ITEM 2.02. Results of Operations and Financial Condition

On August 10, 2017, Perrigo Company plc (the “Company”) released earnings for the second quarter ended July 1, 2017. The press release related to the Company’s earnings is attached as Exhibit 99.1.

The Company provides non-GAAP financial measures as additional information that it believes is useful to investors and analysts in evaluating the performance of the Company's ongoing operating trends, facilitating comparability between periods and companies in similar industries and assessing the Company's prospects for future performance. These non-GAAP financial measures exclude items, such as impairment charges, amortization expense related primarily to acquired intangible assets, restructuring charges, and acquisition and integration-related charges, as well as the related tax effects of these items that by their nature affect comparability of operational performance or obscure underlying business operational trends. The non-GAAP measures the Company provides are consistent with how management analyzes and assesses the operating performance of the Company, and disclosing them provides investor insight into management’s view of the business. Management uses these adjusted financial measures for planning and forecasting in future periods, and evaluating segment and overall operating performance. In addition, management uses certain of the profit measures as factors in determining compensation.

Non-GAAP measures related to profit measurements, which include adjusted gross profit, adjusted operating income, adjusted net income, and adjusted diluted earnings per share, are useful to investors as they provide them with supplemental information to enhance their understanding of the Company’s underlying business performance and trends, and enhance the ability of investors and analysts to compare the Company’s period-to-period financial results. Management believes that adjusted gross margin and adjusted operating margin are useful to investors, in addition to the reasons discussed above, by allowing them to more easily compare and analyze trends in the Company’s peer business group and assisting them in comparing the Company’s overall performance to that of its competitors. The Company discloses adjusted net sales, which excludes operating results attributable to exited or held-for-sale businesses, in order to provide information about sales of the Company’s continuing business. In addition, the Company discloses net sales growth and adjusted net sales growth on a constant currency basis to provide information about sales of the Company’s continuing business excluding the exogenous impact of foreign exchange. The Company believes these supplemental financial measures provide investors with consistency in financial reporting, enabling meaningful comparisons of past, present and future underlying operating results, and also facilitate comparison of the Company’s operating performance to the operating performance of its competitors.

Reported results for the periods below were adjusted for the following items:

Three Months Ended July 1, 2017 Results

- ✶ Loss on early debt extinguishment
- ✶ Amortization expense related primarily to acquired intangible assets
