PRAXAIR, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Summary of Significant Accounting Policies

Presentation of Condensed Consolidated Financial Statements - In the opinion of Praxair, Inc. (Praxair) management, the accompanying condensed consolidated financial statements include all adjustments necessary for a fair presentation of the results for the interim periods presented and such adjustments are of a normal recurring nature. The accompanying condensed consolidated financial statements should be read in conjunction with the notes to the consolidated financial statements of Praxair, Inc. and subsidiaries in Praxair's 2012 Annual Report on Form 10-K. There have been no material changes to the company's significant accounting policies during 2013. Accounting Standards Implemented in 2013

The following standards were effective for Praxair in 2013 and their adoption did not have a significant impact on the condensed consolidated financial statements:

Statement of Comprehensive Income - In February 2013, the Financial Accounting Standards Board ("FASB") issued updated disclosure requirements regarding the presentation of other comprehensive income. The adoption of this guidance did not have a significant impact on the consolidated financial statements. Refer to the Consolidated Statements of Comprehensive Income (Loss) following the Consolidated Statements of Income.

Offsetting Assets and Liabilities – In December 2011, the FASB issued updated disclosure requirements related to a company's right or requirement to offset balance sheet items and the related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of setoff, amounts offset, and the related net exposure. The adoption of this guidance did not have a significant impact on the consolidated financial statements.

Accounting Standards to be Implemented

Accounting for Cumulative Translation Adjustment – In March 2013, the FASB issued updated guidance on the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity, or as a result of acquisitions achieved in stages. This guidance will be effective for Praxair beginning with the first quarter 2014. Praxair does not expect this requirement to have any impact on the consolidated financial statements.

Presentation of Unrecognized Tax Benefits – In July 2013, the FASB issued updated guidance on the presentation of unrecognized tax benefits. The new guidance requires an entity to present certain unrecognized

• tax benefits, or a portion thereof, as a reduction to the related deferred tax asset, primarily for loss and tax credit carryforwards. This guidance will be effective for Praxair beginning with the first quarter 2014. Praxair does not expect this requirement to have a significant impact on the consolidated financial statements.

Reclassifications – Certain prior years' amounts have been reclassified to conform to the current year's presentation. 2. Venezuela Currency Devaluation and Other Charges

2013 and 2012 Pension Settlements

In 2012 and 2011 a number of senior managers retired. These retirees are covered by the U.S. supplemental pension plan which provides for a lump sum benefit payment option. Under certain circumstances, such lump sum payments must be accounted for as a settlement of the related pension obligation, but only when paid. Accordingly, Praxair recorded a settlement charge related to net unrecognized actuarial losses of \$9 million (\$6 million after-tax) in both the third quarter 2013 and 2012, when the cash payments were made to the retirees.

2013 Venezuela Currency Devaluation

On February 8, 2013, Venezuela announced a devaluation of the Venezuelan Bolivar from 4.30 to 6.30 (a 32% devaluation), effective on February 13, 2013. In the first quarter Praxair recorded a \$23 million pre-tax charge (\$23 million after-tax or \$0.08 per diluted share) due primarily to the remeasurement of the local Venezuelan balance sheet to reflect the new official 6.30 exchange rate. The company does not expect the impact of the devaluation on future results of operations to be significant.

2012 Cost Reduction Program

In the third quarter 2012, Praxair recorded pre-tax charges totaling \$56 million (\$38 million after-tax and noncontrolling interest), relating to severance and business restructuring actions primarily in Europe within the industrial gases and surface technologies businesses. The severance costs of \$43 million are for the termination of approximately 410 employees, primarily in Europe (industrial gases and surface technologies). The costs associated with exit or disposal activities of \$13 million include asset write-downs and other costs associated with a decision to eliminate and/or restructure operations and product lines. The actions are substantially completed as of September 30, 2013 and the remaining liability associated with those actions is expected to be paid during the next twelve months. The following table summarizes the activities related to the nine months ended September 30, 2013:

(Millions of dollars)	Severance Costs	Costs Assoc with Exit or Disposal Activities	iated Total Cost Reduction Program	
Balance, January 1, 2013	\$30	\$4	\$34	
Less: Cash payments	(13) (3) (16)
Less: Non-cash asset write-offs		<u> </u>		
Foreign currency translation	1		1	
Balance, September 30, 2013	\$18	\$ 1	\$19	
	1 1 1 0		1.1 . 1.0	• •

For further details regarding the cost reduction program and other charges, refer to Note 2 to the consolidated financial statements of Praxair's 2012 Annual Report on Form 10-K.

3. 2013 Acquisitions

NuCO₂

On March 1, 2013 Praxair acquired 100% of NuCO₂ Inc. ("NuCO₂") for 1,095 million. NuCO₂ is the leading national provider of beverage carbonation solutions in the United States to the restaurant and hospitality industries with 162,000 customer locations and 900 employees, and with 2012 sales of approximately \$230 million. The NuCO₂ micro-bulk beverage carbonation solution is the service model of choice for quick service restaurants and convenience stores offering fountain beverages and represents an extension of Praxair's core industrial gas business.

The acquisition of $NuCO_2$ was accounted for as a business combination. Following the acquisition date, 100% of $NuCO_2$'s results were consolidated in the North America business segment. For the quarter and nine months ended September 30, 2013, Praxair's consolidated income statement includes sales of \$64 million and \$145 million, respectively, related to $NuCO_2$. Pro forma results for the quarters and nine months ended September 30, 2013 and 2012 have not been included as the impact of the acquisition is not material to the consolidated statements of income.

The following table summarizes the fair value of identifiable assets acquired and liabilities assumed in the acquisition of $NuCO_2$ as of the acquisition date. The allocation of the purchase price to identifiable assets and liabilities is final except for those related to income taxes. The potential adjustments are expected to be insignificant and will be recorded when the pre-acquisition tax returns are finalized in the 2014 first quarter.

(Millions of dollars)	March 1, 2013
Trade receivables, net	\$17
Property, plant and equipment	199
Intangible assets	374
Deferred income taxes	(85)
Other assets and (liabilities)	(28)
Goodwill	618
Purchase price	\$1,095

The identifiable intangible assets primarily consist of customer relationships that will be amortized over their estimated useful life of 25 years. The deferred income taxes relate primarily to property, plant and equipment, intangibles and operating loss carryforwards. The goodwill resulting from the acquisition is attributable to (i) expected growth from market penetration into

Table of Contents

the quick service restaurants, convenience stores and themed restaurant chains in the United States and select international markets as we leverage Praxair's customer and distribution networks worldwide, and (ii) cost synergies related to the procurement of raw materials, distribution-related expenses and administrative costs as we integrate and rationalize administration tasks and leverage Praxair's purchasing scale. The goodwill is not expected to be deductible for income tax purposes.

Other Acquisitions

On May 29, 2013 Praxair acquired Dominion Technology Gases ("Dominion"), a leading global supplier of diving, welding, industrial, laboratory and calibration gases and associated equipment to the offshore oil and gas industry based in Aberdeen, Scotland. Dominion provides products and services to the expanding global offshore oil and gas market.

On June 3, 2013 Praxair acquired Volgograd Oxygen Factory ("VOF"), the largest independent industrial gas business in southern Russia, expanding Praxair's production and distribution capabilities in the Volgograd region. Additionally, during the nine-month period ended September 30, 2013, Praxair acquired several smaller independent packaged gas distributors in the United States and a customer contract with operating assets in China.

The results of operations of these acquisitions were consolidated from the respective acquisition dates, primarily in the Europe business segment, and the impact was not significant. The aggregate purchase price for these acquisitions was \$216 million and resulted in the recognition of \$186 million of intangible assets, including \$99 million of goodwill and \$87 million of other intangible assets, which will be amortized over their estimated useful life.

4. Supplemental Information

Inventories

The following is a summary of Praxair's consolidated inventories:

(Millions of dollars)	September 30, 2013	December 31, 2012
Inventories		
Raw materials and supplies	\$181	\$164
Work in process	57	56
Finished goods	281	256
Total inventories	\$519	\$476
Long term respirables		

Long-term receivables

Long-term receivables are not material and are largely reserved. Such long-term receivables are included within other long-term assets in the condensed consolidated balance sheets and totaled \$46 million at September 30, 2013 and December 31, 2012. These amounts are net of reserves of \$49 million and \$43 million, respectively. The amounts in both periods relate primarily to government receivables in Brazil and other long-term notes receivable from customers. Collectability is reviewed regularly and uncollectible amounts are written-off as appropriate. The account balance changes during 2013 were primarily the result of currency fluctuations, additional receivables and reserves.

5. Debt

The following is a summary of Praxair's outstanding debt at September 30, 2013 and December 31, 2012:

SHORT-TERM Entropy Commercial paper and U.S. bank borrowings \$1,002 \$563 Other bank borrowings (primarily international) 133 75 Total short-term debt 1,135 638 LONG-TERM 1,135 638 U.S. borrowings	(Millions of dollars)	September 30, 2013	December 31, 2012

(a) Amounts are net of unamortized discounts.

(b) September 30, 2013 and December 31, 2012 include a \$30 million and \$36 million fair value increase, respectively, related to hedge accounting. See Note 6 for additional information.

For the nine months ended September 30, 2013, Praxair issued the following notes totaling \$2.1 billion: \$400 million of 0.75% notes due 2016, \$500 million of 2.70% notes due 2023, \$500 million of 1.20% notes due 2018,

(c)\$475 million of 1.25% notes due 2018 and \$175 million of 3.55% notes due 2042. The proceeds of all issuances were used for general corporate purposes, including acquisitions, repayment of debt and share repurchases under the Company's share repurchase program.

(d) Classified as long-term because of the Company's intent to refinance this debt on a long-term basis and the availability of such financing under the terms of an existing long-term credit facility, which was increased

)

from \$1.75 billion to \$2.0 billion in September 2013, per the terms of the agreement. (e)In June 2013, Praxair repaid \$350 million of 3.95% notes and \$500 million of 2.125% notes that became due.

6. Financial Instruments

In its normal operations, Praxair is exposed to market risks relating to fluctuations in interest rates, foreign currency exchange rates, energy costs and to a lesser extent precious metal prices. The objective of financial risk management at Praxair is to minimize the negative impact of such fluctuations on the company's earnings and cash flows. To manage these risks, among other strategies, Praxair routinely enters into various derivative financial instruments ("derivatives") including interest-rate swap and treasury rate lock agreements, currency-swap agreements, forward contracts, currency options, and commodity-swap agreements. These instruments are not entered into for trading purposes and Praxair only uses commonly traded and non-leveraged instruments.

There are two types of derivatives that the company enters into: (i) those relating to fair-value exposures, and (ii) those relating to cash-flow exposures. Fair-value exposures relate to recognized assets or liabilities, and firm commitments; while cash-flow exposures relate to the variability of future cash flows associated with recognized assets or liabilities, or forecasted transactions.

When a derivative is executed and hedge accounting is appropriate, it is designated as either a fair-value hedge or a cash-flow hedge. Currently, Praxair designates all interest-rate and treasury-rate locks as hedges for accounting purposes; however, currency contracts are generally not designated as hedges for accounting purposes unless they are related to forecasted transactions. Whether designated as hedges for accounting purposes or not, all derivatives are linked to an appropriate underlying exposure. On an ongoing basis, the company assesses the hedge effectiveness of all derivatives designated as hedges for accounting purposes to determine if they continue to be highly effective in offsetting changes in fair values or cash flows of the underlying hedged items. If it is determined that the hedge is not highly effective, then hedge accounting will be discontinued prospectively.

Counterparties to Praxair's derivatives are major banking institutions with credit ratings of investment grade or better and no collateral is required, and there are no significant risk concentrations. Management believes the risk of incurring losses on derivative contracts related to credit risk is remote and any losses would be immaterial. The following table is a summary of the notional amount and fair value of derivatives outstanding at September 30, 2013 and December 31, 2012:

			Fair Value			
	Notional A	mounts	Assets		Liabilities	
(Millions of dollars)	September 2013	3 D ecember 31, 2012	September 2013	3 D ,ecember 31 2012	, September 3 2013	3 D ,ecember 31, 2012

Total	\$880	\$ 410	\$30	\$ 32	\$—	\$ —
Total Derivatives	\$3,136	\$ 2,925	\$34	\$ 38	\$13	\$8

(a) Assets are recorded in prepaid and other current assets, and liabilities are recorded in other current liabilities. (b) Assets are recorded in long term assets.

Currency Contracts

Balance Sheet Items

Foreign currency contracts related to balance sheet items consist of forward contracts entered into to manage the exposure to fluctuations in foreign-currency exchange rates on recorded balance sheet assets and liabilities denominated in currencies other than the functional currency of the related operating unit. The fair value adjustments

on these contracts are offset by the fair value adjustments recorded on the hedged assets and liabilities.

Anticipated Net Income

Historically Praxair has entered into anticipated net income hedge contracts consisting of foreign currency options and forwards related primarily to anticipated net income in Brazil, Europe and Canada. Although there were no anticipated net income hedges outstanding as of September 30, 2013 and December 31, 2012, such derivatives were outstanding during the nine month period ended September 30, 2012. Over the term of the contracts, the fair value adjustments from net-income hedging contracts are largely offset by the impacts on reported net income resulting from currency translation. The accounting rules pertaining to derivatives and hedging do not allow hedges of anticipated net income to be designated as hedging instruments.

Forecasted Purchases

Foreign currency contracts related to forecasted purchases consist of forward contracts entered into to manage the exposure to fluctuations in foreign-currency exchange rates on forecasted purchases of capital-related equipment and services denominated in currencies other than the functional currency of the related operating units. These forward contracts were designated and accounted for as cash flow hedges.

Interest Rate Contracts

Outstanding Interest Rate Swaps

At September 30, 2013, Praxair had \$875 million notional amount of interest-rate swap agreements outstanding related to the \$400 million 3.25% fixed-rate notes that mature in 2015 and to the \$475 million 1.25% notes that mature 2018, which effectively convert fixed-rate interest to variable-rate interest. These swap agreements were designated as fair value hedges with the resulting fair value adjustments recognized in earnings along with an equally offsetting charge / benefit to earnings for the changes in the fair value of the underlying debt instrument. At September 30, 2013, \$30 million was recognized as an increase in the fair value of these notes (\$32 million at December 31, 2012).

Terminated Interest Rate Swaps

The following table summarizes information related to terminated interest rate swap contracts:

	Year	Original	(a)	ed in Earnings	(a)	ed in Earnings	Unrecogni	ized Gain (a)
	Terminated	Gam	Quarter E	nueu r Sontambar 20	Nine Mon	ths Ended r S 0ptember 30	September	r B0 cember 31,
(Millions of dollars))		2013	2012	2013	2012	2013	2012
Interest Rate Swaps								
Underlying debt instrument (b): \$500 million 2.1259	70							
fixed-rate notes that mature in 2013 \$400 million 1.75%		\$18	\$—	\$ 2	\$4	\$ 7	\$—	\$ 4
fixed-rate notes that mature in 2012 \$500 million 6.3759		13	_	1	_	4		_
fixed-rate notes that matured in 2012	2002	47			—	1	—	—
Total		\$78	\$—	\$ 3	\$4	\$ 12	\$—	\$ 4

The unrecognized gain for terminated interest rate swaps is shown as an increase to long-term debt and will be recognized on a straight line basis to interest expense - net over the term of the underlying debt agreements. Upon settlement of the underlying interest rate contract, the cash received is reflected within the Noncontrolling interest transactions and other in the financing section of the condensed consolidated statements of cash flows.

(b) The notional amounts of the interest rate contracts are equal to the underlying debt instruments.

Terminated Treasury Rate Locks

The following table summarizes the unrecognized gains (losses) related to terminated treasury rate lock contracts:

(Millions of dollars)	Year Terminated	Original Gain / (Loss)		U		Gain / (Loss December 2012	· · ·
Treasury Rate Locks		(L088)		2013		2012	
Underlying debt instrument:							
\$500 million 2.20% fixed-rate notes that mature in 2022 (b	o) 2012	\$(2)	\$ (2)	\$ (2)
\$500 million 3.00% fixed-rate notes that mature in 2021 (b) 2011	(11)	(9)	(10)
\$600 million 4.50% fixed-rate notes that mature in 2019 (b	o) 2009	16		10		11	
\$500 million 4.625% fixed-rate notes that mature in 2015 (b)	2008	(7)	(1)	(2)
Total - pre-tax				\$ (2)	\$ (3)
Less: income taxes				1		1	
After- tax amounts				\$ (1)	\$ (2)

The unrecognized gains / (losses) for the treasury rate locks are shown in accumulated other comprehensive income ("AOCI") and are being recognized on a straight line basis to interest expense – net over the term of the underlying debt agreements. The cash received or paid was reflected within the poncontrolling interest transactions and other

debt agreements. The cash received or paid was reflected within the noncontrolling interest transactions and other
 (a) in the financing section of the condensed consolidated statements of cash flows. Refer to the table below summarizing the impact on the company's consolidated statements of income and AOCI for current period gain (loss) recognition.

The notional amount of the treasury rate lock contracts are equal to the underlying debt instrument with the (b)exception of the treasury rate lock contract entered into to hedge the \$600 million 4.50% fixed-rate notes that mature in 2019. The notional amount of this contract was \$500 million.

The following tables summarize the impacts of the company's derivatives on the consolidated statements of income and AOCI:

	Amount of Pre-Tax Gain (Loss)							
	Recognized in Earnings (a)

Treasury rate locks (b)		(1)		
Total - pre tax	\$1	\$—	\$—	\$—
Less: income taxes	_		_	
Total - Net of Taxes	\$1	\$—	\$—	\$—

The gains (losses) on balance sheet items are offset by gains (losses) recorded on the underlying hedged assets and liabilities. The gains (losses) for the derivatives and the underlying hedged assets and liabilities related to debt

(a) items are recorded in the consolidated statements of income as interest expense-net. Other balance sheet items and anticipated net income gains (losses) are recorded in the consolidated statements of income as other income (expenses)-net.

The gains (losses) on forecasted purchases and treasury rate locks are recorded as a component of AOCI within (b)derivative instruments in the condensed consolidated balance sheets. There was no ineffectiveness for these

instruments during 2013 or 2012.

The gains (losses) on forecasted purchases are reclassified to the depreciation and amortization expense on a straight-line basis consistent with the useful life of the underlying asset. The gains (losses) for interest rate

(c) contracts are reclassified to earnings as interest expense –net on a straight-line basis over the remaining maturity of the underlying debt. Net losses of less than \$1 million are expected to be reclassified to earnings during the next twelve months.

7. Fair Value Disclosures

The fair value hierarchy prioritizes the input to valuation techniques used to measure fair value into three broad levels as follows:

Level 1 – quoted prices in active markets for identical assets or liabilities

Level 2 – quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 – inputs that are unobservable (for example cash flow modeling inputs based on assumptions)

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table summarizes assets and liabilities measured at fair value on a recurring basis:

	Fair Value Measurements Using

Liabilities								
Derivatives		_	\$13	\$8				
The fair walness of the desirections	agaata and liah	ilitian and hoar		in a shain of f	ليسمعه وليستن مسمه	ant hualana au		

The fair values of the derivative assets and liabilities are based on market prices obtained from independent brokers or determined using quantitative models that use as their basis readily observable market parameters that are actively

quoted and can be validated through external sources, including third-party pricing services, brokers and market transactions.

The fair values of cash and cash equivalents, short-term debt, accounts receivable-net, and accounts payable approximate carrying amounts because of the short maturities of these instruments. The fair value of long-term debt is estimated based on the quoted market prices for similar issues, which is deemed a level 2 measurement. At September 30, 2013, the estimated fair value of Praxair's long-term debt portfolio was \$7,948 million versus a carrying value of \$7,891 million. At December 31, 2012, the estimated fair value of Praxair's long-term debt portfolio was \$7,131 million versus a carrying value of \$6,724 million. Differences from carrying amounts are attributable to interest-rate changes subsequent to when the debt was issued.

8. Earnings Per Share - Praxair, Inc. Shareholders

Basic earnings per share is computed by dividing Net income – Praxair, Inc. for the period by the weighted average number of Praxair common shares outstanding. Diluted earnings per share is computed by dividing Net income – Praxair, Inc. for the period by the weighted average number of Praxair common shares outstanding and dilutive common stock equivalents, as follows:

	Quarter En	Ended		
	30,		September 30	,
	2013	2012	2013	2012
Numerator (Millions of dollars)				
Net income - Praxair, Inc.	\$445	\$430	\$1,281	\$1,278
Denominator (Thousands of shares)				
Weighted average shares outstanding	294,595	297,843	295,271	298,224
Shares earned and issuable under compensation plans	529	573	528	569
Weighted average shares used in basic earnings per share	295,124	298,416	295,799	298,793
Effect of dilutive securities				
Stock options and awards	3,233	3,315	3,278	3,559
Weighted average shares used in diluted earnings per share	298,357	301,731	299,077	302,352
Basic Earnings Per Share	\$1.51	\$1.44	\$4.33	\$4.28
Diluted Earnings Per Share	\$1.49	\$1.43	\$4.28	\$4.23

There were no antidilutive shares for the quarter ended September 30, 2013. 780 stock options were antidilutive and therefore excluded in the computation of diluted earnings per share for the nine months ended September 30, 2013. Stock options of 1,601,765 and 1,594,165 were antidilutive and therefore excluded in the computation of diluted earnings per share for the quarter and nine months ended September 30, 2012.

9. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill for the nine months ended September 30, 2013 were as follows:

(Millions of dollars)	North America	South America	Europe	Asia	Surface Technologie	s Total	
Balance, December 31, 2012	\$1,499	\$195	\$645	\$25	\$143	\$2,507	
Acquisitions (Note 3)	624		93		—	717	
Purchase adjustments & other	(7) —			—	(7)
Foreign currency translation	(6) (19) (3) —	—	(28)
Balance, September 30, 2013	\$2,110	\$176	\$735	\$25	\$143	\$3,189	

Praxair has performed its goodwill impairment tests annually during the second quarter of each year, and historically has determined that the fair value of each of its reporting units was substantially in excess of its carrying value. For the 2013 test Praxair applied the FASB's updated accounting guidance (refer to Note 1 to the consolidated financial statements of Praxair's 2012 Annual Report on Form 10-K) which allows the Company to first assess qualitative factors to determine the extent of additional quantitative analysis, if any, that may be required to test goodwill for impairment. Based on the qualitative assessments performed, Praxair concluded that it was more likely than not that the fair value of each reporting unit substantially exceeded its carrying value and therefore, further quantitative analysis was not required. As a result, no impairment was recorded. There were no indicators of impairment through September 30, 2013.

Changes in the carrying amounts of other intangibles for the nine months ended September 30, 2013 were as follows:

(Millions of dollars)	Customer & License/Use Agreements	Non-compete Agreements	Patents & Other	Total
Cost:				
Balance, December 31, 2012	\$232	\$37	\$20	\$289
Additions (Note 3)	428	3	30	461
Foreign currency translation	2			2
Other *	6	(10) (7) (11)
Balance, September 30, 2013	\$668	\$30	\$43	\$741
Less: Accumulated amortization				
Balance, December 31, 2012	\$(89) \$(20) \$(7) \$(116)
Amortization expense	(23) (4) (2) (29)
Foreign currency translation		_		
Other *	2	10	5	17
Balance, September 30, 2013	\$(110) \$(14) \$(4) \$(128)
Net Balance at September 30, 2013	\$558	\$16	\$39	\$613

* Other primarily relates to the write-off of fully amortized assets and purchase accounting adjustments. There are no expected residual values related to these intangible assets. The remaining weighted-average amortization period for intangible assets is approximately 19 years.

Total estimated annual amortization expense is as follows:

(Millions of dollars)	
Remaining 2013	\$13
2014	46
2015	46
2016	43
2017	37
Thereafter	428
	\$613

10. Share-Based Compensation

Share-based compensation of \$18 million (\$12 million after-tax) and \$17 million (\$12 million after-tax) was recognized during the quarters ended September 30, 2013 and 2012, respectively. Share-based compensation of \$52 million (\$35 million after-tax) and \$52 million (\$36 million after-tax) was recognized for the nine months ended September 30, 2013 and 2012, respectively. The expense was recorded primarily in selling, general and administrative expenses. There was no share-based compensation cost that was capitalized. For further details regarding Praxair's share-based compensation arrangements and prior year grants, refer to Note 15 to the consolidated financial statements of Praxair's 2012 Annual Report on Form 10-K.

Stock Options

The weighted-average fair value of options granted during the nine months ended September 30, 2013 was \$16.31 (\$17.43 in 2012) based on the Black-Scholes Options-Pricing model. The decrease in grant date fair value year-over-year is primarily attributable to the impacts of volatility and dividend yield.

The following weighted-average assumptions were used for grants in 2013 and 2012 :

	Nine Months	Nine Months Ended September 30,					
	2013	2012					
Dividend yield	2.2	% 2.0	%				
Volatility	21.7	% 22.5	%				
Risk-free interest rate	0.76	% 0.86	%				
Expected term years	5	5					

The following table summarizes option activity under the plans as of September 30, 2013 and changes during the nine months period then ended (averages are calculated on a weighted basis; life in years; intrinsic value expressed in millions):

	Number of Options (000's)	Average Exercise Price	Average Remaining Life	Aggregate Intrinsic Value
Outstanding at January 1, 2013	12,281	\$74.05		
Granted	1,308	110.58		
Exercised	(1,625)	58.86		
Cancelled or Expired	(48)	104.27		
Outstanding at September 30, 2013	11,916	80.00	5.6	\$479
Exercisable at September 30, 2013	9,056	\$71.20	4.6	\$444

The aggregate intrinsic value represents the difference between the company's closing stock price of \$120.21 as of September 30, 2013 and the exercise price multiplied by the number of options outstanding as of that date. The total intrinsic value of stock options exercised during the quarter and nine months ended September 30, 2013 was \$25 million and \$93 million, respectively (\$15 million and \$129 million during the same time periods in 2012, respectively).

Cash received from option exercises under all share-based payment arrangements for the quarter and nine months ended September 30, 2013 was \$29 million and \$96 million (\$15 million and \$113 million for the same time periods in 2012, respectively). The cash tax benefit realized from share-based compensation totaled \$9 million and \$44 million for the quarter and nine months ended September 30, 2013, of which \$31 million in excess tax benefits was classified as financing cash flows for the nine months ended September 30, 2013 (\$7 million and \$68 million tax benefit for the same periods in 2012 of which \$50 million represented excess tax benefit for the nine months ended September 30, 2012).

As of September 30, 2013, \$27 million of unrecognized compensation cost related to non-vested stock options is expected to be recognized over a weighted-average period of approximately 1 year.

Performance-Based and Restricted Stock Awards

During the nine months ended September 30, 2013, the company granted performance-based stock units to employees which vest on the third anniversary of their grant date. The actual number of shares issued in settlement of a vested award can range from zero to 200 percent of the target number of shares granted based upon the company's attainment of specified performance targets at the end of a three year period. Compensation expense related to these awards is recognized over the three-year performance period based on the fair value of the closing market price of the company's common stock on the date of the grant and the estimated performance that will be achieved. Compensation expense will be adjusted during the three-year performance period based upon the estimated performance levels that will be achieved.

During the nine months ended September 30, 2013, the company also granted restricted stock units to employees. The majority of the restricted stock units vest at the end of a three year service period. Compensation expense related to the restricted stock units is recognized on a straight-line basis over the vesting period.

The weighted-average fair value of performance-based stock and restricted stock units granted during the nine months ended September 30, 2013 was \$103.46 and \$105.53, respectively, (\$103.13 and \$103.81 for the same periods in 2012). This is based on the closing market price of Praxair's common stock on the grant date adjusted for dividends

that will not be paid during the vesting period.

The following table summarizes non-vested performance-based and restricted stock award activity as of September 30, 2013 and changes during the nine months then ended (shares based on target amounts, averages are calculated on a weighted basis):

	Performance-E	Based	Restricted Stoc	k		
	Number of	Average	Number of	Average		
	Shares	Grant Date	Shares	Grant Date		
	(000's)	Fair Value	(000's)	Fair Value		
Non-vested at January 1, 2013	840	\$88.83	368	\$89.89		
Granted (a)	416	103.46	116	105.53		
Vested	(371	70.91	(131)	76.31		
Cancelled	(12	101.16	(6)	98.83		
Non-vested at September 30, 2013	873	\$99.57	347	\$100.22		

(a) Performance-based stock unit grants during 2013 include 98 thousand shares relating to the actual payout of the 2010 PSU grants in 2013.

As of September 30, 2013, based on current estimates of future performance, \$38 million of unrecognized compensation cost related to performance-based awards is expected to be recognized through the first quarter of 2016 and \$17 million of unrecognized compensation cost related to the restricted stock awards is expected to be recognized primarily through the fourth quarter of 2017.

11. Retirement Programs

The components of net pension and postretirement benefits other than pensions ("OPEB") costs for the quarters and nine months ended September 30, 2013 and 2012 are shown below:

	Quarter E	Inded Septe	ember 30,		Nine Mor	ths Ended	ed September 30,				
	Pensions		OPEB		Pensions		OPEB				
(Millions of dollars)	2013	2012	2013	2012	2013	2012	2013	2012			
Service cost	\$14	\$12	\$1	\$1	\$42	\$37	\$3	\$3			
Interest cost	28	30	3	3	86	91	9	9			
Expected return on plan assets	(38)	(38)			(114)	(116)					
Net amortization and deferral	23	17	(1)	(2)	70	51	(3)	(5)			
Net periodic benefit cost before pension settlement charge	27	21	3	2	84	63	9	7			
Pension settlement charge (Note 2)	9	9			9	9					
Net periodic benefit cost	\$36	\$30	\$3	\$2	\$93	\$72	\$9	\$7			
					a + = a						

Praxair estimates that 2013 contributions to its pension plans will be in the area of \$50 million, of which \$48 million have been made through September 30, 2013.

12. Commitments and Contingencies

Contingent Liabilities

Praxair is subject to various lawsuits and government investigations that arise from time to time in the ordinary course of business. These actions are based upon alleged environmental, tax, antitrust and personal injury claims, among others. Praxair has strong defenses in these cases and intends to defend itself vigorously. It is possible that the company may incur losses in connection with some of these actions in excess of accrued liabilities. Management does not anticipate that in the aggregate such losses would have a material adverse effect on the company's consolidated financial position or liquidity; however, it is possible that the final outcomes could have a significant impact on the company's reported results of operations in any given period (see Note 17 to the consolidated financial statements of Praxair's 2012 Annual Report on Form 10-K).

Among such matters are:

Claims by the Brazilian taxing authorities against several of the company's Brazilian subsidiaries relating to non-income and income tax matters.

During May 2009, the Brazilian government published Law 11941/2009 instituting a new voluntary amnesty program ("Refis Program") which allowed Brazilian companies to settle certain federal tax disputes at reduced amounts. During the 2009 third quarter, Praxair decided that it was economically beneficial to settle many of its outstanding federal tax disputes and these disputes were enrolled in the Refis Program and settled. The final settlement related to the Refis

Program is subject to final calculation and review by the Brazilian federal government and, although the timing is very difficult to estimate, it is possible that this review could be concluded during the next year. Any differences from amounts recorded will be adjusted to income at that time.

After enrollment in the amnesty programs, at September 30, 2013 the most significant remaining claims relate to state VAT tax matters associated with procedural issues and a federal income tax matter where the taxing authorities are challenging the tax rate that should be applied to income generated by a subsidiary company. The total estimated exposure relating to such claims, including interest and penalties, as appropriate, is approximately \$192 million. Praxair has not recorded any liabilities related to such claims based on management judgments, after considering judgments and opinions of outside counsel. Because litigation in Brazil historically takes many years to resolve, it is very difficult to estimate the timing of resolution of these matters; however, it is possible that certain of these matters may be resolved within the near term. The company is vigorously defending against the proceedings. On September 1, 2010, CADE (Brazilian Administrative Council for Economic Defense) announced alleged anticompetitive activity on the part of five industrial gas companies in Brazil and imposed fines on all five companies. Originally, CADE imposed a civil fine of R\$2.2 billion Brazilian reais (US\$986 million) against White Martins, the Brazil-based subsidiary of Praxair, Inc. In response to a motion for clarification, the fine was reduced to R\$1.7 billion Brazilian reais (US\$762 million) due to a calculation error made by CADE. The amount of the fine is subject to indexation using SELIC. On September 2, 2010, Praxair issued a press release and filed a report on Form 8-K rejecting all claims and stating that the fine represents a gross and arbitrary disregard of Brazilian law. On October 19, 2010, White Martins filed an annulment petition ("appeal") with the Federal Court in Brasilia seeking to

have the fine against White Martins entirely overturned. In order to suspend payment of the fine pending the completion of the appeal process, Brazilian law required that the company tender a form of guarantee in the amount of the fine as security. Currently, 50% of the guarantee is satisfied by letters of credit with a financial institution and 50% of the guarantee is satisfied by equity of a Brazilian subsidiary.

Praxair strongly believes that the allegations are without merit and that the fine will be entirely overturned during the appeal process. The company further believes that it has strong defenses and will vigorously defend against the allegations and related fine up to such levels of the Federal Courts in Brazil as may be necessary. Because appeals in Brazil historically take many years to resolve, it is very difficult to estimate when the appeal will be finally decided. Based on management judgments, after considering judgments and opinions of outside counsel, no reserve has been recorded for this proceeding as management does not believe that a loss is probable.

Contractual Obligations Update

The following table sets forth an update to Praxair's material unconditional purchase obligations as of September 30, 2013:

	Expiring through December 31,										
(Millions of dollars)	2013 Remaining	2014	2015	2016	2017	Thereafter	Total				
Unconditional Purchase Obligations	\$167	\$511	\$435	\$416	\$399	\$3,830	\$5,758				

Unconditional purchase obligations represent contractual commitments under various long- and short-term take-or-pay arrangements with suppliers and are not included on Praxair's balance sheet. These obligations are primarily minimum-purchase commitments for helium, electricity, natural gas, and feedstock used to produce atmospheric and process gases. A significant portion of these obligations is passed on to customers through similar take-or-pay or other contractual arrangements. Purchase obligations that are not passed along to customers through such contractual arrangements are subject to market conditions, but do not represent a material risk to Praxair.

\$3,881 million of these purchase obligations relate to power and are intended to secure the uninterrupted supply of electricity and feedstock to our plants in order for Praxair to reliably satisfy customer product supply obligations, and extend through 2030. Certain of the power contracts contain various cancellation provisions requiring supplier agreement which the company believes could reduce the reported obligation significantly, if desired, and many are subject to annual escalations based on local inflation factors. The purchase obligations also include a multi-year

contract for silane, with a total purchase obligation of \$168 million at September 30, 2013. Since this contract was signed, the market for silane has not developed as expected and prices have decreased due to lower demand from photovoltaics and consumer electronics markets, primarily in Asia. At September 30, 2013, Praxair's current selling prices and estimated future demand for silane are in excess of its contractual purchase obligations under the contract, as amended. The company is continuously monitoring market developments.

13. Segments

Sales and operating profit by segment for the quarters and nine months ended September 30, 2013 and 2012 are shown below. For a description of Praxair's operating segments, refer to Note 18 to the consolidated financial statements of Praxair's 2012 Annual Report on Form 10-K.

	Quarter Ended September 30,				Nine Months Ended Septem 30,						
(Millions of dollars)	2013		2012		2013		2012				
SALES ^(a)											
North America	\$1,588		\$1,391		\$4,597		\$4,182

Pension / OPEB funded status obligation - net of taxes	(743)	(792)
	\$(2,139)	\$(1,852)

(a) Includes \$13 million and \$11 million in 2013 and 2012, respectively, attributable to noncontrolling interests.

Redeemable Noncontrolling Interests

Noncontrolling interests with redemption features, such as put/sell options, that are not solely within the Company's control ("redeemable noncontrolling interests") are reported separately in the consolidated balance sheets at the greater of carrying value or redemption value. For redeemable noncontrolling interests that are not yet exercisable, Praxair

Edgar Filing: PRAXAIR INC - Form 10-Q

calculates the redemption value by accreting the carrying value to the redemption value over the period until exercisable. If the redemption value is greater than the carrying value, any increase is adjusted directly to retained earnings and does not impact net income.

The following is a summary of the changes in redeemable noncontrolling interest	ts for the nine mo	onths ended	
September 30, 2013 and 2012:

Balance, September 30,	\$290	\$243	

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Results

Sales grew 9% in the 2013 third quarter from the prior-year period. Underlying sales growth from higher volumes and higher pricing was 7%, reflecting growth in all geographic segments. Overall volume growth was driven by new project start-ups in North America and Asia and higher volumes in South America due to stronger economic activity as compared to the prior year. Overall volumes in Europe were flat as compared to the prior-year. Acquisitions in North America and Europe contributed 3% sales growth. Reported operating profit grew 20% year-over-year primarily due to the charges in the 2012 third quarter for the cost reduction program. Excluding these charges, adjusted operating profit grew 9% year-over-year primarily from higher volumes, pricing, and acquisitions. Reported net income and diluted earnings per share ("EPS") were 3% and 4% above the prior year, respectively. This growth was lower than the growth in operating profit due to an income tax benefit in the 2012 third quarter. Excluding this benefit, adjusted net income and EPS grew 8% and 9%, in line with the growth in operating profit, as higher interest expense was offset by a lower share count.

Sales grew 6% in the nine months ended September 30, 2013. Underlying sales increased 4% driven by project start-ups primarily in North and South America and Asia, and from higher pricing. Reported operating profit grew 6% from the prior-year. Excluding \$32 million of charges for the Venezuela currency devaluation and pension settlement in the 2013 period, and \$65 million of charges for the cost reduction program and pension settlement in the 2012 nine-month period, adjusted operating profit grew 4% from the prior year from higher volumes and higher pricing, partially offset by higher depreciation and amortization expense and SG&A expense due to plant start-ups and acquisitions. Reported net income was comparable to the prior-year period and EPS grew 1%. On an adjusted basis, net income grew 3% and EPS 5%.

The following table provides summary data for the quarters and nine months ended September 30, 2013 and 2012:

	Quarter Ended September 30, Nine Months Ended September 30,

The adjusted amounts are non-GAAP measures that supplement an understanding of the company's financial information by presenting information that investors, financial analysts and management use to help evaluate the company's performance and ongoing business trends on a comparable basis. The non-GAAP adjustments for 2013 relate to the impact of the first-quarter Venezuela currency devaluation of \$23 million (\$23 million net of tax) and

(a) third-quarter pension settlement charge of \$9 million (\$6 million net of tax). The non-GAAP adjustments for 2012 relate to the third quarter cost reduction program and other charges of \$65 million (\$44 million net of tax) and a tax benefit of \$55 million related to the divestiture of the U.S. Homecare business (See Note 2 to the condensed consolidated financial statements). A reconciliation of reported amounts to adjusted amounts can be found in the "Non-GAAP Financial Measures" section of this MD&A.

Results of Operations

The changes in consolidated sales and operating profit compared to the prior year is attributable to the following:

	Quarter I 2013 vs. % Chang	2012	eptembe	er 30,	Nine Mc 30, 2013 % Chang	vs. 201	ded September 2

Sales grew \$239 million, or 9%, in the third quarter ended September 30, 2013 versus the respective 2012 period. Underlying sales grew 7% from higher pricing and volume growth driven by higher on-site volumes from new project

Edgar Filing: PRAXAIR INC - Form 10-Q

start-ups primarily in North America and Asia, and volume growth in South America. By end-market, sales growth was strongest to energy, metals

and chemicals customers, as compared to the prior-year quarter. For the nine-month period sales grew \$490 million, or 6%. Underlying sales growth of 4% came from higher pricing, and volume growth in North and South America and Asia. Acquisitions, including NuCO₂ and Dominion Technology Gases, contributed 3% and 2% to sales growth in the quarter and nine-month periods, respectively. The impacts of foreign currency translation and cost pass-through in both periods was not material.

Gross margin in 2013 increased \$137 million, or 12%, for the quarter and increased \$258 million, or 7%, for the nine months ended September 30, 2013 versus the respective 2012 periods primarily due to higher pricing and volumes. Higher pricing contributed to an increase in the gross margin as a percentage of sales for the quarter and nine-months versus the respective prior-year periods.

Selling, general and administrative expenses ("SGA") increased \$30 million, or 10%, in the quarter and \$66 million, or 7%, for the nine months ended September 30, 2013 versus the respective 2012 periods. The increase in the third quarter was due primarily to increased pension and other benefit costs of \$30 million, and \$13 million related to acquisitions, partially offset by benefits from cost reduction and currency impacts of \$16 million, and \$42 million related to acquisitions, partially offset by benefits from cost reduction and other benefit costs of \$56 million, and \$42 million related to acquisitions, partially offset by benefits from cost reduction and currency impacts of \$32 million. SGA as a percent of sales was relatively flat as compared to the prior year in both the quarter and nine-month periods. Depreciation and amortization expense increased \$33 million, or 13%, for the third quarter and increased \$75 million, or 10%, for the nine months ended September 30, 2013 versus the respective 2012 periods. Depreciation and amortization increased \$13 million and \$34 million in the quarter and nine-month periods, respectively, due to new project start-ups in all geographic segments. Acquisitions in North America and Europe increased depreciation and amortization \$13 million in the quarter and nine-month periods, respectively. The remaining variances of \$77 million and \$11 million in the quarter and nine-month periods related to other items none of which were significant.

Other income (expense) – net was a \$4 million benefit in the third quarter, compared to \$22 million in the prior-year quarter. The 2012 quarter included a gain on asset sale in North America. For the year-to date period, other income was an \$8 million benefit, compared to a \$45 million benefit in the prior-year. The 2012 year-to-date period included a gain on an asset sale in Korea, and a litigation settlement in South America, partially offset by severance and business restructuring charges in South America.

Reported operating profit increased \$112 million, or 20%, for the third quarter of 2013 primarily due to the cost reduction program and other charges of \$65 million included in the 2012 third quarter. Excluding these charges, adjusted operating profit increased \$56 million, or 9%. The increase in operating profit was driven by higher pricing, volumes, acquisitions, and productivity gains, partially offset by higher depreciation and amortization and SGA expense, as discussed above. Reported operating profit increased \$114 million, or 6%, for the nine months ended September 30, 2013 versus the respective 2012 period. The nine-month period includes \$32 million of charges related to the Venezuela currency devaluation and pension settlement versus \$65 million of charges in the 2012 period primarily related to the cost reduction program (see Note 2 to the condensed consolidated financial statements). In the nine-month period, adjusted operating profit increased \$81 million, or 4%, from higher pricing, volumes, acquisitions and productivity gains, partially offset by higher costs. A discussion of operating profit by segment is included in the segment discussion that follows.

Interest expense-net increased \$5 million, or 14%, for the quarter and \$16 million, or 15%, for the nine months ended September 30, 2013 versus the respective periods in 2012. The increase in debt levels, primarily to support acquisitions and capital expenditures, increased interest expense by approximately \$13 million and \$35 million for the quarter and nine month periods ended September 30, 2013, respectively. Interest rates reduced expense by approximately \$8 million and \$17 million for the quarter and nine months ended September 30, 2013 respectively. Capitalized interest had an immaterial impact on interest expense for the quarter. For the nine-month period higher capitalized interest, due to higher capital expenditures, reduced interest expense by approximately \$3 million.

The reported effective tax rate for the quarter and nine months ended September 30, 2013 was 27.8% and 28.3%, respectively, and 17.2% and 24.7% for the 2012 periods. The 2012 periods include a tax benefit of \$55 million related

Edgar Filing: PRAXAIR INC - Form 10-Q

to the divestiture of the U.S. Homecare business. The adjusted effective tax rate for the quarter and nine months ended September 30, 2013 and 2012 was approximately 28%.

Praxair's significant sources of equity income are in China, Italy, and the Middle East. Income from equity investments in the quarter was comparable to the prior year and increased \$4 million for the nine months ended September 30, 2013 versus the respective 2012 periods, due primarily to higher earnings in China resulting from stronger volumes.

At September 30, 2013, non-controlling interests consisted primarily of non-controlling shareholders' investments in Asia (primarily China and India), Europe (primarily Italy and Scandinavia), and North America (primarily within the US packaged gas business). Non-controlling interests increased \$7 million for the quarter and increased \$10 million for the nine months ended September 30, 2013 versus the respective periods in 2012 due to higher earnings of these entities.

Reported net income-Praxair, Inc. increased \$15 million, or 3%, for the quarter versus 2012 and Adjusted net income-Praxair, Inc. increased \$32 million, or 8%, for the quarter versus 2012. The increases in both periods are due primarily to higher operating profit partially offset by increased interest expense. Reported net income-Praxair, Inc. increased \$3 million, for the nine months ended September 30, 2013 versus the respective 2012 period and Adjusted net income-Praxair, Inc. increased \$43 million, or 3% for the nine months ended September 30, 2013 versus the respective 2012 period and Adjusted net income-Praxair, Inc. increased \$43 million, or 3% for the nine months ended September 30, 2013 versus 2012. The increases in both periods are due to higher operating profit partially offset by increased interest expense.

Reported EPS increased \$0.06 and \$0.05 in the third quarter and nine months ended September 30, 2013, respectively, versus the respective periods in 2012. Adjusted EPS increased \$0.12 and \$0.19 in the third quarter and nine months ended September 30, 2013, respectively, versus the comparative periods in 2012. The increase in reported and adjusted EPS in both periods is attributable to higher net income - Praxair, Inc. during the quarter and the reduction in the number of diluted shares outstanding as a result of the company's net repurchases of common stock. Other Comprehensive Income

Other comprehensive income for the third quarter of \$101 million includes positive currency translation adjustments of \$77 million, a positive adjustment of \$23 million related to the funded status of retirement obligations and a positive adjustment of \$1 million related to derivative instruments. The translation adjustments reflect the impact of translating local currency foreign subsidiary financial statements to U.S. dollars (see "Currency" section of the MD&A for exchange rates). The positive translation adjustment primarily resulted from currency movements in Europe (\$47 million), Asia (\$27 million primarily related to Korea) and Surface Technologies (\$13 million primarily related to Europe). These positive impacts were offset with a negative currency adjustment of \$17 million in South America, primarily related to Brazil and Argentina. The positive pension funded status impact is primarily related to required reclassifications of net actuarial losses to net income (see note 11 to the Condensed Consolidated Financial Statements). Other comprehensive loss for the nine months ended September 30, 2013 of \$285 million includes negative translation adjustments of \$335 million, a positive adjustment of \$49 million related to the funded status of retirement obligations and a positive adjustment of \$1 million related to derivative instruments. The negative translation adjustment primarily resulted from currency movements in North America (\$105 million primarily related to Mexico and Canada), South America (\$224 million related primarily to Brazil and Argentina), and Asia (\$17 million related primarily to India). These negative impacts were offset with a positive currency adjustment in Europe (\$12 million primarily related to Germany).

Other comprehensive income for the third quarter September 30, 2012 of \$246 million primarily related to a positive translation adjustments of \$245 million. The positive translation adjustment primarily resulted from currency movements in North America (\$153 million primarily related to Mexico and Canada), Europe (\$39 million), Asia (\$42 million primarily related to Korea and India) and Surface Technologies (\$11 million primarily related to Europe). These positive impacts were offset with a negative currency adjustment of \$7 million in South America, primarily related to Brazil. Other comprehensive loss for the nine months ended September 30, 2012 of \$9 million includes negative translation adjustments of \$31 million and a positive adjustment of \$22 million related to the funded status of retirement obligations. The negative translation adjustment primarily resulted from currency movements in South America (\$160 million related primarily to Brazil). These negative impacts were offset with a positive currency adjustment in North America (\$117 million primarily related to Mexico and Canada), Asia (\$13 primarily related to Korea).

The following tables provide sales by end-market and distribution method:

North America segment sales increased \$197 million, or 14%, in the quarter as compared to the prior year. Underlying sales growth was 7% driven primarily by higher on-site volumes from new project start-ups for hydrogen supply to refinery customers in the United States and merchant sales to oil well services customers and higher pricing. Strong sales growth to the energy end-market was primarily due to these project start-ups. Acquisitions, primarily NuCO2, added 6% sales growth. Higher cost pass-through, primarily higher natural gas prices passed through to hydrogen customers, increased sales by 1%. For the year-to-date period, sales grew \$415 million, or 10%. Underlying sales growth of 3% came primarily from higher pricing and higher volumes driven by the new project start-ups. Acquisitions added 5% growth, and cost-pass-through 2%. Packaged gas sales were higher in the quarter primarily due to growth in the U.S. business. However, primarily due to the impact of new projects on on-site sales and NuCO2 on merchant sales, packaged gas sales have decreased as a percentage of total sales for the segment. North America segment operating profit increased \$32 million, or 9%, for the quarter ended September 30, 2013 versus the respective 2012 period. Higher volumes from project start-ups, higher pricing, acquisitions and a contract settlement for \$23 million in the United States drove operating profit growth versus the prior year. The growth was partially offset by higher operating costs driven by acquisitions and the impact of a gain on asset sale in the prior year. Depreciation and amortization increased \$21 million for the quarter primarily due to acquisitions and the new project start-ups. Operating profit increased \$47 million, or 4%, for the nine months ended September 30, 2013 versus the respective 2012 period primarily due to higher pricing, acquisitions and the impact of the contract settlement which were partially offset by higher operating costs driven by acquisitions and the impact of a gain on asset sale in the prior year. Depreciation and amortization increased \$47 million for the nine-month period primarily due to acquisitions.

Europe segment sales of \$386 million increased \$34 million, or 10%, from the prior-year quarter. Cost pass-through reduced sales in the quarter by 2%. Excluding the effects of lower cost pass-through and the positive effects of currency translation, sales grew 6%, primarily from acquisitions. Overall volumes were comparable to the prior year, as volume growth from project starts in Russia was offset by lower base business volumes, primarily packaged gases in Spain and Italy. For the nine-month period sales increased \$27 million, or 2% from the prior year, to \$1,138 million. The positive impact of currency was offset by the lower cost pass-through noted above, and lower volumes in most European countries with the exception of Russia, Germany and Scandinavia. Europe segment operating profit increased by \$4 million, or 7%, for the third quarter. The volume impact was more

Europe segment operating profit increased by \$4 million, or 7%, for the third quarter. The volume impact was more than offset by higher pricing, acquisitions and currency translation. Cost reductions and productivity benefits outpaced inflation in most markets. For the nine month period, operating profit decreased 1% from prior year due to lower volumes, primarily packaged gas and refrigerants, in Spain and Italy, respectively. The impact of lower volumes was partially offset by the favorable impact of higher pricing and lower costs.

South America segment sales in the third quarter decreased \$22 million or 4% versus the prior year. Excluding unfavorable currency translation impacts, sales grew 6% from higher volumes primarily to merchant and packaged gas customers and higher overall pricing. Sales growth came from most major end-markets including metals, manufacturing, chemicals, healthcare and food and beverage. For the nine month period sales decreased \$37 million, or 2% from 2012. Underlying sales growth excluding negative currency impact and cost pass-through was 6% due to higher volumes and higher pricing.

South America segment operating profit increased \$3 million, or 3%, in the third quarter and 14% excluding currency effects from higher volumes and higher pricing. For the nine months operating profit grew 13% excluding unfavorable currency impacts. The favorable operating leverage was due to volume growth and higher pricing across the region. Depreciation and amortization was comparable to the prior year as the start up of new on-site production facilities was more than offset by currency impacts. Asia
