BALTEK CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION

The information included in the accompanying interim financial statements is unaudited. In the opinion of management, all adjustments, consisting of normal recurring accruals necessary for a fair presentation of the results of operations, financial position and cash flows for the interim periods presented, have been reflected herein. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the entire year. The statements should be read in conjunction with the accounting policies and notes to consolidated financial statements included in the Company's 2000 Annual Report on Form 10-K.

2. INVENTORIES

Inventories are summarized as follows (amounts in thousands):

	June 30, 2001	December 31, 2000
Raw materials	\$ 5,883	\$ 5,314
Work-in-process	3,668	3,273
Finished goods	9,914	11,834
	-----	-----
	\$ 19,465	\$ 20,421
	=====	=====

3. NOTES PAYABLE

As of June 30, 2001 and March 31, 2001, the Company was in violation of one of the financial covenants contained in its domestic loan agreement, but was and continues to be current with all of its scheduled payments required by the loan agreement. In August 2001, the Company received a waiver from the bank for the first and second quarters of 2001. At the same time, the bank amended the covenant requirement for the third quarter of 2001. The Company was in compliance with all other financial and non-financial covenants as of June 30, 2001.

4. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

Effective January 1, 2001, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 137, Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of FASB Statement No. 133, and SFAS No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities - an amendment of FASB Statement No. 133 (collectively "SFAS 133"). SFAS 133 requires that an entity recognize all derivatives as either assets or liabilities measured at fair value and establishes criteria for designation and effectiveness of hedging relationships. For derivatives designated as fair

Edgar Filing: BALTEK CORP - Form 10-Q

value hedges, the changes in the fair value of both the derivative instrument and the hedged item are recorded in earnings. For derivatives designated as cash flow hedges, the effective portions of changes in fair value of the derivative are reported in other comprehensive income ("OCI") and are subsequently reclassified into earnings when the hedged item affects earnings. Changes in fair value of derivative instruments not designated as hedging instruments and ineffective portions of hedges are recognized in earnings in

- 4 -

the current period. Adoption of the new accounting standards resulted in a change to current assets and liabilities of \$35,000 and \$51,000, respectively, and a one time cumulative after-tax reduction in OCI of approximately \$16,000.

The Company is exposed to fluctuations in foreign currency exchange rates, interest rates and raw material prices. To manage certain of these exposures, the Company uses derivative instruments including interest rate swaps and forward contracts. Derivative instruments used by the Company are considered risk management tools and are not used for trading or speculative purposes.

All relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions are formally documented. The Company formally assesses the effectiveness of its hedging relationships both at the hedge inception and on at least a quarterly basis in accordance with its risk management policy.

The Company purchases certain raw materials in currencies other than the U.S. dollar. To reduce currency exchange risk on these firm purchase commitments the Company enters into foreign currency forward contracts. The forward contracts are designated as fair value hedges of the firm commitments and do not extend beyond 24 months. The gains and losses on those derivative instruments are reported in cost of products sold and largely offset gains and losses on the purchase commitments. The amount of ineffectiveness recorded in net income for the three and six months ended June 30, 2001 was not material. Currently, the Company does not hold any derivative contracts that hedge its net investments in foreign operations but may consider such strategies in the future.

The Company utilizes interest rate swaps to hedge the Company's exposure to movement in rates. At June 30, 2001, the Company had a one year and a two year interest rate swap that converted \$2 million and \$4 million of outstanding borrowings from a floating to a fixed rate. The swaps resulted in fixed rates of 6.0% and 6.50%. The swaps expire on June 1, 2002 and 2003. The interest rate swaps are designated as cash flow hedges of the variability of the forecasted interest payments. The effective portion of the change in fair value of the interest rate swaps was recorded in OCI. The ineffectiveness relating to the hedges was not material for the three and six months ended June 30, 2001. Amounts accumulated in OCI are reclassified into earnings when interest expense on the borrowings is recorded. Of the amount recorded in accumulated OCI \$45,000 is expected to be reclassified to interest expense during the next 12 months.

5. COMPREHENSIVE INCOME

Total comprehensive income (loss) for the six months ended June 30, 2001 was as follows (amounts in thousands):

Edgar Filing: BALTEK CORP - Form 10-Q

Net income	\$ 564

Balance, January 1, 2001	\$ 16
Change in fair value of interest rate swaps	29

Balance, June 30, 2001	\$ 45
	=====

6. SEGMENT INFORMATION

The Company and its subsidiaries operate in two segments, as a manufacturer and supplier of core materials to various composite industries, and in the seafood business as a shrimp producer and seafood importer. The segments are managed and reported separately because of the difference in products they produce and markets they serve. The Company evaluates performance based on operating income, i.e. results of operations before interest, income taxes and foreign exchange gains and losses. There are no intersegment sales.

Information about the Company's operations by segment for the three and six months ended June 30, 2001 and 2000 is as follows (amounts in thousands):

	Three Months Ended June 30,		Six Mo Ended J
	2001	2000	2001
Net Sales to unaffiliated customers			
Core materials segment	\$ 15,400	\$ 16,385	\$ 30,227

	-----	-----	-----
Total operating income	\$ 745	\$ 1,524	\$ 1,553
	=====	=====	=====

7. NEW ACCOUNTING STANDARDS

In July 2001, the Financial Accounting Standards Board ("FASB"), issued Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations" and No. 142, "Goodwill and Other Intangible Assets". Statement No. 141 requires that all business combinations initiated after June 30, 2001, be accounted for using the purchase method of accounting. In addition, it further clarifies the criteria for recognition of intangible assets separately from goodwill. Statement No. 142 establishes new standards for goodwill acquired in a business combination and eliminates the amortization of goodwill over its estimated useful life. Rather, goodwill will now be tested for impairment annually, or more frequently if circumstances indicate potential impairment, by applying a fair value based test. The Company expects to adopt this statement during the first quarter of fiscal 2002. Management does not believe that the adoption of these standards will have a material impact on the Company's financial position or results of operations.

- 6 -

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Liquidity and Capital Resources

The primary sources of liquidity historically have been and are expected to continue to be cash flow generated from operations and available borrowings under short-term lines of credit. The Company increased its borrowing capacity under its domestic line of credit to \$16.5 million in January 2001. The Company also continues to have lines of credit in Ecuador and Europe totaling approximately \$4.7 million. Borrowing requirements increased in 2001 as a result of the Company's working capital requirements and lower cash generated from operations. Capital expenditures are expected to be funded by a combination of cash generated from operations and outside financing, if necessary.

The Company's financial position remains strong. At June 30, 2001, the Company had working capital of \$16.0 million compared to \$16.6 million at December 31, 2000. The Company believes cash flows from operations and funds available under its existing domestic and foreign credit facilities will be adequate to meet the Company's needs during 2001.

Results of Operations for the Three and Six Months Ended June 30, 2001 and 2000

Total sales decreased 10 % and 6 %, respectively, during the three and six-month periods ended June 30, 2001 as compared to the same period in 2000.

Core material sales were \$15,400,000 and \$16,385,000 for the three months ended June 30, 2001 and 2000, respectively, and \$30,227,000 and \$32,445,000 for the six months ended June 30, 2001 and 2000, respectively. Domestic sales were lower in the three and six-month periods ended June 30, 2001 compared to the same periods in 2000. This reduction was partly offset by a strong increase in sales in Europe. The reduction in domestic sales was primarily due to lower demand from the Company's largest end user group, the boating industry. It is now expected that retail sales in the domestic marine market may be down as much as

Edgar Filing: BALTEK CORP - Form 10-Q

15 percent to 20 percent for the year. The Company therefore expects domestic sales to continue to be lower than 2000 levels for the remainder of the year. The increase in Europe sales resulted from higher shipments to manufacturers of windmill blades. On a worldwide basis volume (measured by boardfeet shipped) of the Company's balsa products was approximately the same in 2001 compared to 2000. This was partially offset by the impact of a stronger U.S. dollar relative to certain foreign currencies, particularly the Euro.

Many of the Company's end user markets, including boating, are highly cyclical. Demand within those industries is dependent upon, among other factors, discretionary income, inflation, interest rates and consumer confidence. Fluctuating interest rates and other changes in economic conditions make it difficult to forecast short or long range trends.

Seafood sales were \$6,088,000 and \$7,526,000 for the three months ended June 30, 2001 and 2000, respectively, and \$12,412,000 and \$12,691,000 for the six months ended June 30, 2001 and 2000, respectively. Sales of seafood products from the Company's import business were lower in the second quarter of 2001 compared to the second quarter of 2000 because of lower demand at the retail and consumer level for seafood products. Sales of shrimp in the first six months of 2001 were lower than the comparable period in 2000 and continue to be significantly below historical levels.

The overall gross margin as a percentage of sales for the six months ended June 30 decreased in 2001 as compared to 2000. The typical margin in the seafood import business is lower than the Company's historical margins realized as a core materials producer/distributor and shrimp producer. The overall margin is therefore determined not only by the margins in each segment but by the mix of seafood and

- 7 -

materials. The margin for the Company's core products remained approximately the same in 2001 as compared to last year. The margins from seafood sales decreased in the six months ended June 30, 2001 as compared to the period ended June 30, 2000 because of the continuing effects of the White Spot virus and a decline in commodity selling prices for many seafood products. The White Spot virus continued to affect the shrimp farms negatively, resulting in significantly lower production and revenues compared to historical levels. The Company is taking all possible steps to mitigate the effect of this disease on its farms, but no definitive determination can be made as to its longevity and effect on shrimp prices in the marketplace. A downturn in the entire seafood industry during the first quarter of 2001 negatively affected prices for many seafood products. This reduced margins in the import business during the first quarter of 2001. Prices in the industry began to stabilize during the second quarter and margins consequently improved.

Selling, general and administrative expenses as a percentage of sales increased in the six months of 2001 as compared to 2000. Certain of the expenses contained in SG&A are fixed in nature, and combined with lower materials segment revenues, caused the increase in the SG&A percentage. The seafood import business has a lower percentage of SG&A expenses to revenues as compared to the Company's materials segment. The overall percentage is therefore influenced by the amount of SG&A in each segment and the relationship of each segment's revenues and SG&A to aggregate amounts.

Sales and expenses were affected in all periods by the different exchange rates applied in remeasuring the books of accounts of the Company's foreign subsidiaries.

Edgar Filing: BALTEK CORP - Form 10-Q

Interest expense increased in the first six months of 2001 as compared to 2000. The average borrowings were higher in 2001 compared to 2000. The interest rates on U.S. dollar loans in Ecuador were lower and rates in the U.S. were slightly lower in 2001 compared to 2000. In both periods interest rates on dollar denominated loans in Ecuador were significantly higher than rates available to the Company in the U.S. The level of borrowing in all periods is related to the Company's working capital needs and cash flows generated from operations.

The Company had a foreign exchange loss of \$159,000 and \$234,000 for the six-month periods ended June 30, 2001 and 2000, respectively. Translation gains and losses are mainly caused by the relationship of the U.S. dollar to the foreign currencies in the countries where the Company operates, and arise when remeasuring foreign currency balance sheets into U.S. dollars. The Company utilizes foreign exchange contracts to hedge certain inventory purchases. The Company does not enter into foreign currency transactions for speculative purposes. Management is unable to forecast the impact of translation gains or losses on future periods due to the unpredictability in the fluctuation of foreign exchange.

The provision for income taxes was at the rate of 37% and 32% of pre-tax earnings for the three and six months ended June 30, 2001 and 2000, respectively.

Derivative Financial Instruments and Hedging Activities

Effective January 1, 2001, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 137, Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of FASB Statement No. 133, and SFAS No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities - an amendment of FASB Statement No. 133 (collectively "SFAS 133"). SFAS 133 requires that an entity recognize all derivatives as either assets or liabilities measured at fair value and establishes criteria for designation and effectiveness of hedging relationships. For derivatives designated as fair value hedges, the changes in the fair value of both the derivative instrument and the hedged item are recorded in earnings. For derivatives designated as cash flow hedges, the effective portions of changes in fair value of the derivative are reported in other comprehensive income ("OCI") and are subsequently reclassified into earnings when the hedged item affects earnings. Changes in fair value of derivative instruments not designated as hedging instruments and ineffective portions of hedges are recognized in earnings in the current period. Adoption of the new accounting standards resulted in a

- 8 -

change to current assets and liabilities of \$35,000 and \$51,000, respectively, and a one time cumulative after-tax reduction in OCI of approximately \$16,000.

The Company is exposed to fluctuations in foreign currency exchange rates, interest rates and raw material prices. To manage certain of these exposures, the Company uses derivative instruments including interest rate swaps and forward contracts. Derivative instruments used by the Company are considered risk management tools and are not used for trading or speculative purposes.

All relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions are formally documented. The Company formally assesses the effectiveness of its hedging relationships both at the hedge inception and on at

Edgar Filing: BALTEK CORP - Form 10-Q

least a quarterly basis in accordance with its risk management policy.

The company purchases certain raw materials in currencies other than the U.S. dollar. The Company enters into foreign currency forward contracts to reduce currency exchange risk on these firm purchase commitments. The forward contracts are designated as fair value hedges of these firm commitments and do not extend beyond 24 months. The gains and losses on those derivative instruments are reported in cost of products sold and largely offset gains and losses on the purchase commitments. The amount of ineffectiveness recorded in net income for the three and six months ended June 30, 2001 was not material. Currently, the Company does not hold any derivative contracts that hedge its net investments in foreign operations but may consider such strategies in the future.

The Company utilizes interest rate swaps to hedge the Company's exposure to movement in rates. At June 30, 2001, the Company had a one year and a two year interest rate swap that converted \$2 million and \$4 million of outstanding borrowings from a floating to a fixed rate. The swaps resulted in fixed rates of 6.0% and 6.50%. The swaps expire on June 1, 2002 and 2003. The interest rate swaps are designated as cash flow hedges of the variability of the forecasted interest payments. The effective portion of the change in fair value of the interest rate swaps was recorded in OCI. The ineffectiveness relating to the hedges was not material for the three and six months ended June 30, 2001. Amounts accumulated in OCI are reclassified into earnings when interest expense on the borrowings is recorded. Of the amount recorded in accumulated OCI \$45,000 is expected to be reclassified to interest expense during the next 12 months.

NEW ACCOUNTING STANDARDS

In July 2001, the Financial Accounting Standards Board ("FASB"), issued Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations" and No. 142, "Goodwill and Other Intangible Assets". Statement No. 141 requires that all business combinations initiated after June 30, 2001, be accounted for using the purchase method of accounting. In addition, it further clarifies the criteria for recognition of intangible assets separately from goodwill. Statement No. 142 establishes new standards for goodwill acquired in a business combination and eliminates the amortization of goodwill over its estimated useful life. Rather, goodwill will now be tested for impairment annually, or more frequently if circumstances indicate potential impairment, by applying a fair value based test. The Company expects to adopt this statement during the first quarter of fiscal 2002. Management does not believe that the adoption of these standards will have a material impact on the Company's financial position or results of operations.

* * * * *

Forward Looking Statements - Cautionary Factors

The foregoing discussion and analysis contains forward-looking statements regarding the Company. Because such statements include risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially include, but are not limited to, economic conditions in the United States, Europe and Ecuador that affect relative interest rates, foreign exchange rates and other costs and prices related to the Company's business.

- 9 -

PART II. OTHER INFORMATION

Edgar Filing: BALTEK CORP - Form 10-Q

Item 4. Submission of Matters to a vote of Security Holders

On May 24, 2001, the Company conducted its annual meeting of shareholders. Of the 2,523,261 shares of the Company's common stock entitled to vote at the meeting, 2,304,787 shares were present at the meeting in person or by proxy.

The seven people designated by the Company's board of directors as nominees for director were elected, with voting as follows:

Nominee -----	Votes For -----	Votes Withheld -----
Jacques Kohn	2,286,441	18,346
Jean Kohn	2,286,441	18,346
Henri-Armand Kohn	2,286,441	18,346
Margot W. Kohn	2,286,441	18,346
William F. Nicklin	2,286,441	18,346
Bernard J. Wald	2,286,441	18,346
Benson J. Zeikowitz	2,286,441	18,346

Stockholders voted to ratify the appointment of Deloitte & Touche LLP as the independent auditors for the Company for the year ending December 31, 2001. There were 2,298,733 shares voted in favor of ratification, 6,054 votes against and no abstentions.

Item 6. Exhibits and Reports on Form 8-K

(A) Exhibits:

11. An exhibit showing the computation of per-share earnings is omitted because the computation can be clearly determined from the material contained in this Quarterly Report on Form 10-Q.

(B) Reports on Form 8-K:

No report has been filed during the quarter ended June 30, 2001.
