Exhibit 99.1

**Crimson Exploration Announces Successful Well in its Willis Marsh Field - Houston, TX** (BUSINESS WIRE) June 26, 2008 - Crimson Exploration Inc. (OTCBB: CXPO - News) today announced that it has successfully completed the Catherine Henderson No. 6 exploitation well in the Willis Marsh Field in east central Liberty County, Texas, south of the Company's Felicia area. The well was drilled to a total depth of 13,111 feet and logged 80 feet of net pay in the Cook Mountain formation. The well was placed on production on June 17th and is currently producing at a stabilized gross rate of approximately 7,300 mcf of natural gas per day, with 550 barrels of condensate and an estimated yield of 75 barrels of natural gas liquids per million cubic feet of natural gas produced and processed, with 8,200 pounds flowing tubing pressure. The Company owns an approximate 67% working interest and an approximate 50.6% net revenue interest in this well.

The Catherine Henderson No. 6 well is the first well drilled by the Company in the Willis Marsh Field, and our seventh successful well out of eight drilled in Liberty County since we acquired the area last year. Allan Keel, President & CEO of the Company, commented: "The drilling success we have experienced in Liberty County supports our belief that this area still contains a significant amount of upside potential for the Company. We will continue to develop and pursue additional opportunities in this area for at least the next couple of years. We anticipate that we will drill another 6-8 wells in the Liberty County area during 2008."

*This press release includes forward-looking statements as defined by the Securities and Exchange Commission (SEC). Such statements include those concerning Crimson's strategic plans, expectations and objectives for future operations. All statements included in this press release that address activities, events or developments that Crimson expects, believes or anticipates will or may occur in the future are forward-looking statements. These statements are based on certain assumptions Crimson made based on its experience and perception of historical trends, current conditions, expected future developments and other factors it believes are appropriate under the circumstances. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond Crimson's control. Statements regarding future capital expenditures and production are subject to all of the risks and uncertainties normally incident to the exploration for and development and production of oil and gas. These risks include, but are not limited to, inflation or lack of availability of goods and services, environmental risks, drilling risks and regulatory changes and the potential lack of capital resources. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. Please refer to our filings with the SEC, including our Form 10-K for the year-ended December 31, 2007 for a further discussion of these risks.*
