UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016, or
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-10235
GENTEX CORPORATION
(Exact name of registrant as specified in its charter)

Michigan 38-2030505
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

600 N. Centennial, Zeeland, Michigan 49464
(Address of principal executive offices) (Zip Code)
(616) 772-1800
(Registrant’s telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes: No:

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes: No:

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by a check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes: No:

Edgar Filing: GENTEX CORP - Form 10-Q

APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PRECEDING FIVE YEARS:

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

Yes: No:

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Shares Outstanding, October 20, 2016
Common Stock, \$.06 Par Value	286,509,623

GENTEX CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Table of Contents

(1) Basis of Presentation

The unaudited condensed consolidated financial statements included herein have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. It is suggested that these unaudited condensed consolidated financial statements be read in conjunction with the financial statements and notes thereto included in the Company's 2015 annual report on Form 10-K. In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments, consisting of only a normal and recurring nature, necessary to present fairly the financial position of the Company as of September 30, 2016, and the results of operations and cash flows for the interim periods presented.

(2) Adoption of New Accounting Standards

In May 2014 the Financial Accounting Standards Board (FASB) issued the Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606), that will supersede nearly all existing revenue recognition guidance under US GAAP. The core principle of the guidance is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The standard was to originally be effective for public entities for annual and interim periods beginning after December 15, 2016. On July 9, 2015 the FASB decided to defer by one year the effective dates of the new standard for both public and nonpublic entities reporting under US GAAP. Early adoption would be permitted for all entities, but not before the original public entity effective date (i.e. annual and interim periods beginning after December 15, 2016).

Entities can choose to apply the standard using either the full retrospective approach or a modified retrospective approach. Entities electing the full retrospective adoption will apply the standard to each period presented in the financial statements. This means that entities will have to apply the new guidance as if it had been in effect since the inception of all its contracts with customers presented in the financial statements. Entities that elect the modified retrospective approach will apply the guidance retrospectively only to the most current period presented in the financial statements. This means that entities will have to recognize the cumulative effect of initially applying the new standard as an adjustment to the opening balance of retained earnings at the date of initial application. The new revenue standard will be applied to contracts that are in progress at the date of initial application.

The Company is currently evaluating which adoption method it plans to use and is assessing the potential effect the new standard will have on its consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, Balance Sheet Classification of Deferred Taxes, requiring all deferred tax assets and liabilities, and any related valuation allowance, to be classified as non-current on the balance sheet instead of separating deferred taxes into current and non-current amounts. The classification change for all deferred taxes as non-current simplifies entities' processes as it eliminates the need to separately identify the net current and net non-current deferred tax asset or liability in each jurisdiction and allocate valuation allowances. The guidance is effective for annual periods beginning after December 15, 2016. The Company adopted ASU No. 2015-17 in the first quarter of 2016 on a prospective basis. As such, prior periods were not retrospectively adjusted. Adoption

of this standard during the quarter ended March 31, 2016 resulted in the reclassification of approximately \$27 million of deferred income taxes from current assets to non-current liabilities.

In February 2016, the FASB issued ASU 2016-02, Leases, which provides guidance for lease accounting. The new guidance contained in the ASU stipulates that lessees will need to recognize a right-of-use asset

7

Table of Contents

and a lease liability for substantially all leases (other than leases that meet the definition of a short-term lease). The liability will be equal to the present value of lease payments. Treatment in the consolidated statements of earnings will be similar to the current treatment of operating and capital leases. The new guidance is effective on a modified retrospective basis for the Company in the first quarter of its fiscal year ending December 31, 2019. The Company is currently in the process of evaluating the impact of adoption of this standard on its consolidated financial statements. Upon adoption, the Company does not anticipate a material impact on the Company's Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-09, Stock Compensation, which identifies areas for simplification involving several aspects of accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, as well as certain classifications on the statement of cash flows. The guidance will be effective for the fiscal year beginning after December 15, 2016, including interim periods within that year. The Company is in the process of assessing the potential effect the new standard will have on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows, which updates the guidance as to how certain cash receipts and cash payments should be presented and classified within the statement of cash flows. The update is intended to reduce the existing diversity in practice. The amended guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, with early adoption permitted, including adoption in an interim period. The Company is in the process of assessing the potential effect the new standard will have on its consolidated financial statements.

(3) Goodwill and Other Intangible Assets

Goodwill represents the cost of an acquisition in excess of the fair values assigned to identifiable net assets acquired. The Company recorded Goodwill of \$307.4 million as part of the HomeLink® acquisition. The carrying value of Goodwill as of December 31, 2015 and September 30, 2016 was \$307.4 million.

In addition to annual impairment testing, which is performed as of the first day of the fourth quarter, the Company continuously monitors for events and circumstances that could negatively impact the key assumptions in determining fair value thus resulting in the need for interim impairment testing, including long-term revenue growth projections, profitability, discount rates, recent market valuations from transactions by comparable companies, volatility in the Company's market capitalization, and general industry, market and macroeconomic conditions. No such events or circumstances in the most recently completed quarter indicated the need for interim impairment testing.

The patents and intangible assets and related change in carrying values are set forth in the tables below:

As of September 30, 2016:

Other Intangible Assets	Gross	Accumulated Amortization	Net	Assumed Useful Life
Gentex Patents	\$32,302,452	\$(15,791,045)	\$16,511,407	various

Table of Contents

(3) Goodwill and Other Intangible Assets (continued)

As of December 31, 2015:

Other Intangible Assets	Gross	Accumulated Amortization	Net	Assumed Useful Life
Gentex Patents	\$31,873,665	\$(13,890,202)	\$17,983,463	various
HomeLink® Trade Names and Trademarks	\$52,000,000	\$—	\$52,000,000	Indefinite
HomeLink® Technology	180,000,000	(33,750,000)	\$146,250,000	12 years
Existing Customer Platforms	43,000,000	(9,675,000)	\$33,325,000	10 years
Exclusive Licensing Agreement	96,000,000	—	\$96,000,000	Indefinite
Total other identifiable intangible assets	\$371,000,000	\$(43,425,000)	\$327,575,000	
Total Patents & Other Intangible Assets	\$402,873,665	\$(57,315,202)	\$345,558,463	

Amortization expense on patents and intangible assets was approximately \$5.6 million and \$16.7 million during the three and nine month periods ended September 30, 2016, respectively, compared to approximately \$5.5 million and \$16.5 million for the same periods ended September 30, 2015, respectively.

Excluding the impact of any future acquisitions, the Company continues to estimate amortization expense for each of the years ended December 31, 2016, 2017, 2018, 2019 and 2020 to be approximately \$22 million annually.

(4) Investments

The Company follows the provisions of ASC 820, "Fair Value Measurements and Disclosures" for its financial assets and liabilities, and for its non-financial assets and liabilities subject to fair value measurements. ASC 820 provides a framework for measuring the fair value of assets and liabilities. This framework is intended to provide increased consistency in how fair value determinations are made under various existing accounting standards that permit, or in some cases, require estimates of fair-market value. This standard also expanded financial statement disclosure requirements about a company's use of fair-value measurements, including the effect of such measure on earnings. The cost of securities sold is based on the specific identification method.

The Company's investment securities (common stocks and mutual funds) are classified as available for sale and are stated at fair value based on quoted market prices, and as such are classified as Level 1 assets.

The Company's certificates of deposit have remaining maturities of less than one year and are classified as available for sale, and are considered as Level 1 assets. These investments are carried at cost, which approximates fair value. Assets or liabilities that have recurring fair value measurements are shown below as of September 30, 2016, and December 31, 2015:

(Unaudited)

Table of Contents

(4) Investments (continued)

investment portfolio for any unrealized losses that would be deemed other-than-temporary and require the recognition of an impairment loss in income. If the cost of an investment exceeds its fair value, the Company evaluates, among other factors, general market conditions, the duration and extent to which the fair value is less than cost, and the Company's intent and ability to hold the investments. Management also considers the type of security, related-industry and sector performance, as well as published investment ratings and analyst reports, to evaluate its portfolio. Once a decline in fair value is determined to be other than temporary, an impairment charge is recorded and a new cost basis in the investment is established. If market, industry, and/or investee conditions deteriorate, the Company may incur future impairments. No equity investment losses were considered to be other than temporary during the periods presented.

Fixed income securities as of September 30, 2016, have contractual maturities as follows:

(7) Stock-Based Compensation Plans

As of September 30, 2016, the Company had four equity incentive plans which include two stock option plans, a restricted stock plan and an employee stock purchase plan. All plans and any prior material amendments thereto have previously been approved by shareholders. Readers should refer to Note 5 of our consolidated financial statements in our Annual Report on Form 10-K for the calendar year ended December 31, 2015, for additional information related to these stock-based compensation plans.

The Company recognized compensation expense for share-based payments of \$3,724,780 and \$11,558,462 for the three and nine months ended September 30, 2016, respectively and \$4,404,297 and \$13,979,297 for the three and nine months ended September 30, 2015, respectively. Compensation cost capitalized as part of inventory as of September 30, 2016 and 2015 was \$317,315 and \$279,903, respectively.

Employee Stock Option Plan

The Company has an employee stock option plan covering 24,000,000 shares of common stock. The purpose of the plan is to provide an opportunity to use stock options as a means of recruiting new managerial and technical personnel and as a means for retaining certain employees of the Company and allow them to purchase shares of common stock of the Corporation and thereby have an additional incentive to contribute to the prosperity of the Company.

The fair value of each option grant in the employee stock option plan was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions for the indicated periods:

	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Dividend Yield ⁽¹⁾	2.19 %	2.12 %	2.17 %	2.13 %
Expected volatility ⁽²⁾	32.19%	35.81%	33.62%	36.10%
Risk-free interest rate ⁽³⁾	1.14 %	1.37 %	1.18 %	1.56 %
Expected term of options (years) ⁽⁴⁾	4.29	4.31	4.26	4.97
Weighted-avg. grant date fair value	\$3.91	\$3.94	\$3.74	\$4.47

(1) Represents the Company's estimated cash dividend yield over the expected term of option grant.

Amount is determined based on analysis of historical price volatility of the Company's common stock. The

(2) expected volatility is based on the daily percentage change in the price of the stock over a period equal to the expected term of the option grant.

(3) Represents the U.S. Treasury yield over the expected term of the option grant.

Represents the period of time that options granted are expected to be outstanding. Based on analysis of historical

(4) option exercise activity, the Company has determined that all employee groups exhibit similar exercise and post-vesting termination behavior.

Under the employee stock option plan, the option exercise price equals the stock's market price on date of grant. The options vest after one to five years, and expire after five to seven years. As of September 30, 2016, there was \$18,589,743 of unrecognized compensation cost related to share-based payments which is expected to be recognized over the vesting periods.

Non-employee Director Stock Option Plan

The Company has a non-employee director stock option plan covering 1,000,000 shares of common stock. As of September 30, 2016, there was \$66,324 of unrecognized compensation cost under the non-employee director plan

related to share-based payments. The Company has granted options on 371,000 shares under the non-employee director plan through September 30, 2016. Under the non-employee director plan, the

GENTEX CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(7) Stock-Based Compensation Plans (continued)

option exercise price equals the stock's market price on the date of grant. The options vest after six months, and expire after ten years.

Employee Stock Purchase Plan

The Company has an employee stock purchase plan covering 2,000,000 shares of common stock. Under the plan, the Company sells shares at 85% of the stock's market price at date of purchase. Under ASC 718, the 15% discounted value is recognized as compensation expense. As of September 30, 2016, the Company has granted 585,668 shares under this plan.

Restricted Stock Plan

The Company has a restricted stock plan covering 9,000,000 shares of common stock. The purpose of the restricted stock plan is to permit grants of shares, subject to restrictions, to employees of the Company as a means of retaining and rewarding them for long-term performance and to increase their ownership in the Company. Shares awarded under the restricted stock plan entitle the shareholder to all rights of common stock ownership except that the shares may not be sold, transferred, pledged, exchanged or otherwise disposed of during the restriction period. The restriction period is determined by the Compensation Committee, appointed by the Board of Directors, but may not exceed ten years under the terms of the plan. As of September 30, 2016, the Company had unearned stock-based compensation of \$11,816,334 associated with these restricted stock grants. The unearned stock-based compensation related to these grants is being amortized to compensation expense over the applicable restriction periods. Amortization expense from restricted stock grants in the three and nine months ended September 30, 2016 was \$1,001,100 and \$2,944,845.

Table of Contents

(8) Comprehensive Income

Comprehensive income reflects the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. For the Company, comprehensive income represents net income adjusted for unrealized gains and losses on certain investments, foreign currency translation adjustments, and derivatives.

The following table presents the net changes in the Company's accumulated other comprehensive income (loss) by component: (All amounts shown are net of tax).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015

(9) Debt and Financing Arrangements

Credit Agreement

On September 27, 2013, the Company entered into a Credit Agreement (“Credit Agreement”) with certain banks and agents.

Pursuant to the Credit Agreement, the Company is borrower under a \$150 million senior revolving credit facility (“Revolver”) and a \$150 million term loan facility (“Term Loan”). Under the terms of the Credit Agreement, the Company is entitled, to further request an additional aggregate principal amount of up to \$75 million, subject to the satisfaction of certain conditions. In addition, the Company is entitled to the benefit of swing loans from amounts otherwise available under the Revolver in the aggregate principal amount of up to \$20 million and to request Letters of Credit from amounts otherwise available under the Revolver in the aggregate principle amount up to \$20 million, both subject to certain conditions. The obligations of the Company under the Credit Agreement are not secured, but are subject to certain covenants. The Revolver expires and the Term Loan matures on September 27, 2018.

During the three and nine months ended September 30, 2016, the Company made principal repayments of \$11.8 million and \$30.6 million respectively, plus accrued interest, on the Term Loan and Revolver. The aforementioned payments include a payment made by the Company of \$15.0 million on the Revolver during the first quarter of 2016 and a payment of \$10.0 million on the Revolver during the third quarter of 2016, which was in addition to scheduled amounts due. The Company used cash and cash equivalents to fund the payments. As of September 30, 2016, \$75.7

million was outstanding on the Revolver with availability of an additional \$74.3 million. Under current terms of the Term Loan, the Company will make principal repayments of \$7.5 million annually through the maturity date of the Term Loan. As of September 30, 2016, \$127.5 million was outstanding under the Term Loan.

As of September 30, 2016, the borrowing rate on both its Term Loan and Revolver are derived from the one month LIBOR, and based on the Company's leverage ratio as of September 30, 2016, the interest rate on its

GENTEX CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

(9) Debt and Financing Arrangements (continued)

borrowings is equal to 1.53%. Interest expense is netted within the "Other, net" section of the Condensed Consolidated Statements of Income, and interest expense associated with the Term Loan and Revolver was \$0.8 million and \$2.5 million during the three and nine months ended September 30, 2016, respectively, and \$0.8 million and \$2.4 million during the three and nine months ended September 30, 2015.

The Credit Agreement contains customary representations and warranties and certain covenants that place certain limitations on the Company.

As of September 30, 2016, the Company was in compliance with its covenants under the Credit Agreement.

Interest Rate Swap

On October 1, 2014 the Company entered into an interest rate swap transaction with a bank ("Counterparty"). The Counterparty is among the syndicate of lenders under the existing Credit Agreement entered into on September 27, 2013. The Company entered into the interest rate swap transaction to mitigate the Company's floating rate interest risk on an aggregate of \$150 million of the Company's debt that is currently outstanding under the Credit Agreement. The interest rate swap has an effective date of July 31, 2015 and a termination date of September 27, 2018 (which is the expiration date of the Credit Agreement). The Company is required to make certain monthly fixed rate payments to the Counterparty calculated on a notional amount of \$150 million for the rate swap, while the Counterparty is obligated to make monthly floating rate payments to the Company referencing the same notional amount. The interest rate swap transaction has the effect of fixing the annual interest rate payable on \$150 million of the Company's outstanding debt under its existing credit facility to 1.89%, as of the effective date. The notional amounts of the interest rate swap agreement are used to measure interest to be paid or received and do not represent the amount of exposure to credit loss. This derivative instrument has been designated as a cash flow hedge of the variable interest payments on the related debt.

Interest expense are netted within the "Other, net" section of the Condensed Consolidated Statements of Income, and interest expense associated with the interest rate swap was \$0.5 million and \$1.6 million during the three and nine months ended September 30, 2016, respectively, and \$0.5 million during both the three and nine months ended September 30, 2015.

Notwithstanding the terms of the interest rate swap transaction, the Company is ultimately obligated for all amounts due and payable under its existing Credit Agreement.

The notional amount of the Company's derivative instruments are as follows:

	September 30, 2016	December 31, 2015
Interest Rate swap	\$ 150,000,000	\$ 150,000,000

The following table sets forth financial assets and liabilities measured at fair value related to the interest rate swap agreement and the respective pricing levels to which the fair value measurements are classified within the fair value hierarchy. The Company uses the market approach to derive the value of its level 2 fair value measurements. Interest rate swaps are valued using publicized swap curves.

GENTEX CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

(9) Debt and Financing Arrangements (continued)

Fair Value Measurements

Quoted Prices with Other Observable Inputs (Level 2)

	September 30, 2016	December 31, 2015
Financial assets:		
Interest Rate Swap Asset	\$ —	\$ —
Financial Liabilities:		
Interest Rate Swap Liability (Other Accrued Liabilities)	\$ 3,349,240	\$ 2,947,438

Based on loan balances as of September 30, 2016 and the effective date of July 31, 2015 of the interest rate swap, a one percent increase in the Company's borrowing rate would increase net interest expense paid by the Company on its borrowings by approximately \$0.5 million dollars on an annual basis.

(10) Equity

The decrease in common stock during the nine months ended September 30, 2016, was primarily due to share repurchases of 8,041,358 shares pursuant to the Company's previously announced share repurchase plan, which was partially offset by the issuance of 4,632,945 shares of the Company's common stock under the Company's stock-based compensation plans for a net decrease of 3,408,413 shares.

The Company announced a \$.005 per share increase in its quarterly cash dividend rate during the second quarter of 2016. As such, the Company recorded a cash dividend of \$0.090 during the second and third quarters of 2016 as compared to a cash dividend of \$.085 per share during the first quarter of 2016. The third quarter 2016 dividend of \$25.9 million, was declared on August 31, 2016, and was paid on October 19, 2016.

(11) Contingencies

The Company is periodically involved in legal proceedings, legal actions and claims arising in the normal course of business, including proceedings relating to product liability, intellectual property, safety and health, employment and other matters. Such matters are subject to many uncertainties and outcomes are not predictable. The Company does not believe, however, that at the current time any of these matters constitute material pending legal proceedings that will have a material adverse effect on the financial position or future results of operations of the Company.

(12) Segment Reporting

The Company's automotive segment develops and manufactures electro-optic products and electronics, including: automatic-dimming rearview mirrors with and without electronic features; non-auto dimming rearview automotive mirrors with and without electronic features; and other electronics. The Company also develops and manufactures variably dimming windows for the aerospace industry and fire protection products for the commercial construction industry, which are combined into the "Other" segment shown below.

	Three Months Ended		Nine Months Ended September	
	September 30,		30,	
	2016	2015	2016	2015
Revenue:				
Automotive Products	\$419,793,577	\$379,889,957	\$1,228,165,639	\$1,111,009,546
Other	9,849,699	9,939,182	30,846,201	27,015,525
Total	\$429,643,276	\$389,829,139	\$1,259,011,840	\$1,138,025,071
Income from operations:				
Automotive Products	\$130,567,201	\$112,238,938	\$372,119,627	\$322,289,461
Other	3,645,080	4,023,682	11,687,365	9,814,495
Total	\$134,212,281	\$116,262,620	\$383,806,992	\$332,103,956

(13) Income Taxes

The effective tax rate was 32.2% in the nine months ended September 30, 2016 compared to 31.3% for the same period in 2015. Effective tax rates for these quarters differ from statutory federal income tax rates, primarily due to the domestic manufacturing deduction, provisions for state and local income taxes and permanent tax differences. The increase in the effective tax rate for the nine months ended September 30, 2016 compared to the same period of 2015 is primarily due to the reversal of \$3.9 million of the uncertain tax position related to the incremental research and development tax credits as a result of the Internal Revenue Service concluding audits for the Company's amended filings for calendar years 2010 through 2012, in the first quarter of 2015.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

RESULTS OF OPERATIONS:

THIRD QUARTER 2016 VERSUS THIRD QUARTER 2015

Net Sales. Net sales for the third quarter of 2016 increased by \$39.8 million or 10% when compared with the third quarter of 2015.

Automotive net sales for the third quarter of 2016 increased 11% to \$419.8 million, compared with automotive net sales of \$379.9 million in the third quarter of 2015, driven primarily by a 9% quarter-over-quarter increase in automotive mirror unit shipments and favorable shifts in product mix. North American automotive mirror unit shipments in the third quarter of 2016 increased 2% to 3.2 million units compared with the third quarter of 2015, primarily due to increased penetration of the Company's exterior auto-dimming mirrors. International automotive mirror unit shipments in the third quarter of 2016 increased 14% to 5.9 million units compared with the third quarter of 2015, primarily due to increased penetration of the Company's interior and exterior auto-dimming mirrors.

The below table represents the Company's auto dimming mirror unit shipments for the three and nine months ended September 30, 2016 and 2015. (in thousands)

	Three Months Ended			Nine Months Ended

North American Interior Mirrors	2,259	2,242	1 %	6,835	6,451	6 %
North American Exterior Mirrors	921	871	6 %	2,714	2,462	10 %
Total North American Mirror Units	3,179	3,114	2 %	9,549	8,913	7 %
International Interior Mirrors	4,258	3,669	16 %	12,771	10,903	17 %
International Exterior Mirrors	1,675	1,541	9 %	4,887	4,614	6 %
Total International Mirror Units	5,933	5,210	14 %	17,658	15,517	14 %
Total Interior Mirrors	6,517	5,911	10 %	19,606	17,354	13 %
Total Exterior Mirrors	2,596	2,412	8 %	7,601	7,076	7 %
Total Auto-Dimming Mirror Units	9,113	8,324	9 %	27,207	24,430	11 %

Note: Percent change and amounts may not total due to rounding.

Other net sales were \$9.8 million in the third quarter of 2016, relatively consistent with \$9.9 million in the third quarter of 2015.

Cost of Goods Sold. As a percentage of net sales, cost of goods sold decreased to 59.5% for the third quarter of 2016 versus 61.0% in the third quarter of 2015. The quarter over quarter increase in the gross profit margin was driven by purchasing cost reductions and favorable product mix, which more than offset annual customer price reductions. Purchasing cost reductions and favorable product mix each had a positive impact of approximately 100 - 150 basis points, while annual customer price reductions had a similar negative impact.

Operating Expenses. Engineering, research and development (E, R & D) expenses for the third quarter of 2016 increased 10% or \$2.1 million when compared with the third quarter of 2015, primarily due to increased staffing levels which continue to support growth and the development of new business.

Selling, general and administrative (S, G & A) expenses increased by 13% or \$1.9 million for the third quarter of 2016 compared to the third quarter of 2015. S, G & A expenses, notwithstanding the quarter over quarter increase, remained

at approximately 4% of net sales in the third quarter of 2016 compared to the third quarter of 2015. S, G, & A expenses increased primarily due to increased staffing levels and benefits.

Total operating expenses were \$39.6 million in the third quarter of 2016, which increased 11% or \$4.0 million from \$35.6 million in the third quarter of 2015.

Table of Contents

Total Other (Loss) Income. Total other income for the third quarter of 2016 increased by \$0.3 million when compared with the third quarter of 2015, primarily due to higher realized gains on the sale of equity investments in the third quarter of 2016 versus the same quarter in the prior year.

Provision for Income Taxes. The effective tax rate was 31.5% in the third quarter of 2016 compared to 32.5% for same quarter of 2015. Effective tax rates differ from statutory federal income tax rates, primarily due to the domestic manufacturing deduction, provisions for state and local income taxes and permanent tax differences.

Net Income. Net income for the third quarter of 2016 increased by \$13.7 million or 18% when compared with the third quarter of 2015, due to increases in sales and increases in operating income as a result of the improved gross margin and consistent financial discipline in the Company's operating expense growth.

NINE MONTHS ENDED SEPTEMBER 30, 2016 VERSUS NINE MONTHS ENDED SEPTEMBER 30, 2015

Net Sales. Net sales for the nine months ended September 30, 2016 increased by \$121.0 million or 10.6% when compared with the same period in 2015.

Automotive net sales for the first nine months of 2016 were \$1.2 billion, up 11% compared with automotive net sales of \$1.1 billion for the first nine months of 2015, driven by a 11% period over period increase in automotive mirror unit shipments. North American automotive mirror unit shipments in the nine months ended September 30, 2016 increased 7% to 9.5 million units compared with same period in 2015, primarily due to increased penetration of the Company's interior and exterior auto-dimming mirrors. International automotive mirror unit shipments in the nine months ended September 30, 2016 increased 14% to 17.7 million units compared with the same period in 2015 primarily due to increased penetration of the Company's interior and exterior auto-dimming mirrors.

Cost of Goods Sold. As a percentage of net sales, cost of goods sold decreased to 60.3% for the first nine months of 2016, versus 61.3% in the same period last year. The increase in gross margin on a year to date basis was primarily due to purchasing cost reductions and favorable product mix, which more than offset annual customer price reductions. Purchasing cost reductions had a positive impact on cost of good sold of approximately 100 - 125 basis points and annual customer price reductions had a negative impact of approximately 100 - 150 basis points. Product mix impacted cost of goods sold independently as a percentage of net sales by approximately 25 - 50 basis points.

Operating Expenses. Engineering, research and development (E, R & D) expenses for the nine months ended September 30, 2016 increased 6.6% or \$4.3 million when compared with the same period last year, primarily due to increased staffing and testing and prototype expense, which continue due to development and launch of new business. Selling, general and administrative (S, G & A) expenses for the first nine months of 2016 increased 6.3% or \$2.7 million when compared with the same period last year, primarily due to increases in staffing and benefits, which were partially offset by severance related costs in 2015, which did not recur in 2016.

Total Other Income. Total other income for the nine months ended September 30, 2016 decreased by \$5.1 million when compared with the same period last year, primarily due to reduced realized gains on sales of equity investments in the first six months of 2016, which were offset by increased realized gains in the third quarter, compared to the first nine months of 2015.

Taxes. The effective tax rate was 32.2% for the nine months ended September 30, 2016 compared to 31.3% for same period of 2015. The increase in the effective tax rate for the third quarter of 2016 compared to the third quarter of 2015 is primarily due to the reversal of \$3.9 million of the uncertain tax position related to the incremental research and development tax credits as a result of the Internal Revenue Service concluding audits for the Company's amended filings for calendar years 2010 through 2012, in the first quarter of 2015.

Net Income. Net income for the nine months ended September 30, 2016 increased by \$28.8 million or 12.5% to \$259 million versus \$230 million in the same period last year, due to increases in sales and operating income which more than offset lower other income and higher income taxes period over period.

Table of Contents

FINANCIAL CONDITION:

The Company's cash and cash equivalents as of September 30, 2016 was \$534.5 million, which decreased approximately \$17.0 million compared to \$551.6 million as of December 31, 2015. The decrease was primarily due to purchases of investments, capital expenditures, accelerated debt repayments, and share repurchases, but was partially offset by cash flow from operations during the nine months ended September 30, 2016.

Short-term investments as of September 30, 2016 were \$152.2 million, up from \$4.5 million as of December 31, 2015 and Long-term investments were \$57.5 million as of September 30, 2016, down from \$95.2 million as of December 31, 2015, due to changes in the Company's overall investment portfolio.

Accounts receivable as of September 30, 2016 increased approximately \$33.3 million compared to December 31, 2015, primarily due to the higher sales level as well as timing of sales within the quarters.

Inventories as of September 30, 2016 increased approximately \$4.7 million when compared to December 31, 2015, primarily due to increases in work-in-process and finished goods inventory.

Prepaid expenses and other as of September 30, 2016 decreased approximately \$43.8 million when compared to December 31, 2015, primarily due to the reclassification of approximately \$27 million of deferred income taxes from current assets to non-current deferred tax liabilities as a result of the adoption of ASU No. 2015-17, further explained in Note 2 to the Unaudited Condensed Consolidated Financial Statements.

Accounts payable as of September 30, 2016 increased approximately \$4.6 million when compared to December 31, 2015 primarily due to increased purchases of raw materials to meet forecasted production demand and capital expenditures.

Accrued liabilities as of September 30, 2016 increased approximately \$20.8 million compared to December 31, 2015, primarily due to increases in accrued wages, reflecting the timing of certain compensation payments.

Long term debt as of September 30, 2016 decreased by \$30.6 million compared to December 31, 2015, due to the Company's principal repayments on its term and revolver loans, further explained in Note 9 to the Unaudited Condensed Consolidated Financial Statements.

Cash flow from operating activities for the nine months ended September 30, 2016, increased \$69.9 million to \$353.0 million, compared with \$283.2 million during the same nine month period last year, primarily due to increases in net income and changes in working capital.

Capital expenditures for the nine months ended September 30, 2016 were approximately \$91.5 million, compared with approximately \$62.3 million for the same nine month period last year.

The Company believes its existing and planned facilities are currently suitable, adequate, and have the capacity required for current and near-term planned business. Nevertheless, the Company continues to evaluate longer term facilities needs. As a result, in 2014, the Company began construction of a 250,000 square-foot manufacturing and distribution facility located at a 140 acre site in Zeeland Michigan, where the Company previously performed master planning and completed land infrastructure improvements. The total cost of the building project is expected to be approximately \$55 - \$60 million and will be funded with cash and cash equivalents on hand. The distribution portion of the facility is currently operational, and the manufacturing portion will be operational in early 2017. Once operational, the Company expects that this building will add capacity to produce an additional 10 - 15 million mirrors annually, depending on product mix and overall use of the building.

The Company estimates that it currently has building capacity to manufacture approximately 25 - 27 million interior mirror units annually and approximately 15 - 20 million exterior mirror units annually, based on current product mix. The Company evaluates equipment capacity on an ongoing basis and adds equipment as needed.

Management considers the current working capital and long-term investments, as well as the debt financing arrangement (not withstanding its prohibitions on incurring additional indebtedness), discussed further in Note 9 to the Unaudited Condensed Consolidated Financial Statements, in addition to internally generated cash flow, to be sufficient to cover anticipated cash needs for the foreseeable future considering its contractual obligations and commitments. The following is a summary of working capital and long-term investments:

Table of Contents

	September 30, 2016	December 31, 2015
Working Capital	\$952,336,857	\$853,002,246
Long Term Investments	57,458,514	95,156,539
Total	\$1,009,795,371	\$948,158,785

The increase in working capital as of September 30, 2016 was negatively impacted due to the reclassification of approximately \$27 million of deferred income taxes to non-current deferred tax liability as a result of the adoption of ASU No. 2015-17, further explained in Note 2 to the Unaudited Condensed Consolidated Financial Statements.

The Company has a previously announced share repurchase plan under which the Board of Directors has authorized the repurchase of shares of the Company's common stock based on market conditions, the market price of the stock, anti-dilutive effect on earnings, available cash and other factors that the Company deems appropriate. During the three and nine months ended September 30, 2016, the Company repurchased 1,836,312 and 8,041,358 shares, respectively, under this share repurchase plan. The Company has 9,010,589 shares remaining under the plan as of September 30, 2016, as is further detailed in Part II, Item 2 of this Form 10-Q.

Table of Contents

BUSINESS UPDATE

The Company's unit growth continues to outpace vehicle production growth in large part due to the many different product launches that have been executed in 2015 and year to date in 2016. The Company's unit and revenue growth continues to be driven by the Company's electrochromic technology, including a number of vehicles as new applications.

Interior and exterior auto-dimming mirrors and advanced electronic features were launched on 11 vehicle models during the first quarter of 2016, 24 vehicle models during the second quarter of 2016 and 21 vehicle models during the third quarter of 2016. The launches in the third quarter were reduced by some minor losses of content on 6 nameplates, meaning the 21 nameplates were the number of launches net of losses. Of the product launches for the first nine months of 2016, approximately 20 of the launches represent advanced feature launches. Historically, the Company has been able to deliver higher than average margins when it has added electronic content faster than unit growth when combined with growth in unit penetration. These additional vehicle models offering the Company's interior, exterior, and advanced feature products, as well as further penetration of its products on existing models, helped drive a 10% organic growth rate for interior mirrors and a 8% organic growth rate for exterior mirrors during the third quarter of 2016 compared to the same quarter in the prior year, against a slight quarter over quarter decrease in light vehicle production in the Company's primary markets. Electronic feature content has contributed to the growth rate in 2016, despite the impact of annual customer price reductions in the range of approximately 2 to 3%.

SmartBeam® is the Company's proprietary high beam control system integrated into its auto-dimming mirror. SmartBeam® Generation 4, which was developed using the fourth generation of the Company's custom designed CMOS imager, has an advanced feature set made possible by the high dynamic range of the imager including: high beam assist; dynamic forward lighting with high beams constantly on; LED matrix beam; and a variety of specific detection applications including tunnel, fog and road type as well as certain lane tracking features to assist with lighting control. The Company believes it has a unique advantage in the automotive industry with SmartBeam®. The camera chip is designed by the Company specifically for certain driver assist applications, with custom optics and algorithms written by the Company and specifically tailored for its chip and optical systems. The Company has the ability to package the control electronics inside of its interior rearview mirrors with a self-calibrating camera attached to the mirror mount with optimal mechanical packaging which also provides for ease of service. Competing products attach their camera and electronics directly to the windshield, which causes additional maintenance in the event of a windshield replacement. In addition, the Company has long been integrating its camera products to optimize performance by fusing with other systems on the vehicle, including radar, navigation, steering and related modules provided by other suppliers. This enables the Company to provide its customers with a highly customizable solution that meets their unique needs and specifications.

On December 8, 2015 the National Highway Traffic Safety Administration (NHTSA) proposed changes to the NHTSA's 5-Star Safety Ratings for new vehicles (also known as the New Car Assessment Program or NCAP) and initiated a comment period. The proposed changes will, for the first time, encompass assessment of crash-avoidance technologies, which includes lower beam headlamp performance, semi-automatic headlamp switching, and blind spot detection. At this time, NHTSA intends to implement the enhancements in NCAP in 2018 beginning with model year 2019 vehicles. The Company believes that its SmartBeam® technology will qualify with the semi-automatic headlamp NCAP rating system, and that its SmartBeam® technology and exterior mirrors with blind spot alert lighting can be included in a system that qualifies with the lower beam headlamp performance and blind spot detection NCAP rating system, respectively.

HomeLink® is a vehicle to home communication system that enables many home automation functions with the simple push of a button. In 2016, HomeLink® continues to be a growth driver of the business as consumers and automakers continue to increase their demand for this type of functionality in the vehicle. HomeLink® V, which

combines bi-directional communication capability for access barriers (e.g., garage doors and gates), lights, locks, and security systems with the ability to function across the globe, provides the Company with a technology platform for innovative, new applications in the vehicle environment. In 2014, the Company announced HomeLink® for applications for alternative automobile and vehicle types which include but are not limited to motorcycles, mopeds, snowmobiles, tractors, combines, lawn mowers, loaders, bulldozers, road-graders, backhoes and golf carts. These product developments will utilize the market leading HomeLink® V system of communication to the home, door locks, access barriers (e.g., garage doors and gates), lights, security systems, and an increasing array of home automation products. The Company has also been working

Table of Contents

with compatibility partners for HomeLink® applications in new markets like China. The unique attributes of the China market allow for potential new use cases of this product and offer what the Company believes to be a real opportunity for growth of the HomeLink® brand and product.

Another advanced electronic feature that the Company has announced is its Full Display Mirror®. The Full Display Mirror® began production in the fourth quarter of 2015. When it comes to driving safety, seeing what is behind you in the rearview mirror is critical. Current automotive design trends are yielding vehicles with small rear windows that are often further obstructed by headrests, passengers, and roof support pillars. These factors can significantly hinder the mirror's rearward view. The Company's Full Display Mirror® is an intelligent rear vision system that uses a custom, externally mounted video camera and mirror-integrated video display to optimize a vehicle's rearward view. This rear vision system consists of a hybrid Full Display Mirror® that offers bi-modal functionality. In mirror mode, the product functions as an auto-dimming rearview mirror which means that during nighttime driving, digital light sensors talk to one another via a microprocessor to automatically darken the mirror when glare is detected. However, with the flip of a switch, the mirror enters display mode, and a clear, bright display appears through the mirror's reflective surface, providing a wide, unobstructed rearward view. The bi-modality of the Full Display Mirror® is essential, because in the event of any failure of the camera or display, the product is able to function as a standard mirror, which is a long-standing safety requirement in the automotive industry. In addition, the driver has the ability to switch between modes to accommodate usage preferences for various weather conditions, lighting conditions, and driving tasks. The Company continues to work on the development and launch of the Full Display Mirror® for its initial four customers. The Company is also seeing interest from the Company's other automotive OEM's as well. The Company has also announced that a fifth OEM has sourced the Company as a supplier of this relatively new technology. The interest in this product is further demonstrated by the fact that several others have begun to show product concepts meant to address a similar use case. The Company believes the Full Display Mirror® provides a unique product offering by combining all relevant technologies into one unit that includes the Company's electrochromic technology. The Company believes it is marketing a very unique, customized solution to OEM's that the Company anticipates will provide tremendous value for not only the OEM but also the consumer. Although the Company expects that there will be competing products, the Company still believes this product addresses all scenarios and thereby provides a unique solution that combines mirror, displays, electrochromics, and the full suite of the Company's other electronic technologies.

As a complement to the Full Display Mirror®, the Company has developed a video camera system designed for today's advanced automotive display application requirements using its proprietary CMOS imager. The Company believes that its CMOS imager has a competitive advantage in video applications due to certain performance and cost advantages when combining the Full Display Mirror® into a full system. The Company's Full Display Mirror® and video camera are designed as a system and employ some of the latest technological advances in automotive video cameras and displays. In some cases, however, certain OEM's already have a preferred camera provider, and the Company works to seamlessly integrate other cameras provided and optimize those for use with the Full Display Mirror® system.

On March 31, 2014, the Alliance of Automobile Manufacturers petitioned NHTSA to allow automakers to use cameras as an option to replace conventional rearview mirrors within the United States, however, no final ruling or legislation was made in response to this petition. In July 2016, a revision to UN-ECE Regulation 46 was published with an effective date of June 18, 2016, which allows for camera monitor systems to replace mirrors within Japan and European countries. Notwithstanding the foregoing, the Company continues to believe rearview mirrors provide a robust, simple and cost effective means to view the surrounding areas of a vehicle and remain the primary safety function for rear vision today. Cameras when used as the primary rear vision delivery mechanism have some inherent limitations such as: electrical failure; cameras being blocked or obstructed; depth perception challenges; and viewing angle of the camera. Nonetheless, the Company continues designing and manufacturing not only rearview mirrors, but CMOS imagers and video displays as well. The Company believes that combining video displays with mirrors may well provide a more robust product by addressing all driving conditions in a single solution that can be controlled by

the driver. The Company also continues to develop in the areas of imager performance, camera dynamic range, lens design, image processing from the camera to the display, and camera lens cleaning. The Company acknowledges that as such technology evolves over time, there could be increased competition.

In January 2016, the Company announced a partnership with TransCore to provide automobile manufacturers with a vehicle-integrated tolling solution that enables motorists to drive on all U.S. toll roads without a traditional toll tag on the windshield. Currently more than 75 percent of new car registrations are in states with toll roads

Table of Contents

with over 50 million drivers accessing these roads each year. The Company signed an exclusive agreement, in the ordinary course of business, to integrate TransCore's toll module technology into the Company's electronic rearview mirrors. The interior mirror is the optimal location for a vehicle-integrated toll transponder and it eliminates the need to affix multiple toll tags to the windshield and helps automakers seamlessly integrate toll collection into the car, similar to navigation systems, HomeLink®, satellite radio, and other technologies. Since the Integrated Toll Module™ enables travel across all U.S. toll roads, motorists would no longer need multiple toll tags for different regions of the country or have to manage multiple toll accounts. The Company's vehicle-integrated solution simplifies and expedites local, regional, and national travel. In 2012, President Obama signed into law the Moving Ahead for Progress in the 21st Century Act (MAP-21). The Act calls for the development of a nationally inter-operable electronic toll collection system by October 2016. The Integrated Toll Module™ provides transportation agencies with an interoperability solution without costly infrastructure changes to the thousands of miles of toll lanes throughout the country. The Company continues to work on the hardware and integration of this product and is seeing interest from several customers in regard to this new technology. With such interest, the Company believes that this product could potentially represent another growth opportunity over the next several years. Over the next few quarters, the Company will be working to finalize the initial hardware designs and complete drive testing of the prototypes with the stated goal of having its first confirmed customer toward the end of next year.

In 2014, the NHTSA issued a final rule requiring rearview video systems in U.S. light vehicles by May 1, 2018, with a phase-in schedule requirement of 10% of vehicles after May 2016, 40% of vehicles after May 2017, and 100% of vehicles after May 2018. In this release, NHTSA estimated that 57% of model year 2014 vehicles already have a rear video system, and that even without a final rule, 73% of the vehicles sold into North America would have already included a rearview video system by 2018. This NHTSA ruling, as is indicated from the percentage of U.S. vehicles already having a solution, does not currently indicate an immediate opportunity for new Rear Camera Display (RCD) mirror applications for the Company. Customer opportunities for RCD mirror applications may exist by the time the 100% requirement is in place, but there is no certainty that is the case at this time. The Company's RCD mirror application meets all the technical requirements of the NHTSA ruling when installed in a vehicle and appropriately paired with an OEM specified camera. The NHTSA ruling that rearview video systems are required has increased competition for systems capable of rear video in a variety of locations in the vehicle. The Company's RCD mirror application has and will continue to be affected by this increased competition.

The Company does continue to experience pricing pressure from its automotive customers and competitors, which will continue to cause downward pressure on its profit margins. The Company works continuously to offset these price reductions with engineering and purchasing cost reductions, productivity improvements, and increases in unit sales volume.

Because the Company sells its products throughout the world, and automotive manufacturing is highly dependent on economic conditions, the Company can be affected by uncertain economic conditions that can reduce demand for its products.

The Company previously announced that it was providing variably dimmable windows for the Boeing 787 Dreamliner series of aircraft. The Company continues to work with aircraft manufacturers that have an interest in this technology regarding potential additional programs.

The Company believes that its patents and trade secrets provide it with a competitive advantage in automotive rearview mirrors and other electronic features that it offers in vehicles and aerospace windows. Claims of patent infringement can be costly and time-consuming to address. To that end, the Company obtains intellectual property rights in the ordinary course of business to strengthen its intellectual property portfolio to minimize the risk of infringement.

The Company does not have any significant off-balance sheet arrangements or commitments that have not been recorded in its consolidated financial statements.

Table of Contents

OUTLOOK

The Company utilizes the light vehicle production forecasting services of IHS Worldwide, and using the mid-October 2016 light vehicle production forecasts indicated in the table below, the Company has updated certain guidance for calendar year 2016.

Light Vehicle Production (per IHS Automotive October light vehicle production forecast)
(in Millions)

Region	4Q	4Q	%	Calendar	Calendar	%
	2016	2015	Change	Year	Year	Change
North America	4.38	4.33	1 %	17.88	17.50	2 %
Europe	5.35	5.21	3 %	21.49	20.94	3 %
Japan and Korea	3.42	3.43	— %	12.95	13.27	(2)%
Total Light Vehicle Production	13.15	12.97	1 %	52.32	51.71	1 %

Based on the above production estimates and actual financial results through the nine months ended September 30, 2016, the Company now estimates that top line revenue for calendar year 2016 will be between \$1.68 and \$1.71 billion. All estimates are based on light vehicle production forecasts in the regions to which the Company ships product, as well as the estimated option rates for its mirrors on prospective vehicle models and anticipated product mix. The Company continues to see order rates and booked business that allow for these estimates despite more modest vehicle production increases in the Company's primary markets. Continuing uncertainties, however, such as: light vehicle production levels; supplier part shortages; automotive plant shutdowns; sales rates in Europe, Asia and North America; OEM strategies and cost pressures; customer inventory management and the impact of potential automotive customer (including their Tier 1 suppliers) work stoppages, strikes, etc., (which could disrupt shipments to customers), always make forecasting challenging.

Based on actual results for the nine months ended September 30, 2016, currently forecasted sales, and anticipated product mix, the Company now estimates that the gross profit margin will be between 39.3% and 39.7% for calendar year 2016.

The Company also now estimates that its operating expenses, which include engineering, research and development expenses and selling, general and administrative expenses are expected to be between \$152 and \$157 million for calendar year 2016, primarily due to increased staffing and benefit costs which continue to support growth and the development of new business. The Company also plans to continue to invest in selling and marketing efforts at a rate of growth that approximates the rate of sales growth for the Company.

In light of on-going demand for the Company's auto-dimming mirrors and electronics, and previously announced facility expansion projects, the Company continues to anticipate that 2016 capital expenditures will be approximately \$115 - \$130 million. 2016 capital expenditures are currently anticipated to be financed from current cash and cash equivalents on hand and cash flows from operating activities.

The Company also continues to estimate that depreciation and amortization expense for calendar year 2016 will be approximately \$90 - \$100 million.

The Company also continues to estimate that its tax rate will be between 31.5% and 32.5% for calendar year 2016. Finally, based on 2017 light vehicle production forecasts and current forecasted product mix, the Company is at this time making no changes to its previously announced revenue estimates for calendar year 2017.

Table of Contents

CRITICAL ACCOUNTING POLICIES:

The preparation of the Company's consolidated condensed financial statements contained in this report, which have been prepared in accordance with accounting principles generally accepted in the United States, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. On an ongoing basis, management evaluates these estimates. Estimates are based on historical experience and/or on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that may not be readily apparent from other sources. Historically, actual results have not been materially different from the Company's estimates. However, actual results may differ from these estimates under different assumptions or conditions. The Company has identified critical accounting policies used in determining estimates and assumptions in the amounts reported in its Management's Discussion and Analysis of Financial Condition and Results of Operations in its Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Table of Contents

Item 3. Quantitative And Qualitative Disclosures About Market Risk.

The Company is subject to market risk exposures of varying correlations and volatilities, including foreign exchange rate risk, interest rate risk, and equity price risk. Volatile equity markets could negatively impact the Company's financial performance due to realized losses on the sale of equity investments and/or recognized losses due to other-than-temporary impairment adjustment on available for sale securities (mark-to-market adjustments). During the quarter ended September 30, 2016, there are no material changes in the risk factors previously disclosed in the Company's report on Form 10-K for the fiscal year ended December 31, 2015, except as set forth in Item 2.

The Company has some assets, liabilities and operations outside the United States, including euro-denominated accounts, which currently are not significant overall to the Company as a whole. Because the Company sells its automotive mirrors throughout the world, and automotive manufacturing is highly dependent on general economic conditions, the Company could be affected by uncertain economic conditions in foreign markets that can reduce demand for its products.

On October 1, 2014 the Company entered into an interest rate swap transaction with a bank. Please refer to Note 9 of the Notes to the Consolidated Financial statements in this Form 10-Q for further details.

Item 4. Controls And Procedures.

Evaluation of Disclosure Controls and Procedures.

Under the supervision of, and with the participation of management, the Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of September 30, 2016, and have concluded that as of that date, the Company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the quarter ended September 30, 2016, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

SAFE HARBOR STATEMENT:

This Quarterly Report contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The statements contained in this communication that are not purely historical are forward-looking statements. Forward-looking statements give the Company's current expectations or forecasts of future events. These forward-looking statements generally can be identified by the use of words such as "anticipate", "believe", "could", "estimate", "expect", "forecast", "goal", "hope", "may", "plan", "project", "will", and variations and similar expressions. Such statements are subject to risks and uncertainties that are often difficult to predict and beyond the Company's control, and could cause the Company's results to differ materially from those described. These risks and uncertainties include, without limitation: changes in general industry or regional market conditions; changes in consumer and customer preferences for our products; our ability to be awarded new business; continued uncertainty in pricing negotiations with customers; loss of business from increased competition; customer bankruptcies or divestiture of customer brands; fluctuation in vehicle production schedules; changes in product mix; raw material shortages; higher raw material, fuel, energy and other costs; unfavorable fluctuations in currencies or interest rates in the regions in which we operate; costs or difficulties related to the integration of any new or acquired technologies and businesses; changes in regulatory conditions; warranty and recall claims and other litigation and customer reactions thereto; possible adverse results of pending or future litigation or infringement claims; and negative impact of any governmental investigations and associated litigations including securities litigations relating to the conduct of our business. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as

of the date they are made. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law or the rules of the NASDAQ Global Select Market.

PART II—OTHER INFORMATION

Item 1A. Risk Factors.

Information regarding risk factors appears in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part I – Item 2 of this Form 10-Q and in Part I – Item 1A – Risk Factors of the Company's report on Form 10-K for the fiscal year ended December 31, 2015. There have been no material changes from the risk factors previously disclosed in the Company's report on Form 10-K for the year ended December 31, 2015, except to the extent described in Part I – Item 2 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Issuer Purchase of Equity Securities

On October 8, 2002, the Company announced a share repurchase plan, under which it may purchase up to 16,000,000 shares (post-split) based on a number of factors. On July 20, 2005, the Company announced that it had raised the price at which the Company may repurchase shares under the existing plan. On May 16, 2006, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 16,000,000 shares (post-split) under the plan. On August 14, 2006, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 16,000,000 shares (post-split) under the plan. On February 26, 2008, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 8,000,000 shares (post-split) under the plan. On October 23, 2012, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 8,000,000 shares (post-split) under the plan. On October 21, 2015, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 5,000,000 shares (post-split) under the plan. On February 23, 2016, the Company's Board of Directors authorized the repurchase of an additional 5,000,000 shares (post-split) under the plan. On October 20, 2016, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 7,500,000 shares (post-split) under the plan. The Company may purchase authorized shares of its common stock under the plan based on a number of factors, including: market, economic, and industry conditions; the market price of the Company's common stock; anti-dilutive effect on earnings; available cash; and other factors that the Company deems appropriate. The plan does not have an expiration date, but the Board of Directors reviews such plan periodically.

The following is a summary of share repurchase activity during the nine months ended September 30, 2016:

Table of Contents

Issuer Purchase of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased Publicly As Part of a Plan*	Maximum Number of Shares That May Purchased Under the Plan*
January 2016	2,448,978	13.96	2,448,978	2,102,969
