CAL-MAINE FOODS, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 2, 2017

(unaudited)

1. Presentation of Interim Information

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair statement of the results for the interim periods presented have been included. The preparation of condensed consolidated financial statements requires us to make estimates and assumptions. These estimates and assumptions affected reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions. Operating results for the thirteen weeks ended September 2, 2017 are not necessarily indicative of the results that may be expected for the year ending June 2, 2018.

The condensed consolidated balance sheet at June 3, 2017 was derived from the audited consolidated financial statements at that date. It does not include all of the information and footnotes required by GAAP for complete financial statements.

For further information, refer to the consolidated financial statements and footnotes thereto included in Cal-Maine Foods, Inc.'s annual report on Form 10-K for the fiscal year ended June 3, 2017. References to “we,” “us,” “our,” or the “Company” refer to Cal-Maine Foods, Inc.

2. Stock Based Compensation

Total stock based compensation expense for the thirteen weeks ended September 2, 2017 and August 27, 2016 was \$859,000 and \$848,000, respectively.

Unrecognized compensation expense as a result of non-vested shares of the 2012 Omnibus Long-Term Incentive Plan at September 2, 2017 was \$4.9 million and will be recorded over a weighted average period of 1.9 years. Refer to Note 10 of our June 3, 2017 audited financial statements for further information on our stock compensation plans.

At September 2, 2017, there were 243,150 restricted shares outstanding, with a weighted average grant date fair value of \$42.76 per share. The Company’s restricted share activity for the thirteen weeks ended September 2, 2017 follows:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding, June 3, 2017	247,735	\$ 42.76
Granted	—	—
Vested	(1,750)	42.10
Forfeited	(2,835)	42.94
Outstanding, September 2, 2017	243,150	\$ 42.76

3. Inventories

Inventories consisted of the following (in thousands):

6

Index

	September 2, 2017	June 3, 2017
Flocks	\$ 97,108	\$98,059
Eggs and egg products	14,697	14,911
Feed and supplies	47,421	47,722
	\$ 159,226	\$ 160,692

We grow and maintain flocks of layers (mature female chickens), pullets (female chickens, under 18 weeks of age), and breeders (male and female chickens used to produce fertile eggs to hatch for egg production flocks). Our total flock at September 2, 2017, consisted of approximately 9.1 million pullets and breeders and 36.7 million layers.

4. Contingencies

Financial Instruments

The Company maintained standby letters of credit (“LOC”) totaling \$4.2 million at September 2, 2017. The LOCs are collateralized with cash which is included in the line item “Other assets” in the Condensed Consolidated Balance Sheets.

The outstanding LOCs are for the benefit of certain insurance companies, and are not recorded as a liability on the consolidated balance sheets.

Legal Contingencies

The Company is a defendant in certain legal actions, and intends to vigorously defend its position in these actions. If the Company’s assessment of a contingency indicates it is probable a material loss has been incurred and the amount of the liability can be reasonably estimated, the estimated liability is accrued in the Company’s financial statements. If the assessment indicates a potential material loss contingency is not probable, but is reasonably possible, or probable but cannot be reasonably estimated, then the nature of the contingent liability, together with an estimate of the possible loss or range of possible loss will be disclosed, or a statement will be made that such an estimate cannot be made.

These legal actions are discussed in detail at Part II, Item 1, of this report.

Index

5. Net Loss per Common Share

Basic net loss per share was calculated by dividing net loss by the weighted-average number of common shares outstanding during the period. Diluted net loss per share was calculated by dividing net loss by the weighted-average number of common shares outstanding during the period plus the dilutive effects of options and restricted stock. Due to the net loss in the thirteen weeks ended September 2, 2017 and August 27, 2016, restricted shares in the amount of 112,353 and 140,551, respectively, were excluded from the calculation of diluted net loss per share because their inclusion would have been antidilutive. The computations of basic and diluted net loss per share attributable to the Company are as follows (in thousands, except per share data):

	13 Weeks Ended	
	September 2, 2017	August 27, 2016
Net loss attributable to Cal-Maine Foods, Inc.	\$(15,993)	\$(30,936)
Basic weighted-average common shares	48,330	48,249
Effect of dilutive securities:		
Restricted shares	—	—
Dilutive potential common shares	48,330	48,249
Net loss per common share attributable to Cal-Maine Foods, Inc.:		
Basic	\$(0.33)	\$(0.64)
Diluted	\$(0.33)	\$(0.64)

6. Accrued Dividends Payable and Dividends per Common Share

We make an accrual of dividends payable at the end of each quarter according to the Company's dividend policy adopted by its Board of Directors. The Company pays a dividend to shareholders of its Common Stock and Class A Common Stock on a quarterly basis for each quarter for which the Company reports net income attributable to Cal-Maine Foods, Inc. computed in accordance with generally accepted accounting principles in an amount equal to one-third (1/3) of such quarterly income. Dividends are paid to shareholders of record as of the 60th day following the last day of such quarter, except for the fourth fiscal quarter. For the fourth quarter, the Company pays dividends to shareholders of record on the 65th day after the quarter end. Dividends are payable on the 15th day following the record date. Following a quarter for which the Company does not report net income attributable to Cal-Maine Foods, Inc., the Company will not pay a dividend for a subsequent profitable quarter until the Company is profitable on a cumulative basis computed from the date of the last quarter for which a dividend was paid. Therefore, the Company did not pay a dividend with respect to the fourth quarter of fiscal 2016, or any quarter of fiscal 2017, and will not pay a dividend for the first quarter of fiscal 2018. At September 2, 2017, cumulative losses that must be recovered prior to paying a dividend were \$90.6 million. When applicable, the amount of the accrual appears on the Condensed Consolidated Balance Sheets as "Accrued dividends payable."

7. Fair Value Measurements

The Company is required to categorize both financial and nonfinancial assets and liabilities based on the following fair value hierarchy. The fair value of an asset is the price at which the asset could be sold in an orderly transaction between unrelated, knowledgeable, and willing parties able to engage in the transaction. A liability's fair value is defined as the amount that would be paid to transfer the liability to a new obligor in a transaction between such parties, not the amount that would be paid to settle the liability with the creditor.

Level 1 - Quoted prices in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly

8

Index

Level 3 - Unobservable inputs for the asset or liability that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

The disclosures of fair value of certain financial assets and liabilities that are recorded at cost are as follows:

Cash and cash equivalents: The carrying amount approximates fair value due to the short maturity of these instruments.

Long-term debt: The carrying value of the Company's long-term debt is at its stated value. We have not elected to carry our long-term debt at fair value. Fair values for debt are based on quoted market prices or published forward interest rate curves, which are level 2 inputs. The fair value and carrying value of the Company's borrowings under its long-term debt were as follows (in thousands):

	September 2, 2017		June 3, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
5.4% – 6.2% Notes payable	\$8,125	\$8,161	\$9,250	\$9,295
Long-term leases	1,606	1,445	1,689	1,520
	\$9,731	\$9,606	\$10,939	\$10,815

Assets and Liabilities Measured at Fair Value on a Recurring Basis

In accordance with the fair value hierarchy described above, the following table shows the fair value of financial assets and liabilities measured at fair value on a recurring basis as of September 2, 2017 and June 3, 2017 (in thousands):

September 2, 2017	Level 1	Level 2	Level 3	Total
				Balance
Assets				
US government and agency obligations	—	\$20,872	—	\$20,872
Municipal bonds	—	29,100	—	29,100
Corporate bonds	—	53,976	—	53,976
Asset backed securities	—	3,080	—	3,080
Mutual funds	2,509	—	—	2,509
Total assets measured at fair value	\$2,509	\$107,028	—	\$109,537

June 3, 2017	Level 1	Level 2	Level 3	Total
				Balance
Assets				
US government and agency obligations	\$—	\$20,216	\$—	—\$20,216
Municipal bonds	—	36,873	—	36,873
Corporate bonds	—	75,790	—	75,790
Asset backed securities	—	5,583	—	5,583
Mutual funds	2,459	—	—	2,459
Total assets measured at fair value	\$2,459	\$138,462	\$—	—\$140,921

Investment securities – available-for-sale, classified as level 2, consist of U.S. government and agency obligations, taxable and tax exempt municipal bonds, zero coupon municipal bonds, foreign government obligations, asset backed securities and corporate bonds with maturities of three months or longer when purchased. We classify these securities

as current, because amounts invested are available for current operations. Observable inputs for these securities are yields, credit risks, default rates, and volatility.

8. Investment Securities

The following represents the Company's investment securities as of September 2, 2017 and June 3, 2017 (in thousands):

9

Index

September 2, 2017	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
US government and agency obligations	\$ 20,906	\$ —	\$ 34	\$20,872

Mutual funds	\$ 1,717	\$ 792	\$ —	\$2,509
Total noncurrent investment securities	\$ 1,717	\$ 792	\$ —	\$2,509
June 3, 2017	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
US government and agency obligations	\$ 20,259	\$ —	\$ 43	\$20,216
Municipal bonds	36,839	34	—	36,873
Corporate bonds	75,769	21	—	75,790
Asset backed securities	5,583	—	—	5,583
Total current investment securities	\$ 138,450	\$ 55	\$ 43	\$ 138,462
Mutual funds	\$ 1,706	\$ 753	\$ —	\$2,459
Total noncurrent investment securities	\$ 1,706	\$ 753	\$ —	\$2,459

Proceeds from sales of available-for-sale securities were \$34.1 million and \$92.8 million during the thirteen weeks ended September 2, 2017 and August 27, 2016, respectively. Gross realized gains during the thirteen weeks ended September 2, 2017 and August 27, 2016 were \$16,000 and \$231,000, respectively. Gross realized losses during the thirteen weeks ended September 2, 2017 and August 27, 2016 were zero and \$6,000, respectively. For purposes of determining gross realized gains and losses, the cost of securities sold is based on the specific identification method.

Unrealized holding gains and (losses), net of taxes, for the thirteen weeks ended September 2, 2017 and August 27, 2016 were as follows (in thousands):

	13 Weeks Ended	
	September 2, 2017	August 27, 2016
Current investments	\$8	\$ 271
Noncurrent investments	24	40
Total unrealized holding gains	\$32	\$ 311

Actual maturities may differ from contractual maturities because some borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Contractual maturities at September 2, 2017, are as follows (in thousands):

	Estimated Fair Value
Within one year	\$73,204
1-5 years	33,824
Total	\$ 107,028

Index

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report contains numerous forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934 (the "Exchange Act") relating to our shell egg business, including estimated production data, expected operating schedules, projected construction costs, and other operating data, including anticipated results of operations and financial condition. Such forward-looking statements are identified by the use of words such as "believes," "intends," "expects," "hopes," "may," "should," "plans," "pro," "contemplates," "anticipates," or similar words. Actual production, operating schedules, capital costs, results of operations, and other projections and estimates could differ materially from those projected in the forward-looking statements. The forward-looking statements are based on management's current intent, belief, expectations, estimates, and projections regarding the Company and its industry. These statements are not guarantees of future performance and involve risks, uncertainties, assumptions, and other factors that are difficult to predict and may be beyond our control. The factors that could cause actual results to differ materially from those projected in the forward-looking statements include, among others, (i) the risk factors set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended June 3, 2017, as updated by our subsequent Quarterly Reports on Form 10-Q, (ii) the risks and hazards inherent in the shell egg business (including disease, pests, weather conditions, and potential for product recall), (iii) changes in the demand for and market prices of shell eggs and feed costs, (iv) our ability to predict and meet demand for cage-free and other specialty eggs, (v) risks, changes, or obligations that could result from our future acquisition of new flocks or businesses and risks or changes that may cause conditions to completing a pending acquisition not to be met, and (vi) adverse results in pending litigation matters. Readers are cautioned not to place undue reliance on forward-looking statements because, while we believe the assumptions on which the forward-looking statements are based are reasonable, there can be no assurance that these forward-looking statements will prove to be accurate. Further, forward-looking statements included herein are only made as of the respective dates thereof, or if no date is stated, as of the date hereof. Except as otherwise required by law, we disclaim any intent

or obligation to update publicly these forward-looking statements, whether because of new information, future events, or otherwise.

OVERVIEW

Cal-Maine Foods, Inc. (“we,” “us,” “our,” or the “Company”) is primarily engaged in the production, grading, packaging, marketing, and distribution of fresh shell eggs. Our fiscal year end is the Saturday closest to May 31.

Index

Our operations are fully integrated. At our facilities we hatch chicks, grow and maintain flocks of pullets (young female chickens, under 18 weeks of age), layers (mature female chickens) and breeders (male and female birds used to produce fertile eggs to hatch for egg production flocks), manufacture feed, and produce, process, and distribute shell eggs. We are the largest producer and marketer of shell eggs in the United States ("U.S."). We market the majority of our shell eggs in the southwestern, southeastern, mid-western, and mid-Atlantic regions of the U.S. We market shell eggs through an extensive distribution network to a diverse group of customers, including national and regional grocery store chains, club stores, foodservice distributors, and egg product consumers.

The Company has one operating segment, which is the production, grading, packaging, marketing and distribution of shell eggs. The majority of our customers rely on us to provide most of their shell egg needs, including specialty and non-specialty eggs. Specialty eggs represent a broad range of products. We classify nutritionally enhanced, cage free, organic and brown eggs as specialty products for accounting and reporting purposes. We classify all other shell eggs as non-specialty products. While we report separate sales information for these types of eggs, there are a number of cost factors which are not specifically available for non-specialty or specialty eggs due to the nature of egg production. We manage our operations and allocate resources to these types of eggs on a consolidated basis based on the demands of our customers.

Our operating results are directly tied to egg prices, which are highly volatile and subject to wide fluctuations, and are outside of our control. For example, the annual average Urner-Barry Southeastern Regional Large Egg Market Price per dozen eggs, for our fiscal years 2005-2017 ranged from a low of \$0.72 in fiscal year 2005 to a high of \$2.97 in fiscal year 2016. The shell egg industry has traditionally been subject to periods of high profitability followed by periods of significant loss. In the past, during periods of high profitability, shell egg producers tended to increase the number of layers in production with a resulting increase in the supply of shell eggs, which generally caused a drop in shell egg prices until supply and demand returned to balance. As a result, our financial results from year to year may vary significantly. Shorter term, retail sales of shell eggs historically have been greatest during the fall and winter months and lowest during the summer months. Prices for shell eggs fluctuate in response to seasonal factors and a natural increase in shell egg production in the spring and early summer. Shell egg prices tend to increase with the start of the school year and are highest prior to holiday periods, particularly Thanksgiving, Christmas, and Easter. Consequently, we generally experience lower sales and net income in our first and fourth fiscal quarters ending in August and May, respectively. Because of the seasonal and quarterly fluctuations, comparisons of our sales and operating results between different quarters within a single fiscal year are not necessarily meaningful comparisons.

In 2015, our industry experienced a significant avian influenza ("AI") outbreak, primarily in the upper Midwestern U.S. There were no positive tests for AI at any of our locations. Based on several published industry estimates, we believe approximately 12% of the national flock of laying hens was affected. During April through June 2015, the affected laying hens were either destroyed by the disease or euthanized. The USDA data showed the supply of laying hens decreased substantially. Since that time, hen numbers began to recover and eventually exceed pre-AI levels by late 2016. In February 2017, the USDA issued revised data that showed the size of the laying hen flock for calendar years 2015 and 2016 was meaningfully higher in both years than previously reported.

Egg prices increased significantly during the summer and fall of 2015. The average Urner-Barry Thursday price for the large market (i.e. conventional shell eggs) in the southeastern region for the months of June through November 2015 was \$2.32 per dozen, with a peak of \$2.97 in August. Subsequent to November 2015, shell egg prices declined. The Urner Barry price index ("UB index") hit a decade-low level in both our fiscal 2016 fourth quarter and fiscal 2017 second quarter. During our fiscal 2018 first quarter, the UB index averaged \$0.94 per dozen, a 25.3% increase over the prior year period average of \$0.75 per dozen. In spite of this increase, the index remained below historical levels. Subsequent to the end of our fiscal 2018 first quarter it has continued to increase.

According to Nielsen data, retail customer demand for shell eggs has remained strong. The USDA reports that egg export demand has improved since the beginning of fiscal 2017; however, it has not fully recovered to levels prior to the AI outbreak. Additionally, the industry experienced reduced demand for egg products, as many commercial customers reformulated their products to use fewer eggs when prices spiked and have been slow to resume previous egg usage. Together with the increased supply of hens, these factors created an oversupply of eggs, with pressure on

Index

market prices. Recently, increasing exports have returned to historical levels, although they remain below the peaks seen just prior to the AI outbreak, and USDA reports show the chick hatch has been trending down, suggesting there may be a moderation in the size of the laying hen flock over time. Accordingly, our net average selling price for shell eggs for the first quarter of fiscal 2018 was \$1.017 compared with \$0.952 for the corresponding period of fiscal 2017. While overall market conditions are more favorable than a year ago, we do not expect any sustained improvement in pricing until we have a more stable supply and demand balance.

We are one of the largest producers and marketers of value-added specialty shell eggs in the U.S. They have been a significant and growing portion of the market in recent years. During our fiscal 2016 a number of large restaurant chains, food service companies and grocery chains, including our largest customers, announced goals to transition to a cage-free egg supply chain by specified future dates. We are working with our customers to achieve smooth progress in meeting their goals. Our focus for future expansion at our farms will be environments that are cage-free or with equipment that can easily be converted to cage-free, based on a timeline to meet our customer's needs.

For the thirteen weeks ended September 2, 2017, we produced approximately 86% of the total number of shell eggs we sold compared to 82% in the comparable prior year period. We produced 7.4% more dozens during the thirteen weeks ended September 2, 2017 than in the corresponding period of last year. For the thirteen weeks ended September 2, 2017, approximately 9% of such production was provided by contract producers who utilize their facilities in the production of shell eggs by layers owned by us compared to 5% for the same period of last year. This increase represents contract production acquired with our fiscal 2017 acquisitions. We own the shell eggs produced under these arrangements.

Our cost of production is materially affected by feed costs. Feed costs averaged approximately 55% of our total farm egg production cost for the thirteen weeks ended September 2, 2017, compared to 60% for the same period of fiscal 2017. Changes in market prices for corn and soybean meal, the primary ingredients in the feed we use, result in changes in our cost of goods sold. The cost of feed ingredients, which are commodities, are subject to factors over which we have little or no control such as volatile price changes caused by weather, size of harvest, transportation and storage costs, demand, and the agricultural and energy policies of the U.S. and foreign governments. We anticipate significant corn and soybean crops in 2017, which combined with the large 2016 crops should provide an adequate supply of our primary feed ingredients in fiscal 2018.

While the recent hurricanes that hit the United States following the end of our first fiscal quarter of 2018 caused disruptions to our operations in Texas, Florida and Georgia, we did not sustain any material loss of egg production.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, certain items from our Condensed Consolidated Statements of Operations expressed as a percentage of net sales.

	13 Weeks Ended	
	September 2, 2017	August 27, 2016
Net sales	100.0 %	100.0 %
Cost of sales	93.4 %	104.0 %
Gross profit (loss)	6.6 %	(4.0)%
Selling, general, and administrative expense	15.9 %	16.8 %
Operating loss	(9.3)%	(20.8)%
Other income (expense), net	(0.1)%	0.8 %
Loss before income taxes and noncontrolling interest	(9.4)%	(20.0)%

Edgar Filing: CAL-MAINE FOODS INC - Form 10-Q

Income tax benefit	3.2	%	7.3	%
Net loss before noncontrolling interest	(12.6)	%	(27.3)	%
Less: Net loss attributable to noncontrolling interest	(0.1)	%	—	%
Net loss attributable to Cal-Maine Foods, Inc.	(12.5)	%	(27.3)	%

NET SALES

Net sales for the thirteen weeks ended September 2, 2017 were \$262.8 million, an increase of \$23.0 million, or 9.6%, compared to net sales of \$239.8 million for the thirteen weeks ended August 27, 2016. The increase was primarily due to an increase in egg selling prices and dozens sold.

Shell egg sales made up approximately 98% of net sales for the thirteen weeks ended September 2, 2017. Dozens sold for the first quarter of fiscal year 2018 were 249.4 million, a 2.9% increase from 242.3 million dozen for the first quarter of fiscal 2017. The volume increase accounted for a \$6.8 million increase in net sales.

Net average selling price per dozen of shell eggs was \$1.017 for the thirteen weeks ended September 2, 2017, compared to \$0.952 for the thirteen weeks ended August 27, 2016. The 6.8% increase in average selling price accounted for a \$15.7 million increase in net sales. Net average selling price is the blended price for all sizes and grades of shell eggs, including non-graded shell egg sales, breaking stock, and undergrades.

Egg products and other revenues accounted for 2% of net sales for the thirteen weeks ended September 2, 2017. These revenues were \$6.1 million for the thirteen weeks ended September 2, 2017, compared to \$5.6 million for the thirteen weeks ended August 27, 2016.

The table below represents an analysis of our non-specialty and specialty shell egg sales (in thousands, except percentage data). Following the table is a discussion of the information presented in the table.

	13 Weeks Ended			
	September 2, 2017		August 27, 2016	
Total net sales	\$262,845		\$239,845	
Non-specialty shell egg	\$146,048	56.9 %	\$113,504	48.4 %
Specialty shell egg	101,697	39.6 %	109,312	46.7 %
Co-pack specialty shell egg	6,080	2.4 %	8,455	3.6 %
Other	2,884	1.1 %	2,997	1.3 %
Net shell egg sales	\$256,709	100.0%	\$234,268	100.0%
Net shell egg sales as a percent of total net sales	98	%	98	%
Dozens sold:				
Non-specialty shell egg	192,168	77.0 %	182,730	75.4 %
Specialty shell egg	54,138	21.7 %	55,399	22.9 %
Co-pack specialty shell egg	3,158	1.3 %	4,196	1.7 %
Total dozens sold	249,464	100.0%	242,325	100.0%
Net average selling price per dozen:				
Non-specialty shell eggs	\$0.760		\$0.621	
Specialty shell eggs	\$1.878		\$1.973	
All shell eggs	\$1.017		\$0.952	

Non-specialty shell eggs include all shell egg sales not specifically identified as specialty or co-pack specialty shell egg sales. This market is characterized generally by an inelasticity of demand. Small increases or decreases in production or demand can have a large positive or adverse effect on selling prices. For the thirteen weeks ended September 2, 2017, non-specialty shell egg dozens sold increased approximately 5.2%, and the average selling price

increased 22.4% to \$0.760 from \$0.621 for the same period of fiscal 2017.

Index

Specialty shell eggs, which include nutritionally enhanced, cage-free, organic, and brown eggs continue to make up a large portion of our total shell egg revenue and dozens sold. Specialty egg retail prices are less cyclical than non-specialty shell egg prices and are generally higher due to consumer willingness to pay for the perceived benefits from these products. This was particularly evident in recent quarters prior to our first quarter of fiscal 2018 as non-specialty egg prices declined more than specialty egg prices. However, as non-specialty egg prices declined, we experienced some margin and volume pressures on specialty egg sales. For the thirteen weeks ended September 2, 2017, specialty shell egg dozens sold decreased 2.3%, and the average selling price decreased 4.8% to \$1.878 from \$1.973 for the same period of fiscal 2017.

Co-pack specialty shell eggs are sold primarily through co-pack arrangements, a common practice in the industry whereby production and processing of certain products is outsourced to another producer. Shell egg sales in this category represented 1.3% and 1.7% dozen for the quarters ended September 2, 2017 and August 27, 2016. Co-pack specialty shell eggs sold during the thirteen weeks ended September 2, 2017 and August 27, 2016, were 3.2 million and 4.2 million, respectively.

The shell egg sales classified as “Other” represent sales of hard cooked eggs, hatching eggs, and other miscellaneous products, which are included with our shell egg operations.

Egg products are shell eggs that are broken and sold in liquid, frozen, or dried form. Our egg products are sold through our consolidated subsidiaries American Egg Products, LLC (“AEP”) and Texas Egg Products, LLC (“TEP”). For the thirteen weeks ended September 2, 2017, egg product sales were \$6.1 million, an increase of \$559,000, or 10.0%, compared to \$5.6 million for the same period of 2017. Pounds sold for the thirteen weeks ended September 2, 2017 were 15.5 million, an increase of 1.1 million, or 7.9%, compared to 14.4 million for the same period of fiscal 2017.

COST OF SALES

Cost of sales consists of costs directly related to production, processing and packing of shell eggs, purchases of shell eggs from outside producers, processing and packing of liquid and frozen egg products, and other non-egg costs. Farm production costs are those costs incurred at the egg production facility, including feed, facility, hen amortization, and other related farm production costs.

Index

The following table presents the key variables affecting cost of sales (in thousands, except cost per dozen data).

	13 Weeks Ended		
	September 2, 2017	August 27, 2016	Percent Change
Cost of Sales:			
Farm production	144,289	142,871	1.0 %
Processing, packaging, and warehouse	51,111	46,302	10.4 %
Egg purchases and other (including change in inventory)	43,780	55,593	(21.2)%
Total shell eggs	239,180	244,766	(2.3)%
Egg products	6,044	4,299	40.6 %
Other	285	349	(18.3)%
Total	\$245,509	\$249,414	(1.6)%
Farm production cost (per dozen produced)			
Feed	\$0.375	\$0.431	(13.0)%
Other	\$0.306	\$0.294	4.1 %
Total	\$0.681	\$0.725	(6.1)%
Outside egg purchases (average cost per dozen)	\$0.98	\$1.03	(4.9)%
Dozen produced	213,570	198,782	7.4 %
Dozen sold	249,464	242,325	2.9 %

Cost of sales for the first quarter of fiscal 2018 was \$245.5 million, a decrease of \$3.9 million, or 1.6%, from \$249.4 million for the same period of fiscal 2017. The decrease was primarily driven by a decrease in the volume and cost of egg purchases during the period. Dozens produced increased 7.4% resulting in higher farm production, processing, and packaging costs. These increases were offset by a lower feed cost per dozen produced. Feed cost per dozen for the thirteen weeks ended September 2, 2017, was \$0.375, compared to \$0.431 per dozen for the comparable period of fiscal 2017, a decrease of 13.0%, resulting in a decrease in cost of sales of \$12.0 million for the comparable period. Other farm production cost increased 4.1% to \$0.306 for the thirteen weeks ended September 2, 2017, compared to \$0.294 for the same period of last year primarily due to increased layer hen amortization expense and facility costs related to capital improvement and conversion projects.

Gross profit increased to \$17.3 million for the thirteen weeks ended September 2, 2017, compared to a loss of \$9.6 million for the first quarter of fiscal 2017 primarily due to the increased average customer selling prices and sales volumes.

Index

SELLING, GENERAL, AND ADMINISTRATIVE EXPENSES

Selling, general, and administrative expenses include costs of marketing, distribution, accounting, and corporate overhead. The following table presents an analysis of our selling, general, and administrative expenses (in thousands).

	13 Weeks Ended				Change	%
	Actual	Less: Acquisitions*	Net			
	September 2, 2017	September 2, 2017	September 2, 2017	August 27, 2016	\$	%
Specialty egg expense	\$ 11,734	\$ 337	\$ 11,397	\$ 13,057	\$(1,660)	(12.7)%
Delivery expense	13,124	1,016	12,108	12,560	(452)	(3.6)%
Payroll and overhead	9,496	724	8,772	8,438	334	4.0%
Stock compensation expense	859	—	859	848	11	1.3%
Other expenses	6,497	1,273	5,224	5,353	(129)	(2.4)%
Total	\$ 41,710	\$ 3,350	\$ 38,360	\$ 40,256	\$(1,896)	(4.7)%

*Represents amounts in the first quarter of fiscal 2018 related to our fiscal 2017 acquisitions, Foodonics International, Inc, and Happy Hen Egg Farms, Inc., which were completed after the first quarter of fiscal 2017.

For the thirteen weeks ended September 2, 2017, selling, general, and administrative expenses was \$41.7 million, an increase of \$1.4 million, or 3.5%, compared to \$40.3 million for the thirteen weeks ended August 27, 2016. The impact of the fiscal 2017 acquisitions, which were completed after the first quarter of fiscal 2017, was a \$3.4 million increase to SG&A in the first quarter of 2018.

Excluding the impact of these acquisitions, specialty egg expense decreased \$1.7 million, or 12.7%, compared to the same period of last year. Specialty egg expense typically fluctuates with specialty egg dozens sold, which decreased 2.3% for the thirteen weeks ended September 2, 2017 compared to the same period of last year. Advertising expense, which is a component of specialty egg expense, for the thirteen weeks ended September 2, 2017 decreased 19.5% from the same period of fiscal 2017. Payroll and overhead increased \$334,000, or 4.0%, compared to the same period of fiscal 2017 primarily due to 2017 bonus accruals being adjusted to actual payments which were made in the first quarter of fiscal 2018. Delivery expense decreased \$452,000 or 3.6%, compared to the same period of last year primarily due to a decrease in contract trucking cost.

LOSS ON DISPOSAL OF FIXED ASSETS

In the first quarter of fiscal 2017 we recorded a \$525,000 loss on disposal of fixed assets due to a roof replacement at one of our Texas locations.

OPERATING INCOME (LOSS)

As a result of the above, operating loss was \$24.4 million for the first quarter of fiscal 2018, compared to \$50.4 million for the fiscal 2017 first quarter.

OTHER INCOME (EXPENSE)

Total other income (expense) consists of items not directly charged to, or related to, operations such as interest income and expense, royalty income, equity in income or loss of affiliates, and patronage income, among other items.

For the first quarter of fiscal 2018, we recorded \$504,000 of interest income compared to \$1.1 million for the same period of last year. The decrease resulted from lower average invested balances. The Company recorded interest expense of \$146,000 and \$387,000, of which \$116,000 and \$379,000 was capitalized, in the first quarters of fiscal 2018 and 2017, respectively. These changes resulted from the Company reducing outstanding debt and capitalizing less interest due to a reduction in major expansion and renovation projects.

Index

Equity in income (loss) of affiliates for the first quarter of fiscal 2018 was a loss of \$353,000 compared to income of \$191,000 for the same period of last year. The decrease of \$544,000 is primarily due to losses at our Red River joint venture.

Other, net for the thirteen weeks ended September 2, 2017, was a loss of \$538,000 compared with income of \$122,000 for the same period of last year, a decrease of \$660,000, primarily driven by a reduction in miscellaneous income and an increase in uninsured losses in the current period.

INCOME TAXES

Pre-tax loss, less net loss attributable to noncontrolling interest, was \$24.3 million for the thirteen weeks ended September 2, 2017, compared to pre-tax loss, less net loss attributable to noncontrolling interest, of \$48.5 million for last year's comparable period. For the current thirteen-week period, an income tax benefit of \$8.3 million was recorded, with an effective tax rate of 34.3%, compared to an income tax benefit of \$17.6 million, with an effective rate of 36.2%, for last year's comparable period. The effective rate decrease for the thirteen weeks ended September 2, 2017 was primarily related to the projected carryback of net operating losses, as the carryback reduced prior year taxable income and the benefit of domestic manufacturers deductions, a portion of which was therefore reversed in the current period.

At September 2, 2017, the Company had recorded an income tax receivable of \$56.0 million, an increase of \$3.3 million, compared to \$52.7 million at June 3, 2017. This increase is due to income tax benefit recorded on net losses for fiscal year 2018.

Our effective rate differs from the federal statutory income tax rate of 35% due to state income taxes and certain items included in income for financial reporting purposes that are not included in taxable income for income tax purposes, including tax exempt interest income, and net income or loss attributable to noncontrolling interest.

NET LOSS ATTRIBUTABLE TO NONCONTROLLING INTEREST

For the thirteen weeks ended September 2, 2017, net loss attributable to noncontrolling interest was \$184,000 compared to \$44,000 for the same period of fiscal 2017. This is attributable to losses from the Company's consolidated joint ventures.

NET LOSS ATTRIBUTABLE TO CAL-MAINE FOODS, INC.

Net loss for the thirteen weeks ended September 2, 2017 was \$16.0 million, or \$0.33 per basic and diluted share, compared \$30.9 million, or \$0.64 per basic and diluted share for the same period last year.

CAPITAL RESOURCES AND LIQUIDITY

Our working capital at September 2, 2017 was \$357.5 million, compared to \$371.5 million at June 3, 2017. The calculation of working capital is defined as current assets less current liabilities. Our current ratio was 6.67 at September 2, 2017, compared with 6.74 at June 3, 2017. The decrease was due primarily to net losses in recent periods, along with the use of cash for capital expenditures. We have \$4.2 million in outstanding standby letters of credit, which are collateralized by cash for the benefit of certain insurance companies. Our long-term debt at September 2, 2017, including current maturities, amounted to \$9.7 million, compared to \$10.9 million at June 3, 2017. Refer to Note 9 of our June 3, 2017 audited financial statements for further information on our long-term debt.

For the thirteen weeks ended September 2, 2017, \$21.5 million in net cash was used in operating activities, a decrease of \$24.0 million, compared to net cash used in operations of \$45.4 million for the comparable period in fiscal 2017. Improved gross profit margins primarily resulting from higher sales volumes and egg selling prices contributed to our increase in cash flow from operations.

Index

For the thirteen weeks ended September 2, 2017, approximately \$34.1 million was provided from the sale of short-term investments and we used \$2.7 million for purchases of short-term investments, compared to \$92.8 million in sales and \$9.0 million in purchases in the first quarter of fiscal 2017. We invested an additional \$1.2 million in our Red River Valley Egg Farm, LLC joint venture (“Red River JV”) compared to \$5.5 million for the first quarter of fiscal 2017. Approximately \$6.5 million was used to purchase property, plant and equipment, including construction projects discussed in detail below, compared to \$23.9 million in the thirteen weeks ended August 27, 2016. This decrease represents the completion of several major expansion projects over the past twelve months. As of September 2, 2017, cash increased approximately \$1.4 million since June 3, 2017 compared to an increase of \$8.6 million during the same period of fiscal 2017.

To accommodate the previously discussed increase in customers committing to cage-free eggs over time, we expect that future expansions at our farms will be with environments that are cage-free or with equipment that can easily be converted to cage-free, based on a timeline that meets our customer’s needs. The following table represents material construction projects approved as of September 28, 2017 (in thousands):

Project	Location	Projected Completion	Projected Cost	Incurred as of September 2, 2017	Remaining Projected Cost
Cage-Free Layer Houses	Lake City, FL	September 2017	\$ 8,669	\$ 8,614	\$ 55
Convertible/Cage-Free Layer House with Pullets	South Texas	September 2017	11,641	11,626	15
Convertible/Cage-Free Layer Houses	Green Forest, AR	October 2017	8,991	8,753	238
Cage-Free Layer Houses	South Texas	November 2017	4,063	3,904	159
Convertible/Cage-Free Layer Houses with Pullets	Guthrie, KY	January 2018	13,252	12,194	1,058
			\$ 46,616	\$ 45,091	\$ 1,525

In addition to these projects, the Company expects to continue to fund its 50% share of the Red River JV. As of September 28, 2017, we have contributed \$55.6 million to the joint venture to fund our share of construction, startup costs, and operating losses. We estimate we will make additional contributions of approximately \$7 million to fund our share of the remaining construction costs.

Property, plant, and equipment at certain of our locations is pledged as collateral on our notes payable and senior secured notes. Unless otherwise approved by our lenders, we are required by provisions of our loan agreements to (1) maintain minimum levels of working capital (current ratio of not less than 1.25 to 1) and net worth (minimum of \$90.0 million tangible net worth, plus 45% of cumulative net income since the fiscal year ended May 28, 2005); (2) limit dividends paid in any given quarter to not exceed an amount equal to one third of the previous quarter’s consolidated net income (allowed if no events of default); (3) maintain minimum total funded debt to total capitalization (not to exceed 55%); and (4) maintain various cash-flow coverage ratios (1.25 to 1), among other restrictions. At September 2, 2017, we were in compliance with the financial covenant requirements of all loan agreements. Under certain of the loan agreements, the lenders have the option to require the prepayment of any outstanding borrowings in the event we undergo a change in control, as defined in the applicable loan agreement. Our debt agreements require Fred R. Adams, Jr., our Founder and Chairman Emeritus, or his family, to maintain ownership of Company shares representing not less than 50% of the outstanding voting power of the Company.

We believe our current cash balances, investments, and cash flows from operations will be sufficient to fund our current and projected capital needs for at least the next twelve months.

Index

IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standard Update No. 2014-09, Revenue from Contracts with Customers (ASU 2014-09). The standard provides companies with a single model for use in accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, including industry-specific revenue guidance. The core principle of the model is to recognize revenue when control of the goods or services transfers to the customer in an amount that reflects the consideration that is expected to be received for those goods or services. In August 2015, FASB issued ASU 2015-14 which deferred the effective date of ASU 2014-09 until annual reporting periods beginning after December 15, 2017. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. To date the Company’s assessments efforts include evaluation of certain revenue contracts with customers and the method of retrospective application, either full or modified. We currently expect to utilize the full retrospective transition on date of adoption. Based on the findings to date, the Company does not expect ASU 2014-09 to have a material impact on the results of operations or financial position; however, the Company’s assessment is not complete. The Company plans to complete its review and method of adoption in fiscal 2018.

In February 2016, the FASB issued ASU 2016-02, Leases. The purpose of the standard is to improve transparency and comparability related to the accounting and reporting of leasing arrangements. The guidance will require balance sheet recognition for assets and liabilities associated with rights and obligations created by leases with terms greater than twelve months. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and interim periods within those annual periods. Early adoption is permitted. Based on the findings to date, the Company does not expect ASU 2016-02 to have a material impact on the results of operations or financial position; however, the Company's assessment is not complete.

In January 2017, the FASB issued ASU 2017-04, Simplifying the Test for Goodwill Impairment, which removes step 2 from the goodwill impairment test. As a result, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting units' fair value. The guidance is effective for annual or interim goodwill impairment tests in fiscal years beginning after December 15, 2019, our fiscal 2021. Early adoption is permitted for annual or interim goodwill impairment tests performed on testing dates after January 1, 2017, and the prospective transition method should be applied. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

CRITICAL ACCOUNTING POLICIES

We suggest our Summary of Significant Accounting Policies, as described in Note 1 of the Notes to Consolidated Financial Statements included our Annual Report on Form 10-K for the fiscal year ended June 3, 2017, be read in conjunction with Management’s Discussion and Analysis of Financial Condition and Results of Operations. There have been no changes to critical accounting policies identified in our Annual Report on Form 10-K for the year ended June 3, 2017.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the market risk reported in the Company's Annual Report on Form 10-K for the fiscal year ended June 3, 2017.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation of our disclosure controls and procedures conducted by our Chief Executive Officer and Chief Financial Officer, together with other financial officers, such officers concluded that our disclosure controls and procedures were effective as of September 2, 2017 at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended September 2, 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Refer to the discussion of certain legal proceedings involving the Company and/or its subsidiaries in our Annual Report on Form 10-K for the year ended June 3, 2017, under Part I, Item 3: Legal Proceedings, and Part II Item 8, Notes to Consolidated Financial Statements, Note 12: Contingencies, which discussions are incorporated herein by reference, as well as the following:

Litigation

Refer to the discussion of certain legal proceedings involving the Company and/or its subsidiaries in our Annual Report on Form 10-K for the year ended June 3, 2017, under Part I, Item 3: Legal Proceedings, and Part II Item 8, Notes to Consolidated Financial Statements, Note 12: Contingencies, which discussions are incorporated herein by reference, as well as the following:

Egg Antitrust Litigation

Since September 25, 2008, the Company has been named as one of several defendants in numerous antitrust cases involving the United States shell egg industry. In some of these cases, the named plaintiffs allege that they purchased eggs or egg products directly from a defendant and have sued on behalf of themselves and a putative class of others who claim to be similarly situated. In other cases, the named plaintiffs allege that they purchased shell eggs and egg products directly from one or more of the defendants but sue only for their own alleged damages and not on behalf of a putative class. In the remaining cases, the named plaintiffs are individuals or companies who allege that they purchased shell eggs indirectly from one or more of the defendants - that is, they purchased from retailers that had previously purchased from defendants or other parties - and have sued on behalf of themselves and a putative class of others who claim to be similarly situated.

The Judicial Panel on Multidistrict Litigation consolidated all of the putative class actions (as well as certain other cases in which the Company was not a named defendant) for pretrial proceedings in the United States District Court for the Eastern District of Pennsylvania. The Pennsylvania court organized the putative class actions around two groups (direct purchasers and indirect purchasers) and named interim lead counsel for the named plaintiffs in each group.

Index

The Direct Purchaser Putative Class Action. The direct purchaser putative class cases were consolidated into In re: Processed Egg Products Antitrust Litigation, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. As previously reported, in November 2014, the Court approved the Company's settlement with the direct purchaser plaintiff class and entered final judgment dismissing with prejudice the class members' claims against the Company.

The Indirect Purchaser Putative Class Action. The indirect purchaser putative class cases were consolidated into In re: Processed Egg Products Antitrust Litigation, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. On April 20-21, 2015, the Court held an evidentiary hearing on the indirect purchaser plaintiffs' motion for class certification. On September 18, 2015, the Court denied the indirect purchaser plaintiffs' motion for class certification of 21 separate classes seeking damages under the laws of 21 states, holding that the plaintiffs were not able to prove that their purported method for ascertaining class membership was reliable or administratively feasible, that common questions would predominate, or that their proposed class approach would be manageable in a single trial. In addition to barring any right to pursue a class monetary remedy under state law, the Court also denied indirect purchaser plaintiffs' request for certification of an injunctive-relief class under federal law. However, the court allowed the indirect purchaser plaintiffs to renew their motion for class certification seeking a federal injunction. The plaintiffs filed their renewed motion to certify an injunctive-relief class on October 23, 2015. The Company joined the other defendants in opposing that motion on November 20. The plaintiffs filed their reply memorandum on December 11, 2015, and on March 7, 2017, the Court heard arguments on the renewed motion for injunctive class certification. On June 27, 2017, the Court denied plaintiffs' renewed motion for injunctive class certification. The plaintiffs also filed a petition with the United States Court of Appeals for the Third Circuit, asking the court to hear an immediate appeal of the trial court's denial of the motion to certify 21 state-law damages classes. On December 3, 2015, the Third Circuit entered an order staying its consideration of the plaintiffs' request for an immediate appeal of the damages-class ruling pending the trial court's resolution of the plaintiffs' renewed motion to certify an injunctive-relief class. On July 11, 2017 the plaintiffs filed a petition with the Third Circuit asking the court to hear an immediate appeal of the June 27 order denying plaintiffs' renewed motion for injunctive class certification. On July 21, 2017, the Company joined other defendants in a response filed with the Third Circuit opposing the plaintiffs' latest petition. The Third Circuit has not yet ruled on either petition.

The Non-Class Cases. Six of the cases in which plaintiffs do not seek to certify a class have been consolidated with the putative class actions into In re: Processed Egg Products Antitrust Litigation, No. 2:08-md-02002-GP, in the United States District Court for the Eastern District of Pennsylvania. The court granted with prejudice the defendants' renewed motion to dismiss the non-class plaintiffs' claims for damages arising before September 24, 2004. On July 2, 2015, the Company filed and joined several motions for summary judgment that sought either dismissal of all of the claims in all of these cases or, in the alternative, dismissal of portions of these cases. On July 2, 2015, the non-class plaintiffs filed a motion for summary judgment seeking dismissal of certain affirmative defenses based on statutory immunities from federal antitrust law. The Court heard oral argument on the motions for summary judgment on February 22 and 23, 2016. On September 6, 2016, the Court granted the defendants' motion for summary judgment against the plaintiffs' claims arising from their purchases of egg products, dismissing those claims with prejudice. On September 9, 2016, the Court granted in part the Company's motion for summary judgment on liability, dismissing as a matter of law the plaintiffs' allegations of a side agreement to cease construction of new facilities and ruling that the plaintiffs' allegations against United Egg Producers' (UEP) animal-welfare guidelines must be evaluated at trial under the rule of reason. On September 12, 2016, the Court granted in part the Company's motion for summary judgment on damages, ruling that plaintiffs cannot recover damages arising from purchases of eggs from non-defendants and cannot recover any relief arising from eggs and egg products produced or sold in Arizona after October 1, 2009, the date that Arizona mandated that all eggs sold or produced in that state must be produced in compliance with the 2008 version of the UEP animal-welfare guidelines. On September 13, 2016, the Court granted in part the plaintiffs' motion for summary judgment as to the applicability of the Capper-Volstead defense, ruling that United States Egg Marketers (an industry cooperative of which the Company is a member) may invoke the defense at trial but that UEP (another

industry cooperative of which the Company is a member) cannot. The Capper-Volstead defense is a defense pursuant to the Capper-Volstead Act (the Co-operative Marketing Associations Act), enacted by Congress in 1922, which gives certain associations of farmers certain exemptions from antitrust laws. On October 4, 2016, certain direct action plaintiffs (Kraft Food Global, Inc., General Mills, Inc., Nestle USA, Inc., and The Kellogg Company) filed an appeal to the

Index

United States Court of Appeals for the Third Circuit from the District Court's Order dated September 6, 2016, granting defendants' motion for summary judgment and dismissing with prejudice all claims based on the purchase of egg products. These plaintiffs filed their opening brief on March 7, 2017. The defendants filed their response brief on April 20. These plaintiffs filed their reply brief on May 18. The court of appeals heard oral argument on July 11, 2017, but has not issued a ruling. On November 22, 2016, the non-class plaintiffs filed a motion asking the Court to hold a status conference and asking the court to set the non-class cases for trial in June of 2017. The parties in all of the remaining class and non-class cases submitted several different proposed trial schedules to the court, and a status conference was held on February 9, 2017. On August 11, 2017, the Company and certain other defendants filed a motion to exclude damage calculations by direct action plaintiffs' expert, Dr. Baye. The direct action plaintiffs filed a motion to strike on August 25, 2017, and then filed a memorandum in support thereof on August 28, 2017. On September 8, the Company and the other moving defendants filed a response to the plaintiffs' motion to strike. The court has scheduled a hearing on these latest motions for October 25, 2017.

Allegations in Each Case. In all of the cases described above, the plaintiffs allege that the Company and certain other large domestic egg producers conspired to reduce the domestic supply of eggs in a concerted effort to raise the price of eggs to artificially high levels. In each case, plaintiffs allege that all defendants agreed to reduce the domestic supply of eggs by: (a) agreeing to limit production; (b) manipulating egg exports; and (c) implementing industry-wide animal welfare guidelines that reduced the number of hens and eggs.

The named plaintiffs in the remaining indirect purchaser putative class action seek treble damages under the statutes and common-law of various states and injunctive relief under the Sherman Act on behalf of themselves and all other putative class members in the United States. Although plaintiffs allege a class period starting in October, 2006 and running "through the present," the Court denied the plaintiffs' motion to certify classes seeking damages under the laws of 21 states and denied the plaintiffs' renewed motion to certify an injunctive-relief class, as discussed above.

Five of the original six non-class cases remain pending against the Company. The principal plaintiffs in these cases are: The Kroger Co.; Publix Super Markets, Inc.; SUPERVALU, Inc.; Safeway, Inc.; Albertsons LLC; H.E. Butt Grocery Co.; The Great Atlantic & Pacific Tea Company, Inc.; Walgreen Co.; Hy-Vee, Inc.; and Giant Eagle, Inc. In four of these remaining non-class cases, the plaintiffs seek treble damages and injunctive relief under the Sherman Act. In one of those four cases, the plaintiffs purchased only egg products, and as noted above, the Court dismissed with prejudice all claims arising from the purchase of egg products. On October 4, 2016, the four plaintiffs in that case (Kraft Food Global, Inc., General Mills, Inc., Nestle USA, Inc., and The Kellogg Company) appealed that decision to the United States Court of Appeals for the Third Circuit. In the fifth remaining non-class case, the plaintiff seeks treble damages and injunctive relief under the Sherman Act and the Ohio antitrust act (known as the Valentine Act).

The Pennsylvania court has entered a series of orders related to case management, discovery, class certification, summary judgment, and scheduling. The Court has also denied all four motions that the plaintiffs filed to exclude testimony from certain expert witnesses retained by the defendants. The court's latest Case Management Order (No. 23) was filed on September 20, 2017, and indicated that the non-class plaintiffs' cases would be set for trial later in calendar year 2018.

The Company intends to continue to defend the remaining cases as vigorously as possible based on defenses which the Company believes are meritorious and provable. While management believes that the likelihood of a material adverse outcome in the overall egg antitrust litigation has been significantly reduced as a result of the settlements and rulings described above, there is still a reasonable possibility of a material adverse outcome in the remaining egg antitrust litigation. At the present time, however, it is not possible to estimate the amount of monetary exposure, if any, to the Company because of these cases. Accordingly, adjustments, if any, which might result from the resolution of these remaining legal matters, have not been reflected in the financial statements.

Other Matters

In addition to the above, the Company is involved in various other claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel,

23

Index

is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operations or financial position.

At this time, it is not possible for us to predict the ultimate outcome of the matters set forth above.

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended June 3, 2017.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table is a summary of our first quarter 2018 share repurchases:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Or Plans Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
06/04/17 to 07/01/17	519	\$ 39.60	—	—
07/02/17 to 07/29/17	—	—	—	—
07/30/17 to 09/02/17	—	—	—	—
	519	\$ 39.60	—	—

(1) As permitted under our 2012 Omnibus Long-term Incentive Plan, these shares were withheld by us to satisfy tax withholding obligations for employees in connection with the vesting of common stock.
