SEASPINE HOLDINGS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BUSINESS

Spin-off from Integra

SeaSpine Holdings Corporation ("SeaSpine" or the "Company") was incorporated in Delaware on February 12, 2015. As of June 30, 2015, SeaSpine was a subsidiary of Integra LifeSciences Holdings Corporation ("Integra"). On July 1, 2015, Integra completed the spin-off of its orthobiologics and spinal fusion hardware business into SeaSpine, which was created to be a separate, independent, publicly-traded medical technology company focused on the design, development and commercialization of surgical solutions for the treatment of patients suffering from spinal disorders. Unless the context indicates otherwise, (i) references to "SeaSpine", the "Company", and the "Business", refer to SeaSpine Holdings Corporation and the Company's orthobiologics and spinal fusion hardware business and (ii) references to "Integra" refer to Integra LifeSciences Holdings Corporation and its subsidiaries other than SeaSpine.

The SeaSpine Registration Statement on Form 10 became effective on June 9, 2015, and SeaSpine common stock began "regular-way" trading on the NASDAQ Global Market on July 2, 2015 under the symbol "SPNE."

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company prepared the unaudited interim condensed consolidated financial statements included in this report in accordance with accounting principles generally accepted in the U.S. ("GAAP") for interim financial information and the rules and regulations of the SEC related to quarterly reports on Form 10-Q.

For periods prior to the spin-off, the Company's consolidated financial statements were prepared on a stand-alone basis and derived from Integra's consolidated financial statements and accounting records related to its orthobiologics and spinal fusion hardware business. The Company relied on Integra for a significant portion of its operational and administrative support. The consolidated financial statements for all periods prior to the spin-off included allocations of certain Integra corporate expenses, including information technology resources and support; finance, accounting, and auditing services; real estate and facility management services; human resources activities; certain procurement activities; treasury services, legal advisory services and costs for research and development. These costs were allocated to the Company on the basis of direct usage when identifiable, with the remainder allocated on a pro-rata basis of revenue, standard costs of sales, or other measures.

Integra used a centralized approach to cash management and financing of its operations and substantially all cash generated by the Company through May 4, 2015, the date the Company implemented its own separate enterprise resource planning system, was assumed to be remitted to Integra. Prior to the spin-off, cash management and financing transactions relating to the Company were accounted for through the Integra invested equity account. Accordingly, none of the Integra cash and cash equivalents at the corporate level was assigned to SeaSpine in the consolidated financial statements. Integra's debt and related interest expense were not allocated to SeaSpine for any of the periods presented since SeaSpine was not the legal obligor of the debt and Integra's borrowings were not directly attributable to SeaSpine.

Subsequent to the spin-off, the Company's financial statements are presented on a consolidated basis, as the Company became a separate publicly-traded company on July 1, 2015. The unaudited interim condensed consolidated financial statements do not include all information and disclosures required by GAAP for annual audited financial statements and should be read in conjunction with the Company's consolidated financial statements and notes thereto for the year ended December 31, 2015 included in the Company's Annual Report on Form 10-K filed with the Securities and

Exchange Commission ("SEC"). In the opinion of management, the September 30, 2016 unaudited condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements and include all adjustments (consisting only of normal recurring adjustments) necessary for a fair statement of the financial position, results of operations, cash flows, and statement of equity for periods presented. The results for the three and nine months ended September 30, 2016 are not necessarily indicative of the results expected for the full year. The condensed consolidated balance sheet as of December 31, 2015 was derived from the audited consolidated financial statements for the year ended December 31, 2015.

See Note 4, "Transactions with Integra," for further information regarding the relationships the Company has with Integra.

SEASPINE HOLDINGS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Principles of Consolidation

For periods prior to the spin-off, the consolidated financial statements include certain assets and liabilities that have historically been held at the Integra level but were specifically identifiable or otherwise attributable to the Company. All significant intra-company transactions within Integra's pre-spin off orthobiologics and spinal fusion hardware business have been eliminated. All significant transactions between the Company and other businesses of Integra before the spin-off are included in these condensed consolidated financial statements.

For periods subsequent to the spin-off, the consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued Update No. 2014-09, Revenue from Contracts with Customers (Topic 606). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should: 1) identify the contract(s) with a customer, 2) identify the performance obligations in the contract, 3) determine the transaction price, 4) allocate the transaction price to the performance obligations in the contract, and 5) recognize revenue when (or as) the entity satisfies a performance obligation. In July 2015, the FASB deferred for one year the effective date of the new revenue standard, but early adoption is permitted. In April and May 2016, the FASB issued ASU No. 2016-10 and ASU No. 2016-12, Revenue from Contracts with Customers (Topic 606), which do not change the core principle of the guidance in Topic 606 stated in Update No. 2014-09. Rather, they clarify identifying performance obligations and the licensing implementation guidance, while retaining the related principles for those areas, and address certain issues identified by the Transition Resource Group for Revenue Recognition in the guidance on assessing collectability, presentation of sales taxes, noncash consideration, and completed contracts and contract modifications at transition. The new standard will be effective for the Company on January 1, 2018. The Company is in the process of evaluating the impact of this standard on its financial statements.

In August 2014, the FASB issued Update No. 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. The amendment requires management to evaluate, for each annual and interim reporting period, whether there are conditions and events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern within one year after the date the financial statements are issued or are available to be issued. If substantial doubt is raised, additional disclosures around management's plan to alleviate these doubts are required. This update will become effective for all annual periods and interim reporting periods ending after December 15, 2016. The implementation of the amended guidance is not expected to have an impact on current disclosures in our financial statements.

In July 2015, the FASB issued Update No. 2015-11, Simplifying the Measurement of Inventory (Topic 330). The new guidance requires an entity to measure inventory within the scope of the amendment at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The implementation of the amended guidance is not expected to have an impact on our financial statements.

In February 2016, the FASB issued Update No. 2016-02, Leases (Topic 842), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors).

The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight line basis over the term of the lease, respectively. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. Topic 842 supersedes the previous leases standard, Topic 840 Leases. The standard is effective on January 1, 2019, with early adoption permitted. The Company is in the process of evaluating the impact of this new guidance.

In March 2016, the FASB issued Update No. 2016-09, Improvements to Employee Share-Based Payment Accounting (Topic 718). Under current accounting guidance an entity is required to report excess tax benefits and tax deficiencies to the extent of previous windfalls in equity when the tax benefit is realized. Excess settlements are currently reported as cash inflows from financing activities. The amendment requires that an entity present all excess tax benefits and all tax deficiencies as income tax expense or benefit in the statement of operations to be applied using a prospective transition method. Related tax settlements are to be presented as cash inflows from operating activities. The Company has the option to use either a prospective or retrospective transition method. The amendment removes the requirement to delay recognition of an excess tax benefit until the

SEASPINE HOLDINGS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

tax benefit is realized. A modified retrospective transition method must be applied. This update will become effective for all annual periods and interim reporting periods beginning after December 15, 2016. Early adoption is permitted.

The Company elected to early adopt ASU 2016-09 as of January 1, 2016, the beginning of the annual period that includes the interim period of adoption. Amendments related to accounting for excess tax benefits (deficiencies) have been adopted prospectively, and recognition of excess tax benefits (deficiencies) against income tax expenses is immaterial for the three and nine months ended September 30, 2016. The Company elected to apply the change in classification for excess tax benefits in the statement of cash flows on a prospective basis, and elected to continue estimating stock-based compensation award forfeitures in determining the amount of compensation cost to be recognized each period.

In May 2016, the FASB issued Update No. 2016-11, Revenue Recognition (Topic 605) and Derivative and Hedging (Topic 815). This Update rescinds certain SEC Staff Observer Comments that are codified in Topic 605, Revenue Recognition, and Topic 932, Extract Activities - Oil and Gas, upon adoption of Topic 606, Revenue from Contracts with Customers. Specifically, registrants should not rely on the following SEC Staff Observer comments: a. Revenue and Expense Recognition for Freight Services in Process; b. Accounting for Shipping and Handling Fees and Costs; c. Accounting for Consideration Given by a Vendor to a Customer (including Reseller of the Vendor's Products); d. Accounting for Gas-Balancing Arrangements (that is, use of the "entitlements method"). The new standard will be effective for the Company upon adoption of Topic 606 on January 1, 2018. The implementation of the amended guidance is not expected to have an impact on our financial statements.

In August 2016, the FASB issued Update No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This Update address eight specific cash flow issues related to cash receipts and cash payments with the objective of reducing the existing diversity of presentation and classification in the statement of cash flows. The new standard will be effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted and should be applied using a retrospective transition method to each period presented. If it is impracticable to apply the amendments retrospectively for some of the issues, the amendments for those issues would be applied prospectively as of the earliest date practicable. The Company is in the process of evaluating the impact of this standard on its financial statements.

Net Loss Per Share

Basic and diluted net loss per share was calculated using the weighted-average number of shares of common stock outstanding during the period. The weighted average number of shares used to compute diluted net loss per share excludes any assumed exercise of stock options, and any assumed issuance of common stock under restricted stock units and the Employee Stock Purchase Plan as the effect would be antidilutive. Common stock equivalents of 2.9 million and 1.8 million shares for the three and nine months ended September 30, 2016 and 2015, respectively, were excluded from the calculation because of their antidilutive effect.

Out-of-Period Adjustment

In the third quarter of 2016, the Company recorded an adjustment to correct an error in the first quarter of 2016 reported amounts. This resulted in an increase to cost of goods sold by \$0.6 million for the three months ended September 30, 2016. The error had the effect of overstating the inventory balance and understating the cost of goods sold, in each case, by \$0.6 million for the three months ended March 31, 2016. The adjustment recorded in the third quarter of 2016 corrects the balance sheet and cost of goods sold for the nine months ended September 30, 2016. The impact to the

periods presented and the previously issued financial statements is not material.

3. DEBT AND INTEREST

Credit Agreement

On December 24, 2015, the Company entered into a three-year credit facility (the "Credit Facility") with Wells Fargo Capital Finance. The Credit Facility provides an asset-backed revolving line of credit of up to \$30.0 million in borrowing capacity with a maturity date of December 24, 2018, which maturity date is subject to a one-year extension at the Company's election. In connection with the Credit Facility, the Company was required to become guarantors and to provide a security interest in substantially all its assets for the benefit of the counterparty.

Borrowings under the Credit Facility accrue interest at the rate then applicable to the Base Rate (as customarily defined) Loans, unless and until converted into LIBOR Rate Loans in accordance with the terms of the Credit Facility. Borrowings bear interest at a floating annual rate equal to (a) during any month for which the Company's average excess availability (as customarily defined) is greater than \$20.0 million, base rate plus (i) 1.25 percentage points for base rate loans and (ii) LIBOR rate plus 2.25 percentage

SEASPINE HOLDINGS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

points for LIBOR loans, (b) during any month for which the Company's average excess availability is greater than \$10.0 million but less than or equal to \$20.0 million, (i) base rate plus 1.50 percentage points for base rate loans and (ii) LIBOR rate plus 2.50 percentage points for LIBOR loans and (c) during any month for which the Company's average excess availability is less than or equal to \$10.0 million, (i) base rate plus 1.75 percentage points for base rate loans and (ii) LIBOR rate plus 2.75 percentage points for LIBOR loans. The Company will also pay an unused line fee in an amount equal to 0.375% per annum of the unused Credit Facility amount. The unused line fee is due and payable on the first day of each month.

In September 2016, the Company borrowed \$3.3 million from the revolving line of credit. The Company elected to use the LIBOR Rate with an interest period of six months commencing on September 28, 2016. At September 30, 2016, there was \$3.8 million outstanding in total debt under the Credit Facility. Debt issuance costs and legal fees related to the Credit Facility totaling \$0.4 million were recorded as a deferred asset and are being amortized ratably over the term of the arrangement.

The Credit Facility contains various customary affirmative and negative covenants, including prohibiting the Company from incurring indebtedness without the lender's consent. The Credit Facility also includes a financial covenant that requires the Company to maintain a minimum fixed charge coverage ratio of 1.10 to 1.00 for the applicable measurement period, if the Company's Total Liquidity (as defined in the Credit Facility) is less than \$5.0 million. The Company was in compliance with all applicable covenants at September 30, 2016.

The Credit Facility also includes customary events of default, including events relating to non-payment of amounts due under the Credit Facility, material inaccuracy of representations and warranties, violation of covenants, bankruptcy and insolvency, failure to comply with health care laws, violation of certain of the Company's existing agreements, and the occurrence of a change of control. Under the Credit Facility, if an event of default occurs, Wells Fargo Capital Finance will have the right to terminate the commitments and accelerate the maturity of any loans outstanding.

Insurance Premium Finance Agreements

In July 2016, the Company entered into two insurance premium finance agreements (the "Finance Agreements") with First Insurance Funding Corporation and AFCO Acceptance Corporation (the "Lenders"), under which the Lenders will pay premiums, taxes and fees to insurance companies on the Company's behalf for various insurance policies under which the Company is the insured for a policy term of 12 months. Under the Finance Agreements, the Company will pay to the Lenders the financed amount of \$1.2 million including immaterial amounts of finance charges with annual interest rates between 2% and 4% within the next 12 months. The Company recorded the total amounts due to the Lenders as a short-term debt on the balance sheet. At September 30, 2016, there was \$0.8 million outstanding under the Finance Agreements.

4. TRANSACTIONS WITH INTEGRA

Related-party Transactions

Prior to the spin-off, and pursuant to certain supply agreements subsequent to the spin-off, SeaSpine purchased a portion of raw materials and finished goods from Integra for SeaSpine's Mozaik family of products, and SeaSpine contract manufactured certain finished goods for Integra. The Company's purchases of raw materials and Mozaik product finished goods from Integra for the three months ended September 30, 2016 and 2015 totaled \$0.1 million and \$1.9 million, respectively, and for the nine months ended September 30, 2016 and 2015 totaled \$1.1 million and \$5.6 million, respectively. The Company's sale of finished goods sold to Integra under its contract manufacturing arrangement for the three months ended September 30, 2016 and for the three and nine months ended September 30, 2015 was immaterial, and for the nine months ended September 30, 2016 totaled \$0.2 million.

Pursuant to a transition services agreement, Integra and SeaSpine have provided, and will continue to provide, certain services to one another following the spin-off, and Integra and SeaSpine will indemnify each other against certain liabilities arising from their respective businesses. Under this agreement, Integra provides the Company with certain support functions, including information technology, accounting and other financial functions, regulatory affairs and quality assurance, human resources and other administrative support. The Company incurred approximately \$0.3 million of expenses under the agreement for the nine months ended September 30, 2016, nearly all of which was paid at September 30, 2016. Such expenses for the three months ended September 30, 2016 were immaterial. Expenses incurred by the Company under the agreement for both the three and nine months ended September 30, 2015 totaled \$1.8 million.

Allocated Costs

For periods prior to the spin-off, the condensed consolidated statements of operations included direct expenses for cost of goods sold, research and development, sales and marketing, customer service, and administration as well as allocations of expenses arising from shared services and infrastructure provided by Integra to the Company, such as costs of information

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

technology, including the costs of a multi-year global enterprise resource planning implementation, accounting and legal services, real estate and facilities management, corporate advertising, insurance and treasury services, and other corporate and infrastructure services. These allocations are included in the table below. These expenses were allocated to the Company using estimates that the Company considers to be a reasonable reflection of the utilization of services provided to or benefits received from the Company. The allocation methods include pro-rata basis of revenue, standard cost of sales or other measures.

	Nine Months Ended September 30, 2015 (In thousands)
Cost of goods sold	\$ 488
Selling, general and administrative	8,633
Research and development	253
Total Allocated Costs	\$ 9,374

Included in the above amounts are certain non-cash allocated costs, including stock-based compensation of \$0.6 million. There were no allocated costs for the three months ended September 30, 2015 or for the three and nine months ended September 30, 2016.

All significant related party transactions between SeaSpine and Integra were included in the condensed consolidated financial statements and, prior to the spin-off, were considered to be effectively settled for cash at the time the transaction was recorded, with the exception of the purchases by SeaSpine from Integra of Mozaik raw materials and finished goods for all periods presented. The total net effect of the transactions considered to be effectively settled for cash was reflected in the consolidated statement of cash flows as a financing activity.

The following table summarizes the components of the net increase in Integra net investment for the nine months ended September 30, 2015. The Integra net investment was reclassified to Additional Paid-in Capital in connection with the spin-off.

	Nine Months Ended September 30, 2015 (In thousands)
Cash pooling and general financing activities (a)	\$ 68,386
Corporate Allocations (excluding non-cash adjustments)	8,787
Total Integra net investment in financing activities within cash flow statement	77,173
Non-cash adjustments (b)	29,806
Separation related adjustments (c)	(166)
Reclassification of Integra net investment in connection with the spin-off	(169,914)
Foreign exchange impact	293
Net increase in Integra investment	\$ (62,808)

(a) Includes financing activities for capital transfers, cash sweeps and other treasury services.

(b) Reflects allocation of non-cash charges from Integra, including stock-based compensation and settlement of related-party payable to Integra net investment.

(c) During the three months ended September 30, 2015, certain spin-off related adjustments were recorded in stockholders' equity, to reflect the appropriate opening balances related to SeaSpine's legal entities at the

Distribution Date.

5. INVENTORIES

Inventories consisted of the following:

September 30, 2016 December 31, 2015

(In thousands)

Finished goods \$33,067 \$ 29,845

Work in process 11,488 15,574

Raw materials 3,621 5,852

\$48,176 \$ 51,271

6. PROPERTY, PLANT AND EQUIPMENT

12

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Property, plant and equipment are stated at historical cost less accumulated depreciation and any impairment charges. The Company provides for depreciation using the straight-line method over the estimated useful lives of the assets. Leasehold improvements are amortized over the lesser of the lease term or the useful life. The cost of major additions and improvements is capitalized, while maintenance and repair costs that do not improve or extend the lives of the respective assets are charged to operations as incurred. The cost of computer software obtained for internal use is accounted for in accordance with the Accounting Standards Codification 350-40, Internal-Use Software.

The cost of purchased spinal hardware instruments which the Company consigns to hospitals and independent sales agents to support surgeries is initially capitalized as construction in progress. The amount is then reclassified to spinal hardware instrument sets and depreciation is initiated when instruments are put together in a newly built set with spinal implants, or directly expensed for the instruments that are used to replace damaged instruments in an existing set. The depreciation expense and direct expense for replacement instruments are recorded in selling, general and administrative expense.

Property, plant and equipment balances and corresponding useful lives were as follows:

	September 30, 2016	December 31, 2015	Useful Lives
	(In thousands)		
Leasehold improvement	\$6,371	\$ 4,830	Lease Term
Machinery and production equipment	6,695	6,404	3-10 years
Spinal hardware instrument sets	26,022	25,080	5 years
Information systems and hardware	7,552	6,872	3-7 years
Furniture and fixtures	1,246	944	3-5 years
Construction in progress	8,213	8,375	
Total	56,099	52,505	
Less accumulated depreciation and amortization	(33,737)	(30,547)	
Property, plant and equipment, net	\$22,362	\$ 21,958	

Depreciation and amortization expenses totaled \$1.1 million and \$1.3 million for the three months ended September 30, 2016 and 2015, respectively, and \$3.4 million and \$3.1 million for the nine months ended September 30, 2016 and 2015, respectively. The cost of purchased instruments used to replace damaged instruments in existing sets and recorded directly to the instrument replacement expense totaled \$0.2 million and \$0.4 million for the three months ended September 30, 2016 and 2015, respectively, and \$1.0 million and \$0.9 million for the nine months ended September 30, 2016 and 2015, respectively.

7. IDENTIFIABLE INTANGIBLE ASSETS

Identifiable intangible assets are initially recorded at fair value at the time of acquisition generally using an income or cost approach. The Company capitalizes costs incurred to renew or extend the term of recognized intangible assets and amortizes those costs over their expected useful lives.

The components of the Company's identifiable intangible assets were as follows:

	September 30, 2016			
	Weighted Average Life	Cost	Accumulated Amortization	Net
	(Dollars in thousands)			
Product technology	12 years	\$40,619	\$ (21,320)	\$ 19,299
Customer relationships	12 years	56,830	(32,603)	24,227
Trademarks/brand names	—	300	(300)	—
		\$97,749	\$ (54,223)	\$ 43,526

SEASPINE HOLDINGS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

	December 31, 2015			
	Weighted		Accumulated	Net
	Average	Cost	Amortization	
	Life			
	(Dollars in thousands)			
Product technology	12 years	\$31,169	\$ (19,280)	\$11,889
Customer relationships	12 years	56,830	(29,087)	27,743
Trademarks/brand names	—	300	(300)	—
		\$88,299	\$ (48,667)	\$39,632

Annual amortization expense (including amounts reported in cost of goods sold) is expected to be approximately \$7.3 million in 2016, \$6.8 million in 2017, \$6.5 million in 2018, \$5.8 million in 2019 and \$4.9 million in 2020.

Amortization expense totaled \$1.6 million and \$2.0 million for the three months ended September 30, 2016 and 2015, respectively, and includes \$0.7 million of amortization of product technology-based intangible assets. Amortization expense totaled \$5.6 million and \$6.1 million for the nine months ended September 30, 2016 and 2015, respectively, and includes \$2.0 million of amortization of product technology-based intangible assets. The amortization of product technology-based intangible assets is presented by the Company within cost of goods sold.

SEASPINE HOLDINGS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. BUSINESS COMBINATIONS

In August 2016, the Company entered into an Asset Purchase Agreement (“APA”) with N.L.T Spine Ltd. (“NLT”), and NLT Spine, Inc., a wholly owned subsidiary of NLT, pursuant to which the Company agreed to purchase certain of the assets (the “Purchased Assets”) of NLT’s medical device business (the “Medical Device Business”), including substantially all of NLT’s medical device intellectual property (the “Medical Device Intellectual Property”). NLT owns certain assets related to the ownership, design, development, manufacture, marketing and commercial exploitation of certain expandable interbody medical devices. The acquisition was undertaken to expand the Company's growth in interbody medical devices, one of the fastest growing market segments of the spine hardware market.

Upon the terms and subject to the conditions of the APA, at the initial closing (as defined in the APA), the Company entered into (i) an exclusive license agreement with NLT, pursuant to which the Company will receive an exclusive, worldwide license to make, use, import, offer for sale, sell and otherwise commercially exploit NLT’s medical device products (the “Medical Device Products”), (ii) a transition services agreement with NLT, pursuant to which NLT will provide certain services in respect of the continued development of the Medical Device Intellectual Property and Medical Device Products and (iii) a non-competition and non-solicitation agreement with NLT, pursuant to which NLT and its affiliates agree not to compete with the Company with respect to the Medical Device Business, subject to certain exceptions.

The purchase price consisted of an initial cash payment to NLT of \$1.0 million, which was paid on September 26, 2016 upon the initial closing, and \$3.5 million worth of shares (the "Shares") of the Company’s common stock (the "Stock Consideration"), which is anticipated to be issued during the fourth quarter of 2016. The number of shares is determined based on the volume weighted average closing price (“VWAP”) of the common stock during the twenty trading day period ending one trading day prior to the issuance date of the Stock Consideration, provided, however, that the minimum VWAP shall be \$10.00 and the maximum VWAP shall be \$17.00. If any sale of Shares results in aggregate net proceeds to NLT in excess of \$3.5 million, then NLT shall pay to the Company, in cash, an amount equal to one-half of the net proceeds received by NLT from such sale and each subsequent sale of Shares.

There are also maximum milestone payments of \$5.0 million, payable in cash or the Company's common stock, at the Company's election, which are contingent on the Company's achievement of four independent events related to the commercialization of the Medical Device Products. In connection with the acquisition, after the initial closing the Company will pay NLT contingent asset purchase payments equal to declining (over time) percentages of the Company’s future net sales of certain of the Medical Device Products not to exceed \$43.0 million in the aggregate. In addition, the Company has the option to terminate any future obligation to make royalty payments by making a one-time cash payment to NLT of \$18.0 million.

The Company accounted for this transaction as a business combination in accordance with Accounting Standards Codification ("ASC") 805 Business Combinations, and as such, the assets acquired have been recorded at their respective fair values. There were no liabilities assumed. The determination of fair value for the identifiable intangible assets acquired requires extensive use of estimates and judgments. Significant estimates include, but are not limited to, measurements estimating cash flows and determining the appropriate discount rate, which are considered Level 3 inputs, as defined using the fair value concepts defined in ASC 820. Intangible assets acquired were fair valued at \$9.3 million as of the initial closing date and recorded as Product Technology intangible assets, which are being amortized ratably over a useful life of 10 years from the initial closing. Acquisition costs of \$0.5 million incurred were recorded as selling, marketing and administrative.

The following table summarizes the preliminary estimated fair value of total consideration to be paid to NLT. The Company estimated the fair value of the contingent consideration, including milestone obligations and royalty obligations, using a probability weighted approach that considers the possible outcomes based on assumptions related to the timing and probability of the product launch dates, discount rates matched to the timing of payments, and probability of success rates and discount adjustments on the related cash flows. Subsequent to the acquisition date, at each reporting period, the contingent consideration liabilities will be remeasured at current fair value with changes to be recorded in the consolidated statements of operations. The total purchase price is allocated to the intangible assets subject to amortization based on their fair values, which are the sole assets acquired in connection with this acquisition.

15

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(In thousands)

Cash paid for purchase	\$ 1,000
Contingent closing consideration	3,100
Contingent milestone payments	2,300
Contingent asset purchase payments	2,900
Total purchase price	\$9,300

The Company is still in the process of finalizing the valuation of contingent consideration liabilities and intangible assets. Certain assumptions that were in place at the initial closing could result in material changes in the purchase price allocation. The Company anticipates finalizing the purchase price allocation in the fourth quarter of 2016.

The results of operations of the NLT Purchased Assets are not included in our consolidated statements of operations for the three and nine months ended September 30, 2016 as the initial close of the transaction occurred on September 26, 2016. The balance sheet as of September 30, 2016 includes the estimated fair value of assets acquired from NLT. The unaudited pro forma financial information set forth below assumes that the NLT Purchased Assets had been acquired on January 1, 2015. The unaudited pro forma financial information includes the effect of estimated amortization charges for acquired intangible assets of \$0.2 million and \$0.6 million for the three and nine months ended September 30, 2016 and 2015, respectively, the estimated research and development expenses for the Purchased Assets of \$0.3 million and \$0.8 million for the three and nine months ended September 30, 2016 and 2015, respectively, and the removal of non-recurring acquisition costs of \$0.5 million for the three and nine months ended September 30, 2016. There was no adjustment to the total revenues. The unaudited pro forma information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisition had taken place at the beginning of the periods presented.

9. STOCK-BASED COMPENSATION

For periods prior to the spin-off, the Company's stock-based compensation was derived from the equity awards granted by Integra to individuals who became the Company's employees after the spin-off. As those stock-based compensation plans were Integra's plans, the amounts have been recognized in the consolidated statements of operations and the Integra net investment account on the consolidated balance sheet. For periods after the spin-off, the Company's stock-based compensation has been recognized through the consolidated statement of operations and the Company's additional paid-in capital account on the consolidated balance sheet.

Equity Award Plans

As of June 30, 2015, Integra had stock options, restricted stock awards, performance stock awards, contract stock awards and restricted stock units outstanding under three plans, the 2000 Equity Incentive Plan, the 2001 Equity Incentive Plan, and the 2003 Equity Incentive Plan. In connection with the spin-off, Integra equity awards granted to individuals who became employees of the Company were converted to SeaSpine equity awards. In general, each award is subject to the same terms and conditions as were in effect prior to the spin-off.

In May 2015, the Company adopted the 2015 Incentive Award Plan (the "2015 Plan"), under which the Company can grant its employees and non-employee directors incentive stock options and non-qualified stock options, restricted stock, performance stock, dividend equivalent rights, stock appreciation rights, stock payment awards and other incentive awards. The Company may issue up to 2,000,000 shares of its common stock under the 2015 Plan. On January 27, 2016, the Company's board of directors approved an amendment and restatement of the 2015 Plan, pursuant to which the share reserve was increased by

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

300,000 shares over the original share reserve under the 2015 Plan, and on March 30, 2016, the board of directors approved an amendment and restatement of the 2015 Plan, pursuant to which the share reserve was increased by an additional 1,209,500 shares of common stock. Such amendments and restatements were approved by the stockholders of the Company on June 7, 2016. As a result, pursuant to the final amended and restated 2015 Plan (the "Restated Plan"), an aggregate of 1,509,500 additional shares are reserved for issuance under the Restated Plan relative to the share reserve under the 2015 Plan.

Restricted Stock Awards, Restricted Stock Units and Performance Stock Awards

Performance stock awards, restricted stock awards and restricted stock units generally have requisite service periods of three years. Performance stock awards are subject to graded vesting and the Company expenses their fair value over the requisite service period. The Company expenses the fair value of restricted stock awards and restricted stock units on an accelerated basis over the vesting period or requisite service period, whichever is shorter. Stock-based compensation expense related to restricted stock awards, restricted stock units and performance stock awards includes an estimate for forfeitures. The expected forfeiture rate of all equity-based compensation is based on historical experience of pre-vesting forfeitures on awards by each homogenous group of shareowners and is estimated to be 12% annually for all non-executive employees for the nine months ended September 30, 2016 and 10% annually for the nine months ended September 2015. There is no forfeiture rate applied for non-employee directors and executive employees as their pre-vesting forfeitures are anticipated to be highly unlikely. As individual grant awards become fully vested, stock-based compensation expense is adjusted to recognize actual forfeitures.

During the nine months ended September 30, 2016, the Company granted 75,075 shares of restricted stock awards, all of which were granted to non-employee directors. As of September 30, 2016, there was approximately \$0.4 million of total unrecognized compensation expense related to unvested awards. This cost is expected to be recognized over a weighted-average period of approximately one year.

Stock Options

Stock option grants to employees generally have requisite service periods of four years, and stock option grants to non-employee directors generally have a requisite service period of one year. Both are subject to graded vesting. The Company records stock-based compensation expense associated with stock options on an accelerated basis over the various vesting periods within each grant and based on their fair value at the date of grant using the Black-Scholes-Merton option pricing model. The following weighted-average assumptions were used in the calculation of fair value for options grants for the three and nine months ended September 30, 2016, respectively:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Expected dividend yield	0 %	0 %	0 %	0 %
Risk-free interest rate	1.1 %	1.6 %	1.3 %	1.6 %
Expected volatility	38.1 %	35.3 %	38.3 %	35.3 %
Expected term (in years)	5.1	5.3	4.9	5.3

The Company considered that it has never paid cash dividends and does not currently intend to pay cash dividends. The risk-free interest rates are derived from the U.S. Treasury yield curve in effect on the date of grant for instruments with a remaining term similar to the expected term of the options. Due to the Company's limited historical data, the expected volatility is calculated based upon the historical volatility of comparable companies in the medical device industry whose share prices are publicly available for a sufficient period of time. The expected term of "plain vanilla"

options is calculated using the simplified method as prescribed by accounting guidance for stock-based compensation. A "plain vanilla" option is an option with the following characteristics: (1) the option is granted at-the-money; (2) exercisability is conditional only on satisfaction of a service condition through the vesting date; (3) employees who terminate their service prior to vesting forfeit the options; (4) employees who terminate their service after vesting are granted limited time to exercise their stock options; and (5) the options are nontransferable and non-hedgeable. The expected term of any other option is based on disclosures from similar companies with similar grants. In addition, the Company applies an expected forfeiture rate when amortizing stock-based compensation expense. The expected forfeiture rate of stock options is based on historical experience of pre-vesting forfeitures on awards by each homogenous group of shareowners and is estimated to be 12% annually for all non-executive employees for the nine months ended September 30, 2016, and 10% annually for the nine months ended September 30, 2015. There is no forfeiture rate applied for non-employee directors and executive employees as their pre-vesting forfeitures are anticipated to be highly unlikely. As individual grant awards become fully vested, stock-based compensation expense is adjusted to recognize actual forfeitures.

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

There were 43,500 and 900,524 stock options granted during the three and nine months ended September 30, 2016, and 1,449,956 options granted during the three and nine months ended September 30, 2015.

As of September 30, 2016, there was approximately \$3.5 million of total unrecognized compensation expense related to unvested stock options. This cost is expected to be recognized over a weighted-average period of approximately 1.5 years.

Employee Stock Purchase Plan

In May 2015, the Company adopted a 2015 Employee Stock Purchase Plan, which was amended in December 2015 (as amended, the "ESPP"). Under the ESPP, eligible employees may purchase shares of the Company's common stock through payroll deductions of up to 15% of eligible compensation during an offering period. Generally, each offering will be for a period of twenty-four months as determined by the Company's board of directors. There are four six-month purchase periods in each offering period for contributions to be made and to be converted into shares at the end of the purchase period. In no event may an employee purchase more than 2,500 shares per purchase period based on the closing price on the first trading date of an offering period or more than \$25,000 worth of stock during each calendar year. The purchase price for shares to be purchased under the ESPP is 85% of the lesser of the market price of the Company's common stock on the first trading date of an offering period or any purchase date during an offering period (June 30 or December 31).

The ESPP authorizes the issuance of up to 400,000 shares of common stock pursuant to purchase rights granted to employees. The ESPP is intended to qualify as an "employee stock purchase plan" within the meaning of Section 423 of the Internal Revenue Code of 1986, as amended. The first offering period under the ESPP commenced on January 1, 2016 and will end on December 31, 2017. However, the ESPP contains a restart feature, such that if the market price of the stock at the end of any six-month purchase period is lower than the stock price at the original grant date of an offering period, that offering period will terminate after that purchase date, and a new two-year offering period will commence on the January 1 or July 1 immediately following the date the original offering period terminated. This restart feature was triggered by the purchase date that occurred on June 30, 2016, such that the offering period that commenced on January 1, 2016 was terminated, and a new offering period commenced on July 1, 2016 and will end on June 30, 2018. The Company applied share-based payment modification accounting to the awards that were initially valued at the grant date to determine the amount of any incremental fair value associated with the modified awards. The impact to stock-based compensation expense for modifications during the three and nine months ended September 30, 2016 was immaterial.

During the nine months ended September 30, 2016, 39,955 shares of common stock were purchased under the ESPP.

The Company estimates the fair value of shares issued to employees under the ESPP using the Black-Scholes-Merton option-pricing model. The following weighted average assumptions were used in the calculation of fair value of shares under the ESPP at the grant date for the three and nine months ended September 30, 2016:

	Three Months Ended September 30, 2016	Nine Months Ended September 30, 2016	
Expected dividend yield	0	% 0	%
Risk-free interest rate	0.5	% 0.6	%
Expected volatility	29.3	% 30.5	%
Expected term (in years)	1.2	1.2	

10. LEASES

The Company leases administrative, manufacturing, research, and distribution facilities and various manufacturing, office and transportation equipment through operating lease agreements. Future minimum lease payments under these operating leases at September 30, 2016 are as follows:

Payments
Due by
Calendar
Year
(In
thousands)
2016\$ 574
20172,185
20182,220
20192,262

18

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

2020	2,317
Thereafter	12,160
Total minimum lease payments	\$21,718

Total rental expense for the three months ended September 30, 2016 and 2015 was \$0.7 million and \$0.5 million, respectively, and \$2.3 million and \$1.7 million for the nine months ended September 30, 2016 and 2015, respectively.

11. INCOME TAXES

The following table provides a summary of the Company's effective tax rate for the three and nine months ended September 30, 2016 and 2015:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015

Reported tax rate 1.1% 1.9% 1.6% (5.4)%

The Company reported a \$0.3 million benefit from the change in realizable deferred tax assets of a foreign subsidiary for the three months ended September 30, 2015. The Company reported income tax expense for the nine months ended September 30, 2015 related to the taxable income generated by its U.S. subsidiary that was not part of the U.S. consolidated tax group as of September 30, 2015. As such, despite the reported losses before income taxes in those periods, the taxable income generated by such U.S. subsidiary was not allowed to be offset against the taxable losses generated by its other U.S. subsidiaries through August 31, 2015. Effective September 1, 2015, the Company made an election that will allow it to offset any future taxable losses generated by its U.S. subsidiaries against any future taxable income generated by its U.S. subsidiaries.

The Company reported an income tax benefit for the three and nine months ended September 30, 2016 which was primarily the result of a refund of tax initially paid toward the income tax return for our U.S. subsidiary which was not part of the U.S. consolidated tax group for the tax period January 1, 2015 through August 31, 2015. The Company also recorded a tax benefit related to the reversal of a liability recorded under ASC 740-10 due to the expiration of the statute of limitations. In addition, for all periods presented, the pretax losses incurred by the consolidated U.S. tax group received no corresponding tax benefit because we have concluded that it is more likely than not that the Company will be unable to realize the value of any resulting deferred tax assets. The Company will continue to assess its position in future periods to determine if it is appropriate to reduce a portion of its valuation allowance in the future.

The income tax provision in the consolidated statements of operations for periods prior to the spin-off was calculated using the separate return method, as if the Company had filed a separate tax return and operated as a stand-alone business. However, because Integra historically generated taxable income in excess of the Company's pretax losses incurred prior to the spin-off and all of the Company's U.S. subsidiaries that incurred these pretax losses were included in Integra's U.S. consolidated tax group, those pretax losses were more than offset by Integra's taxable income. Therefore, there were no U.S. net operating losses available to the Company for future use at the date of the spin-off.

12. COMMITMENTS AND CONTINGENCIES

In consideration for certain technology, manufacturing, distribution, and selling rights and licenses granted to the Company, the Company has agreed to pay royalties on sales of certain products sold by the Company. The royalty

payments that the Company made under these agreements were included on the condensed consolidated statements of operations as a component of cost of goods sold.

The Company is subject to various claims, lawsuits and proceedings in the ordinary course of its business with respect to its products, its current or former employees, and involving commercial disputes, some of which have been settled by the Company. In the opinion of management, such claims are either adequately covered by insurance or otherwise indemnified, or are not expected, individually or in the aggregate, to result in a material adverse effect on the Company's financial condition. However, it is possible that our results of operations, financial position and cash flows in a particular period could be materially affected by these contingencies.

The Company accrues for loss contingencies when it is deemed probable that a loss has been incurred and that loss is estimable. The amounts accrued are based on the full amount of the estimated loss before considering insurance proceeds, and do not include an estimate for legal fees expected to be incurred in connection with the loss contingency. The Company accrues legal fees expected to be incurred in connection with loss contingencies as those fees are incurred by outside counsel as a period cost. The Company

SEASPINE HOLDINGS CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

does not believe there are any pending legal proceedings that would have a material impact on the Company's financial position, cash flows or results of operations.

13. SEGMENT AND GEOGRAPHIC INFORMATION

Subsequent to the spin-off from Integra, management assessed its segment reporting based on how it internally manages and reports the results of its business to its chief operating decision maker. The Company's management reviews financial results, manages the business and allocates resources on an aggregate basis. Therefore, financial results are reported in a single operating segment: the development, manufacture and marketing of orthobiologics and spinal fusion hardware. The Company reports revenue in two product categories: orthobiologics and spinal fusion hardware. Orthobiologics products consist of a broad range of advanced and traditional bone graft substitutes that are designed to improve bone fusion rates following surgery. The spinal fusion hardware portfolio consists of an extensive line of products for minimally invasive surgery, complex spine, deformity and degenerative procedures.

Revenue, net consisted of the following:

	Three Months		Nine Months	
	Ended September		Ended September	
	30,		30,	
	2016	2015	2016	2015
	(In thousands)			
Orthobiologics	\$16,186	\$16,472	\$49,649	\$49,527
Spinal fusion hardware	15,555	16,207	46,692	48,927
Total revenue, net	\$31,741	\$32,679	\$96,341	\$98,454

The Company attributes revenues to geographic areas based on the location of the customer. Total revenue by major geographic area consisted of the following:

	Three Months		Nine Months	
	Ended September		Ended September	
	30,		30,	
	2016	2015	2016	2015
	(In thousands)			
United States	\$28,485	\$30,139	\$87,041	\$89,081
International	3,256	2,540	9,300	9,373
Total revenue, net	\$31,741	\$32,679	\$96,341	\$98,454

SEASPINE HOLDINGS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

14. SUBSEQUENT EVENT

On November 9, 2016, the Company announced that it is reducing its workforce as part of broad cost reduction measures to be implemented immediately. The expected charges to be recorded in connection with the employee termination costs related to this workforce reduction are \$0.4 million, which are anticipated to be incurred and paid during the fourth quarter of 2016.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis refers to and should be read in conjunction with the condensed consolidated financial statements and the corresponding notes included elsewhere in this report. We believe that the assumptions underlying the condensed consolidated financial statements and the corresponding notes are reasonable. However, the condensed consolidated financial statements may not necessarily reflect our results of operations, financial position and cash flows for future periods or what they would have been had SeaSpine been a separate, stand-alone company during the periods presented. The following discussion and analysis contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The matters discussed in these forward-looking statements are subject to risk and uncertainties that could cause actual results to differ materially from those made, projected or implied in the forward-looking statements. Such risks and uncertainties may also give rise to future claims and increase exposure to contingent liabilities. Please see the "Risk Factors" section included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 for a discussion of the uncertainties, risks and assumptions associated with these statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

You can identify these forward-looking statements by forward-looking words such as "believe," "may," "could," "will," "estimate," "continue," "anticipate," "intend," "seek," "plan," "expect," "should," "would" and similar expressions. These risks and uncertainties arise from (among other factors) the following:

- general economic and business conditions, in both domestic and international markets;

- our expectations and estimates concerning future financial performance, financing plans and the impact of competition;

- anticipated trends in our business, including healthcare reform in the United States, increased pricing pressure from our competitors or hospitals and changes in third-party payment systems;

- physicians' willingness to adopt our recently launched and planned products, customers' continued willingness to pay for our products and third-party payors' willingness to provide or continue coverage and appropriate reimbursement for any of our products and our ability to secure regulatory approval for products in development;

- existing and future regulations affecting our business, both in the United States and internationally, and enforcement of those regulations;

- anticipated demand for our products and our ability to purchase or produce our products in sufficient quantities to meet customer demand;

- our ability to manage timelines and costs related to manufacturing our products;

- our ability to maintain and expand our marketing and sales networks and the costs related thereto;

• our ability to successfully develop new products and the costs associated with designing and developing those new products;

• our ability to support the safety and efficacy of our products with long-term clinical data;

• our ability to obtain additional debt and equity financing to fund capital expenditures and working capital requirements and acquisitions;

• our dependence on a limited number of third-party suppliers for components and raw materials;

Table of Contents

our ability to protect our intellectual property, including unpatented trade secrets, and to operate without infringing or misappropriating the proprietary rights of others;

our ability to complete acquisitions, integrate operations post-acquisition and maintain relationships with customers of acquired entities; and

other risk factors described in the section entitled "Risk Factors" included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this report.

Spin-off from Integra

SeaSpine was incorporated in Delaware on February 12, 2015 in connection with the spin-off of Integra's spinal fusion hardware and orthobiologics business from Integra's diversified medical technology business on July 1, 2015. For periods prior to the spin-off, our consolidated financial statements were prepared on a stand-alone basis and were derived from Integra's consolidated financial statements and accounting records. Therefore, these financial statements reflected, in conformity with accounting principles generally accepted in the United States, the financial position, results of operations, comprehensive loss and cash flows as the orthobiologics and spinal fusion hardware business was historically operated as part of Integra. They may not be indicative of our future performance and do not necessarily reflect what our consolidated results of operations, financial condition and cash flows would have been had we operated as a separate, publicly-traded company during the periods presented, particularly because we implemented many changes in our operations and capitalization after the spin-off from Integra.

The consolidated financial statements for periods prior to the spin-off included the attribution of certain assets and liabilities that were historically held at the Integra corporate level but which were specifically identified or attributable to us. However, cash held by Integra was not attributed to us. Integra's debt and related interest expense also were not allocated to us for any of the periods presented since we were not the legal obligor of the debt and Integra's borrowings were not directly attributable to us. Integra managed cash centrally and substantially all cash generated by our business through May 4, 2015, the date we implemented a separate enterprise resource planning ("ERP") system for SeaSpine, was assumed to be remitted to Integra. All significant related party transactions between us and Integra were included in the consolidated financial statements and, prior to the spin-off, were considered to be effectively settled for cash at the time the transaction was recorded, with the exception of the purchases from Integra of Mozaik raw materials and finished goods. Prior to the spin-off, SeaSpine purchased a portion of raw materials and finished goods from Integra for the Mozaik family of products, and SeaSpine contract manufactured certain finished goods for Integra. The total net effect of the settlement of the transactions considered to be effectively settled for cash was reflected in the consolidated statements of cash flows as a financing activity and in the consolidated balance sheet as Integra net investment.

Our consolidated statements of operations included our direct expenses for cost of goods sold, research and development, sales and marketing, distribution, and administration as well as allocations of expenses arising from shared services and infrastructure provided by Integra to us, such as costs of information technology, including the costs of a multi-year global ERP implementation, accounting and legal services, real estate and facilities, corporate advertising, insurance services and related treasury, and other corporate and infrastructure services. In addition, other costs allocated to us include restructuring costs, share-based compensation expense and retirement plan expenses related to Integra's corporate and shared services employees. These operating expenses were allocated to us using estimates that we considered to be a reasonable reflection of the utilization of services provided to or benefits received by us. The allocation methods include pro-rata basis of revenue, standard cost of sales or other measures.

Integra continues to provide some of the services related to these functions to us after the spin-off on a transitional basis for a fee under a transition services agreement. We incurred \$0.3 million of transition service fees from Integra in the nine months ended September 30, 2016, and \$1.8 million for the both three and nine months ended September 30, 2015. Such fees for the three months ended September 30, 2016 were immaterial. We do not expect to incur significant costs in the future under the transition services agreement. In addition, costs associated with supply agreements with Integra for our Mozaik product line are at materially different terms than those that were incurred while the business was part of Integra. Also, we are incurring costs as an independent, publicly-traded company that are different from the costs historically allocated to us by Integra.

Table of Contents

Overview

We are a global medical technology company focused on the design, development and commercialization of surgical solutions for the treatment of patients suffering from spinal disorders. We have a comprehensive portfolio of orthobiologics and spinal fusion hardware solutions designed to meet the varying combinations of products that neurosurgeons and orthopedic spine surgeons need to perform fusion procedures in the lumbar, thoracic and cervical spine. We believe this broad combined portfolio of orthobiologics and spinal fusion hardware products is essential to meet the “complete solution” requirements of neurosurgeons and orthopedic spine surgeons.

We report revenue in two product categories: orthobiologics and spinal fusion hardware. Our orthobiologics products consist of a broad range of advanced and traditional bone graft substitutes that are designed to improve bone fusion rates following a wide range of orthopedic surgeries, including spine, hip, and extremities procedures. Our spinal fusion hardware portfolio consists of an extensive line of products to facilitate spinal fusion in minimally invasive surgery, complex spine, deformity and degenerative procedures.

Our U.S. sales organization consists of regional business and territory sales managers who oversee a broad network of independent orthobiologics and spinal fusion hardware sales agents, to whom we consign and loan our products and pay commissions based on the sales of our products that they generate. These sales are generated by building and maintaining relationships with the neurosurgeons and orthopedic spine surgeons who use our products in surgeries or from the hospitals that order our products directly. Our international sales organization is composed of a sales management team that oversees a network of independent orthobiologics and spinal fusion hardware stocking distributors in over 30 countries that purchase products directly from us and independently sell them. For the nine months ended September 30, 2016 and 2015, international sales accounted for approximately 10% of our revenue. Our policy is not to sell our products through or participate in physician-owned distributorships.

We expect to continue to incur losses in the foreseeable future as we further invest in the expansion of our business, primarily in sales, marketing and research and development, and from the general and administrative expenses we expect to incur due to our operation as an independent, publicly-traded company.

Components of Our Results of Operations

Revenue

Our net revenue is derived primarily from the sale of orthobiologics and spinal fusion hardware products across North America, Europe, Asia Pacific and Latin America. Sales are reported net of returns, group purchasing organization fees and other customer allowances.

In the United States, we generate most of our revenue by consigning our orthobiologics products and by consigning or loaning our spinal fusion hardware sets to hospitals and independent sales agents, who in turn either deliver them to hospitals for a single surgical procedure, after which they are returned to us, or leave them with hospitals that are high volume users for multiple procedures. The spinal fusion hardware sets typically contain the instruments, disposables, and spinal implants required to complete a surgery. We ship replacement inventory to independent sales agents to replace the consigned inventory used in surgeries. We maintain and replenish loaned sets at our facility and return replenished sets to a hospital or independent sales agent for the next procedure. We recognize revenue on these consigned or loaned products when they have been used or implanted in a surgical procedure.

For all other sales transactions, including sales to international stocking distributors and private label partners, we recognize revenue when the products are shipped to the customer or stocking distributor and the transfer of title and risk of loss occurs. There is generally no customer acceptance or other condition that prevents us from recognizing revenue in accordance with the delivery terms for these sales transactions.

We entered into certain supply agreements with Integra, pursuant to which Integra provides us with certain raw materials and we provide each other with finished product for further sale in the operation of each other’s business. These supply agreements reflect new pricing compared to our historical arrangements prior to the spin-off.

Cost of Goods Sold

Cost of goods sold primarily consists of the costs of finished goods purchased directly from third parties and raw materials used in the manufacture of our products, plant and equipment overhead, labor costs, packaging costs,

amortization of technology-related intangible assets and freight. The majority of our orthobiologics products are designed and manufactured internally. The

23

Table of Contents

cost of human tissue and fixed manufacturing overhead costs are significant drivers of the costs of goods sold and consequently our orthobiologics products, at current production volumes, generate lower gross margin than our spinal fusion hardware products. We rely on third-party suppliers to manufacture our spinal fusion hardware products, and we assemble them into surgical sets in-house, part of which, beginning in the fourth quarter of 2016, will be outsourced to a third party logistics provider. Other costs included in cost of goods sold include royalties, shipping, inspection and charges for expired, excess and obsolete inventory. We expect our cost of goods sold to continue to increase in absolute dollars as our sales volume increases over time.

Selling, General and Administrative Expense

Our selling, general and administrative (“SG&A”) expenses consist primarily of sales commissions to independent sales agents, cost of medical education and training, payroll and other headcount related expenses, depreciation of instrument sets, instrument replacement expense, stock-based compensation, the medical device excise tax (through 2015), marketing expenses, supply chain and distribution expenses, and expenses for information technology, legal, human resources, insurance, finance, facilities, and management, the substantial majority of which were allocated from Integra prior to the spin-off. Subsequent to the spin-off, we are incurring these expenses directly as an independent, publicly-traded company.

We expect our SG&A expenses, excluding allocations from Integra incurred prior to the spin-off, to increase shortly after the spin-off as we continue to hire additional personnel to support the growth of our business, expand our product portfolio and add related sales and marketing personnel, and as a result of being an independent, publicly-traded company. However, those increases will slow and we will begin seeing decreases to SG&A expenses as we incur lower fees for services incurred under a transition services agreement with Integra and the absence of spin-off related charges.

Research and Development Expense

Our research and development (“R&D”) expenses primarily consist of expenses related to the headcount for engineering, product development, clinical affairs and regulatory functions as well as consulting services, third-party prototyping services, outside research and clinical studies activities, and materials, production and other costs associated with development of our products. We expense R&D costs as they are incurred.

While our R&D expenses fluctuate from period to period based on the timing of specific initiatives, we expect that these costs will increase over time as we continue to design and commercialize new products and expand our product portfolio, add related personnel and conduct additional clinical activities.

RESULTS OF OPERATIONS

(In thousands, except percentages)	Three Months Ended		Nine Months Ended

Table of Contents

Three Months Ended September 30, 2016 Compared to Three Months Ended September 30, 2015

Revenue

Total revenue, net decreased for the three months ended September 30, 2016 by \$1.0 million, or 3.0%, to \$31.7 million compared to \$32.7 million for the same period in 2015.

	Three Months Ended September 30, 2016		2015	
	(In millions)			
Orthobiologics	\$16.2		\$16.5	
% of total revenue, net	51	%	50	%
Spinal Fusion Hardware	15.5		16.2	
% of total revenue, net	49	%	50	%
Total revenue, net	\$31.7		\$32.7	

Orthobiologics revenues totaled \$16.2 million for the three months ended September 30, 2016, a decrease of \$0.3 million as compared to the same period in 2015, mainly because sales in the United States decreased \$0.4 million to \$14.6 million in the three months ended September 30, 2016 compared to the same period in 2015, primarily due to pricing pressures (a decrease of \$2 in average unit price for the items sold).

Spinal fusion hardware revenues totaled \$15.5 million for the three months ended September 30, 2016, a decrease of 4.3% from the same period in 2015. Revenue from sales in the United States decreased \$1.2 million to \$13.9 million in the three months ended September 30, 2016 compared to the same period in 2015. The U.S. hardware portfolio continued to face mid-single digit pricing pressures and lower demand for our older spinal fusion hardware products, particularly in our thoracolumbar systems. Revenue from international sales of our spinal hardware fusion products increased \$0.5 million to \$1.6 million in the three months ended September 30, 2016 compared to the same period in 2015, primarily due to new distribution channels in Latin America.

The following table sets forth our total revenue, net by geography for the three months ended September 30, 2016 and 2015.

	Three Months Ended September 30, 2016		2015	
	(In millions)			
United States	\$28.5		\$30.1	
International	3.2		2.6	
Total revenue, net	\$31.7		\$32.7	

Cost of Goods Sold and Gross Margin

Cost of goods sold for the three months ended September 30, 2016 decreased \$3.5 million to \$13.9 million compared to the same period in 2015. Gross margin was 56.3% for the three months ended September 30, 2016 and 46.9% for the three months ended September 30, 2015. The increase in gross margin was mainly driven by the absence of a \$4.4 million non-recurring charge recorded in the third quarter of 2015 for excess and obsolete spinal fusion hardware inventory, the substantial majority of which was purchased prior to the spin-off and a portion of which was primarily intended for distribution in international markets. This charge was a result of the Company's assessment of its growth strategy for international markets, completed in the third quarter of 2015, following the spin-off.

Selling, General and Administrative

SG&A expenses decreased \$2.5 million to \$23.8 million for the three months ended September 30, 2016 compared to the same period in 2015. The decrease was mainly driven by a \$1.2 million decrease in fees incurred for services under a transition services agreement with Integra and a \$2.5 million decrease in professional fees related to the spin-off, \$0.4 million lower commissions due to slightly lower sales and the absence of \$0.5 million of medical device excise tax expense compared to the same period in 2015. These decreases were somewhat offset by a \$1.9 million increase in compensation due to increased head count.

Table of Contents

Research and Development

R&D expenses increased \$0.2 million to \$2.6 million, or 8.2% of revenue, for the three months ended September 30, 2016 compared to the same period in 2015. The increase was primarily driven by higher compensation costs due to an increase in headcount, and higher external costs related to product development and clinical studies. For the full year 2016, we plan to increase our investment in R&D to between 7%-9% of revenues, compared to 6% of revenues for the full year-ended December 31, 2015, as we continue to add personnel and accelerate the design and commercialization of new products to expand our product portfolio and conduct additional clinical activities.

Income Taxes

	Three Months Ended	
	September 30,	
	2016	2015
	(In thousands)	
Loss before income taxes	\$(9,557)	\$(14,474)
Benefit for income taxes	(103)	(275)
Effective tax rate	1.1 %	1.9 %

We reported a \$0.3 million benefit from the change in realizable deferred tax assets of a foreign subsidiary for the three months ended September 30, 2015.

We reported an income tax benefit for the three months ended September 30, 2016 which was primarily the result of a refund of tax initially paid toward the income tax return for our U.S. subsidiary which was not part of the U.S. consolidated tax group for the tax period January 1, 2015 through August 31, 2015. The Company also recorded a tax benefit related to the reversal of a liability recorded under ASC 740-10 due to the expiration of the statute of limitations. In addition, for all periods presented, the pretax losses incurred by the consolidated U.S. tax group received no corresponding tax benefit because we have concluded that it is more likely than not that we will be unable to realize the value of any resulting deferred tax assets.

Nine Months Ended September 30, 2016 Compared to Nine Months Ended September 30, 2015

Revenue

Total revenue, net decreased for the nine months ended September 30, 2016 by \$2.2 million or 2.2%, to \$96.3 million compared to \$98.5 million for the same period in 2015.

	Nine Months	
	Ended	
	September 30,	
	2016	2015
	(In millions)	
Orthobiologics	\$49.6	\$49.6
% of total revenue, net	52 %	50 %
Spinal Fusion Hardware	46.7	48.9
% of total revenue, net	48 %	50 %
Total revenue, net	\$96.3	\$98.5

Orthobiologics revenues totaled \$49.6 million for the nine months ended September 30, 2016, flat as compared to the same period in 2015. Revenue from sales in the United States increased \$0.4 million to \$44.4 million in the nine months ended September 30, 2016 compared to the same period in 2015, primarily because of increased demand for our third generation demineralized bone matrix products. Revenue from international sales decreased \$0.3 million to \$5.2 million in the nine months ended September 30, 2016 compared to the same period in 2015.

Spinal fusion hardware revenues totaled \$46.7 million for the nine months ended September 30, 2016, a decrease of 4.5% from the same period in 2015. Revenue from sales in the United States decreased \$2.5 million to \$42.6 million

in the nine months ended September 30, 2016 compared to the same period in 2015. The U.S. hardware portfolio continued to face mid-single digit pricing pressures and lower demand for our older spinal fusion hardware products, particularly in our thoracolumbar systems. We expect sales of products that will be launched in the fourth quarter of 2016 and recently launched interbody devices and cervical fixation systems and our expandable interbody device accelerate in the fourth quarter of 2016 and somewhat offset the anticipated continued decline in sales of our older spinal fusion hardware product lines. Sales of our spinal

Table of Contents

hardware fusion products internationally increased \$0.2 million to \$4.0 million in the nine months ended September 30, 2016 compared to the same period in 2015, primarily due to new distribution channels in Latin America.

The following table sets forth our total revenue, net by geography for the nine months ended September 30, 2016 and 2015.

	Nine Months Ended September 30, 2016 2015 (In millions)	
United States	\$87.0	\$89.1
International	9.3	9.4
Total revenue, net	\$96.3	\$98.5

Cost of Goods Sold and Gross Margin

Cost of goods sold for the nine months ended September 30, 2016 decreased \$2.4 million to \$42.1 million compared to the same period in 2015. Gross margin was 56.3% for the nine months ended September 30, 2016 and 54.9% for the nine months ended September 30, 2015. The increase in gross margin was mainly driven by lower manufacturing costs in 2016 as we began to sell the Mozaik product that we manufactured internally at a lower cost compared to the cost we paid to Integra for Mozaik product under our supply agreement with Integra, the absence of a \$4.4 million non-recurring charge taken in the nine months ended September 30, 2015 for excess and obsolete spinal fusion hardware inventory, the substantial majority of which was purchased prior to the spin-off and a portion of which was primarily intended for distribution in international markets, and the absence of \$0.5 million of allocation expenses from Integra in the nine months ended September 30, 2015, offset by a \$1.7 million provision for excess and obsolete orthobiologics inventory recorded in the first quarter of 2016 related to a portion of our matched-donor cancellous bone raw material on hand.

Cost of goods sold included \$2.0 million of amortization for technology-based intangible assets in both of the nine months ended September 30, 2016 and 2015.

Selling, General and Administrative

SG&A expenses decreased \$6.9 million to \$76.2 million for the nine months ended September 30, 2016 compared to the same period in 2015. For the nine months ended September 30, 2015, SG&A expense included \$18.6 million of nonrecurring spin-off related charges, \$1.4 million of medical device excise tax expense and \$8.6 million of allocated expenses from Integra. Since the spin-off, we have directly incurred those operating expenses that were previously represented in the allocation from Integra, including the compensation and related costs of our executive management team and expenses associated with being an independent, publicly-traded company, such as audit, insurance, and information technology-related fees. We have also incurred greater expense from the hiring of additional marketing, sales and administrative headcount since the spin-off.

Research and Development

R&D expenses increased \$2.6 million to \$8.5 million, or 8.9% of revenue, for the nine months ended September 30, 2016 compared to the same period in 2015. The increase was primarily driven by a \$2.4 million increase in compensation costs due to an increase in headcount, and increased external costs related to product development and clinical studies, offset by the absence of \$0.3 million of allocation expense from Integra that was reported for the nine months ended September 30, 2015.

Provision (benefit) for income taxes	(559)	2,130
Effective tax rate	1.6	% (5.4)%

We reported income tax expense for the nine months ended September 30, 2015 related to the taxable income generated by our U.S. subsidiary that was not part of the U.S. consolidated tax group as of August 31, 2015. As such, despite the reported losses before income taxes in those periods, the taxable income generated by such U.S. subsidiary was not allowed to be offset against the taxable losses generated by our other U.S. subsidiaries through August 31, 2015. Effective September 1, 2015, we made an

27

Table of Contents

election that allows us to offset any future taxable losses generated by our U.S. subsidiaries against any future taxable income generated by our U.S. subsidiaries.

We reported an income tax benefit for the nine months ended September 30, 2016 which was primarily the result of a refund of tax initially paid toward the income tax return for our U.S. subsidiary which was not part of the U.S. consolidated tax group for the tax period January 1, 2015 through August 31, 2015. The Company also recorded a tax benefit related to the reversal of a liability recorded under ASC 740-10 due to the expiration of the statute of limitations. In addition, for all periods presented, the pretax losses incurred by the consolidated U.S. tax group received no corresponding tax benefit because we have concluded that it is more likely than not that we will be unable to realize the value of any resulting deferred tax assets.

The income tax provision in the consolidated statements of operations for periods prior to the spin-off was calculated using the separate return method, as if we had filed a separate tax return and operated as a stand-alone business. However, because Integra historically generated taxable income in excess of our pretax losses incurred prior to the spin-off and all of our U.S. subsidiaries that incurred these pretax losses were included in Integra's U.S. consolidated tax group, those pretax losses were more than offset by Integra's taxable income. Therefore, there were no U.S. net operating losses available to us for future use at the date of the spin-off.

Business Factors Affecting the Results of Operations

Special Charges

We define special charges as expenses for which the amount or timing can vary significantly from period to period, and for which the amounts are non-cash in nature, or the amounts are not expected to recur at the same magnitude. We believe that identification of these special charges provides important supplemental information to investors regarding financial and business trends relating to our financial condition and results of operations. Investors may find this information useful in assessing comparability of our operating performance from period to period, against the business model objectives that management has established, and against other companies in our industry. We provide this information to investors so that they can analyze our operating results in the same way that management does and use this information in their assessment of the core business and valuation of SeaSpine.

Loss before income taxes includes the following special charges:

	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	2015
	(In thousands)	(In thousands)	
Global ERP implementation charges	\$—	\$—	\$95
SeaSpine spin-off related charges	— 2,500	—	17,278
Transition services agreement charges	— 1,800	264	1,800
Total	\$— 4,300	\$264	\$19,173

The items reported above are reflected in the consolidated statements of operations as follows:

Three Months Ended September 30,	Nine Months Ended September 30,
--	---------------------------------------

	2015	2016	2015
	(In thousands)	(In thousands)	
Cost of goods sold	\$ 436	\$ —	\$ 563
Selling, general and administrative	3,864	264	18,610
Total	\$ 4,300	\$ 264	\$ 19,173

These special charges are directly related to the SeaSpine business and do not include allocations from Integra. SeaSpine spin-off related charges include legal, accounting, program management and outside consulting expenses incurred as part of the spin-off from Integra, and incremental personnel costs associated with becoming an independent, publicly-traded company.

Liquidity and Capital Resources Overview

Table of Contents

As of September 30, 2016, we had cash and cash equivalents totaling approximately \$20.8 million, and \$26.2 million of borrowing capacity was available under a credit facility that we entered into in December 2015, which expires in December 2018, subject to a one-year extension at our election. At September 30, 2016, there was \$3.8 million outstanding under this credit facility. The credit facility contains various customary affirmative and negative covenants agreed to by us, including prohibiting us from incurring indebtedness without the lender's consent. The credit facility also includes a financial covenant that requires us to maintain a minimum fixed charge coverage ratio of 1.10 to 1.00 for the applicable measurement period if our Total Liquidity (as defined in the credit facility) is less than \$5.0 million. We were in compliance with that covenant at September 30, 2016.

At September 30, 2016, there was also \$0.8 million short-term debt outstanding under the insurance premium financing agreements we entered into in July 2016. For more information regarding the credit facility and the insurance premium financing agreements, see Note 3 "Debt and Interest" to the Notes to Unaudited Condensed Consolidated Financial Statements included elsewhere in this report.

In August 2016, we entered into an Asset Purchase Agreement with NLT to acquire certain of the assets of NLT's medical device business related to the expandable interbody medical devices. We made an upfront cash payment of \$1.0 million in connection with the initial closing in September 2016. The Company recorded a preliminary purchase accounting fair value estimate for \$2.3 million of contingent milestone payments related to the achievement of certain commercial milestones, which we anticipate will become payable at varying times between 2017 and 2020, and for \$2.9 million of contingent asset purchase payments based on percentages of the Company's future net sales of certain of the Medical Device Products, which we anticipate will become payable at varying times between 2017 and 2027. The milestone contingent payments are payable in cash or the Company's common stock, at the Company's election.

We believe that our cash and cash equivalents on hand and the amount available to us under our credit facility will be sufficient to fund our operations for at least the next twelve months.

Cash and Cash Equivalents

We had cash and cash equivalents totaling approximately \$20.8 million and \$33.4 million at September 30, 2016 and December 31, 2015, respectively.

Cash Flows

	Nine Months Ended	
	September 30,	September 30,
	2016	2015
	(In thousands)	
Net cash used in operating activities	\$(10,406)	\$(29,451)
Net cash used in investing activities	(6,857)	(9,976)
Net cash provided by financing activities	4,455	77,210
Effect of exchange rate changes on cash and cash equivalents	187	68
Net (decrease) increase in cash and cash equivalents	\$(12,621)	\$37,851

Net Cash Used in Operating Activities

Cash used in operating activities for the nine months ended September 30, 2016 decreased by \$19.0 million compared to the same period in 2015. Cash used in operating activities decreased primarily due to the absence of spin-off related charges. Among the changes in working capital, in the nine months ended September 30, 2016 compared to the prior year period, the decrease in accounts receivable and prepaid expenses and other current assets reduced cash used in operating activities by \$1.7 million collectively, and we spent \$8.8 million less cash on inventory, all of which was partially offset by a \$9.3 million increase in use of cash for accounts payable, accrued expenses and other liabilities.

Net Cash Used in Investing Activities

Net cash used in investing activities was \$6.9 million for the nine months ended September 30, 2016 compared to \$10.0 million for the same period in 2015. The decreased use of cash was primarily attributable to the completion of implementing a global ERP system during the second quarter of 2015, offset by the \$1.0 million cash payment associated with the NLT acquisition during the third quarter of 2016.

Table of Contents

Net Cash Provided by Financing Activities

Net cash provided by financing activities was \$4.5 million for the nine months ended September 30, 2016, comprised primarily of \$3.3 million we borrowed from the revolving line of credit in September 2016 under the credit facility we entered into in December 2015, and \$0.8 million we borrowed under the insurance premium financing agreements we entered into in July 2016, net of repayments. For more information regarding the credit facility and the insurance premium financing agreements, see Note 3 "Debt and Interest" to the Notes to Unaudited Condensed Consolidated Financial Statements included elsewhere in this report. The net cash provided by financing activities of \$77.2 million for the nine months ended September 30, 2015 was investment received from Integra prior to the spin-off.

Off-Balance Sheet Arrangements

There were no off-balance sheet arrangements as of September 30, 2016 that have or are reasonably likely to have, a current or future effect on our financial condition, revenues or expenses, results of operations, cash flows, liquidity, capital expenditures or capital resources that is material to our business.

Contractual Obligations and Commitments

There have been no material changes outside the ordinary course of our business in the contractual obligations disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Other Matters

Critical Accounting Estimates

The critical accounting estimates disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 have not materially changed.

Recently Issued Accounting Pronouncements

Information regarding new accounting pronouncements is included in Note 2, "Summary of Significant Accounting Policies," to the Notes to Unaudited Condensed Consolidated Financial Statements included elsewhere in this report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk exposures described in Part II, Item 7A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 have not changed materially during the nine months ended September 30, 2016.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of our management, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act were effective as of the end of the period covered by this report to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) under the Exchange Act that occurred during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations of Internal Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls over financial reporting will prevent or detect all error and all fraud. A control

30

Table of Contents

system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are subject to legal proceedings and claims in the ordinary course of business. While management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not materially harm our financial position, cash flows, or overall trends in results of operations, legal proceedings are subject to inherent uncertainties, and unfavorable rulings or outcomes could occur that have individually or in aggregate, a material adverse effect on our business, financial condition or operating results.

ITEM 1A. RISK FACTORS

The Risk Factors included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 filed with the SEC have not materially changed.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.
