**NOTES TO THE (UNAUDITED) INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
CYBEROPTICS CORPORATION**

1. INTERIM REPORTING:

The interim condensed consolidated financial statements presented herein as of June 30, 2011, and for the three and six month periods ended June 30, 2011 and 2010, are unaudited, but in the opinion of management, include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position, results of operations and cash flows for the periods presented.

The results of operations for the three and six month periods ended June 30, 2011 do not necessarily indicate the results to be expected for the full year. The December 31, 2010 consolidated balance sheet data was derived from audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. These unaudited interim condensed consolidated financial statements should be read in conjunction with our consolidated financial statements and notes thereto, contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

2. MARKETABLE SECURITIES:

Our investments in marketable securities are classified as available for sale and consist of the following:

		June 30, 2011			
(In thousands)	Cost	Unrealized Gains	Unrealized Losses	Fair Value

Marketable securities long term	\$ 7,301	\$ 24	\$ (36)	\$ 7,289	

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Our investments in marketable debt securities all have maturities of less than three years. At June 30, 2011, marketable debt securities valued at \$13,606,000 were in an unrealized gain position totaling \$50,000 and marketable debt securities valued at \$2,366,000 were in an insignificant unrealized loss position totaling \$2,000 (all had been in an unrealized loss position for less than twelve months). At December 31, 2010, marketable debt securities valued at \$10,578,000 were in an unrealized gain position totaling \$33,000 and marketable debt securities valued at \$3,043,000 were in an insignificant unrealized loss position totaling \$4,000 (all had been in an unrealized loss position for less than twelve months).

Net pre-tax unrealized gains for marketable securities of \$48,000 at June 30, 2011 and net pre-tax losses of \$3,000 at December 31, 2010 were recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity. In the three months ended June 30, 2011 we received proceeds of \$800,000 from the sale of marketable securities. In the six months ended June 30, 2011 we received proceeds of \$1,848,000 from the sale of marketable securities. In the three months ended June 30, 2010 we received proceeds of \$1,500,000 from the sale of marketable securities. In the six months ended June 30, 2010 we received proceeds of \$2,644,000 from the sale of marketable securities. No gain or loss was recognized on any of the sales during the six months ended June 30, 2011 or 2010.

3. DERIVATIVES:

We enter into foreign exchange forward contracts to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions associated with our subsidiaries in the United Kingdom and Singapore. These transactions are designated as cash flow hedges. The effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings. Hedge ineffectiveness and the amounts excluded from effectiveness testing recognized in income on cash flow hedges were not material for the three and six month periods ended June 30, 2011 and June 30, 2010.

The maximum length of time over which we hedge our exposure to the variability in future cash flows is 12 months. Accordingly, at June 30, 2011 and June 30, 2010, all of our open foreign exchange forward contracts had maturities of one year or less. The dollar equivalent gross notional amount of our foreign exchange forward contracts designated as cash flow hedges was approximately \$9.2 million at June 30, 2011 and \$1.0 million at June 30, 2010.

The location in the consolidated statements of operations and comprehensive income and amounts of gains and losses related to derivative instruments designated as cash flow hedges are as follows. Reclassifications of amounts from accumulated other comprehensive income into income include accumulated gains (losses) at the time earnings are impacted by the forecasted transaction.

(In thousands)	Three Months Ended June 30, 2011

Other income	30	30	
Total	\$ 30	\$ 30	\$

As of June 30, 2011, we had \$100,000 recorded in accumulated other comprehensive income for the after tax net unrealized gain associated with cash flow hedging instruments. We expect to reclassify this amount to earnings over the next 12 months, with the impact offset by cash flows from underlying hedged items. At June 30, 2011, the fair value of our foreign exchange forward contracts in the amount of \$130,000 was recorded in other assets in the accompanying consolidated balance sheet.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

The fair value of foreign exchange forward contracts and their impact on accumulated other comprehensive income as of June 30, 2010 was inconsequential.

Additional information with respect to the impact of derivative instruments on other comprehensive income is included in Note 10. Additional information with respect to the fair value of derivative instruments is included in Note 4.

Our foreign exchange forward contracts contain credit risk to the extent that our bank counter-parties may be unable to meet the terms of the agreements. We minimize such risk by limiting our counter-parties to major financial institutions. We do not expect material losses as a result of defaults by other parties.

4. FAIR VALUE MEASUREMENTS:

We determine the fair value of our assets and liabilities based on the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value maximize the use of observable inputs and minimize the use of unobservable inputs. We use a fair value hierarchy with three levels of inputs, of which the first two are considered observable and the last unobservable, to measure fair value: The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1). The next highest priority is based on quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar assets or liabilities in non-active markets or other observable inputs (Level 2). The lowest priority is given to unobservable inputs (Level 3). The following provides information regarding fair value measurements for our marketable securities and foreign exchange forward contracts as of June 30, 2011 and December 31, 2010 according to the three-level fair value hierarchy:

	Fair Value Measurements at June 30, 2011 Using			
(In thousands)	Balance June 30, 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Marketable securities:				
U.S. government and agency obligations	\$ 8,966	\$	\$ 8,966	\$
Corporate debt securities and certificates of deposit	7,006		7,006	
Equity securities	84	84		
Total marketable securities	\$ 16,056	\$ 84	\$ 15,972	\$
Derivative instruments assets:				
Foreign exchange forward contracts	\$ 130	\$	\$ 130	\$
		8		

Fair Value Measurements at December 31, 2010 Using

(In thousands)	Balance December 31, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Marketable securities:				
U.S. government and agency obligations	\$ 8,010	\$	\$ 8,010	\$
Corporate debt securities and certificates of deposit	5,408		5,408	
Asset backed securities	203		203	
Equity securities	52	52		
Total marketable securities	\$ 13,673	\$	\$ 13,621	\$
Derivative instruments assets:				
Foreign exchange forward Contracts	\$	\$	\$	\$

During the six months ended June 30, 2011 there were no significant transfers to or from the three level hierarchy. A significant transfer is recognized when the inputs used to value a security have been changed which merit a transfer between the disclosed levels of the valuation hierarchy.

The fair value for our U.S. government and agency obligations, corporate debt securities and certificates of deposit and asset backed securities are determined based on valuations provided by external investment managers who obtain them from a variety of industry standard data providers. The fair value for our equity securities is based on a quoted market price obtained from an active market.

The fair value for our foreign exchange forward contracts are based on foreign currency spot and forward rates obtained from reputable financial institutions with resulting valuations periodically validated by obtaining foreign currency spot rate and forward quotes from other industry standard sources or third party or counterparty quotes.

The carrying amounts of financial instruments such as cash equivalents, accounts receivable, other assets, accounts payable, accrued expenses and other current liabilities approximate the related fair values due to the short-term maturities of these instruments. Non-financial assets such as equipment and leasehold improvements, goodwill and intangible assets are subject to non-recurring fair value measurements if they are deemed impaired. We had no re-measurements of non-financial assets to fair value during the six months ended June 30, 2011 or June 30, 2010.

5. ACCOUNTING FOR STOCK-BASED COMPENSATION:

All equity-based payments to employees, including grants of employee stock options, are recognized as an expense in our consolidated statement of operations based on the grant date fair value of the award. We utilize the straight-line method of expense recognition over the award's service period for our graded vesting options. The fair value of stock options granted has been determined using the Black-Scholes model. The compensation expense recognized for all equity based awards is net of estimated forfeitures, which are based on historical data. We have classified equity based compensation within our statement of operations in the same manner as our cash based employee compensation costs.

There have been no grants of stock options or restricted stock units in the six months ended June 30, 2011. We issued 4,000 shares of common stock under our stock grant plan for non-employee directors upon their re-election to our board of directors in May 2011. These share grants were valued on the grant date at their fair market value, with immediate recognition of all corresponding compensation expense as the shares were fully vested upon issuance.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Equity based compensation expense in the three months ended June 30, 2011 totaled \$143,000 and includes \$56,000 for stock option awards, \$27,000 for our employee stock purchase plan, \$20,000 for unvested restricted stock units and \$40,000 for shares issued to our non-employee directors. Equity based compensation expense in the six months ended June 30, 2011 totaled \$248,000 and includes \$113,000 for stock option awards, \$53,000 for our employee stock purchase plan, \$42,000 for unvested restricted stock units and \$40,000 for shares issued to our non-employee directors upon their re-election to our board in May 2011.

Equity based compensation expense in the three months ended June 30, 2010 totaled \$121,000 and includes \$46,000 for stock option awards, \$18,000 for our employee stock purchase plan, \$19,000 for unvested restricted stock units and \$38,000 for shares issued to our non-employee directors upon their re-election to our board in May 2010. Equity based compensation expense in the six months ended June 30, 2010 totaled \$194,000 and includes \$83,000 for stock option awards, \$36,000 for our employee stock purchase plan, \$37,000 for unvested restricted stock units and \$38,000 for shares issued to our non-employee directors.

At June 30, 2011, the total unrecognized compensation cost related to non-vested equity based compensation arrangements was \$680,000 and the related weighted average period over which it is expected to be recognized is 1.91 years.

Stock Options

We have two stock incentive plans that are administered under the supervision of the Compensation Committee of the Board of Directors. There are 744,579 shares of common stock reserved in the aggregate for issuance of options and other stock based benefits under these plans, including restricted stock units and share grants to employees, officers and others. Reserved shares underlying canceled options are available for future grant under our active plans. Options are granted at an option price per share equal to or greater than the market value on the date of grant. Generally, options granted to employees vest over a four-year period and expire five, seven, or ten years after the date of grant. As of June 30, 2011, there were 246,085 shares of common stock available under these plans for future issuance to employees, officers and others. In addition, there are 50,000 shares reserved and included in the plan summaries below that are not part of the two stock incentive plans.

The following is a summary of stock option activity during the six months ended June 30, 2011:

	Options Outstanding	Weighted-Average Exercise Price Per Share
Outstanding, December 31, 2010	531,137	\$ 10.09
Granted		
Exercised	(2,500)	4.80
Expired	(12,350)	12.05
Forfeited		
Outstanding, June 30, 2011	516,287	\$ 10.07
Exercisable, June 30, 2011	342,121	\$ 11.28

The intrinsic value of an option is the amount by which the fair value of the underlying stock exceeds its exercise price. The weighted average remaining contractual term and aggregate intrinsic value for all options outstanding at June 30, 2011 was 3.65 years and \$738,624. The weighted average remaining contractual term and aggregate intrinsic value of options that were exercisable at June 30, 2011 was 2.73 years and \$331,025. The aggregate intrinsic value of stock options that were exercised in the six months ended June 30, 2011 was \$12,900. During the six months ended June 30, 2011, we received total proceeds of \$12,000 from the exercise of stock options. The excess tax benefit associated with the exercise of stock options in the three and six months ended June 30, 2011 was inconsequential.

Restricted Stock Units

Our 1998 Stock Incentive Plan also permits our Compensation Committee to grant other stock-based benefits, including restricted stock units. Restricted stock units are valued at a price equal to the fair market value of our common stock on the date of grant, vest over a four year period and entitle the holders to one share of our common stock for each restricted stock unit. The aggregate fair value of outstanding restricted stock units as of June 30, 2011 was \$312,000.

A summary of activity in non-vested restricted stock units for the six months ended June 30, 2011 is as follows:

Non vested restricted stock units	Shares	Weighted Average Grant Date Fair Value
Non vested at December 31, 2010	32,645	\$ 7.55
Granted		
Vested	(88)	7.71
Forfeited	(350)	8.71
Non vested at June 30, 2011	32,207	\$ 7.53

Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan available to eligible U.S. employees. Under terms of the plan, eligible employees may designate from 1% to 10% of their compensation to be withheld through payroll deductions, up to a maximum of \$6,500 in each plan year, for the purchase of common stock at 85% of the lower of the market price on the first or last day of the offering period. There were no shares issued under this plan in the six months ended June 30, 2011 or the six months ended June 30, 2010. In May 2011, the Board of Directors approved an amendment to increase the number of shares that may be issued under the plan by 150,000 shares. As of June 30, 2011, 211,344 shares remain available for future issuance under this plan.

Stock Grant Plan for Non-Employee Directors

Our stock grant plan for non-employee directors provides for automatic grants of 1,000 shares of our common stock to each of our non-employee directors upon their re-election to the board of directors. The plan provides for a total of 30,000 shares of our common stock for issuance to directors and will expire on May 19, 2018. We issued a total of 4,000 shares of common stock under this plan in connection with our annual meeting in May 2011, resulting in \$40,000 of stock compensation expense in the three and six months ended June 30, 2011. There are presently 16,000 shares of common stock reserved in the aggregate for future issuance under this plan.

6. INVENTORIES AND WARRANTIES:

Inventories consist of the following:

(In thousands)	June 30, 2011	December 31, 2010
Raw materials and purchased parts	\$ 7,221	\$ 6,895
Work in process	1,479	1,807
Finished goods	5,819	5,513
Total inventories	\$ 14,519	\$ 14,215
Warranty costs:		

We provide for the estimated cost of product warranties at the time revenue is recognized, generally for one year. While we engage in extensive product quality programs and processes, including actively monitoring and evaluating the quality of component suppliers, warranty obligations are affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. Should actual product failure rates, material usage or service delivery costs differ from our estimates, revisions to the estimated warranty liability would be required. Our warranty liability is included as a component of accrued expenses. At the end of each reporting period we revise our estimated warranty liability based on these factors.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

A reconciliation of the changes in our estimated warranty liability, included as a component of accrued expenses, is as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 696	\$ 552	\$ 702	\$ 488
Accrual for warranties	337	324	522	505
Settlements made during the period	(276)	(269)	(467)	(386)
Balance at end of period	\$ 757	\$ 607	\$ 757	\$ 607
Extended warranty:				

Our extended warranty liability is included as a component of advance customer payments. A reconciliation of the changes in our extended warranty liability is as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 763	\$ 697	\$ 787	\$ 636
Revenue deferrals	136	290	222	466
Amortization of deferred revenue	(113)	(112)	(223)	(227)
Balance at end of period	\$ 786	\$ 875	\$ 786	\$ 875

7. INTANGIBLE ASSETS:

Intangible assets consist of the following:

(In thousands)	As of June 30, 2011			As of December 31, 2010		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Developed technology	\$ 7,775	\$ (7,757)	\$ 18	\$ 7,775	\$ (7,666)	\$ 109
Patents and trademarks	2,684	(2,414)	270	2,732	(2,406)	326
Total	\$ 10,459	\$ (10,171)	\$ 288	\$ 10,507	\$ (10,072)	\$ 435

Amortization expense for the three and six month periods ended June 30, 2011 and 2010 is as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Developed technology	\$ 45	\$ 46	\$ 90	\$ 91
Patents and trademarks	51	56	110	114
Total	\$ 96	\$ 102	\$ 200	\$ 205

Intangible and other long lived assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. An impairment loss would be recognized when future undiscounted cash flows expected to result from use of the asset and eventual disposition are less than the carrying amount.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Amortization of patents and trademarks has been classified as research and development expense in the accompanying statement of operations. Estimated aggregate amortization expense based on current intangibles for the next four years is expected to be as follows: \$116,000 for the remainder of 2011 and \$132,000 in 2012, \$31,000 in 2013, and \$9,000 in 2014.

8. BUSINESS SEGMENTS AND SIGNIFICANT CUSTOMERS:

Our electronic assembly segment designs, manufactures and sells optical process control sensors and inspection systems for the electronic assembly equipment market. Our semiconductor segment designs, manufactures and sells optical and other process control sensors and related equipment for the semiconductor capital equipment market. Information regarding our segments is as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Revenue:				
Electronic Assembly				
OEM Sensors	\$ 6,174	\$ 6,485	\$ 12,266	\$ 11,604
SMT Systems	9,032	8,716	14,411	14,761
Total Electronic Assembly	15,206	15,201	26,677	26,365
Semiconductor				
Total	\$ 1,653	1,298	3,532	2,475
Total	\$ 16,859	\$ 16,499	\$ 30,209	\$ 28,840
Income from operations:

Interest income and other	(7)	13	79	90
Income before taxes	\$ 1,837	\$ 1,202	\$ 3,010	\$ 1,536
Depreciation and amortization:				
Electronic Assembly				
	\$ 441	\$ 490	\$ 1,027	\$ 920
Semiconductor				
	52	59	109	116
Total	\$ 493	\$ 549	\$ 1,136	\$ 1,036

Export sales were 88% of revenue in the three months ended June 30, 2011 and 87% of revenue in the six months ended June 30, 2011. Export sales were 87% of revenue in the three months ended June 30, 2010 and 85% of revenue in the six months ended June 30, 2010. Virtually all of our export sales are negotiated, invoiced and paid in U.S. dollars. Export sales by geographic area are summarized as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Americas	\$ 392	\$ 79	\$ 866	\$ 282
Europe	4,073	3,250	8,603	6,670
Asia	9,953	10,951	16,114	17,451
Other	393	56	589	86
Total export sales	\$ 14,811	\$ 14,336	\$ 26,172	\$ 24,489

We are dependent upon three electronic assembly customers, Assembleon, DEK and Juki for a significant portion of our total revenue. For the six months ended June 30, 2011, sales to Assembleon accounted for 11% of our total revenue, sales to DEK accounted for 9% of our total revenue and sales to Juki accounted for 18% of our total revenue.

9. NET INCOME PER SHARE:

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Net income per diluted share is computed by dividing net income by the weighted average number of common and common equivalent shares outstanding during the period. Common equivalent shares consist of common shares to be issued upon exercise of stock options, restricted stock units and from participation in our employee stock purchase plan, as calculated using the treasury stock method. The components of net income per basic and diluted share are as follows:

(In thousands except per share amounts)	Net income	Weighted Average Shares Outstanding	Per Share Amount
Three Months Ended June 30, 2011:			
Basic	\$ 1,398	6,894	\$ 0.20
Dilutive effect of common equivalent shares		54	
Dilutive	\$ 1,398	6,948	\$ 0.20

(In thousands except per share amounts)	Net income	Weighted Average Shares Outstanding	Per Share Amount
Three Months Ended June 30, 2010:			
Basic	\$ 969	6,847	\$ 0.14
Dilutive effect of common equivalent shares		67	
Dilutive	\$ 969	6,914	\$ 0.14

(In thousands except per share amounts)	Net income	Weighted Average Shares Outstanding	Per Share Amount
Six Months Ended June 30, 2011:			
Basic	\$ 2,244	6,893	\$ 0.33
Dilutive effect of common equivalent shares		48	(.01)
Dilutive	\$ 2,244	6,941	\$ 0.32

(In thousands except per share amounts)	Net income	Weighted Average Shares Outstanding	Per Share Amount
Six Months Ended June 30, 2010:			
Basic	\$ 1,216	6,843	\$ 0.18
Dilutive effect of common equivalent shares		49	
Dilutive	\$ 1,216	6,892	\$ 0.18

The calculation of diluted net income per common share excludes 293,000 potentially dilutive shares for the three months ended June 30, 2011, 241,000 potentially dilutive shares for the three months ended June 30, 2010, 307,000 potentially dilutive shares for the six months ended June 30, 2011 and 297,000 potentially dilutive shares for the six months ended June 30, 2010, because their effect would be anti-dilutive.

10. COMPREHENSIVE INCOME:

Total comprehensive income and components of total other comprehensive income (loss) for the three and six months ended June 30, 2011 and 2010 is as follows:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Net income	\$ 1,398	\$ 969	\$ 2,244	\$ 1,216
Other comprehensive income (loss), net of tax:				
Foreign currency translation adjustment	145	11	243	40
Tax effect				
Foreign currency translation adjustment, net of tax	145	11	243	40
Unrealized gains (losses) on available for sale securities	42	(61)	51	(109)
Tax effect	(15)	21	(17)	38
Unrealized gains (losses) on available for sale securities, net of tax	27	(40)	34	(71)
Unrealized gains on foreign exchange forward contracts	150		151	
Tax effect	(51)		(51)	
Unrealized gains (losses) on foreign exchange forward contracts, net of tax	99		100	
Total other comprehensive income (loss), net of tax	\$ 271	\$ (29)	\$ 377	\$ (31)
Total comprehensive income	\$ 1,669	\$ 940	\$ 2,621	\$ 1,185

At June 30, 2011 and December 31, 2010 components of accumulated other comprehensive income (loss) is as follows:

(In thousands)	June 30, 2011	December 31, 2010
Unrealized gains (losses) on available for sale securities	\$ 32	\$ (2)
Unrealized gains on effective portion of foreign exchange forward contracts	100	
Foreign currency translation adjustments	(341)	(584)
Balance June 30, 2011	\$ (209)	\$ (586)

Reclassification adjustments are made to avoid double counting in comprehensive income items that are also recorded as part of net income. Reclassifications to earnings related to cash flow hedging instruments are provided in Note 4. There were no reclassifications to earnings from accumulated other comprehensive income related to realized gains or losses on available for sale securities. Income taxes are not provided for foreign currency adjustments translation relating to permanent investments in international subsidiaries.

11. INCOME TAXES:

In the six months ended June 30, 2011, we recorded income tax expense of \$766,000, reflecting an effective tax rate of 25%, compared to income tax expense of \$320,000 in the six months ended June 30, 2010, reflecting an effective tax rate of 21%. Our effective tax rate for 2011 and 2010 reflects the benefit of having a significant portion of our operations in Singapore where corporate income tax rates are substantially lower than the United States. Fluctuations in the level of income in the United States and Singapore will have an impact on our effective tax rate in any given annual period. Other items favorably impacting our income tax rate in 2011 and 2010 include benefits from the federal research and experimentation (R&D) tax credit and the domestic manufacturer's production incentive deduction.

We currently have significant deferred tax assets as a result of temporary differences between taxable income on our tax returns and U.S. GAAP income, research and development tax credit carry forwards and foreign net operating loss carry forwards. A deferred tax asset generally represents future tax benefits to be received when temporary differences previously reported in our financial statements become deductible for income tax purposes, or when net operating loss carry forwards or credits are applied against future taxable income, or when tax credit carry forwards are utilized on our tax returns. We assess the realizability of our deferred tax assets and the need for a valuation allowance based on the guidance provided in current financial accounting standards.

Significant judgment is required in determining the realizability of our deferred tax assets. The assessment of whether valuation allowances are required considers, among other matters, the nature, frequency and severity of any current and cumulative losses, forecasts of future profitability, the duration of statutory carry forward periods, our experience with loss carry forwards not expiring unused and tax planning alternatives.

In analyzing the need for valuation allowances, we first considered our history of cumulative losses for U.S. income tax purposes over the past three years and also gave significant consideration to our results for U.S. income tax purposes over the past five years, as the economic cycles in our industry have tended to average five years in length (from peak to trough). We also considered our forecasts of future profitability, the duration of statutory carry forward periods and tax planning alternatives. Finally, we considered the length and severity of the recent global economic crisis, the impact that it had on our operating results and our expectation for rebound given recent signs of recovery in the global economy and more specifically in our markets. After considering all of these factors, and after considering other significant positive evidence, we concluded that a valuation allowance, with respect to substantially all of our U.S. based deferred tax assets, was not required at June 30, 2011.

Our results in both 2008 and 2009 were negatively impacted by the recent global economic slowdown, and we incurred a loss in the United States in both 2008 and 2009, where most of our net deferred tax assets are recorded. We recorded a profit in 2010. Achievement of ongoing profitability in the United States will be a significant factor in determining our continuing ability to carry these deferred tax assets without recording a valuation allowance. If future results from our operations are less than projected, a valuation allowance may be required against virtually all of our deferred tax assets, which could have a material impact on our results of operations in the period in which it is recorded.

Deferred tax assets at June 30, 2011, include net operating loss carry forwards incurred in the UK by CyberOptics Ltd., which was acquired in 1999. The utilization of these net operating loss carry forwards is dependent on CyberOptics Ltd.'s ability to generate sufficient UK taxable income during the carry forward period.

12. CONTINGENCIES:

We are periodically a defendant in miscellaneous claims and disputes in the ordinary course of business. While the outcome of these matters cannot be predicted with certainty, management presently believes the disposition of these matters will not have a material effect on our financial position, results of operations or cash flows.

In the normal course of business to facilitate sales of our products and services, we at times indemnify other parties, including customers, with respect to certain matters. In these instances, we have agreed to hold the other parties harmless against losses arising out of intellectual property infringement or other types of claims. These agreements may limit the time within which an indemnification claim can be made, and almost always limit the amount of the claim. It is not possible to determine the maximum potential amount under these indemnification agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made, if any, under these agreements have not had a material impact on our operating results, financial position or cash flows.

13. RECENT ACCOUNTING DEVELOPMENTS:

In December 2010, the Financial Accounting Standards Board (FASB) issued amendments to the guidance on goodwill impairment testing. The amendments modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In making that determination, an entity should consider whether there are any adverse qualitative factors indicating that impairment may exist. The amendments were effective January 1, 2011 and had no impact on our consolidated financial position, results of operations or cash flows.

In January 2010, the FASB issued additional disclosure requirements for fair value measurements which we included in our interim and annual financial statements in 2010. Certain disclosure requirements relating to fair value measurements using significant unobservable inputs (Level 3) were deferred until January 1, 2011. These new requirements did not have any impact on our consolidated financial positions, results of operations or cash flows as they relate only to additional disclosures.

In May 2011, the FASB issued amended guidance and disclosure requirements for fair value measurements. These amendments are not expected to have a material impact to the consolidated financial results. Additional disclosure requirements include information about valuation techniques and unobservable inputs used in Level 3 measurements and a narrative description about Level 3 measurement sensitivity to changes in unobservable inputs. These changes will be effective January 1, 2012 on a prospective basis. Early application is not permitted.

In June 2011, the FASB issued amended disclosure requirements for the presentation of comprehensive income. The amended guidance eliminates the option to present components of other comprehensive income (OCI) as part of the statement of changes in equity. Under the amended guidance, all changes in OCI are to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive financial statements. The changes are effective January 1, 2012. Early application is permitted. There will be no impact to the consolidated financial results as the amendments relate only to changes in financial statement presentation.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CRITICAL ACCOUNTING POLICIES AND ESTIMATES:

The preparation of the financial information contained in this 10-Q requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate these estimates on an ongoing basis, including those related to allowances for doubtful accounts and returns, warranty obligations, inventory valuation, the carrying value and any impairment of intangible assets, and income taxes. These critical accounting policies are discussed in more detail in the Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Form 10-K for the year ended December 31, 2010.

FORWARD LOOKING STATEMENTS:

The following management's discussion and analysis contains a number of estimates and predictions that are forward looking rather than based on historical fact. Among other matters, we discuss (i) our level of anticipated revenues and net income for the third quarter and full year 2011; (ii) the potential margin improvements resulting from our next-generation solder paste and automated optical inspection (AOI) systems; (iii) the timing of initial revenue and margin improvements from other new products that we have under development, that have been recently introduced or we anticipate introducing in the future; (iv) our expectations regarding market acceptance of WaferSense and our other semiconductor products; (v) our beliefs regarding trends in the general economy and its impact on markets for our equipment; and (vi) the impact of currency fluctuations on our operations. Although we have made these statements based on our experience and best estimate of future events, there may be events or factors that we have not anticipated, and the accuracy of our statements and estimates are subject to a number of risks, including those identified in our Annual Report on Form 10-K for the year ended December 31, 2010.

RESULTS OF OPERATIONS:

General

Our products are sold primarily into the electronics assembly, photovoltaic (solar) cell manufacturing, semiconductor DRAM and Flash memory manufacturing, and semiconductor fabrication capital equipment markets. We sell products in these markets both to original equipment manufacturers of production equipment and to end-user customers that produce circuit boards, solar cells and semiconductor wafers and devices. Historically these markets have been very cyclical, and have experienced periods of rapid growth as worldwide capacity is added to support increased consumer demand for electronic products, and new capital equipment is purchased as a result of technology changes in electronics components, such as miniaturization, and changing production requirements. These periods of growth have historically been followed by periods of excess capacity and reduced capital spending.

Our results were favorably impacted in 2006 and 2007 as the worldwide demand for cell phones, smart phones, laptops and other consumer electronics remained strong, driving the need for increased production of printed circuit boards and memory modules, and thereby increasing demand for our electronic assembly and semiconductor products. After peaking in the third quarter of 2007, our revenue declined sequentially each quarter through the first quarter of 2009, as our results were negatively impacted by reduced levels of capital spending for electronics manufacturing capacity brought about by the deepening weakness in the global economy. New orders dropped off sharply late in the fourth quarter of 2008 as the global economy fell into a severe recession, and our results for 2009 were adversely affected by the ongoing weakness in the global electronics market.

The global electronics market strengthened significantly in 2010. We experienced particularly strong demand in the second quarter of 2010, as pent-up demand and an improving economy led to significantly increased sales of alignment sensors and our stand-alone solder paste inspection and AOI systems. Sales of sensors continued at these strong levels throughout the remainder of 2010, while systems sales moderated to more normal levels.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Sales of inspection systems, particularly our QX500 AOI offering were strong in the second quarter of 2011, and we forecast sales of inspection systems to increase further in this year's third quarter as Asian original design manufacturers and other large electronics manufacturers continue deploying our inspection technologies. We expect the strength of our systems business to more than offset lower sensor sales that we anticipate during this period. We expect some softness in sales of SMT alignment sensors because of a general weakening in worldwide economic conditions and electronics supply chain disruptions resulting from the Japanese tsunami earlier this year. We also expect sales of solar wafer cameras to remain soft in the third quarter, reflecting some over-expansion of solar market production capacity in recent months. Given our expectation for continued strong sales of inspection systems, particularly our AOI offerings, we are forecasting earnings of \$0.19 to \$0.23 per diluted share on sales of \$16.5 to \$17.5 million for the third quarter of 2011 ending September 30. Consistent with this guidance, we have refined our full-year outlook to earnings of \$0.62 to \$0.69 per diluted share on sales of \$60 to \$63 million, compared to our previously issued 2011 guidance for earnings of \$0.60 to \$0.70 per share on sales of \$60 to \$65 million. Realization of our forecast results is subject to risks and uncertainties, including those identified above under "Forward-Looking Statements" and those identified in our Annual Report on Form 10-K for the year ended December 31, 2010.

Segment Results

Operating results for our electronic assembly and semiconductor segments for the three and six month periods ended June 30, 2011 and 2010 are as follows:

(In thousands)	Three months ended June 30, 2011			Three months ended June 30, 2010		
	Electronic Assembly	Semi- Conductor	Total	Electronic Assembly	Semi- Conductor	Total
Revenues	\$ 15,206	\$ 1,653	\$ 16,859	\$ 15,201	\$ 1,298	\$ 16,499
Cost of revenues	8,904	448	9,352	9,455	388	9,843

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Revenues

Our revenues increased by 2% to \$16.9 million in the three months ended June 30, 2011 from \$16.5 million in the three months ended June 30, 2010, and increased by 5% to \$30.2 million in the six months ended June 30, 2011 from \$28.8 million in the six months ended June 30, 2010. The following table sets forth revenues by product line for the three and six month periods ended June 30, 2011 and 2010:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Electronic Assembly				
OEM Alignment Sensors	\$ 6,174	\$ 6,485	\$ 12,266	\$ 11,604
SMT Inspection Systems	9,032	8,716	14,411	14,761
Total Electronic Assembly	15,206	15,201	26,677	26,365
Semiconductor	1,653	1,298	3,532	2,475
Total	\$ 16,859	\$ 16,499	\$ 30,209	\$ 28,840
<i>Electronic Assembly</i>				

Revenue from sales of our OEM alignment sensors decreased by \$311,000 or 5% to \$6.2 million in the three months ended June 30, 2011, down from \$6.5 million in the three months ended June 30, 2010, and increased by \$662,000 or 6% to \$12.3 million in the six months ended June 30, 2011, up from \$11.6 million in the six months ended June 30, 2010. Revenue from sales of non-solar alignment sensors decreased in the three and six months ended June 30, 2011 due to a challenging comparison with the same periods of 2010, when sales of capital equipment for printed circuit board production benefited from pent-up demand as the global economy was emerging from the deep recession in 2009. We believe the reduction in revenue from sales of non-solar alignment sensors in the three and six months ended June 30, 2011 is not due to any competitive factors resulting in a loss of sales or market share. The increase in revenue from sales of OEM alignment sensors in the six months ended June 30, 2011 was due to a \$1.4 million increase in sales of our new solar wafer alignment camera to DEK, partially offset by the reduction in sales of non-solar alignment sensors.

Revenue from sales of our stand-alone SMT inspection systems products increased by \$316,000 or 4% to \$9.0 million in the three months ended June 30, 2011, up from \$8.7 million in the three months ended June 30, 2010, and decreased by \$350,000 or 2% to \$14.4 million in the six months ended June 30, 2011, down from \$14.8 million in the six months ended June 30, 2010. Sales of automated optical inspection systems (AOI) increased by \$2.4 million or 144% in the three months ended June 30, 2011 and increased by \$3.0 million or 94% in the six months ended June 30, 2011, led by our next-generation QX500 AOI system, as we capitalized on our existing relationships with several of the world's largest original design manufacturers.

Featuring the fastest AOI inspection times currently available, the QX500 is based upon a cost-reduced platform that we believe exceeds the performance metrics of competitors' systems. We believe the QX500 will continue to receive favorable market acceptance, particularly with original design manufacturers, where we have a large, established installed base of SPI systems and where the fast inspection times of the QX500 are required. Increased sales of AOI systems in the three and six months ended June 30, 2011 were largely offset by a reduction in sales of our solder paste inspection (SPI) systems, reflecting the challenging comparison with last year when sales of our SE500 SPI system benefited from pent-up demand as the global economy was emerging from the deep recession. We believe sales of our SPI systems will increase in the second half of 2011 when compared to the second half of 2010, reflecting continued strong demand for our inspection systems from global electronics manufacturers, including original equipment design manufacturers in Asia.

We believe that ongoing introduction of new system products, including those accommodating dual production lanes, inspecting bigger circuit boards and addressing different tiers of the market, will strengthen our competitive position in the inspection market. Unlike revenue from our alignment sensors, which is closely tied to the need for added production capacity for printed circuit boards, a portion of our stand-alone SMT systems revenue is derived from the retro-fit of existing production lines as companies seek to improve their production yields, thereby reducing manufacturing costs.

In March 2011, we entered into an OEM agreement with German-based Viscom AG, under which we integrated our SE500 sensor technology into Viscom's SPI platforms. Given Viscom's strong customer base in the automotive and industrial electronics markets, this partnership provides us with increased access to large segments of the global SPI market. We realized the initial sales of our SE500 solder paste inspection sensors to Viscom AG in the second quarter of 2011.

We believe that these new products, and technology trends toward smaller components and increased production speeds, will contribute to increased demand and higher revenue in 2011.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Export revenue from OEM alignment sensors and SMT inspection systems totaled \$13.9 million or 91% of electronic assembly revenue in the three months ended June 30, 2011, compared to \$13.8 million or 91% of electronic assembly revenue in the three months ended June 30, 2010. Export revenue from electronic assembly OEM alignment sensors and SMT inspection systems totaled \$24.3 million or 91% of electronic assembly revenue in the six months ended June 30, 2011, compared to \$23.6 million or 90% of electronic assembly revenue in the six months ended June 30, 2010. Sales to international customers continue to be significant, as manufacturing of electronic components has migrated offshore, particularly to China and other areas of Asia.

Semiconductor

Revenues from semiconductor products increased by \$355,000 or 27% to \$1.7 million in the three months ended June 30, 2011 from \$1.3 million in the three months ended June 30, 2010, and increased by \$1.1 million or 43% to \$3.5 million in the six months ended June 30, 2011 from \$2.5 million in the six months ended June 30, 2010. The increase in revenue was due to improving conditions in the market for semiconductor fabrication equipment, coupled with favorable market acceptance of our new WaferSense products.

Our wafer mapper and frame grabber products are relatively mature. We anticipate that future growth in our semiconductor revenues, exclusive of changes related to capital procurement cycles will come from our new WaferSense products, a family of wireless, wafer like precision measurement tools for in-situ setup, calibration and process optimization in semiconductor processing equipment. We have introduced, or will be introducing, several new additions to the WaferSense product line, including additional leveling sensors, along with new gapping, teaching, vibration and particle sensors. WaferSense revenue increased by \$338,000 or 49% to \$1.0 million in the three months ended June 30, 2011 from \$693,000 in the three months ended June 30, 2010 and increased by \$1.0 million or 84% to \$2.2 million in the six months ended June 30, 2011 from \$1.2 million in the six months ended June 30, 2010.

Export revenue from semiconductor products totaled \$930,000 or 56% of revenue in the three months ended June 30, 2011, compared to \$500,000 or 39% of revenue in the three months ended June 30, 2010. Export revenue from semiconductor products totaled \$1.8 million or 52% of revenue in the six months ended June 30, 2011, compared to \$865,000 or 35% of revenue in the six months ended June 30, 2010. The increase in the percentage of sales coming from exports for our semiconductor products reflects proportionately higher WaferSense revenue, as these products tend to have a higher concentration of international sales.

Cost of Revenue and Gross Margin

Electronic Assembly

Cost of revenue for our electronic assembly segment decreased by \$551,000 or 6% in the three months ended June 30, 2011 and decreased by \$1.2 million or 7% in the six months ended June 30, 2011, while sales in both periods of 2011 remained essentially unchanged, when compared to the same periods of 2010. Gross margin as a percentage of electronic assembly sales was 41% in the three months ended June 30, 2011, compared to 38% in the three months ended June 30, 2010, and was 44% in the six months ended June 30, 2011 compared to 39% in the six months ended June 30, 2010. The reduction in cost of revenue and improvement in gross margin was due to a shift in sales mix toward newer, higher gross margin products, including our new solar wafer alignment camera and our new next generation QX500 AOI system and the favorable impact of cost reduction programs across all of our electronic assembly products.

We anticipate that gross margins as a percentage of electronic assembly sales in the third quarter of 2011 will be consistent with the three months ended June 30, 2011.

The electronic assembly market is highly price competitive, resulting in continual pressure on our gross margins. We compensate for pricing pressure by introducing new products with more features and improved performance and through manufacturing cost reduction programs. For example, our next-generation SE500 and SE350 SPI systems and QX500 AOI system combines a reduction in cost with enhanced performance. Other recently introduced products, including our solar wafer alignment camera, embedded process verification (EPV) technology and the embedded 2D solder paste inspection solution we developed for DEK, have more favorable margins than our existing products.

Semiconductor

Cost of revenue for our semiconductor segment increased by \$60,000 or 15% in the three months ended June 30, 2011 and increased by \$317,000 or 43% in the six months June 30, 2011 when compared to the same periods of 2010, due to the higher level of semiconductor sales in 2011. Gross margin as a percentage of semiconductor sales improved to 73% in the three months ended June 30, 2011 from 70% in the three months ended June 30, 2010 due to proportionately higher sales of WaferSense products, which carry a higher gross margin than our older frame grabber and wafer mapper products. Gross margin as a percentage of semiconductor sales was 70% in both the six months ended June 30, 2011 and 2010, as the gross margin benefit from higher WaferSense sales in 2011 was offset by higher scrap charges in the first quarter of 2011.

We anticipate that gross margins as a percentage of semiconductor sales in the third quarter of 2011 will be consistent with the three months ended June 30, 2011.

Operating Expenses

We believe continued investment in research and development of new products, coupled with continued investment in and development of our sales channel is critical to future growth and profitability. We historically have maintained research and development and sales and marketing expenses at relatively high levels, even during periods of recession and downturn in our electronic assembly and semiconductor capital equipment markets, as we continue to fund development of important new products, and continue to invest in our sales channels and develop new sales territories.

Electronic Assembly

Research and development expenses for our electronic assembly segment were \$1.7 million in the three months ended June 30, 2011, compared to \$1.5 million in the three months ended June 30, 2010. Research and development expenses for our electronic assembly segment were \$3.2 million in the six months ended June 30, 2011, compared to \$3.0 million in the six months ended June 30, 2010. The increase in research and development expenses in both the three and six months ended June 30, 2011 resulted from additional wages and benefits due to annual pay increases and headcount in the 2011 period. In addition, the weakening United States dollar increased the recorded value of costs attributable to our research and development organization located in Singapore.

We anticipate that research and development expenses in the third quarter of 2011 will be near the second quarter level as development continues on new products, including those based on our embedded inspection technology and our stand-alone inspection systems.

Selling, general and administrative expenses for our electronic assembly segment were \$3.3 million in the three months ended June 30, 2011, compared to \$3.4 million in the three months ended June 30, 2010. Selling, general and administrative expenses for our electronic assembly segment were \$6.5 million in the six months ended June 30, 2011, compared to \$6.2 million in the six months ended June 30, 2010. The slight decrease in selling, general and administrative expense in the three months ended June 30, 2011 was due to a reduction in commissions for third party sales representatives, as more sales were sold through distribution channels, and lower professional fees, mostly offset by higher costs for business development activities and the impact of the weakening United States dollar on the recorded value of costs attributable to our foreign sales offices. The increase in business development activities and the weaker United States dollar also accounted for the increase in selling, general and administrative expense in the six months ended June 30, 2011 compared to the prior year period. Costs for third party commissions were also lower in the six months ended June 30, 2011 as more sales occurred through distribution channels in the second quarter of 2011 compared to the second quarter of 2010.

We presently anticipate that selling, general and administrative expenses in the third quarter of 2011 will be near the level recorded in the three months ended June 30, 2011, as an anticipated increase in commission expense for third party sales representatives will be offset by a reduction in expense associated with the annual retainer paid to our outside board members in the second quarter of 2011.

Semiconductor

Research and development expenses for our semiconductor segment were \$273,000 in the three months ended June 30, 2011, compared to \$247,000 in the three months ended June 30, 2010. Research and development expenses for our semiconductor segment were \$571,000 in the six months ended June 30, 2011, compared to \$519,000 in the six months ended June 30, 2010. Research and development expenses were higher in the three and six months ended June 30, 2011 due to increased expenditures for proto-types reflecting our ongoing investment in the WaferSense product line.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Selling, general and administrative expenses for our semiconductor segment were \$364,000 in the three months ended June 30, 2011 compared to \$343,000 in the three months ended June 30, 2010. Selling, general and administrative expenses for our semiconductor segment were \$825,000 in the six months ended June 30, 2011, compared to \$695,000 in the six months ended June 30, 2010. The increase in expense in the three and six months ended June 30, 2011 reflects higher third party commissions resulting from the higher level of sales. No significant changes are expected in the level of semiconductor operating expenses in the third quarter of 2011.

Interest and Other

Interest income and other includes interest earned on investments and gains and losses associated with foreign currency transactions and foreign exchange forward contracts used to hedge against the effects of exchange rate fluctuations on intercompany financing transactions associated with our subsidiaries in the United Kingdom and Singapore. Interest income and other decreased in the three and six months ended June 30, 2011, compared to the same periods of 2010, reflecting lower interest income resulting from lower rates of interest earned on invested funds. Interest income in the three months ended June 30, 2011 was entirely offset by losses on foreign exchange forward contracts associated with intercompany financing transactions, net of foreign currency gains on the underlying intercompany balance.

Provision for Income Taxes and Effective Income Tax Rate

In the six months ended June 30, 2011, we recorded income tax expense of \$766,000, reflecting an effective tax rate of 25%, compared to income tax expense of \$320,000 in the six months ended June 30, 2010, reflecting an effective tax rate of 21%. Our effective tax rate for 2011 and 2010 reflects the benefit of having a significant portion of our operations in Singapore where corporate income tax rates are substantially lower than the United States. Fluctuations in the level of income in the United States and Singapore will have an impact on our effective tax rate in any given annual period. Other items favorably impacting our income tax rate in 2011 and 2010 include benefits from the federal research and experimentation (R&D) tax credit and the domestic manufacturer's production incentive deduction.

Order Rate and Backlog

Our orders totaled \$17.9 million in the three months ended June 30, 2011, compared to \$16.8 million in the three months ended March 31, 2011 and \$17.7 million in the three months ended June 30, 2010. Backlog totaled \$11.6 million at June 30, 2011, \$10.6 million at March 31, 2011 and \$12.9 million at June 30, 2010. The scheduled shipment (or estimated timing of revenue for systems recognized upon acceptance) for backlog at June 30, 2011 is as follows:

(In thousands)	Backlog
3 rd Quarter 2011	\$ 10,535
4 th Quarter 2011 and after	1,087
Total backlog	\$ 11,622

LIQUIDITY AND CAPITAL RESOURCES

Our cash and cash equivalents decreased by \$569,000 in the six months ended June 30, 2011, resulting from \$2.4 million of new marketable security purchases, net of proceeds from maturities and sales of marketable securities, purchases of capital assets totaling \$270,000, offset in part by \$2.1 million of cash provided by operating activities and proceeds from stock option exercise of \$12,000. Our cash and cash equivalents fluctuate in part because of maturities of marketable securities, and investment of cash balances in marketable securities, or from other sources of cash, in addition to marketable securities. Accordingly, we believe the combined balances of cash and marketable securities provide a more reliable indication of our available liquidity. Combined balances of cash and marketable securities increased by \$1.8 million to \$23.9 million as of June 30, 2011 from \$22.1 million as of December 31, 2010.

Operating activities provided \$2.1 million of cash in the six months ended June 30, 2011. Cash provided by operations included net income of \$2.2 million, which included non-cash expenses totaling \$1.7 million for depreciation and amortization, deferred taxes, non-cash gains and losses from foreign currency transactions and stock compensation expenses. Changes in operating assets and liabilities using cash included increases in accounts receivable of \$2.3 million and inventories of \$216,000. Changes in operating assets and liabilities providing cash included decreases in other assets of \$213,000, increases in accounts payable of \$152,000 and increases in accrued expenses of \$287,000. The increase in accounts receivable was due to higher sales levels in the second quarter of 2011, compared to the fourth quarter of 2010. Inventories were slightly higher due to lower than planned sales of solar wafer alignment cameras in the second quarter of 2011. The decrease in other assets was due to reductions in recoverable value added tax and accrued interest. The increase in accounts payable resulted from a conscious effort on our part to extend the timing of vendor payments. Accrued expenses and other liabilities increased due to higher warranty, commission and incentive compensation accruals, resulting from higher sales levels and improved operating results.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

Operating activities used \$2.5 million of cash in the six months ended June 30, 2010. Cash provided by operations included net income of \$1.2 million, which included non-cash expenses totaling \$1.4 million for depreciation and amortization, deferred taxes, non-cash gains and losses from foreign currency transactions and stock compensation expenses. Changes in operating assets and liabilities using cash included increases in accounts receivable of \$6.4 million, inventories of \$4.9 million and other assets of \$469,000. Changes in operating assets and liabilities providing cash included increases in accounts payable of \$5.6 million and increases in accrued expenses and other liabilities of \$1.1 million. The increase in accounts receivable was due to higher sales levels in the second quarter of 2010, compared to the fourth quarter of 2009. Inventories were higher due to increased material purchases to support the higher level of sales expected in the second half of 2010. The increase in accounts payable resulted from increased material purchases and a conscious effort on our part to extend the timing of vendor payments. Accrued expenses and other liabilities increased due to higher warranty, commission and incentive compensation accruals, resulting from higher sales levels and improved operating results.

Investing activities used \$2.7 million of cash in the six months ended June 30, 2011 compared to providing \$4.5 million of cash in the same period last year. Changes in the level of investment in marketable securities, resulting from the purchases, sales and maturities of those securities used \$2.4 million of cash in the six months ended June 30, 2011, compared to generating \$5.2 million of cash in the same period last year. We used \$270,000 of cash in the six months ended June 30, 2011 and \$779,000 of cash in the six months ended June 30, 2010 for the purchase of fixed asset and capitalized patent costs.

Financing activities provided \$12,000 of cash in the six months ended June 30, 2011 and \$25,000 of cash in the six months ended June 30, 2010, all from the exercise of employee stock options.

At June 30, 2011, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of establishing off-balance sheet arrangements or other contractually narrow or limited purposes.

A table of our contractual obligations was provided in Item 7 in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010. We lease a mixed office and warehouse facility built to our specifications in Golden Valley, Minnesota, which functions as our corporate headquarters and primary manufacturing facility for our sensor products, including the sensors used in our stand-alone systems products and our semiconductor products. In March 2011, we finalized a lease amendment for this facility that became effective July 1, 2011. The amendment provides that we will lease approximately 50,762 square feet of our existing facility through December 31, 2018. Future minimum lease payments due under the lease amendment from July 1, 2011 through December 31, 2018 are approximately \$5.1 million. We estimate a reduction in average annual rental expense over the term of the new lease amendment of approximately \$270,000 per year. There have been no other significant changes to our contractual obligations in the six months ended June 30, 2011. At the present time, we have no material commitments for capital expenditures. Purchase commitments for inventory will vary based on the volume of revenue and resulting inventory requirements.

Our cash, cash equivalents and marketable securities totaled \$23.9 million at June 30, 2011. We believe that our available balances of cash, cash equivalents and marketable securities will be adequate to fund our cash flow needs for the foreseeable future.

Inflation and Foreign Currency Transactions

Changes in our revenues have resulted primarily because of changes in the level of unit shipments and the relative strength of the worldwide electronics and semiconductor fabrication capital equipment markets. We believe that inflation has not had a significant effect on our operations.

Virtually all of our international export sales are negotiated, invoiced and paid in U.S. dollars. We manufacture our SMT systems products in Singapore and a portion of our raw material purchases are denominated in Singapore dollars. We also have R&D and sales personnel located in Singapore and sales offices located in other parts of the world. Although currency fluctuations do not significantly affect our revenue, they can impact our costs and influence the price competitiveness of our products and the willingness of existing and potential customers to purchase units. Recently, the Singapore dollar has strengthened in relation to the U.S. dollar and this factor could further negatively impact our results in future periods.

Edgar Filing: CYBEROPTICS CORP - Form 10-Q

We enter into foreign exchange forward contracts to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions associated with our subsidiaries in the United Kingdom and Singapore. These transactions are designated as cash flow hedges. The effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings. The maximum length of time over which we hedge our exposure to the variability in future cash flows is 12 months and, accordingly, at June 30, 2011, all of our open foreign exchange forward contracts had maturities of one year or less. The dollar equivalent gross notional amount of our foreign exchange forward contracts designated as cash flow hedges at June 30, 2011 was approximately \$9.2 million.

Recent Accounting Developments

In December 2010, the Financial Accounting Standards Board (FASB) issued amendments to the guidance on goodwill impairment testing. The amendments modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In making that determination, an entity should consider whether there are any adverse qualitative factors indicating that impairment may exist. The amendments were effective January 1, 2011 and had no impact on our consolidated financial position, results of operations or cash flows.

In January 2010, the FASB issued additional disclosure requirements for fair value measurements which we included in our interim and annual financial statements in 2010. Certain disclosure requirements relating to fair value measurements using significant unobservable inputs (Level 3) were deferred until January 1, 2011. These new requirements did not have any impact on our consolidated financial positions, results of operations or cash flows as they relate only to additional disclosures.

In May 2011, the FASB issued amended guidance and disclosure requirements for fair value measurements. These amendments are not expected to have a material impact to the consolidated financial results. Additional disclosure requirements include information about valuation techniques and unobservable inputs used in Level 3 measurements and a narrative description about Level 3 measurement sensitivity to changes in unobservable inputs. These changes will be effective January 1, 2012 on a prospective basis. Early application is not permitted.

In June 2011, the FASB issued amended disclosure requirements for the presentation of comprehensive income. The amended guidance eliminates the option to present components of other comprehensive income (OCI) as part of the statement of changes in equity. Under the amended guidance, all changes in OCI are to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive financial statements. The changes are effective January 1, 2012. Early application is permitted. There will be no impact to the consolidated financial results as the amendments relate only to changes in financial statement presentation.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4 CONTROLS AND PROCEDURES

a. Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

b. During the quarter ended June 30, 2011, there has been no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010, which could materially affect our business, financial condition or future results.

ITEM 6 EXHIBITS

- 31.1: Certification of Chief Executive Officer pursuant to Rule 15d-14(a)(17 CFR 240.15d-14(a)) and Section 302 of the Sarbanes Oxley Act of 2002
- 31.2: Certification of Chief Financial Officer pursuant to Rule 15d-14(a)(17 CFR 240.15d-14(a)) and Section 302 of the Sarbanes Oxley Act of 2002
- 32: Certification of Chief Executive Officer and Chief Financial Officer Pursuant to Section 906 of the Sarbanes Oxley Act of 2002
- 101: Financial statements formatted in Extensible Business Reporting Language: (i) the Condensed Consolidated Balance Sheets, (ii) the Condensed Consolidated Statements of Operations, (iii) the Condensed Consolidated Statements of Cash Flows and (iv) the Notes to the Interim Condensed Consolidated Financial Statements.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
