STANDEX INTERNATIONAL CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1)

Management Statement

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary to present fairly the results of operations for the three and six months ended December 31, 2011 and 2010, the cash flows for the six months ended December 31, 2011 and 2010 and the financial position of the Company at December 31, 2011. The interim results are not necessarily indicative of results for a full year. The unaudited condensed consolidated financial statements and notes do not contain information which would substantially duplicate the disclosures contained in the audited annual consolidated financial statements and notes for the year ended June 30, 2011. The condensed consolidated balance sheet at June 30, 2011 was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. The financial statements contained herein should be read in conjunction with the Annual Report on Form 10-K and in particular the audited consolidated financial statements for the year ended June 30, 2011. Unless otherwise noted, references to years are to fiscal years.

The Company considers events or transactions that occur after the balance sheet date but before the financial statements are issued to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. We evaluated subsequent events through the date and time our unaudited condensed consolidated financial statements were issued.

Recently Issued Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board ("FASB") issued amended accounting guidance for goodwill in order to simplify how companies test goodwill for impairment. The amendments permit a company to first assess the qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events or circumstances, a company determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. We do not expect the adoption of this accounting pronouncement to have a material effect on our financial statements when implemented.

In June 2011, the FASB issued an amendment to the accounting guidance for presentation of comprehensive income. Under the amended guidance, a company may present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In either case, a company is required to present each component of net income along with total net income, each component of other comprehensive income along with a

total for other comprehensive income, and a total amount for comprehensive income. Regardless of choice in presentation, of which we are currently evaluating, a company is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. In December 2011, the FASB delayed indefinitely the portion of the guidance related to the presentation of reclassification adjustments in the income statement. For public companies, these amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and shall be applied retrospectively. Early adoption is permitted. Other than a change in presentation, the implementation of this accounting pronouncement is not expected to have a material impact on our financial statements when implemented.

In September 2011, the FASB issued an accounting standard update that requires employers that participate in multiemployer pension plans to provide additional quantitative and qualitative disclosures. The amended disclosures provide users with more detailed information about an employer's involvement in multiemployer pension plans and are effective for annual periods ending after December 15, 2011. Certain U.S. employees of the Company are covered by union-sponsored, multi-employer pension plans. We are currently evaluating the disclosure requirements of this accounting standard update.

2)

Asset Held For Sale

In December 2011, the Company entered into a plan to divest its Air Distribution Products (ADP) business unit in order to allow the Company to focus its financial assets and managerial resources on its remaining portfolio of businesses. The Company has concluded that all criteria of ASC 360-10 have been met as of December 31, 2011 to classify the business as an asset group held for sale. In conjunction with classifying ADP as held for sale, the Company has conducted an assessment of the recoverability of the net assets of the underlying business compared to its net realizable value based on a range of expected sale prices. As a result of this assessment, the Company has recorded impairment charges of \$14.9 million to goodwill and \$5.0 million to fixed assets in order to reflect the carrying value of ADP at its net realizable value. These charges are recorded as a component of discontinued operations. The Company expects a sale of ADP to be completed within 12 months.

As a result of this decision and the expected future sale, the Company is reporting the ADP segment as a discontinued operation for all periods presented in accordance with ASC 205-20. Results of the ADP segment in current and prior periods have been classified as discontinued in the Condensed Consolidated Financial Statements to exclude the results from continuing operations. The following selected financial data of the ADP segment for the three and six months ended December 31, 2011 and 2010 is presented for informational purposes only and does not necessarily reflect what the results of operations would have been had the businesses operated as a stand-alone entity (amounts in thousands).

3)

Fair Value Measurements

Certain of our assets and liabilities, shown below, are presented at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models may be applied.

Assets and liabilities recorded at fair value in our balance sheet are categorized based upon the level of judgment associated with the inputs used to measure their fair values. Hierarchical levels directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities and the methodologies used in valuation are as follows:

Level 1 Quoted prices in active markets for identical assets and liabilities. The Company s KEYSOP and deferred compensation plan assets consist of shares in various mutual funds (for the deferred compensation plan, investments are participant-directed) which invest in a broad portfolio of debt and equity securities. These assets are valued based on publicly quoted market prices for the funds shares as of the balance sheet dates.

Level 2 Inputs, other than quoted prices in an active market, that are observable either directly or indirectly through correlation with market data. For foreign exchange forward contracts and interest rate swaps, the Company values the instruments based on the market price of instruments with similar terms, which are based on spot and forward rates as of the balance sheet dates. The Company has considered the creditworthiness of counterparties in valuing all assets and liabilities

Level 3 Unobservable inputs based upon the Company s best estimate of what market participants would use in pricing the asset or liability. The Company does not hold any Level 3 instruments as of the balance sheet dates.

Cash and cash equivalents, accounts receivable, and accounts payable are carried at cost, which approximates fair value.

Items presented at fair value at December 31, 2011 and June 30, 2011 were (in thousands):
