On October 7, 2008, the Alabama Public Service Commission (the APSC) voted to approve an increase in Alabama Power s Rate Energy Cost Recovery (ECR) factor to 3.983 cents per kilowatt hour (KWH) for a 24-month period beginning with October 9, 2008 billings. Thereafter, the Rate ECR factor shall be 5.910 cents per KWH, absent a contrary order by the APSC. Rate ECR revenues, as recorded on the financial statements, are adjusted for the difference in actual recoverable costs and amounts billed in current regulated rates. Accordingly, this approved increase in the billing factor will have no significant effect on revenues or net income, but will increase annual cash flow.

The APSC also voted to approve a corrective rate package effective in January 2009 providing for various adjustments to customer charges under Alabama Power's rate structure which are expected to generate additional annual revenues of \$168 million. Alabama Power expects that these additional revenues will preclude the need for a rate adjustment under the Rate Stabilization and Equalization Plan (Rate RSE) in 2009. At the October 7, 2008 meeting of the APSC, Alabama Power agreed to a moratorium on any increase in 2009 under Rate RSE.

Alabama Power also agreed to defer collection during 2009 of any increase in rates under the portion of Rate Certificated New Plant which permits recovery of costs associated with environmental laws and regulations.
