KRONOS INCORPORATED

KRONOS INCORPORATED CONDENSED CONSOLIDATED STATEMENTS OF CASH FLOWS (In thousands) UN

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE A - General

The accompanying unaudited condensed consolidated financial statements include all adjustments, consisting of normal recurring accruals that management of Kronos Incorporated (the Company or Kronos) considers necessary for a fair presentation of the Company s financial position and results of operations as of and for the interim periods presented pursuant to the rules and regulations of the Securities and Exchange Commission. Certain footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Company believes the disclosures in these financial statements are adequate to make the information presented not misleading. These condensed consolidated financial statements should be read in conjunction with the Company s audited financial statements for the fiscal year ended September 30, 2004. The results of operations for the six months ended April 2, 2005 are not necessarily indicative of the results for a full fiscal year. The Company has reclassified certain support services that are billed on a time and materials basis out of professional services revenues and into maintenance services revenues. These reclassified support services relate to support services charged on a time and materials basis for customers not on maintenance support contracts. This resulted in a reclassification of approximately \$1.2 million and \$2.4 million for the three and six month periods ended April 3, 2004, respectively.

NOTE B - Fiscal Quarters

The Company utilizes a system of fiscal quarters. Under this system, the first three quarters of each fiscal year end on a Saturday. However, the fourth quarter of each fiscal year will always end on September 30. Because of this, the number of days in the first quarter (93 days in fiscal 2005 and 95 days in fiscal 2004) and fourth quarter (90 days in fiscal 2005 and 89 days in fiscal 2004) of each fiscal year varies from year to year. The second and third quarters of each fiscal year will be exactly thirteen weeks long. This policy does not have a material effect on the comparability of results of operations between quarters.

NOTE C - Stock-Based Compensation

The Company accounts for its stock-based compensation plan under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees and related Interpretations. The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, an amendment of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation, (Statement No. 123). Therefore, no stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of Statement No. 123 to stock-based employee compensation (in thousands, except per share data).

Edgar Filing: KRONOS INC - Form 10-Q

Diluted pro forma	\$0.25	\$0.22	\$0.50	\$0.39

On December 16, 2004, the Financial Accounting Standards Board issued Statement No. 123 (revised 2004), Share-Based Payment, which is a revision of Statement No. 123. Please refer to Note I for additional information.

NOTE D - Other Current Assets

Other current assets consists of the following (in thousands):

	April 2,	September 30,
	<u>2005</u>	<u>2004</u>
Inventory	\$7,205	\$6,199
Prepaid expenses	21,747	15,235
Total	\$28,952	\$21,434

NOTE E - Intangible Assets

Acquired intangible assets subject to amortization are presented in the following table (in thousands). Due to the relative size and timing of recent acquisitions, the Company has not finalized the allocation of the purchase price on certain acquisitions and the amounts shown below for intangible assets and goodwill are estimates.

	Weighted Average Life in <u>Years</u>	Gross Carrying <u>Value</u>	Accumulated <u>Amortization</u>	Net Book <u>Value</u>
As of April 2, 2005:				
Intangible assets:				
Customer related	10.0	\$32,000	\$12,813	\$19,187
Maintenance relationships	12.0	11,380	2,354	9,026
Technology	10.0	7,701	288	7,413
Non-compete agreements	3.9	4,968	3,448	1,520
Total intangible assets		\$56,049	\$18,903	\$37,146
As of September 30, 2004:				
Intangible assets:				
Customer related	9.9	\$23,212	\$11,531	\$11,681
Maintenance relationships	12.0	9,492	1,941	7,551
Non-compete agreements	3.9	4,403	2,938	1,465
Total intangible assets		\$37,107	\$16,410	\$20,697

For the three months ended April 2, 2005 and April 3, 2004, the amount of goodwill acquired is \$13.2 million and \$.2 million, respectively. The amount of goodwill acquired during the six months ended April 2, 2005 and April 3, 2004 is \$40.8 million and \$2.4 million respectively.

For the three months ended April 2, 2005 and April 3, 2004, the Company recorded amortization expense for intangible assets of \$1.2 million and \$1.0 million, respectively. The Company recorded \$2.3 million and \$2.0 million of amortization expense for intangible assets for the six months ended April 2, 2005 and April 3, 2004, respectively. The estimated annual amortization expense for intangible assets for the current and next five fiscal years is as follows (in thousands):

Edgar Filing: KRONOS INC - Form 10-Q

Fiscal Year Ending	Estimated Annual
<u>September 30,</u>	<u>Amortization Expense</u>
2005	\$4,978
2006	4,926
2007	4,346
2008	4,150
2009	3,859
2010	3,338

NOTE F - Acquisitions

On November 18, 2004, the Company acquired through Kronos Acquisition Inc., a Canadian corporation and the Company's wholly-owned subsidiary, approximately 10.5 million common shares of AD OPT Technologies Inc. ("AD OPT"), a Canadian corporation, representing approximately 95.6% of the outstanding common shares, for an aggregate purchase price of approximately \$39.1 million, net of cash and short-term investments acquired of approximately \$16.0 million. On December 16, 2004, the Company acquired the remaining 4.4% outstanding common shares through the compulsory acquisition provisions of the Canada Business Corporations Act, for an additional purchase price of approximately \$2.5 million. The results of AD OPT's operations have been included in the consolidated financial statements since November 18, 2004. AD OPT was a provider of advanced workforce planning and scheduling solutions.

The transaction was accounted for under the purchase method of accounting and accordingly, the assets and liabilities acquired were recorded at their estimated fair values at the effective date of the acquisition. The goodwill recognized is deductible for income tax purposes. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed (in thousands):

Accounts receivable	\$4,936
Fixed assets	1,817
Deferred taxes	2,924
Other assets	2,793
Identifiable intangible assets	13,672
Goodwill	32,194
Total assets acquired	58,336
Accounts payable	4,742
Deferred product revenues	732
Deferred maintenance revenues	3,344
Deferred professional services	963
Deferred tax liabilities	5,291
Other liabilities	180
Total liabilities assumed	15,252
Net assets acquired	\$43,084

Edgar Filing: KRONOS INC - Form 10-Q

The preceding table reflects the payment of approximately \$1.5 million in transaction costs related to the AD OPT acquisition.

The deferred revenue included in the table above, which was recorded at estimated fair value of the Company's remaining performance obligation, was recorded as the Company had assumed a legal performance obligation as described in EITF 01-03, Accounting in a Business Combination for Deferred Revenue of an Acquiree.

7

Edgar Filing: KRONOS INC - Form 10-Q

Due to the timing of the acquisition, the Company has not finalized the allocation of the purchase price. The Company anticipates that the allocation of the purchase price will be completed by July 2, 2005.

The following table presents the consolidated results of operations on an unaudited pro forma basis as if the acquisition of AD OPT had taken place at the beginning of the periods presented. The following table has been prepared on the basis of estimates and assumptions available at the time of this filing that the Company and AD OPT believe are reasonable (in thousands, except per share data).

Unaudited	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>April 2, 2005</u>	<u>April 3, 2004</u>	<u>April 2, 2005</u>	<u>April 3, 2004</u>
Total revenues	\$120,621	\$113,402	\$242,751	\$220,652
Net income	11,223	8,583	22,692	17,845
Earnings per share basic	0.35	0.28	0.71	0.58
Earnings per share diluted	0.34	0.27	0.69	0.56

The unaudited pro forma results of operations are for comparative purposes only and do not necessarily reflect the results that would have occurred had the acquisitions occurred at the beginning of the periods presented or the results which may occur in the future.

During the three month period ended April 2, 2005, the Company completed the acquisition of certain assets of Nextime, Inc. (Nextime), the former Tennessee-based Kronos reseller. The aggregate consideration paid, including the liabilities assumed, was approximately \$15.7 million. The amounts allocated to identifiable intangible assets and goodwill are approximately \$5.2 million and \$9.1 million, respectively. Due to the timing of the acquisition, the Company has not finalized the allocation of the purchase price. The Company anticipates that the allocation of the purchase price will be completed by September 30, 2005. The results of Nextime s operations, which are not material to the Company s results of operations, have been included in the consolidated financial statements since that date. Nextime was engaged in the sale and service of employee time and attendance, employee scheduling, data collection and labor management hardware and software systems, including the resale of the Company s products through a reseller relationship. As a result of the acquisition, the Company gained access to direct sales and service organizations, as well as access to the entire existing maintenance revenue stream from their customers. The deferred revenue related to the maintenance and professional services revenue streams, which was recorded at fair value of the Company s remaining performance obligation, was recognized as the Company had assumed a legal performance obligation as described in EITF 01-03, Accounting in a Business Combination for Deferred Revenue of an Acquiree.

As a result of the AD OPT and 3i Systems acquisitions, the Company has begun to provide customized software solutions to its customers. Revenue related to the sale of customized software solutions is recognized on a contract accounting basis in accordance with the provisions of Statement of Position 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. The contract accounting is applied based on a percentage-of-completion basis generally representing labor costs incurred relative to total estimated labor costs. Provisions for estimated losses on contracts are recorded when identified. Deferred revenues are recorded when invoicing exceeds recognized revenues. Revenue derived from the development and delivery of customized software solutions are included in product revenues.

Certain acquisition agreements which were previously entered into contain provisions that require the Company to make a guaranteed payment and/or contingent payments based upon profitability of the business unit or if specified minimum revenue requirements are met. These provisions expire during fiscal 2005 through 2009. Guaranteed payments are accrued at the time of the acquisition and are included in the purchase price allocation. As of April 2, 2005, the Company has the obligation to pay \$3.5 million in guaranteed payments. These payments will be made at various dates through fiscal 2006. Amounts due to be paid within twelve months of the balance sheet date are included in accrued expenses and amounts due to be paid in excess of twelve months of the balance sheet date are included in other liabilities. Contingent payments

Edgar Filing: KRONOS INC - Form 10-Q

due under the terms of the agreements are recognized when earned and are principally recorded as goodwill. However, under certain circumstances, a portion of the contingent payment may be recorded as compensation expense. During the three months ended April 2, 2005, there were \$80,000 of contingent payments earned, all of which was recorded as compensation expense. During the six months ended April 2, 2005 there were \$207,000 of contingent payments earned of which \$108,000 were recorded as goodwill.

8

Edgar Filing: KRONOS INC - Form 10-Q

The remainder was recorded as compensation expense. There were \$38,000 of contingent payments earned during the three months ended April 3, 2004, all of which was recorded as compensation expense. During the six months ended April 3, 2004, there were \$76,000 of contingent payments earned, all of which was recorded as compensation expense.

NOTE G - Comprehensive Income

For the three and six months ended April 2, 2005 and April 3, 2004, comprehensive income consisted of the following (in thousands):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2, 2005	April 3, 2004	April 2, 2005	April 3, 2004
Comprehensive income:				
Net income	\$11,223	\$9,620	\$21,881	\$17,032
Cumulative translation adjustment	(541)	(8)	200	991
Unrealized loss on available-for-sale securities	(416)	(27)	(808)	(246)
Total comprehensive income	\$10,266	\$9,585	\$21,273	\$17,777

NOTE H - Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except share and per share data):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2, 2005	April 3, 2004	April 2, 2005	April 3, 2004
Net income	\$11,223	\$9,620	\$21,881	\$17,032
Weighted-average shares	31,910,961	30,992,982	31,741,255	30,841,312
Effect of dilutive securities:				
Employee stock options	924,913	1,032,600	975,469	1,113,038
Adjusted weighted-average shares				
And assumed conversions	32,835,874	32,025,582	32,716,724	31,954,350

Edgar Filing: KRONOS INC - Form 10-Q

Basic earnings per share	\$0.35	\$0.31	\$0.69	\$0.55
Diluted earnings per share	\$0.34	\$0.30	\$0.67	\$0.53

9

NOTE I - New Accounting Pronouncements

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 123 (revised 2004), Share-Based Payment , which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation . Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees , and amends FASB Statement No. 95, Statement of Cash Flows . Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including the grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure will no longer be an alternative.

Statement 123(R) must be adopted for annual periods beginning after June 15, 2005. Early adoption will be permitted in periods in which financial statements have not been issued. The Company will adopt Statement 123(R) on October 1, 2005, the beginning of its 2006 fiscal year.

As permitted by Statement 123, the Company currently accounts for share-based payments to employees using Opinion 25 's intrinsic value method and, as such, generally recognizes no compensation cost for employee stock options. Accordingly, the adoption of Statement 123(R) 's fair value method will have a significant impact on the Company 's results of operations, although it will have no impact on its overall financial position. The impact of adoption of Statement 123(R) cannot be predicted at this time because it will depend on levels of share-based payments granted in the future. However, had the Company adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of Statement 123 as described in the disclosure of pro forma net income and earnings per share in Note C to the consolidated financial statements. The Company currently uses the Black-Scholes option pricing model for the valuation of options under Statement 123. The Company is currently assessing valuation model options to be used under Statement 123(R) and has not yet determined which valuation model to apply to new option grants after the adoption of Statement 123(R). Statement 123(R) also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after adoption. While the Company cannot estimate what those amounts will be in the future (because they depend on, among other things, when employees exercise stock options), the amount of operating cash flows recognized in prior periods for such excess tax deductions were \$10.7 million, \$9.1 million, and \$9.2 million in fiscal 2004, 2003 and 2002, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This discussion includes certain forward-looking statements about our business and our expectations, including statements relating to product and service revenues, revenue growth rates, gross margin, operating expenses, earnings per share, future acquisitions, capital expenditures, customer purchase patterns, income tax rates, available cash, investments and operating cash flow, and the current economic climate. Any such statements are subject to risk that could cause the actual results to vary materially from expectations. For a further discussion of the various risks that may affect our business and expectations, see "Certain Factors That May Affect Future Operating Results" at the end of Management's Discussion and Analysis of Financial Condition and Results of Operations and in our Annual Report on Form 10-K for the fiscal year ended September 30, 2004. The risks and uncertainties discussed herein do not reflect the potential future impact of any mergers, acquisitions or dispositions. In addition, any forward-looking statements represent our estimates only as of the day this Quarterly Report was filed with the Securities and Exchange Commission and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements at some point in the future, we specifically disclaim any obligation to do so, even if our estimates change.

Overview

We provide a suite of solutions that automate employee-centric processes and provide tools to optimize the workforce. Our solutions, which include human resources, payroll, scheduling, and time and labor applications, are designed for a wide range of businesses from single-site to large multi-site enterprises. We derive revenues from the licensing of our software solutions, sales of our hardware solutions and by providing professional services as well as ongoing customer support and maintenance.

We were successful in increasing our revenues in the three month period ended April 2, 2005, as compared to the same period in the prior year. While we believe that the current economic environment is improving, certain factors such as the continuing lag in job creation in the current economic recovery, the sustainability of the economic recovery, as well as the diversion of resources towards compliance with new regulatory requirements on internal controls may result in many customers deferring or reducing their technology purchases in the future.

Total revenue for the three and six month periods ended April 2, 2005 increased 12% and 15%, respectively, over the comparable periods of the prior year. Growth in our maintenance and professional services revenues (19% and 17%, respectively in the three month period and 14% and 11% in the six month period) were significant factors in the revenue growth, as was continued growth in our product revenue (3% in the three month period and 18% in the six month period).

Net income for the three month period ended April 2, 2005 increased 17% to \$11.2 million from \$9.6 million for the same period last year, with earnings per share increasing to \$0.34 from \$0.30 per diluted share as compared to the same period last year. Net income for the six month period ended April 2, 2005 increased 28% to \$21.9 million from \$17.0 million for the same period last year. Net income growth for the three and six month periods ended April 2, 2005 was primarily the result of continued growth in revenues, as well as continued corporate-wide efforts to contain costs. We currently anticipate operating expenses to increase as a percentage of total revenues for the remainder of the fiscal year, due to anticipated increased spending related to the April go-live of our new information systems (related to a decrease in capitalization of certain costs associated with the project, as well as the commencement of amortization expense related to the previously capitalized software costs), as well as costs related to the next phase of the implementation of the new systems.

Regarding expectations for the remainder of the current fiscal year, we presently anticipate that year-over-year revenue growth for the third quarter and for the entire fiscal 2005, including revenues from customers obtained in the acquisition of businesses, will range between 11% - 15% and 14% - 16%, respectively, with earnings per diluted share in the range of \$0.36 - \$0.38 for the third quarter and \$1.56 - \$1.64 for the entire fiscal 2005.

The SEC recently concluded that the Financial Accounting Standards Board Statement 123R, Share-Based Payment, which will require all companies to measure compensation cost for all share-based payments (including employee stock options) at fair value, would be effective for public companies for annual periods beginning after June 15, 2005. The new accounting pronouncement will be effective for Kronos in the first quarter of fiscal 2006. The impact of adopting Statement 123R will reduce our net income. We have not yet determined the magnitude of the impact of adopting Statement 123R.

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expenses, and related disclosures of contingent assets and liabilities. We base estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions.

We have identified the following critical accounting policies that affect the more significant judgments and estimates used in the preparation of consolidated financial statements. This listing is not a comprehensive list of all of our accounting policies. Please refer to Note A in the Notes to Consolidated Financial Statements in this Quarterly Report on Form 10-Q and in Item 15 of our Annual Report on Form 10-K for the fiscal year ended September 30, 2004 for further information.

Revenue Recognition We license software and sell data collection hardware and related ancillary products to end-user customers through our direct sales force as well as indirect channel customers, which include Automatic Data Processing, Inc., or ADP, and other independent resellers. Substantially all of our software license revenue is earned from perpetual licenses of off-the-shelf software requiring no modification or customization. The software license, data collection hardware and related ancillary product revenues from our end-user customers and indirect channel customers are generally recognized using the residual method when:

Persuasive evidence of an arrangement exists, which is typically when a non-cancelable sales and software license agreement has been signed;

Delivery, which is typically FOB shipping point, is complete for the software (either physically or electronically), data collection hardware and related ancillary products;

The customer's fee is deemed to be fixed or determinable and free of contingencies or significant uncertainties;

Collectibility is probable; and

Vendor-specific objective evidence of fair value exists for all undelivered elements, typically maintenance and professional services.

Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue, assuming all other conditions for revenue recognition have been satisfied. Substantially all of our product revenue is recognized in this manner. If we cannot determine the fair value of any undelivered element included in an arrangement, we will defer revenue until all elements are delivered, services are performed or until fair value can be objectively determined.

As part of an arrangement, end-user customers typically purchase maintenance contracts as well as professional services from us. Maintenance services include telephone and Web-based support as well as rights to unspecified upgrades and enhancements, when and if we make them generally available. Professional services are deemed to be non-essential to the functionality of the software and typically are for implementation planning, loading of software, installation of the data collection hardware, training, building simple interfaces, running test data, and assisting in the development and documentation of pay rules and best practices consulting.

Revenues from maintenance services are recognized ratably over the term of the maintenance contract period based on vendor-specific objective evidence of fair value. Vendor-specific objective evidence of fair value is based upon the amount charged when purchased separately, which is typically the contract's renewal rate. Maintenance services are typically stated separately in an arrangement. We have classified the allocated fair value of revenues pertaining to the contractual maintenance obligations that exist for the 12-month period subsequent to the balance sheet date as a current liability, and the contractual obligations with a term beyond 12 months as a non-current liability. Revenues from time and material customer support services are recognized as the services are delivered.

Revenues from professional services are generally recognized based on vendor-specific objective evidence of fair value when:

A non-cancelable agreement for the services has been signed or a customer's purchase order has been received;

The professional services have been delivered;

The customer's fee is deemed to be fixed or determinable and free of contingencies or significant uncertainties; and

Collectibility is probable.

Vendor-specific objective evidence of fair value is based upon the price charged when these services are sold separately and are typically an hourly rate for professional services and a per-class rate for training. Based upon our experience in completing product implementations, we have determined that these services are typically delivered within a 12-month period subsequent to the contract signing and therefore have classified deferred professional services as a current liability.

Our arrangements with end-user customers and indirect channel customers do not include any rights of return or price protection, nor do arrangements with indirect channel customers include any acceptance provisions. Our arrangements with end-user customers generally include our standard acceptance provision. Our standard acceptance provision provides the end-user customer with a right to a refund if the arrangement is terminated because the product did not meet our published technical specifications. Generally, we determine that these acceptance provisions are not substantive and therefore should be accounted for as a warranty in accordance with SFAS No. 5.

At the time we enter into an arrangement, we assess the probability of collection of the fee and the terms granted to the customer. For end-user customers, our typical payment terms include a deposit and subsequent payments, based on specific due dates, such that all payments for the software license, data collection hardware and related ancillary products, as well as services included in the original arrangement, are ordinarily due within one year of contract signing. Our payment terms for indirect channel customers are less than 90 days and payments are typically due within 30 days of the invoice date.

If the arrangement includes a substantive acceptance provision, we defer revenue not meeting the criterion for recognition under Statement of Position 97-2, Software Revenue Recognition, and classify this revenue as deferred revenue, including deferred product revenue. This revenue is recognized, assuming all other conditions for revenue recognition have been satisfied, when the uncertainty regarding acceptance is resolved as generally evidenced by written acceptance or payment of the arrangement fee. If the payment terms for the arrangement are considered extended, other than those arrangements that are financing arrangements as discussed below, we defer revenue on the arrangement until the payment of the arrangement fee becomes due. The deferred amounts related to arrangements with extended payment terms are removed from deferred revenue and accounts receivable, as we have determined that these amounts do not represent either a receivable or deferred revenue until the payment becomes due. We report the allocated fair value of revenues related to the product element of arrangements as a current liability because of the expectation that these revenues will be recognized within 12 months of the balance sheet date.

Since fiscal 1996, we have had a standard practice of providing creditworthy end-user customers the option of financing arrangements beyond one year. Our policy for recognizing revenue and the timing of the recognition for arrangements that are financed is the same as our non-financed arrangements. The financed arrangements, which encompass separate fees for software license, data collection hardware and ancillary products, maintenance and support contracts, and professional services, are evidenced by distinct standard sales, license and maintenance agreements and typically require equal monthly payments. The terms of these arrangements typically range between 18 and 48 months. At the time we enter into an arrangement, we assess the probability of collection and whether the arrangement fee is fixed or determinable. We consider our history of collection without concessions as well as whether each new transaction involves similar customers, products and arrangement economics to ensure that the history developed under previous arrangements remains relevant to current arrangements. If the fee is not determined to be collectible, fixed or determinable, we will initially defer the revenue and recognize it when collection becomes probable, which typically is when payment is due, assuming all other conditions for revenue recognition have been satisfied. As a financing arrangement, we apply a present value factor using annual interest rates ranging from 5% to 8%. These rates may vary depending upon when the financing arrangement is entered into and the length of the financing arrangement.

As a result of the AD OPT and 3i Systems acquisitions, we have begun to provide customized software solutions to our customers. Revenue related to the sale of customized software solutions is recognized on a contract accounting basis in accordance with the provisions of Statement of Position 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. The contract accounting is applied based on a percentage-of-completion basis generally representing labor costs incurred relative to total estimated labor costs. Provisions for estimated losses on contracts are recorded when identified. Deferred revenues are recorded when invoicing exceeds recognized revenues. Revenue derived from the development and delivery of customized software solutions are included in product revenues.

Allowance for Doubtful Accounts and Sales Returns Allowance We maintain an allowance for doubtful accounts to reflect estimated losses resulting from the inability of customers to make required payments. This allowance is based on estimates made by us after consideration of factors such as the composition of the accounts receivable aging and bad debt history. If the financial condition of customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances and bad debt expense may be required. In addition, we maintain a sales returns allowance to reflect estimated losses for sales returns and adjustments. Sales returns and adjustments are generally due to incorrect ordering of product, general customer satisfaction issues or incorrect billing. This allowance is established by us using estimates based on historical experience. If we experience an increase in sales returns and adjustments, additional allowances and charges against revenue may be required.

Valuation of Intangible Assets and Goodwill In assessing the recoverability of goodwill and other intangible assets, we must make assumptions regarding the estimated future cash flows and other factors to determine the fair value of these assets. If these estimates or their related assumptions change in the future, we may be required to record impairment charges against these

assets in the reporting period in which the impairment is determined. For intangible assets, this evaluation includes an analysis of estimated future undiscounted net cash flows expected to be generated by the assets over their estimated useful lives. If the estimated future undiscounted net cash flows are insufficient to recover the carrying value of the assets over their estimated useful lives, we will record an impairment charge in the amount by which the carrying value of the assets exceeds their fair value. For goodwill, the impairment evaluation includes a comparison of the carrying value of the reporting unit that houses goodwill to that reporting unit's fair value. We have only one reporting unit. The fair value of the reporting unit is based upon the net present value of future cash flows, including a terminal value calculation. If the reporting unit's estimated fair value exceeds the reporting unit's carrying value, no impairment of goodwill exists. If the fair value of the reporting unit does not exceed its carrying value, then further analysis would be required to determine the amount of the impairment, if any. If we determine that there is an impairment in either an intangible asset or goodwill, we will be required to record an impairment charge in the reporting period in which the impairment is determined. During fiscal 2004 we completed the annual testing of the impairment of goodwill, and as a result of these tests, we concluded that no impairment of goodwill existed as of July 4, 2004, the annual goodwill impairment measurement date for fiscal 2004. In addition, we have determined that no events or circumstances currently exist that would indicate that either the fair value of the reporting unit has been reduced, or the carrying value of the intangible assets is no longer recoverable. Therefore, no impairment charges have been recorded in the six months ended April 2, 2005.

Capitalization of Software Development Costs - Costs incurred in the research, design and development of software for sale to others are charged to expense until technological feasibility is established. Thereafter, software development costs are capitalized and amortized to product cost of sales on a straight-line basis over the lesser of three years or the estimated economic lives of the respective products. Costs incurred in the development of software for internal use are charged to expense until it becomes probable that future economic benefits will be realized. Thereafter, certain costs are capitalized and amortized to operating expense on a straight-line basis over the lesser of three years or the estimated economic life of the software. We have capitalized approximately \$12.9 million in costs associated with the replacement of information technology systems since the start of the project.

Income Taxes We account for income taxes under the liability method. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and the tax basis of assets and liabilities, and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. We record a valuation allowance in accordance with generally accepted accounting principles to reduce our deferred tax assets to the amount of future tax benefit that is more likely than not to be realized. While we have considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, there is no assurance that the valuation allowance will not need to be increased to cover additional deferred tax assets that may not be realizable. Any increase in the valuation allowance could have a material adverse impact on our income tax provision and net income in the period in which such determination is made.

Results of Operations

Revenues. We derive revenues from the licensing of our software solutions, sales of our hardware solutions and by providing professional services as well as ongoing customer support and maintenance.

Total Revenues (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Total revenues	\$120,621	\$107,979	12%	\$238,897	\$207,652	15%

The principal factors driving revenue growth in the three month period ended April 2, 2005 were increased demand for our maintenance and professional services solutions, and to a lesser extent, increase in demand for our software products from new and existing customers, as well as revenues from acquired businesses. Revenue growth in the three month period ended April 2, 2005 was impacted by a decrease in revenues generated by our core business. This decrease is primarily the result of delayed orders from our reseller channels. Also contributing to the decrease was the effect of the reorganization of our sales force announced during the three month period ended September 30, 2004, and completed during the three month period ended January 1, 2005. The principal factors driving revenue growth in the six month period ended April 2, 2005 were increased demand for our software and hardware products and an increased demand for our professional and maintenance services. Also contributing to overall growth in revenues, to a lesser extent, were revenues from acquired businesses.

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2, <u>2005</u>	April 3, <u>2004</u>	April 2, <u>2005</u>	April 3, <u>2004</u>
Revenues from acquired businesses*	\$6,644	\$2,812	\$9,375	\$5,119
Percentage of total revenues	5.5%	2.6%	3.9%	2.5%

* Revenues from acquired businesses are revenues generated from customers that have been part of an acquired business transaction over the preceding four fiscal quarters.

Product Revenues (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Product revenues	\$46,317	\$44,966	3%	\$99,583	\$84,106	18%
Product revenues as a percent of total revenues	38%	42%	---	42%	41%	---

The product revenue growth in the three month period ended April 2, 2005 was primarily the result of an increase in product revenues attributable to acquired businesses. Product revenues in the three month period ended April 2, 2005 from our core business decreased as compared to the same period in the prior year. This decrease was primarily the result of delayed orders from our reseller channels. Also contributing to the decrease was the effect of the reorganization of our sales force announced during the three month period ended September 30, 2004, and completed during the three month period ended January 1, 2005. Although product revenues from core business decreased as a result of those factors discussed above, we continue to see strong demand for our products and expect product revenues to increase, as compared to the same periods in the prior year, during the remainder of the fiscal year. The product revenue growth in the six month period ended April 2, 2005 was primarily the result of an increase in demand for our Workforce Central® suite and related software modules, as well as our Kronos 4500 Terminal. Also contributing to the growth in product revenues, to a lesser extent, are product revenues attributable to acquired businesses. These increases in both the three and six month periods, were partially offset by decreases in sales volume associated with our legacy software solutions and data collection terminals.

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2, <u>2005</u>	April 3, <u>2004</u>	April 2, <u>2005</u>	April 3, <u>2004</u>
Product revenues from acquired businesses	\$3,215	\$271	\$4,794	\$316
Percentage of product revenues	6.9%	0.6%	4.8%	0.4%

Maintenance Revenues (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Maintenance revenues	\$42,451	\$35,802	19%	\$81,119	\$71,148	14%
Maintenance revenues as a percent of total revenues	35%	33%	---	34%	34%	---

The increase in maintenance revenues in the three and six month periods ended April 2, 2005 was principally the result of expansion of our installed base of software solutions, and an increase in the value of maintenance contracts. The increase in the value of the maintenance contracts was principally attributable to the sales of capacity upgrade licenses and add-on modules to existing customers. Capacity upgrade and add-on module sales typically result in an increased value of maintenance contracts due to the increased value in the product resulting from the additional capacity or modules. The maintenance value is typically based on the related product's value. Maintenance revenues in the three month period ended April 2, 2005 were also positively impacted, although to a lesser extent, by an increase in maintenance revenues associated with acquired businesses. The higher proportion of maintenance revenues to total revenues in the three month period ended April 2, 2005 was primarily due to the decreased proportion of product revenue.

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2, <u>2005</u>	April 3, <u>2004</u>	April 2, <u>2005</u>	April 3, <u>2004</u>
Maintenance revenues from acquired businesses	\$2,420	\$1,489	\$3,072	\$3,018
Percentage of maintenance revenues	5.7%	4.2%	3.8%	4.2%

Professional Services Revenues (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2,	April 3,	Percent	April 2,	April 3,	Percent
	<u>2005</u>	<u>2004</u>	<u>Change</u>	<u>2005</u>	<u>2004</u>	<u>Change</u>
Professional services revenues	\$31,853	\$27,211	17%	\$58,195	\$52,398	11%
Professional services revenues as a percent of total revenues	26%	25%	---	24%	25%	---

There has been an increase in customer demand for professional services in the three and six month periods ended April 2, 2005, as compared to the same period in the prior year, primarily due to an increase in the level of professional services accompanying sales to our customers. The increase in demand is primarily due to an expansion of our complementary product offerings, as well as an expansion of our professional consulting and value-added professional services offerings. The growth in professional services in the three and six month periods ended April 2, 2005 was principally due to an increase in the capacity to deliver professional services, as well as an increase in the utilization rate experienced by the services organization

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	April 2,	April 3,	April 2,	April 3,
	<u>2005</u>	<u>2004</u>	<u>2005</u>	<u>2004</u>
Professional services revenues from acquired businesses	\$1,009	\$1,052	\$1,509	\$1,785
Percentage of professional services revenues	3.2%	3.9%	2.6%	3.4%

Gross Profit. Gross profit is the net result of revenues, less cost of sales. Product cost of sales primarily consists of salaries, facilities and related expenses for manufacturing personnel and personnel developing and delivering customized software solutions, costs of materials for the manufacturing of certain hardware products, amortization of capitalized software costs, as well as the cost of royalties paid to third-parties for certain products. Service cost of sales primarily consists of salaries, facilities and related expenses for service personnel, as well as the cost of maintenance contracts paid to third-parties for certain products.

Edgar Filing: KRONOS INC - Form 10-Q

Gross Profit/Gross Margin (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2,	April 3,	Percent	April 2,	April 3,	Percent
	<u>2005</u>	<u>2004</u>	<u>Change</u>	<u>2005</u>	<u>2004</u>	<u>Change</u>
Product gross profit	\$34,666	\$34,454	1%	\$76,559	\$63,894	20%
Service gross profit	37,202	29,710	25%	67,520	58,198	16%
Total gross profit	\$71,868	\$64,164	12%	\$144,079	\$122,092	18%
Product gross margin	75%	77%	---	77%	76%	---
Service gross margin	50%	47%	---	48%	47%	---
Total gross margin	60%	59%	---	60%	59%	---

Total gross margin for the three and six month periods ended April 2, 2005 increased to 60% from 59% in the comparable periods in the prior year. The increase in total gross margin for the three month period was the result of an increase in the services gross margin during that period as compared to the same period in the prior year, partially offset by a decrease in product gross margin. The increase in total gross margin for the six month period ended April 2, 2005 was the result of a higher content of product revenues, which typically generate higher gross margins than service revenues, and an increase in both product gross margin and service gross margin. We anticipate total gross margin to increase in the third quarter and the remainder of fiscal 2005 as compared to the prior year principally as a result of our expectation of a favorable mix of product revenues, resulting in a higher proportion of product revenues as compared to services revenues.

Product gross margin decreased in the three month period ended April 2, 2005 principally due to an unfavorable product mix during the period, which resulted in a higher proportion of product revenues from our customized and HRMS software products which generate lower gross margins than other software products. Product gross margin increased in the six month period ended April 2, 2005 primarily due to a favorable product mix during the period, which resulted in a higher proportion of product revenues from hardware and software as compared to revenues generated by sales of third party products for resale. Product revenues from hardware and software, which typically generate a higher gross margin than sales of third-party product for resale, were a greater proportion of total product revenues in the six month period ended April 2, 2005 as compared to the comparable period in the prior year (94.2% and 93.0% for the six month periods ended April 2, 2005 and April 3, 2004, respectively). This was partially offset by the unfavorable product mix during the period, which resulted in a higher proportion of product revenues from certain software products which generate lower gross margins than other software products.

Service gross margin in the three and six month periods ended April 2, 2005 increased as compared to service gross margin in the same period in the prior year. The primary factors for this increase are an increase in the utilization rate and productivity experienced by the services

Edgar Filing: KRONOS INC - Form 10-Q

organization in the three and six month periods ended April 2, 2005 resulting from more effective management of the services organization as well as our expanding use of more efficient implementation methodologies, such as remote services. Although we expect to see a higher proportion of professional services revenues as compared to maintenance revenues for the remainder of the fiscal year, the resulting impact on services gross margin (professional services result in a lower gross margin than maintenance services) will be offset by an increase in productivity that results from more effective management of the workforce and our expanding use of more efficient implementation methodologies, such as remote services.

Net Operating Expenses. Net operating expenses includes sales and marketing expenses, engineering, research and development expenses, general and administrative expenses, amortization of intangible assets and other income, net.

Total Net Operating Expenses (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Net operating expenses	\$54,772	\$50,318	9%	\$111,263	\$96,861	15%
Net operating expenses as a % of total revenues	45%	47%	---	47%	47%	---

The increase in total net operating expenses for the three and six month periods ended April 2, 2005 was principally attributable to investments in personnel and related compensation and overhead costs in response to increased customer demand and to support the development of new products (approximately \$5.1 million and \$13.6 million for the three and six month periods respectively). The increase in personnel and related compensation and overhead costs in the three month period was partially offset by a decrease in spending related to consulting services, training and other costs associated with the replacement of information technology systems (approximately \$0.3 million) and a decrease in certain professional services fees (approximately \$0.6 million). The increase in total net operating expenses for the six month period ended April 2, 2005 was also due to an increase in professional services fees (approximately \$0.5 million).

Sales and Marketing Expenses: Sales and marketing expenses primarily consist of personnel and overhead-related expenses for sales and marketing functions, as well as costs associated with advertising, promotions, tradeshow, seminars, training and other sales and marketing programs (dollars in thousands).

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Sales and marketing expenses	\$34,616	\$32,344	7%	\$70,478	\$63,364	11%
Sales and marketing expenses as a % of total revenues	29%	30%	---	30%	31%	---

The increase in sales and marketing expense for the three and six month periods ended April 2, 2005 was primarily attributable to personnel and related compensation and overhead costs associated with higher sales volume and support costs to add new customers and to maximize the penetration of existing customer accounts (approximately \$2.2 million and \$6.4 million in the three and six month periods, respectively). In addition, an increase in professional services and consulting fees also contributed to the increase in the six month period ended April 2, 2005 (approximately \$0.9 million). The decrease in sales and marketing expense as a percentage of total revenues for the three and six month periods ended April 2, 2005 was primarily attributable to leveraging the investments in infrastructure to generate higher sales volumes.

Engineering, Research and Development Expenses: Engineering, research and development expenses primarily consist of personnel and overhead-related expenses for engineering functions, as well as costs associated with training and third-party consulting (dollars in thousands).

	<u>Three Month Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Total Engineering, research and development spending	\$16,001	\$14,126	13%	\$32,054	\$26,916	19%
Capitalized software development costs	(3,974)	(3,353)	19%	(7,238)	(6,468)	12%
Engineering, research and development expenses	\$12,027	\$10,773	12%	\$24,816	\$20,448	21%
Engineering, research and development expenses as a % of total revenues	10%	10%	---	10%	10%	---

The increase in engineering, research and development spending for the three and six month periods ended April 2, 2005 was primarily attributable to continued investment in engineering personnel and their compensation-related expenses (approximately \$1.3 million and \$4.3 million in the three and six month periods, respectively). This increase is the result of the continued development and support of new products. The significant product development efforts in the first three and six months of fiscal 2005 were principally related to further development and enhancement of the Workforce Central suite, including scheduling, activities and workflow modules as well as Workforce HR , Workforce Payroll and the Kronos 4500 terminal.

Edgar Filing: KRONOS INC - Form 10-Q

General and Administrative Expenses: General and administrative expenses primarily consist of personnel and overhead-related expenses for administrative, information technology, finance, legal and human resources support functions (dollars in thousands).

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
General and administrative expenses	\$8,546	\$8,053	6%	\$16,992	\$14,412	18%
General and administrative expenses as a % of total revenues	7%	7%	---	7%	7%	---

The increase in general and administrative expenses in the three and six month periods ended April 2, 2005 was primarily due to investment in personnel and related compensation and support costs required for the continued support of our growing operations (approximately \$1.6 million and \$2.9 million for the three and six month periods respectively). These increases in the three month period ended April 2, 2005 in personnel related costs were partially offset by a decrease in expenses related to consulting services, training and other costs associated with the replacement of information technology systems (approximately \$0.3 million) and a decrease in professional services fees (approximately \$0.6 million). The increases in the six month period were partially offset by a decrease in professional services fees (approximately \$0.4 million). We expect general and administrative expenses to increase significantly in the third quarter of fiscal 2005 due to increased expenses related to the completion of the first phase of the implementation of our new information technology systems in April 2005, as well as expenses related to commencement of the second phase of the implementation during the third quarter of fiscal 2005. These increases are specifically related to a decrease in capitalization of certain costs associated with the project, as well as the commencement of amortization expense related to the previously capitalized software costs.

Edgar Filing: KRONOS INC - Form 10-Q

Amortization of Intangible Assets and Other Income, Net: Amortization of intangible assets includes the amortization expense related to certain identified intangible assets recorded by us related to acquisitions of businesses. Other income, net is principally interest income earned from cash as well as investments in our marketable securities and financing arrangements (dollars in thousands).

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Amortization of intangible assets	\$1,194	\$1,001	19%	\$2,290	\$2,008	14%
Amortization of intangible assets as a % of total revenues	1%	1%	---	1%	1%	---
Other income, net	\$1,611	\$1,853	(13%)	\$3,313	\$3,371	(2%)
Other income, net as a % of total revenues	1%	2%	---	1%	2%	---

The increase in amortization of intangible assets in the three and six month period ended April 2, 2005, as compared to the same period in the prior year, is principally attributed to amortization charges related to acquisitions which were completed during the last twelve months.

Income Taxes. The provision for income taxes as a percentage of pre-tax income was 34.4% for the three month period ended April 2, 2005 and 33.3% for the six month period ended April 2, 2005. For the comparable periods in the prior fiscal year, the provision for income taxes as a percentage of pre-tax income was 30.5% and 32.5% for the three and six month periods, respectively. The provision for income taxes for the three and six month periods ended April 3, 2004 was favorably impacted as a result of the completion of certain tax audits during the three month period ended April 3, 2004. The provision for income taxes for the three and six month periods ended April 2, 2005 was favorably impacted as a result of the retroactive reinstatement of legislation related to certain research and development tax credits as well as the impact on certain research and development tax credits related to the Ad Opt acquisition completed during the three month period ended January 1, 2005. We currently anticipate that the income tax rate will approximate 34% for the remainder of the fiscal year.

Newly Issued Accounting Standards. On December 16, 2004, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 123 (revised 2004), Share-Based Payment , which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation . Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees , and amends FASB Statement No. 95, Statement of Cash Flows . Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including the

grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative.

Statement 123(R) must be adopted for annual periods beginning after June 15, 2005. Early adoption will be permitted in periods in which financial statements have not been issued. We expect to adopt Statement 123(R) on October 1, 2005, the beginning of our 2006 fiscal year.

As permitted by Statement 123, we currently account for share-based payments to employees using Opinion 25's intrinsic value method and, as such, generally recognize no compensation cost for employee stock options. Accordingly, the adoption of Statement 123(R)'s fair value method will have a significant impact on our results of operations, although it will have no impact on our overall financial position. The impact of adoption of Statement 123(R) cannot be predicted at this time because it will depend on levels of share-based payments granted in the future. However, had we adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of Statement 123 as described in the disclosure of pro forma net income and earnings per share in Note C to our consolidated financial statements. Statement 123(R) also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after adoption. While we cannot estimate what those amounts will be in the future (because they depend on, among other things, when employees exercise stock options), the amount of operating cash flows recognized in prior periods for such excess tax deductions were \$10.7 million, \$9.1 million, and \$9.2 million in fiscal 2004, 2003 and 2002, respectively.

Liquidity and Capital Resources

We fund our business through cash generated by operations. If near-term demand for our products weakens or if significant anticipated sales in any quarter do not close when expected, the availability of such funds may be adversely impacted.

Cash, Cash Equivalents and Marketable Securities (dollars in thousands):

	<u>As of</u> April 2,	September 30,	Percent
	<u>2005</u>	<u>2004</u>	<u>Change</u>
Cash, cash equivalents and marketable securities (including short and long-term)	\$159,753	\$189,142	(16%)
Working capital	\$10,026	\$10,144	(1%)

The decrease in cash, cash equivalents and marketable securities is primarily due to cash paid for acquired businesses during the six month period ended April 2, 2005, partially offset by cash generated from operations. The decrease in working capital is primarily due to a decrease in cash, cash equivalents and short-term marketable securities. A portion of our cash reserves is invested in long-term marketable securities.

Edgar Filing: KRONOS INC - Form 10-Q

Cash Flow Highlights (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Cash provided by operations	\$20,392	\$11,905	71%	\$36,047	\$26,742	35%
Cash used for property, plant and equipment	\$8,526	\$3,012	183%	\$14,853	\$6,031	146%
Cash used for acquisitions of businesses	\$9,814	\$1,811	442%	\$52,488	\$3,144	*
Increase (Decrease) in marketable securities	\$9,109	\$11,852	(23%)	(\$17,129)	\$24,601	(170%)
Net proceeds from exercise of stock options and employee stock purchase plans	\$10,794	\$7,747	39%	\$18,584	\$13,440	38%
Repurchases of common stock	\$6,564	\$6,028	9%	\$10,398	6,028	72%

* Not meaningful

The increase in cash provided by operations in the three and six month periods ended April 2, 2005 was principally attributable to an increased rate of cash collected from accounts receivable, an increase in net income, a net increase in the deferred income taxes payable, and an increase in the tax benefit from the exercise of stock options. These are partially offset by an increase in cash used for the payment of certain vendor and compensation related payments.

Our use of cash for property, plant and equipment in the three and six month periods ended April 2, 2005 includes investments in information systems and infrastructure to improve and support our expanding operations. We anticipate making significant capital investments during the remainder of fiscal 2005 in conjunction with the replacement of our information technology

28

systems. To date, we have invested approximately \$13.8 million (excluding internal personnel related costs) related to the replacement of our information technology systems of which \$9.6 million has been capitalized, with the remainder expensed through operations. We expect our total investment in this project (excluding internal personnel related costs) to range between \$20.0 million and \$22.0 million through the end of fiscal 2006. Our use of cash for the acquisition of businesses in all periods presented was principally related to the acquisitions of AD OPT Technologies, Inc. on November 18, 2004 and Nextime, Inc. on February 28, 2005. Please refer to Note F in the Notes to the Condensed Consolidated Financial Statements for further details. We are assessing several acquisition opportunities that may be completed over the next twelve months, although there can be no assurance that these acquisitions will be completed. Excess cash reserves not required for operations, investments in property, plant and equipment or acquisitions are invested in marketable securities.

Stock Repurchases Under Stock Repurchase Program (dollars in thousands):

	<u>Three Months Ended</u>			<u>Six Months Ended</u>		
	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>	April 2, <u>2005</u>	April 3, <u>2004</u>	Percent <u>Change</u>
Shares of common stock repurchased	133,200	175,500	(24%)	211,594	175,500	21%
Cost of shares of common stock repurchased	\$6,564	\$6,028	9%	\$10,398	\$6,028	72%

The common stock repurchased under our stock repurchase program is used to partially cover the shares required for our employee stock option plans and employee stock purchase plan.

We lease certain office space, manufacturing facilities and equipment under long-term operating lease agreements. In addition, certain acquisition agreements contain provisions that require us to make a guaranteed payment and/or contingent payments based upon profitability of the business unit or if specified minimum revenue requirements are met. Future minimum rental commitments under operating leases with non-cancelable terms of one year or more, and future payment obligations related to guaranteed payments are as follows:

Payments Due by Period (in thousands)

<u>Contractual Obligations</u>	<u>Total</u>	<u>Less Than 1 Year</u>	<u>More Than 1 Year, Less Than 3 Years</u>	<u>More Than 3 Years, Less Than 5 Years</u>	<u>More Than 5 Years</u>
Operating lease obligations	\$46,351	\$10,884	\$16,141	\$9,122	\$10,204
Guaranteed payment obligations	3,526	2,292	1,234	---	---
Total	\$49,877	\$13,176	\$17,375	\$9,122	\$10,204

We believe that we have adequate cash and investments and operating cash flow to fund our investments in property, plant and equipment, software development costs, cash requirements under operating leases, cash payments related to acquisitions, if any, and any additional stock repurchases for the foreseeable future.

Certain Factors That May Affect Future Operating Results

Except for historical matters, the matters discussed in this Quarterly Report on Form 10-Q are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the Act). We desire to take advantage of the safe harbor provisions of the Act and include this statement for the express purpose of availing ourselves of the protection of the safe harbor with respect to all forward-looking statements that involve risks and uncertainties.

Actual operating results may differ from those indicated by forward-looking statements made in this Quarterly Report on Form 10-Q and presented elsewhere by us from time to time because of a number of factors including the potential fluctuations in quarterly results, timing and acceptance of new product introductions by us and our competitors, the dependence on our time and labor product line, the ability to attract and retain sufficient technical personnel, the protection of our intellectual property and the potential infringement on our intellectual property rights, competitive pricing pressure, and the dependence on alternate distribution channels and on key vendors, as further described below and in our Annual Report on Form 10-K for the fiscal year ended September 30, 2004, which are specifically incorporated by reference herein.

Potential Fluctuations in Results. Our operating results, including revenue growth, sources of revenue, effective tax rate and liquidity, may fluctuate as a result of a variety of factors, including general economic conditions and related effect on workforce size, the purchasing patterns of our customers, the diversion of public companies' resources to address compliance with new regulatory requirements on internal controls, mix of products and services sold, the ability to effectively integrate acquired businesses into our operations, the timing of the introduction of new products and product enhancements by us and our competitors, the strategy employed by us in the human resources and payroll market, market acceptance of new products,

competitive pricing pressure and costs associated with the transition related to the replacement of our information technology systems. We completed the first phase of the implementation in April 2005, and therefore we will be incurring certain costs going forward which were not incurred prior to completion of this first phase (i.e. amortization and depreciation related costs). We currently anticipate completing the transition to our new information technology systems during fiscal 2005 and 2006. We may experience some short-term erosion to our productivity resulting from duplicate data entry, troubleshooting and mitigation of any issues related to the rollout of these systems as well as increased costs related to the completion of the implementation. We historically have realized a relatively larger percentage of our annual revenues and profits in the third and fourth quarters and a relatively smaller percentage in the first and second quarters of each fiscal year, although there can be no assurance that this pattern will continue. In addition, substantially all of our product revenue and profits in each quarter result from orders received in that quarter. If near-term demand for our products weakens or if significant anticipated sales in any quarter do not close when expected, our revenues for that quarter will be adversely affected. We believe that our operating results for any one period are not necessarily indicative of results for any future period.

Integration of Acquired Businesses. As part of our overall growth strategy, we acquire from time to time resellers of our products and, in certain instances, complementary business lines. Even if we are successful in identifying and acquiring businesses strategic to us, these acquisition activities involve a number of risks, including:

We may find the acquired business does not further our business strategy, that we overpaid for the company or the economic assumptions underlying our acquisition decision have changed or were not accurate;

Difficulties integrating the acquired companies' products and services and customer base with our existing product and service offerings;

Difficulties integrating the operations, technology and personnel of an acquired company, or retaining the key personnel of the acquired company critical to its continued operation and success;

Disruption of our ongoing business and diversion of management's attention by transition or integration issues and the complexity of managing geographically or culturally diverse enterprises;

Difficulties maintaining uniform standards, controls, procedures and policies across locations and businesses;

Litigation by terminated employees or third parties; and

Problems or liabilities associated with product quality, technology and legal contingencies relating to the acquired business or technology, such as intellectual property matters.

These and other factors could have a material adverse effect on our results of operations, particularly in the case of a larger acquisition or multiple acquisitions in a short period of time. Acquisitions may also have a negative effect on our earnings per share. If we were to proceed with one or more significant acquisitions or investments in which the consideration included cash, we could be required to use a substantial portion of our available cash to consummate any acquisition or investment. To the extent we issue shares of capital stock or other rights to purchase capital stock, including options and warrants, existing stockholders may be diluted and earnings per share may decrease. In addition, acquisitions and investments may result in the incurrence of debt, large one-time write-offs, such as acquired in-process research and development costs, and restructuring charges. They may also result in goodwill and other intangible assets that are subject to impairment tests, which could result in future impairment charges.

Competition. The workforce management market, which includes time and labor, scheduling, human resources and payroll, is highly competitive. Technological changes such as those allowing for increased use of the Internet have resulted in new entrants into the market. Increased competition could adversely affect our operating results through price reductions and/or loss of market share. With our efforts to expand our workforce management offering with the introduction of our human resources and payroll product suite, and the expansion of our scheduling product offerings, we will continue to meet strong competition. Many of these competitors may be able to adapt more quickly to new or emerging technologies or to devote greater resources to the promotion and sale of their human resources and payroll products. Many of our human resources and payroll competitors have significantly greater financial, technical and sales and marketing resources than us, as well as more experience in delivering human resources and payroll solutions. Although we believe our organization has core competencies that position us strongly in the marketplace, maintaining our technological and other advantages over competitors will require continued investment in research and development as well as marketing and sales programs. There can be no assurance that we will have sufficient resources to make such investments or be able to achieve the technological advances necessary to maintain our competitive advantages. There can be no assurance that we will be able to compete successfully in the human resources and payroll marketplace, and our failure to do so could have a material adverse impact upon our business, prospects, financial condition and operating results.

Dependence on Time and Labor Product Line. To date, more than 90% of our revenues have been attributable to sales of time and labor systems and related services. Although we have introduced products for scheduling solutions, and the licensed human resources and payroll market, we expect that our dependence on the time and labor product line for revenues will continue for the foreseeable future. Competitive pressures or other factors could cause our time and labor products to lose market acceptance or experience significant price erosion, adversely affecting the results of our operations.

Product Development and Technological Change. Continual change and improvement in computer software and hardware technology characterize the markets for workforce management systems. Our future success will depend largely on our ability to enhance the capabilities and increase the performance of our existing products and to develop new products and interfaces to third-party products on a timely basis to meet the increasingly sophisticated

needs of our customers. Although we are continually seeking to further enhance our workforce management offerings and to develop new products and interfaces, there can be no assurance that these efforts will succeed, or that, if successful, such product enhancements or new products will achieve widespread market acceptance, or that our competitors will not develop and market products that are superior to our products or achieve greater market acceptance.

Dependence on Alternate Distribution Channels. We market and sell our products through our direct sales organization, independent resellers and ADP under an OEM agreement. In the first six months of fiscal 2005, approximately 9% of our revenue was generated through sales to resellers and ADP. A reduction in the sales efforts of either our major resellers or ADP, or termination or changes in their relationships with us, could have a material adverse effect on the results of our operations.

Attracting and Retaining Sufficient Technical Personnel for Product Development, Support and Sales. We have encountered intense competition for experienced technical personnel for product development, technical support and sales and expect such competition to continue in the future. Any inability to attract and retain a sufficient number of qualified technical personnel could adversely affect our ability to produce, support and sell products in a timely manner.

Protection of Intellectual Property. We have developed, and through our acquisitions of businesses and software, acquired proprietary technology and intellectual property rights. Our success is dependent upon our ability to further develop and protect our proprietary technology and intellectual property rights. We seek to protect products, software, documentation and other written materials primarily through a combination of trade secret, patent, trademark and copyright laws, confidentiality procedures and contractual provisions. While we have attempted to safeguard and maintain our proprietary rights, it is unknown whether we have been or will be successful in doing so.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or obtain and use information that is regarded as proprietary. Policing unauthorized use of our products is difficult. While we are unable to determine the extent to which piracy of our software products exists, software piracy can be expected to be a persistent problem, particularly in foreign countries where the laws may not protect proprietary rights as fully as in the United States. We can offer no assurance that we can adequately protect our proprietary rights or that our competitors will not reverse engineer or independently develop similar technology.

Infringement of Intellectual Property Rights. We cannot provide assurance that others will not claim that our developed or acquired intellectual property rights infringe on their intellectual property rights or that we do not in fact infringe on those intellectual property rights.

Any litigation regarding intellectual property rights could be costly and time-consuming and divert the attention of our management and key personnel from business operations. The complexity of the technology involved and the uncertainty of intellectual property litigation increase these risks. Claims of intellectual property infringement might also require us to enter

into costly royalty or license agreements, and in this event, we may not be able to obtain royalty or license agreements on acceptable terms, if at all. We may also be subject to significant damages or an injunction against the use of our products. A successful claim of patent or other intellectual property infringement against us could cause immediate and substantial damage to our business and financial condition.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of market risks, including changes in interest rates affecting the return on our investments and foreign currency fluctuations. Refer to Note A, Summary of Significant Accounting Policies, in the Notes to Consolidated Financial Statements in the Annual Report on Form 10-K for the year ended September 30, 2004 for further discussion regarding marketable securities, foreign currency forward exchange contracts and capped call option arrangements. Our marketable securities that expose us to market rate risks are comprised of debt securities. A decrease in interest rates would not adversely impact interest income or related cash flows pertaining to securities held at April 2, 2005, as all of these securities have fixed rates of interest. A 100 basis point increase in interest rates would not adversely impact the fair value of these securities by a material amount due to the size and average duration of the portfolio. Our exposure to market risk for fluctuations in foreign currency relate primarily to the amounts due from subsidiaries. Exchange gains and losses related to amounts due from subsidiaries have not been material. For foreign currency exposures existing at April 2, 2005, a 10% unfavorable movement in the foreign exchange rates for each subsidiary location would not expose us to material losses in earnings or cash flows. The calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of April 2, 2005. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of April 2, 2005, the Company's disclosure controls and procedures were (1) designed to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to the Company's Chief Executive Officer and Chief Financial Officer by others within those entities, particularly during the period in which this report was being prepared and (2) effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) Changes in Internal Controls

No change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended April 2, 2005 that

has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

35

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

None

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In the following table, we provide information about our purchases during the quarter ended April 2, 2005 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act.

ISSUER PURCHASES OF EQUITY SECURITIES

	(a)	(b)	(c)	(d)
<u>Period</u>	<u>Total Number of Shares Purchased (1)</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Programs (2)</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Programs</u>
01/02/05 - 02/02/05	97,200	\$48.86	97,200	262,778
02/03/05 - 03/03/05	-	-	-	262,778

Edgar Filing: KRONOS INC - Form 10-Q

03/04/05	04/02/05	36,000	\$50.43	36,000	226,778
Total:		133,200	\$49.28	133,200	226,778

(1) We repurchased an aggregate of 133,200 shares of our common stock pursuant to the repurchase program that we publicly announced on May 13, 2003 (the Program).

(2) Our board of directors approved the repurchase by us of up to an aggregate of 750,000 shares of our common stock pursuant to the Program. Unless terminated earlier by resolution of our board of directors, the Program will expire when we have repurchased all shares authorized for repurchase thereunder.

Item 3. Defaults Upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders.

- (a) The 2005 Annual Meeting of Stockholders of Kronos Incorporated was held on February 10, 2005.
- (b) At the Annual Meeting, Messrs. D. Bradley McWilliams and Lawrence J. Portner were elected as Class I Directors for three-year terms expiring in 2008. In addition, the Directors whose terms of office continue after the

36

Edgar Filing: KRONOS INC - Form 10-Q

meeting are three Class II Directors: Messrs. Mark S. Ain, W. Patrick Decker and David B. Kiser, and two Class III Directors: Messrs. Richard J. Dumler and Samuel Rubinovitz. The tabulation was as follows:

	<u>FOR</u>	<u>WITHHELD</u>
D. Bradley McWilliams	29,451,497	817,912
Lawrence J. Portner	28,818,903	1,450,506

(c) The amended and restated 2002 Stock Incentive Plan was approved as follows:

<u>FOR</u>	<u>AGAINST</u>	<u>ABSTAIN/BROKER NON-VOTE</u>
24,904,653	2,787,064	2,577,692

(d) The ratification of the selection of Ernst & Young LLP as the Company's independent auditors for the 2005 fiscal year was approved as follows:

<u>FOR</u>	<u>AGAINST</u>	<u>ABSTAIN/BROKER NON-VOTE</u>
29,964,081	289,357	15,971

Item 5. Other Information

None

37

Item 6. Exhibits

- 10.1 Kronos Incorporated 2002 Stock Incentive Plan, as amended.
- 31.1 Certification by Chief Executive Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended.
