Diluted earnings per share increased 33% to \$1.57 in the current year's first nine months as compared to diluted earnings per share of \$1.18 in last year's nine months.

Howard Solomon, Chairman and Chief Executive Officer of Forest, said: "During this quarter several important events occurred for Forest. We received Food and Drug Administration approval for Namenda™ for the treatment of moderate to severe Alzheimer's disease and for Lexapro for the treatment of Generalized Anxiety Disorder. These regulatory approvals are both important advances for physicians, patients and caregivers involved with these debilitating diseases. We also reported positive results from a placebo- controlled study of Namenda in the treatment of mild to moderate Alzheimer's disease which will serve as the basis of a potential label expansion. Lexapro achieved meaningful market share gains while Benicar®*, an angiotensin receptor blocker for the treatment of hypertension which is co-promoted with Sankyo, continued to gain market share at the expense of all competing products in the category."

Mr. Solomon continued: "Our financial performance for the remainder of this fiscal year ending March 31, 2004 should result in earnings per share for the year at the high end of our previously issued guidance of \$1.82 to \$1.92. Regarding fiscal 2005 earnings per share, we continue to project a range of \$2.30 to \$2.50 which is consistent with our guidance issued on October 14, 2003."

Forest will host a conference call at 10:00 AM EST today to discuss the results. The conference call will be webcast live beginning at 10:00 AM EST on the Company's website at www.frx.com and also on the website www.streetevents.com.
