Form 10-Q
November 14, 2011

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D. C. 20549

FORM 10-Q

Quarterly report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2011 or

Transition report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

001-9731
(Commission file No.)

ARRHYTHMIA RESEARCH TECHNOLOGY, INC.
(Exact name of registrant as specified in its charter)

DELAWARE
(State or other jurisdiction of incorporation or organization)

72-0925679
(I.R.S. employer identification no.)

25 Sawyer Passway
Fitchburg, Massachusetts 01420
(Address of principal executive offices)

(978) 345-5000
(Issuer's telephone number, including area code)

Check whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and

post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer [] Accelerated filer [] Non-Accelerated filer [] Smaller reporting company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 7, 2011 there were 2,790,514 shares of the Company’s common stock outstanding.

ARRHYTHMIA RESEARCH TECHNOLOGY, INC.

Cash and cash equivalents at end of period	\$2,445,115	\$3,139,546

The accompanying notes are an integral part of the consolidated financial statements.

Notes to the Consolidated Financial Statements

1. Basis of Presentation:

The unaudited interim consolidated financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Accordingly, certain information and footnote disclosures normally included in complete financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The accompanying unaudited interim consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Arrhythmia Research Technology, Inc. ("ART") and subsidiaries (the "Company") Annual Report on Form 10-K for the year ended December 31, 2010 filed with the SEC on March 23, 2011.

The information presented reflects, in the opinion of the management of the Company, all adjustments necessary for a fair presentation of the financial results for the interim period presented.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Operating results for interim periods are not necessarily indicative of results that may be expected for the entire fiscal year.

2. Inventories:

Inventories consist of the following as of:	September 30, 2011	December 31, 2010
Raw materials	\$ 878,113	\$ 911,440
Work-in-process	307,155	169,063
Finished goods	1,545,550	1,988,674
Total	\$ 2,730,818	\$ 3,069,177

The value of silver in inventory at September 30, 2011 and December 31, 2010 as a part of finished goods as plated sensors, work in process, or raw material was \$752,149 and \$617,154, respectively. Inventories are stated net of a reserve for slow moving or obsolete inventory.

3. Share-Based Compensation:

The Company accounts for non-cash share based compensation under Accounting Standards Codification ("ASC") 718 "Stock Compensation", which establishes accounting for equity instruments exchanged for employee services. Under the provisions of ASC 718, share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grant).

The Company estimates the fair value of stock options using the Black-Scholes valuation model. Key input assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of the Company's stock over the option's expected term, the risk-free interest rate over the option's expected term, and the Company's expected annual dividend yield. The Company believes that the valuation technique and the approach utilized to develop the underlying assumptions are appropriate in calculating the

fair values of the Company's stock options. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by persons who receive equity awards.

The Company recognized share-based compensation expense of \$23,521 and \$22,030 for the three months ended September 30, 2011 and 2010, and \$85,385 and \$79,041 for the nine months ended September 30, 2011 and 2010, respectively. Two grants totaling 160,000 options to 9 persons, including directors and management, were made during the nine months ended September 30, 2011. Grants totaling 135,500 options were made in the first nine months of 2010 of which, 60,000 non-qualified options were outside of the Company's stock option plan in conjunction with business combination activities, of which 20,000 are currently exercisable.

The following is a weighted average of the assumptions used to estimate the fair market value of options granted using the Black Scholes valuation method:

	Nine Months Ended September 30, 2011	Nine Months Ended September 30, 2010
Dividend Yield	2.1%	1.26%
Expected Volatility	31.24%	46.48%
Risk Free Interest Rate	0.98%	1.2%
Expected Option Terms (in years)	5	5

Share-based Incentive Plan

At September 30, 2011, the Company has two stock option plans that includes both incentive stock options and non-qualified stock options to be granted to certain eligible employees, non-employee directors, or consultants of the Company. The 2001 Plan has 236,500 options outstanding; however, has been closed for new grants. The 2010 Plan has 160,000 options outstanding and the maximum number of shares reserved for issuance is 500,000 shares. The options granted have six or ten year contractual terms and either vest immediately or vest annually over a five-year term.

The following table presents the average price and contractual life information about options outstanding and exercisable at September 30, 2011:

Exercise Price	Number of Outstanding Shares	Weighted Average Remaining Contractual Life (years)	Options Currently Exercisable	Average Fair Value at Grant Date
\$3.41	75,500	4.26	15,100	\$0.96
4.76	60,000	3.71	20,000	1.77
5.73	90,000	9.68	—	1.30
7.15	96,000	2.26	57,600	2.74
9.86	63,000	0.22	63,000	4.22
9.86	70,000	9.63	—	0.50
12.42	10,000	0.85	10,000	5.38
23.10	10,000	1.43	8,000	10.77
	474,500		173,700	

The aggregated intrinsic value of options outstanding and vested at September 30, 2011 was \$0. The Company expects 244,490 or 81.3% of the 300,800 unvested options to vest over their remaining life.

The following table summarizes the status of the Company's non-vested options since December 31, 2010:

	Non-Vested Options Number of Shares	Weighted Average Fair Value
Non-vested at December 31, 2010	184,100	\$1.98
Granted	160,000	0.95
Vested	(43,300) 2.50
Forfeited	—	
Non-vested at September 30, 2011	300,800	\$1.36

At September 30, 2011, there was \$259,125 of total unrecognized cost related to non-vested share-based compensation arrangements granted under the Plan. This cost is expected to be recognized over a weighted average period of 3.92 years.

6

4. Income Taxes:

The Company accounts for income taxes in accordance with ASC 740 "Income Taxes," which requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using tax rates in effect for the year in which the differences are expected to reverse.

The Company files income tax returns in the U.S. Federal jurisdiction and various state jurisdictions. The periods from 2008 to 2010 remain open to examination by the IRS and state jurisdictions. The Company believes it is not subject to any significant tax risks related to uncertain tax positions. The Company does not have any accrued interest or penalties associated with any unrecognized tax benefits, nor were any interest expenses recognized during the nine months ended September 30, 2011 and 2010.

5. Earnings per share:

In accordance with ASC 260, the basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional shares that would have been outstanding if the potential shares had been issued and if the additional shares were dilutive. At September 30, 2011, 173,700 stock options were anti-dilutive and are excluded from the three and nine months in the earnings per share computation.

6. RMDDx Acquisition:

On June 18, 2010, the Company, through a newly created Delaware subsidiary named RMDDxUSA Corp., purchased all of the outstanding shares of RMDDx Corporation ("RMDDx"), a Prince Edward Island corporation. The shares were exchanged for 115,033 shares of ART common stock and options to purchase 60,000 shares at \$4.76. These shares and options were immediately placed in escrow and are released and vested based upon the achievement of certain performance targets. The performance targets require client contracts, service volumes and gross sales with minimum gross margins. On October 15, 2010, the first performance target was met, 28,758 shares of stock were released from escrow and 20,000 options are vested. On October 18, 2011, the second performance target was missed, and will require an adjustment to equity.

RMDDxUSA Corp. is the U.S. sales and distribution operations entity for, and parent of, RMDDx.

RMDDx is a medical device and diagnostic service company dedicated to the development and commercialization of medical devices, medical information technology, medical diagnostics and patient monitoring through wireless, internet and telecommunication technologies. Since inception, the efforts have been devoted to the development of remote wireless medical technology for heart monitors.

The fair value of the assets acquired and liabilities assumed in the acquisition on June 18, 2010 is as follows:

Assets	
Current Assets	\$17,357
Fixed Assets	83,381
Deferred Tax Assets	165,872
Other Assets	512,483
Total Assets	\$779,093
Liabilities	
Current Liabilities	\$82,254

Total Liabilities

\$82,254

RMDDx has a deferred tax asset related to losses prior to the close of the transaction. The deferred tax asset is for Canadian and Provincial corporate income taxes.

7

RMDDx had \$510,833 in cash which was restricted as it collateralized a guarantee on a stand-by letter of credit related to a Canadian Federal contracting economic incentive program involving an unrelated third party. The restriction was lifted during the second quarter of 2011 when the Company secured a \$1,000,000 letter of credit to replace the guarantee by the Province of Prince Edward Island. Using the judgment of management in the fair market valuation required by ASC 805 "Business Combinations", over the next 5 years the targets of the incentive program are expected to be achieved. These calculations and the associated assumptions are the basis for not including a liability related to the guarantee on the Balance Sheet. As of September 30, 2011, management has not booked a reserve for this performance requirement. This guarantee, secured by the Company's letter of credit, is reviewed by management for impairment. The Province of Prince Edward Island, through an economic incentive program, has paid expense reimbursements exceeding \$220,000 to the Company in the form of a labor and equipment rebates.

The common stock was issued from treasury, and the options were issued outside of the Company's existing stock option plan. The fair value of the options was determined by using the Black Scholes valuation methods described in Note 3. The fair value of the equity issued was determined based on the probability of the management of RMDDx meeting the performance targets required for the release and vesting of shares and options. In compliance with ASC 805-30-30-1, a fair value of the equity was determined to be \$550,551 and was calculated by discounting the targets outside of a 12 month period with an estimate of the probability of attainment. The determination of probabilities was made using the same assumptions used throughout the purchase accounting.

In compliance with FASB ASC 805-30-25-2, this transaction was deemed a "bargain purchase" with the resulting gain of \$146,288 booked as other income in the quarter ended June 30, 2010. This increase to other income offsets the general and administrative costs related to the transaction of approximately \$80,000. As defined by ASC 805-30-25, the purchase of RMDDx was not a forced sale in which the seller acted under compulsion. The discount to fair value relates to the sellers belief in the future value of the combined entity exceeding the current value of the consideration.

7. Recent Pronouncements

Accounting Standards Update (ASU) 2011-05, "Comprehensive Income" ("Update 2011-05"), revises the manner in which companies present comprehensive income in their financial statements. This ASU requires companies to report the components of comprehensive income in either a continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement would present the components of net income, similar to the Company's current Consolidated Statements of Operations, while the second statement would include the components of other comprehensive income (OCI), as well as a cumulative total for comprehensive income. This ASU does not change the items that must be reported in OCI. ASU 2011-05 must be applied retrospectively and is effective for the first quarter of 2012. Management is in the process of evaluating the presentation options required by this ASU.

Accounting Standards Update (ASU) 2011-07, "Health Care Entities (Topic 954): Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts and the Allowance for Doubtful Accounts for Certain Health Care Entities" ("Update 2011-07"). Update 2011-07 requires certain health care entities to change the presentation in their statement of operations by reclassifying the provision for bad debts associated with patient service revenue from an expense to a deduction from patient service revenue (net of contractual allowances and discounts). Additionally, those health care entities are required to provide enhanced disclosure about their policies for recognizing revenue and assessing bad debts. The amendments also require disclosures of patient service revenue (net of contractual allowances and discounts) as well as qualitative and quantitative information about changes in the allowance for doubtful accounts. Update 2011-07 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2011, with early adoption permitted. Management is in the process of evaluating the effects of Update 2011-07 on the consolidated financial statements.

Accounting Standards Update ("ASU") 2011-08, "Intangibles Goodwill and Other (Topic 350): Testing Goodwill for Impairment" ("Update 2011-08"). Update 2011-08 amends existing guidance by giving an entity the option to first assess qualitative factors to determine whether it is more likely than not (that is, a likelihood of more than 50%) that the fair value of a reporting unit is less than its carrying amount. If this is the case, companies will need to perform a more detailed two-step goodwill impairment test which is used to identify potential goodwill impairments and to measure the amount of goodwill impairment losses to be recognized, if any. ASU 2011-08 will be effective for annual

and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, which for the company is the first quarter of 2012. Management does not believe the adoption of this update will have a material impact on the consolidated financial statements.

8

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

Any forward looking statements made herein are based on current expectations of the Company that involve a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. Forward looking statements may be identified by the use of words such as “expect,” “anticipate,” “believe,” “intend,” “plans,” “predict,” or “will”. Although the Company believes that our expectations are based on reasonable assumptions, we can give no assurance that our expectations will materialize. Many factors could cause actual results to differ materially from our forward looking statements. Several of these factors include, without limitation: our ability to maintain our current pricing model and/or decrease our cost of sales; our ability to increase sales of higher margin products and services; variations in the mix of products and services sold; variability of customer delivery requirements; ability to license our software, provide timely customization and updates; ability to successfully market WirelessDx services, manage the timing of investment in operational infrastructure and ability to accelerate the pace of revenues from customer implementation; a stable interest rate market and/or a stable currency rate environment in the world, and specifically the countries where we are doing business; continued availability of supplies or materials used in manufacturing at competitive prices; volatility in commodity and energy prices; the Company's ability to offset higher costs with price increases; adverse regulatory developments in the U.S. or any other country the Company plans to do business in; entrance of competitive products and services in the Company's markets; the ability of management to execute plans and motivate personnel in the execution of those plans; no adverse publicity related to the Company and/or its products; adverse claims relating to the Company's intellectual property; adoption of new, or changes in, accounting principles; passage of new, or changes in, regulations; legal proceedings; ability to maintain compliance with the NYSE Amex requirements for continued listing of our common stock; the costs inherent with complying with statutes and regulations applicable to public reporting companies, such as the Sarbanes-Oxley Act of 2002; the Company's ability to efficiently integrate acquisitions and other new lines of business that the Company may enter in the future, if any; and other risks referenced from time to time elsewhere in this report and in our filings with the SEC.

The Company is under no obligation and does not intend to update, revise or otherwise publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of any unanticipated events. More information about factors that potentially could affect the Company's financial results is included in the Company's filings with the SEC, including its Annual Report on Form 10-K for the year ended December 31, 2010.

Overview

Arrhythmia Research Technology, Inc. (“ART”) is engaged in the licensing of medical software, which acquires data and analyzes electrical impulses of the heart to aid in the detection of potentially lethal arrhythmias. Micron Products, Inc. (“Micron”), a wholly owned subsidiary, is the primary source of consolidated revenues. This primary source of revenue relates to the manufacturing of components, devices and equipment primarily for the medical and defense industries. The single largest category of revenue relates to Micron’s production and sale of silver/silver chloride coated and conductive resin sensors used as component parts in the manufacture of integrated disposable electrophysiological sensors. These disposable medical devices are used worldwide in the monitoring of electrical signals in various medical applications. In an effort to leverage these skills, the Company has expanded into custom thermoplastic injection molded products with a full array of design, engineering and production services and management. With the addition of a medical machining cell, the Company began production of patient specific metal and plastic orthopedic devices. RMDDxUSA Corp. together with its subsidiary RMDDx Corporation (such subsidiaries collectively, “WirelessDx”), a wholly owned subsidiary of ART, provides medical software and services,

respectively, to the medical industry. While not currently adding significant revenue to the results, management believes these businesses have significant potential for future growth of the Company. Management continues to identify complementary and/or synergistic products, technologies and lines of business in an effort to broaden the Company's offerings.

9

Results of Operations

Revenue for the three months ended September 30, 2011 was \$6,788,974 versus \$5,888,277 for the three months ended September 30, 2010, an increase of \$900,697 or 15%. Micron's medical sensors and snaps with silver surcharge revenue increased by \$1,839,000 and high volume precision molded products and other miscellaneous sales increased by \$134,000. The increase in revenues from sensors and snaps is due to higher silver surcharge and a unit volume increase of 17% as compared to the three months ended September 30, 2010. Revenue from the Micron Integrated Technology's (MIT) products decreased \$902,000 due to decreased volume from the Company's defense industry customers and the planned completion of a significant program. The MIT division's revenue is derived from custom molding, precision metal machining and mold making activities. Combined revenues from ART's software and WirelessDx services were \$32,124 and \$202,510 for the three months ended September 30, 2011 and 2010, respectively.

Revenue for the nine months ended September 30, 2011 was \$18,990,368 versus \$17,255,916 for the nine months ended September 30, 2010, an increase of \$1,734,452 or 10%. Micron's medical sensors and snaps with silver surcharge revenue increased by \$4,071,941 and high volume precision molded products and other miscellaneous sales increased by \$283,038. The increase in revenues from sensors and snaps is due to higher silver surcharge and a 9% increase in per unit revenue due to a shift in product mix. Revenue from the Micron Integrated Technology's (MIT) product life cycle management programs decreased \$2,378,889. MIT's revenue is derived from the custom molding, precision metal machining and mold making activities. The revenue decreases reflect lower volume of defense industry products that were partially offset by higher tooling sales. Combined revenues from ART's software and WirelessDx services were \$60,873 and \$302,510 for the nine months ended September 30, 2011 and 2010, respectively.

Revenue from domestic and foreign sales for the three and nine month periods is as follows:

	Three months ended September 30,				Nine months ended September 30,			
	2011	%	2010	%	2011	%	2010	%
United States	\$2,571,442	38	\$3,119,155	53	\$7,494,626	39	\$9,158,010	53
Canada	2,031,183	30	1,373,442	23	6,388,472	34	4,128,142	24
Europe	764,403	11	608,331	10	1,924,825	10	1,753,490	10
Pacific Rim	888,691	13	677,297	12	1,731,345	9	1,487,659	9
Other	533,255	8	110,052	2	1,451,100	8	728,615	4
Total	\$6,788,974	100%	\$5,888,277	100%	\$18,990,368	100%	\$17,255,916	100%

The increase of sales in Canada, Europe and the Pacific Rim is due to increasing sensor revenue. The decrease of sales in United States is related to a reduction in defense industry products.

Cost of sales was \$5,455,531 or 80% of revenue for the three months ended September 30, 2011 as compared to \$4,605,683 or 78% of revenue for the same period in 2010. Cost of sales was \$15,254,373 or 80% of revenue for the nine months ended September 30, 2011 as compared to \$13,894,697 or 81% of revenue for the same period in 2010. The stabilization and reduction of costs remains a priority of management. The inability to increase our sensor prices in the competitive global marketplace hinders passing additional material and utility cost increases to our customers, excluding the escalating cost of silver. As silver increases in price, the additional cost is passed to customers in the form of a silver surcharge, resulting in a decreased gross margin as a percentage of sales. The increase in sensor margin in the nine months ended September 30, 2011 occurred despite the aforementioned escalating cost of silver. The improvements from automation and in process controls continue to positively contribute to gross profit.

Management continues to investigate ways to improve the overall gross margin by focusing marketing efforts on higher margin products and investing in new technologies.

Selling and marketing expense was \$450,910 or 7% of sales for the three months ended September 30, 2011 as compared to \$259,831 or 4% for the same period in 2010. The selling and marketing expense was \$
