Item . Other Events. Green Mountain Power places \$42 million first mortgage bonds

COLCHESTER, VT. Green Mountain Power Corporation (NYSE:GMP) announced today the sale through private placement of \$42 million principal amount of first mortgage bonds bearing interest at 6.04 percent per year and maturing on December 1, 2017. The average life of the bond issuance is twelve years and the bonds are subject to seven equal annual principal payments beginning on December 1, 2011.

Net proceeds from the sale will be used to repay short-term and intermediate-term borrowings, including amounts arising as a result of the Company's successful repurchase of approximately 812,000 shares of its common stock through a modified Dutch Auction last month. Proceeds will also be used to redeem \$8 million in first mortgage bonds due December 18, 2002, and for other corporate purposes. The repayment of amounts outstanding under the Company's revolving credit facility and its \$12 million two-year term loan means that the annual dividend paid on the Company's common stock will increase to \$0.76 per share, consistent with the action of the Company's Board of Directors earlier this month.

"This issuance completes our financing plan for 2002," said Christopher Dutton, President and Chief Executive Officer. "The bond sale improves our liquidity and, with the stock repurchase, will lower costs of capital for our customers for many years. We also expect to increase our dividend over the next several years in a measured, consistent manner to a payout range of between fifty and sixty percent of annual earnings, which we will sustain so long as our financial health seems assured."
