BERRY PETROLEUM CO Form 10-Q May 02, 2007

UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

FORM 10-Q

x Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended **March 31, 2007**oTransition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from __to ___

Commission file number **1-9735**

BERRY PETROLEUM COMPANY

(Exact name of registrant as specified in its charter)

DELAWARE

77-0079387

(State of incorporation or organization)

(I.R.S. Employer Identification Number)

5201 Truxtun Avenue, Suite 300 Bakersfield, California 93309

(Address of principal executive offices, including zip code)

Registrant's telephone number, including area code: (661) 616-3900

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES x NO o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one): Large accelerated filers. Accelerated filers accelerated filers.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES o NO x

As of April 18, 2007, the registrant had 42,196,896 shares of Class A Common Stock (\$.01 par value) outstanding. The registrant also had 1,797,784 shares of Class B Stock (\$.01 par value) outstanding on April 18, 2007 all of which is held by an affiliate of the registrant.

BERRY PETROLEUM COMPANY Notes to the Unaudited Condensed Financial Statements

1. General

All adjustments which are, in the opinion of Management, necessary for a fair statement of Berry Petroleum Company's (the "Company") financial position at March 31, 2007 and December 31, 2006 and results of operations and cash flows for the three month periods ended March 31, 2007 and 2006 have been included. All such adjustments are of a normal recurring nature. The results of operations and cash flows are not necessarily indicative of the results for a full year.

The accompanying unaudited condensed financial statements have been prepared on a basis consistent with the accounting principles and policies reflected in the December 31, 2006 financial statements. The December 31, 2006 Form 10-K should be read in conjunction herewith. The year-end condensed balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

Our cash management process provides for the daily funding of checks as they are presented to the bank. Included in accounts payable at March 31, 2007, December 31, 2006 and March 31, 2006 is \$12.5 million, \$17.2 million and \$11.8 million, respectively, representing outstanding checks in excess of the bank balance (book overdraft).

In December 2004, Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*, was issued which establishes standards for transactions in which an entity exchanges its equity instruments for goods or services. As a result, we adopted this statement beginning January 1, 2006. This standard requires us to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. Accordingly, the adoption of SFAS No. 123(R) using the modified prospective method did not have a material impact on our condensed financial statements for the year ended December 31, 2006. We previously adopted the fair value recognition provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* effective January 1, 2004. The modified prospective method was selected as described in SFAS No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure*. Under this method, we recognized stock option compensation expense as if it had applied the fair value method to account for unvested stock options from its original effective date.

2. Stock Split

On March 1, 2006, our Board of Directors approved a two-for-one stock split to shareholders of record on May 17, 2006, subject to obtaining shareholder approval of an increase in our authorized shares. On May 17, 2006 our shareholders approved the authorized share increase and on June 2, 2006 each shareholder received one additional share for each share owned on May 17, 2006. This did not change the proportionate interest a shareholder maintained in Berry Petroleum Company on May 17, 2006. All historical shares, equity awards and per share amounts have been restated for the two-for-one stock split.

3. Recent Accounting Developments

In June 2006, the FASB issued Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, Accounting for Income Taxes*. This interpretation requires that realization of an uncertain income tax position must be "more likely than not" (i.e. greater than 50% likelihood of receiving a benefit) before it can be recognized in the financial statements. Further, this interpretation prescribes the benefit to be recorded in the financial statements as the amount most likely to be realized assuming a review by tax authorities having all relevant information and applying current conventions. This interpretation also clarifies the financial statement classification of tax-related penalties and interest and sets forth new disclosures regarding unrecognized tax

benefits. This interpretation is effective for fiscal years beginning after December 15, 2006, and we adopted this interpretation in the first quarter of 2007. See Note 6.

In September 2006, SFAS No. 157, *Fair Value Measurements* was issued by the Financial Accounting Standards Board (FASB). This statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 will become effective for our fiscal year beginning January 1, 2008, and we are currently assessing the potential impact of this Statement on our financial statements.

In September 2006, Staff Accounting Bulletin ("SAB") No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. Registrants must quantify the impact on current period financial statements of correcting all misstatements, including both those occurring in the current period and the effect of reversing those that have accumulated from prior periods. This SAB was adopted at December 31, 2006. The adoption of SAB No. 108 had no effect on our financial position or on the results of our operations.

BERRY PETROLEUM COMPANY Notes to the Unaudited Condensed Financial Statements

3. Recent Accounting Developments (Cont'd)

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, which permits an entity to measure certain financial assets and financial liabilities at fair value. The objective of SFAS No. 159 is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by the measurement of related assets and liabilities using different attributes, without having to apply complex hedge accounting provisions. Under SFAS No. 159, entities that elect the fair value option (by instrument) will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on its earnings, but does not eliminate disclosure requirements of other accounting standards. Assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. This statement is effective beginning January 1, 2008 and we are evaluating this pronouncement.

4. Hedging

The related cash flow impact of all of our hedges are reflected in cash flows from operating activities. At March 31, 2007, our net fair value of derivatives liability was \$54.2 million as compared to \$33.2 million at December 31, 2006. At March 31, 2007, Accumulated Other Comprehensive Loss consisted of \$32.3 million, net of tax, of unrealized losses from our crude oil and natural gas swaps and collars that qualified for hedge accounting treatment at March 31, 2007. Deferred net losses recorded in Accumulated Other Comprehensive Loss at March 31, 2007 and subsequent marked-to-market changes in the underlying hedging contracts are expected to be reclassified to earnings over the life of these contracts. Our liability is primarily related to the time value of the underlying instruments and based on current prices the amount expected to be reclassified to earnings over the next 12 months is not significant.

As of February 28, 2007, we have converted 2,000 Bbl/D of our 2007 oil collars beginning on March 1, 2007 to a swap with a strike price of \$60 West Texas Intermediate (WTI). This swap is considered to be an effective cash flow hedge. Additionally, we entered into oil swaps for 1,000 Bbl/D at \$64.55 from March 2007 through December 2007 and entered into oil collars for 1,000 Bbl/D at \$60 floor and \$75 ceiling prices for 2010.

Additionally, on June 8, 2006 and July 10, 2006, we entered into five year interest rate swaps for a fixed rate of approximately 5.5% on \$100 million of our outstanding borrowings under our credit facility for five years. These interest rate swaps have been designated as cash flow hedges.

5. Asset Retirement Obligations

Inherent in the fair value calculation of the asset retirement obligation (ARO) are numerous assumptions and judgments including the ultimate settlement amounts, inflation factors, credit adjusted discount rates, timing of settlement, and changes in the legal, regulatory, environmental and political environments. To the extent future revisions to these assumptions impact the fair value of the existing ARO liability, a corresponding adjustment is made to the oil and gas property balance. In 2007, we reassessed our estimate as costs have increased due to demand for related services, resulting in an increase in the ARO balance at quarter end.

Under SFAS 143, the following table summarizes the change in abandonment obligation for the quarter ended March 31, 2007 (in thousands):

Beginning	
balance at	
January 1	\$ 26,135
Liabilities	
incurred	1,274
Liabilities

expense	533
Ending	
balance at	
March 31	\$ 30,958

BERRY PETROLEUM COMPANY Notes to the Unaudited Condensed Financial Statements

6. Income Taxes

The effective tax rate was 39% for the first quarter of 2007 compared to 38% for the fourth quarter of 2006 and 39% for the first quarter of 2006.

In June 2006, the FASB issued FIN No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, Accounting for Income Taxes*. The Interpretation addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under FIN No. 48, we may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

We adopted the provisions of FIN No. 48 on January 1, 2007 and recognized no material adjustment to retained earnings. As of the date of adoption, we had a gross liability for uncertain tax benefits of \$14.6 million of which \$10.8 million if recognized, would affect the effective tax rate. We recognize potential accrued interest and penalties related to unrecognized tax benefits in income tax expense, which is consistent with the recognition of these items in prior reporting periods. As of January 1, 2007, we had accrued approximately \$.9 million of interest related to our uncertain tax positions.

We have not had any material changes to our unrecognized tax benefits since adoption, nor do we anticipate significant changes to the total amount of unrecognized tax benefits within the next 12 months.

As of January 1, 2007, we remain subject to examination in the following major tax jurisdictions for the tax years indicated below:

Jurisdiction: Tax Years Subject to Exam:

Federal 2003 - 2006 California 2002 - 2006 Colorado 2002 - 2006 Utah 2003 - 2006

7. Long-term and Short-term Obligations

Long-term debt

In October 2006, we issued in a public offering \$200 million of 8.25% senior subordinated notes due 2016 (the Notes). The deferred costs of approximately \$5 million associated with the issuance of this debt are being amortized over the ten year life of the Notes. The net proceeds from the offering were used to 1) repay approximately \$145 million of borrowings under the bank credit facility, which were \$170 million as of the issuance date after the application of this payment, and 2) approximately \$50 million was used to pay the November 1, 2006 installment under the joint venture agreement to develop properties in the Piceance basin.

In April 2006, we completed a new unsecured five year bank credit facility agreement (the Agreement) with a banking syndicate and extended the term by one year to July 2011. The Agreement is a revolving credit facility for up to \$750 million and replaces the previous \$500 million facility. The current borrowing base was established at \$500 million, as

compared to the previous \$350 million. This transaction was accounted for in accordance with Emerging Issues Task Force, (EITF) 98-14, *Debtor's Accounting for Changes in Line-of-Credit or Revolving-Debt Arrangements*.

The total outstanding debt under the credit facility's borrowing base was \$270 million and the short-term line of credit was \$7 million at March 31, 2007, leaving \$223 million in borrowing capacity available. Interest on amounts borrowed under this debt is charged at LIBOR plus a margin of 1.00% to 1.75% or the prime rate, with margins on the various rate options based on the ratio of credit outstanding to the borrowing base. We are required under the Agreement to pay a commitment fee of .25% to .375% on the unused portion of the credit facility annually.

BERRY PETROLEUM COMPANY Notes to the Unaudited Condensed Financial Statements

7. Long-term and Short-term Obligations (Cont'd)

The Agreement contains restrictive covenants which, among other things, require us to maintain a certain debt to EBITDA ratio and a minimum current ratio, as defined. The \$200 million Notes are subordinated to our credit facility indebtedness. Our Notes covenants limit debt to the greater of \$750 million or 40% of Adjusted Consolidated Net Tangible Assets (as defined). Additionally, as long as the interest coverage ratio (as defined) is met, we may incur additional debt. We were in compliance with all such covenants as of March 31, 2007. The weighted average interest rate on the long-term outstanding credit facility borrowings at March 31, 2007 was 6.6%.

Short-term debt

In November 2005, we completed an unsecured uncommitted money market line of credit (Line of Credit). Borrowings under the Line of Credit may be up to \$30 million for a maximum of 30 days. The Line of Credit may be terminated at any time upon written notice by either us or the lender. At March 31, 2007 the outstanding balance under this Line of Credit was \$7 million. Interest on amounts borrowed is charged at LIBOR plus a margin of approximately 1%. The weighted average interest rate on outstanding borrowings on the Line of Credit at March 31, 2007 was 6.2%.

8. Contingencies and Commitments

We have no accrued environmental liabilities for our sites, including sites in which governmental agencies have designated us as a potentially responsible party, because it is not probable that a loss will be incurred and the minimum cost and/or amount of loss cannot be reasonably estimated. However, because of the uncertainties associated with environmental assessment and remediation activities, future expense to remediate the currently identified sites, and sites identified in the future, if any, could be accrued. Management believes, based upon current site assessments, that the ultimate resolution of any matters will not require substantial accruals. We are involved in various other lawsuits, claims and inquiries, most of which are routine to the nature of our business. In the opinion of management, the resolution of these matters will not have a material effect on our financial position, or on the results of operations or liquidity.

On February 27, 2007, we entered into a six year multi-staged crude oil sales contract with a subsidiary of Holly Corporation (Holly) for a portion of our Uinta basin crude oil. Under the agreement, Holly will begin purchasing 3,200 Bbl/D beginning July 1, 2007. Upon completion of their Woods Cross refinery expansion in Salt Lake City, which is expected in late 2008, Holly will increase total purchased volumes to 5,000 Bbl/D through June 30, 2013. During the term of the contract, the minimum number of delivered units ("base daily volume") is 3,200 Bbl/D increasing to 5,000 Bbl/D upon the certified completion of the refinery upgrade. Holly may, but is not obligated to, purchase volumes in excess of the base daily volumes when notified by us at the beginning of any contract year.

9. Assets Held for Sale

Net oil and gas properties and equipment classified as held for sale is \$8.9 million at March 31, 2007 in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. On March 19, 2007 we announced that we have entered into an agreement to sell our non-core West Montalvo assets, near Ventura, California. We estimate a sales price of approximately \$63 million before adjustments and expect to transfer the properties in the second quarter of 2007. The completion of the transaction is subject to certain conditions and there is no assurance that all such conditions will be satisfied.

10. Subsequent Event

We paid the third and final installment of approximately \$54 million utilizing our credit facility on May 1, 2007 for the North Parachute Ranch property located in the Piceance basin.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General. The following discussion provides information on the results of operations for the three month periods ended March 31, 2007 and 2006 and our financial condition, liquidity and capital resources as of March 31, 2007. The financial statements and the notes thereto contain detailed information that should be referred to in conjunction with this discussion.

The profitability of our operations in any particular accounting period will be directly related to the realized prices of oil, gas and electricity sold, the type and volume of oil and gas produced and electricity generated and the results of development, exploitation, acquisition, exploration and hedging activities. The realized prices for natural gas and electricity will fluctuate from one period to another due to regional market conditions and other factors, while oil prices will be predominantly influenced by world supply and demand. The aggregate amount of oil and gas produced may fluctuate based on the success of development and exploitation of oil and gas reserves pursuant to current reservoir management. The cost of natural gas used in our steaming operations and electrical generation, production rates, labor, equipment costs, maintenance expenses, and production taxes are expected to be the principal influences on operating costs. Accordingly, our results of operations may fluctuate from period to period based on the foregoing principal factors, among others.

Overview. Our mission is to increase shareholder value through consistent growth in our production and reserves, both through the drill bit and acquisitions. We strive to operate our properties in an efficient manner to maximize the cash flow and earnings of our assets. The strategies to accomplish these goals include:

- · Developing our existing resource base
- · Acquiring additional assets with significant growth potential
- · Utilizing joint ventures with respected partners to enter new basins
- · Accumulating significant acreage positions near our producing operations
- · Investing our capital in a disciplined manner and maintaining a strong financial position

Notable First Quarter Items.

- · Production averaged 25,490 BOE/D, up 9% from the first quarter of 2006
- · Entered into a long-term crude oil sales contract for our Uinta basin, Utah production
- · Restored Uinta basin production to approximately 6,000 BOE/D from a low of 3,800 BOE/D in January 2007
- · Production at Midway-Sunset diatomite averaged 600 Bbl/D compared to 400 Bbl/D in the fourth quarter of 2006
 - · Improvements made in the Piceance basin program in personnel, services, rigs, drilling and completions
- · Entered into an agreement to sell our non-core West Montalvo assets, near Ventura, California for an estimated sales price of approximately \$63 million cash before adjustments

Notable Items and Expectations for the Second Quarter of 2007.

- · Completing over 20 Piceance basin wells with total Piceance net production estimated at 9.6 MMcf/D
- · Production at Midway-Sunset diatomite is approaching 1,000 BOE/D and the steam to oil ratio is improving
 - · Accelerating Poso Creek development by drilling 40 wells and installing an additional steam generator
 - · Transferring Montalvo properties with proceeds estimated at \$63 million before adjustments
- · Production is projected to average between 26,500 BOE/D and 27,500 BOE/D for the second quarter of 2007

Overview of the First Quarter of 2007. In the first quarter we were unable to sell all of our Uinta basin production due to a refinery shutdown. On February 27, 2007, we entered into a six year multi-staged crude oil sales contract with a subsidiary of Holly for a portion of our Uinta basin crude oil. This contract will allow us to stabilize our basis differentials on these barrels beginning on July 1, 2007 and assures us of the ability to sell this regional crude oil. Our activities in the Piceance basin included completion of a pipeline. Eleven wells have been connected since the pipeline was completed, allowing production to rise to over 8.5 net MMcf/D in April from 6.4 net MMcf/D in the first quarter of 2007.

View to the Second Quarter. Our 2007 drilling program will continue to drive our production growth. Operationally, we are focused on executing our drilling program on our Piceance basin asset where we expect to drill 16 wells during the second quarter of 2007. Furthermore, based on higher than expected performance at Poso Creek, we are planning to accelerate development there by drilling 40 wells and installing a third steam generator during the second quarter. On May 1, 2007, the final installment for our Piceance basin joint venture was paid.

Results of Operations. The following companywide results are in millions (except per share data) for the three months ended:

	March :	31, 2007	March	31, 2006	1Q07 to 1Q06	Decem	nber 31, 2006	1Q07 to 4Q06
		(1Q07)		(1Q06)	Change		(4Q06)	Change
Sales of oil	\$	80.9	\$	83.3	(3%)	\$	84.2	(4%)
Sales of gas		20.9		18.6	12%		17.6	19%
Total sales of oil and gas	\$	101.8	\$	101.9	-%	\$	101.8	-%
Sales of electricity		14.6		15.2	(4%)		13.4	9%
Interest and other income, net		1.1		.5	120%		1.0	10%
Total revenues and other income	\$	117.5	\$	117.6	-%	\$	116.2	1%
Net income	\$	18.9	\$	23.3	(19%)	\$	19.1	(1%)
Net income per share (diluted)	\$.42	\$.52	(19%)	\$.43	(2%)

Our revenues may vary significantly from period to period as a result of changes in commodity prices and/or production volumes. For the three months ended March 31, 2007, gas sales improved while oil sales declined when compared to three months ended March 31, 2006. Improvement to gas sales is due to higher production primarily from our Piceance basin acquisition, partially offset by lower gas prices. Oil sales decreased due to lower prices partially offset by higher volumes primarily from our NMWSS and Poso Creek properties.

Similarly, for the three months ended March 31, 2007 compared to the three months ended December 31, 2006, gas sales improved while oil sales declined. Improvement in realized gas prices during the first three months of 2007 were due to increased weather related demand and a tighter supply and demand balance, while oil sales declined primarily due to lower production.

Operating data. The following table is for the three months ended:

	March 31, 2007	%	March 31, 2006	%	December 31, 2006	%
Oil and Gas	31, 2007	70	31, 2000	70	31, 2000	70
Heavy Oil Production (Bbl/D)	16,140	63	15,407	66	16,833	63
Light Oil Production (Bbl/D)	3,233	13	3,303	14	3,363	13
Total Oil Production (Bbl/D)	19,373	76	18,710	80	20,196	76
Natural Gas Production (Mcf/D)	36,704	24	28,507	20	40,157	24
Total (BOE/D)	25,490	100	23,461	100	26,889	100
Per BOE:						
Average sales price before						
hedging	\$ 43.62		\$ 50.04		\$ 41.53	
Average sales price after hedging	43.84		48.45		42.00	
Oil, per Bbl:						
Average WTI price	\$ 58.23		\$ 63.48		\$ 60.17	
Price sensitive royalties	(3.74)		(5.41)		(4.28)	
Quality differential and other	(8.78)		(6.36)		(9.06)	
Crude oil hedges	.03		(2.04)		(.01)	
Average oil sales price after						
hedging	\$ 45.74		\$ 49.67		\$ 46.82	
Gas, per MMBtu:						
Average Henry Hub price	\$ 7.18		\$ 7.92		\$ 7.24	
Natural gas hedges	.13		(.03)		.33	
Location, quality differentials and						
other	(.70)		(1.05)		(2.68)	
Average gas sales price after						
hedging	\$ 6.61		\$ 6.84		\$ 4.89	

Gas Basis Differential. The gas prices in the Rockies continue to be volatile due to various factors, including takeaway pipeline capacity, supply volumes, and regional demand issues. We expect the basis differential to narrow upon the startup of the Rockies Express pipeline which is anticipated in 2008. We have contracted 10,000 Mcf/D on this pipeline to provide assurance of gas delivery. The Colorado Interstate Gas (CIG) basis differential averaged \$1.18 below Henry Hub (HH) and ranged from \$.51 to \$1.67 below HH in the first quarter. Although related to CIG, the actual basin price varies. Gas from the DJ basin was sold slightly above the CIG price, Piceance basin gas was slightly below the CIG price while Uinta basin gas sold for approximately \$.40 below CIG pricing.

Oil Contracts. Utah - As of March 31, 2007, our Utah light crude oil is sold under multiple contracts with different purchasers for varying pricing terms and ranging from one month to six months. In April 2007, contracts were in place to sell approximately 5,000 BOE/D during the month. These contracts have marginally improved since December 31, 2006 and are currently priced at approximately \$12 to \$17 per barrel below WTI with certain volumes tied to field posting, and in some cases our realized price is further reduced by transportation charges. As operator we deliver all produced volumes pursuant to these contracts, although our working interest partners or royalty owners have the right to take their respective volumes in kind and market their own volumes. Our net volumes from our Brundage Canyon properties approximate 80% of the total gross volumes. Assuming all the Brundage Canyon wells are producing, the gross production could exceed these contracted volumes. Our Utah crude oil is a paraffinic crude and can be processed efficiently by only a limited number of refineries.

On February 27, 2007, we entered into a six year multi-staged crude oil sales contract with a subsidiary of Holly for a portion of our Uinta basin crude oil. Under the agreement, Holly will begin purchasing 3,200 Bbl/D beginning July 1, 2007. Holly has begun to take delivery of approximately 1,000 Bbl/D in the first quarter of 2007, which stabilizes our realized sales price and reduces our transportation costs. Upon completion of their Woods Cross refinery expansion in Salt Lake City, which is expected in late 2008, Holly will increase total purchased volumes to 5,000 Bbl/D through June 30, 2013. Pricing under the contract, which includes transportation, is a fixed percentage of WTI and approximates our expected field posted price of \$13 to \$16 below WTI. This contract provides the pricing assurance we need to proceed with the long-term development of our Uinta basin assets. From October 1, 2003 through April 30, 2006 we were able to sell our Utah crude oil at approximately \$2.00 per barrel below WTI and from May 1, 2006 through September 30, 2006, we were selling the majority of our Utah crude at approximately \$9.00 per barrel below WTI. We may adjust our capital expenditures in the Uinta basin due to various factors, including the timing of refinery demand for the Uinta basin barrels and the actual or expected change in our realized price.

Hedging. See Note 4 to the unaudited condensed financial statements and Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Electricity. We consume natural gas as fuel to operate our three cogeneration facilities which are intended to provide an efficient and secure long-term supply of steam necessary for the economic production of heavy oil. Revenue and operating costs for the three months ended March 31, 2007 were down from the three months ended March 31, 2006 due to 6% lower electricity prices and 12% lower fuel gas cost, respectively. Conversely, revenue and operating costs in the three months ended March 31, 2007 were up from the three months ended December 31, 2006 due to 8% higher electricity prices and 4% higher natural gas prices, respectively. The following table is for the three months ended:

	March 31,	March 31,	December	
	2007	2006	31, 2006	
Electricity				
Revenues (in millions)	\$ 14.6	\$ 15.2	\$ 13.4	
Operating costs (in millions)	\$ 14.2	\$ 14.3	\$ 12.1	
Electric power produced -				
MWh/D	2,117	2,080	2,093	
Electric power sold - MWh/D	1,914	1,884	1,861	
Average sales price/MWh	\$ 81.08	\$ 85.93	\$ 75.05	
Fuel gas cost/MMBtu				
(including transportation)	\$ 6.70	\$ 7.65	\$ 6.44	

Oil and Gas Operating, Production Taxes, G&A and Interest Expenses. The following table presents information about our operating expenses for each of the three month periods ended:

Amount per BOE

Amount (in thousands)

	M	arch 31, 2007	M	arch 31, 2006	ecember 1, 2006	March 31, 2007	N	March 31, 2006	De	cember 31, 2006
Operating costs - oil										
and gas production	\$	14.65	\$	12.19	\$ 13.69 9	33,610	\$	25,738	\$	33,804
Production taxes		1.66		1.53	1.15	3,815		3,233		2,840
DD&A - oil and gas										
production		8.16		6.26	8.24	18,725		13,223		20,335
G&A		4.49		3.94	4.55	10,307		8,314		11,231
Interest expense		1.69		.75	1.27	4,292		1,577		3,503
Total	\$	30.65	\$	24.67	\$ 28.90 5	5 70,749	\$	52,085	\$	71,713

Our total operating costs, production taxes, G&A and interest expenses for the three months ended March 31, 2007, stated on a unit-of-production basis, increased 24% over the three months ended March 31, 2006 and increased 6% over the three months ended December 31, 2006. The changes were primarily related to the following items:

Operating costs: Operating costs per BOE in the first quarter of 2007 were 20% higher than the first quarter of 2006 primarily due to an increase in steam costs, company and contract labor as well as transportation, compression and gathering costs. Similarly, operating costs per BOE were 7% higher in the first quarter of 2007 as compared to the fourth quarter of 2006, as production volumes were down. Cost pressures do remain, but we are working to offset them with improved efficiencies. The cost of our steaming operations on our heavy oil properties in California varies depending on the cost of natural gas used as fuel and the volume of steam injected. The following table presents steam information:

			1Q07 to		1Q07 to
	March 31,	March 31,	1Q06	December	4Q06
	2007	2006	Change	31, 2006	Change
Average volume of steam injected	86,132	75,138	15%	85,349	1%
(Bbl/D)					
Fuel gas cost/MMBtu (including	\$ 6.70	\$ 7.65	(12%)	\$ 6.44	4%
transportation)					

As we remain in a strong commodity price environment, we anticipate that cost pressures within our industry may continue due to greater field activity and rising service costs in general. Based on current plans, we are targeting average steam injection in 2007 of approximately 90,000 to 95,000 barrels of steam per day (BSPD). Natural gas prices impact our cost structure in California by approximately \$1.60 per California BOE for each \$1.00 change in natural gas price.

- · Production taxes: Our production taxes have increased over 2006 as the value of our oil and natural gas assets has increased. Severance taxes, which are prevalent in Utah and Colorado, are directly related to the cost of the field sales price of the commodity. In California, our production is burdened with ad valorem taxes on our total proved reserves. We expect production taxes, in general, to track the commodity price.
- Depreciation, depletion and amortization: DD&A increased per BOE in the three months ended March 31, 2007 compared to the same period in the prior year due to an increase in capital spending over the last year and particularly more extensive development in fields with higher drilling costs and leasehold acquisition costs. Our capital program is also experiencing cost pressures in our labor and for goods and services commensurate with other energy developers. As these costs increase, our DD&A rates per BOE will also increase.
- · General and administrative: Approximately 70% of our G&A is compensation or compensation related costs. To remain competitive in workforce compensation and achieve our growth goals, our general and administrative cost increased significantly due to additional staffing, higher compensation levels, bonuses, stock compensation and benefit costs. We also incurred higher employee travel and other G&A costs associated with our growth activities.
- · Interest expense: Our outstanding borrowings, including our senior unsecured money market line of credit and senior subordinated notes, was \$477 million at March 31, 2007 compared to \$406 million at December 31, 2006. Our average borrowings increased during the three months ended March 31, 2007 as a result of our capital expenditure program and due to the annual payment of a price-based royalty for \$38 million. Beginning in 2006, a certain portion of our interest cost related to our Piceance basin acquisition and joint venture has been capitalized into the basis of the assets, and we anticipate a portion will continue to be capitalized until the remainder of our probable reserves have been recategorized to proved developed reserves. For the quarter ended March 31, 2007, \$4

million has been capitalized and we expect to capitalize approximately \$20 million of interest cost during the full year of 2007.
