MACC PRIVATE EQUITIES INC.

Notes to Unaudited Condensed Consolidated Financial Statements

(1) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of MACC Private Equities Inc. (Equities) and its wholly owned subsidiary MorAmerica Capital Corporation (MACC) which have been prepared in accordance with accounting principals generally accepted in the United States of America for investment companies. All material intercompany accounts and transactions have been eliminated in consolidation.

The financial statements included herein have been prepared in accordance with accounting principals generally accepted in the United States of America for interim financial information and instructions to Form 10-Q and Article 6 of Regulation S-X. The financial statements should be read in conjunction with the consolidated financial statements and notes thereto of MACC Private Equities Inc. and its Subsidiary as of and for the year ended September 30, 2005. The information reflects all adjustments consisting of normal recurring adjustments which are, in the opinion of management, necessary for a fair presentation of the results of operations for the interim periods. The results of the interim period reported are not necessarily indicative of results to be expected for the year. The balance sheet information as of September 30, 2005 has been derived from the audited balance sheet as of that date.

(2) Critical Accounting Policy

Investments in securities traded on a national securities exchange (or reported on the NASDAQ national market) are stated at the bid price on the final day of the period. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by the Board of Directors. Among the factors considered in determining the fair value of investments are the cost of the investment; developments, including recent financing transactions, since the acquisition of the investment; financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates for similar debt securities; and other factors generally pertinent to the valuation of investments. However, because of the inherent uncertainty of valuation, those estimated values may

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

In the valuation process, MACC uses financial information received monthly, quarterly, and annually from its portfolio companies which includes both audited and unaudited financial statements. This information is used to determine financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses. Under the provisions of SOP 90-7, the fair value of loans and investments in portfolio securities on February 15, 1995, the fresh-start date, is considered the cost basis for financial statement purposes.

Closing market price	\$ 2.56 =====	3.15 =====
	For the three months ended December 31, 2005 -----	For the three months ended December 31, 2004 -----
Total return		
Net asset value basis	(7.70)%	1.53
Market price basis	(0.04)%	(8.70)

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

Net asset value, end of period <i>(in thousands)</i>	\$ 12,612	10,902
Ratio to average net assets:		
Investment (expense) income, net	(1.62)%	(3.13)
Operating expense	4.07%	9.84

The ratios of investment (expense) income, net to average net assets, of operating and income tax expenses to average net assets and total return are calculated for common stockholders as a class. Total return, which reflects the annual change in net assets, was calculated using the change in net assets between the beginning of the current fiscal year and end of the current year period. An individual common stockholders' return may vary from these returns.

Item 2. **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This section contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "1995 Act"). Such statements are made in good faith by MACC pursuant to the safe-harbor provisions of the 1995 Act, and are identified as including terms such as "may," "will," "should," "expects," "anticipates," "estimates," "plans," or similar language. In connection with these safe-harbor provisions, MACC has identified in its Annual Report to Shareholders for the fiscal year ended September 30, 2005, important factors that could cause actual results to differ materially from those contained in any forward-looking statement made by or on behalf of MACC, including, without limitation, the high risk nature of MACC's portfolio investments, the effects of general economic conditions on MACC's portfolio companies, the effects of recent or future losses on the ability of MorAmerica Capital to comply with applicable regulations of the Small Business Administration and MorAmerica Capital's ability to obtain future funding, changes in prevailing market interest rates, and contractions in the markets for corporate acquisitions and initial public offerings. MACC further cautions that such factors are not exhaustive or exclusive. MACC does not undertake to update any forward-looking statement which may be made from time to time by or on behalf of MACC.

Results of Operations

MACC's investment income includes income from interest, dividends and fees. Investment expense, net represents total investment income minus net operating

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

expenses. The main objective of portfolio company investments is to achieve capital appreciation and realized gains in the portfolio. These gains and losses are not included in investment expense, net. However, another one of MACC's on-going goals is to reduce net investment expense. MACC is currently seeking to achieve this goal by reducing its operating expenses. MACC also earns interest on short-term investments of cash.

First Quarter Ended December 31, 2005 Compared to First Quarter Ended December 31, 2004

	For the three months ended December 31,		
	2005	2004	Change

	5.54	4.61	
Net asset value: Beginning of period			
	\$ 5.12	4.68	
End of period			

Total Investment Income

During the current year first quarter, total investment income was \$331,684, a decrease of \$367,766, or 53%, from total investment income of \$699,450 for the prior year first quarter. In the current year first quarter as compared to the prior year first quarter, interest income decreased \$190,434, or 38%, dividend income decreased \$168,632, or 87%, processing fees decreased \$7,700, or 100%, and other income decreased \$1,000, or 100%. The decrease in interest income is the net result of repayments of principal on debt portfolio securities issued by seven portfolio companies, a decrease in interest income on debt portfolio securities issued by two portfolio companies which were placed on non-accrual of interest status after the end of the prior year first quarter, and a lump sum interest payment by one portfolio company in the prior year first quarter. In the current year first quarter, MACC received dividends on two existing portfolio investments, as compared to dividend income received in the

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

prior year first quarter from three existing portfolio companies, one of which was a distribution from a limited liability company. The dividends in the prior year first quarter were also larger than in the current year first quarter. Processing fees decreased due to no fees received in the current year first quarter compared to fees received on one follow-on investment made in the prior year first quarter.

Net Operating Expenses

Net operating expenses for the first quarter of the current year were \$551,723, a decrease of \$473,189, or 46%, as compared to net operating expenses for the prior year first quarter of \$1,024,912. Interest expense decreased \$202,009, or 39%, in the current year first quarter due to the repayment of borrowings from the Small Business Administration in the amount of \$9,000,000 in the prior fiscal year. Management fees decreased \$127,000, or 52%, in the current year first quarter due to the decrease in capital under management and a decrease in the management fee as a percentage of capital under management from 2.50% to 1.50%, which became effective April 30, 2005. Professional fees decreased \$134,862, or 76%, in the current year first quarter primarily due to the legal expenses incurred in the prior year first quarter from the arbitration proceedings related to the sale of a former portfolio company which has been settled and legal expenses incurred in pursuing a rights offering. Other expenses decreased \$9,318, or 11%, in the current year first quarter as compared to the prior year first quarter. The decrease in other expenses is the net result of decreases in director's fees and board travel expense offset by the increase in administrative expenses mainly due to the timing of expenses in the prior year first quarter due to the postponement of the 2005 Annual Shareholders Meeting.

Investment Expense, Net

For the current year first quarter, MACC recorded investment expense, net of \$220,039, as compared to investment expense, net of \$325,462 during the prior year first quarter. The decrease in investment expense, net is the result of the decrease in operating expenses described above.

Net Realized (Loss) Gain on Investments

During the current year first quarter, MACC recorded net realized gain on investments of \$213,333, as compared with net realized loss on investments of \$2,467,409 during the prior

year first quarter. In the current year first quarter, MACC realized a gain of \$213,333 from the sale of warrant shares in one portfolio company. Management does not attempt to maintain a comparable level of realized gains quarter to quarter but instead attempts to maximize total investment portfolio appreciation through realizing gains in the disposition of securities. MACC's investment advisor earns an incentive fee which is calculated as a percentage of the excess of MACC's realized gains in a particular period, over the sum of net realized losses and unrealized depreciation during the same period. As a result, the timing of realized gains, realized losses and unrealized depreciation can have an effect on the amount of the incentive fee payable to the investment advisor.

Net Change in Unrealized Appreciation/Depreciation of Investments and Other Assets

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

MACC recorded net change in unrealized appreciation/depreciation on investments of (\$1,016,410) during the current year first quarter, as compared to \$2,981,776 during the prior year first quarter. This net change in unrealized appreciation/depreciation on investments of (\$1,016,410) is the net effect of increases in fair value of three portfolio companies totaling \$627,442, decreases in fair value of eight portfolio companies of \$1,430,519 and the reversal of appreciation of \$213,333 in one portfolio investment from the sale of warrant shares resulting in a realized gain.

Net change in unrealized appreciation/depreciation on investments represents the change for the period in the unrealized appreciation, net of unrealized depreciation, on MACC's total investment portfolio. When MACC increases the fair value of a portfolio investment above its cost, the unrealized appreciation for the portfolio as a whole increases, and when MACC decreases the fair value of a portfolio investment below its cost, unrealized depreciation for the portfolio as a whole increases. When MACC sells an appreciated portfolio investment for a gain, unrealized appreciation for the portfolio as a whole decreases as the gain is realized. Similarly, when MACC sells or writes off a depreciated portfolio investment for a loss, unrealized depreciation for the portfolio as a whole decreases as the loss is realized.

Net change in unrealized loss on other assets of \$29,521 during the current year first quarter was recorded with respect to other securities which are classified as other assets, as compared to a net change in unrealized loss on other assets of \$24,659 during the prior year first quarter.

Net Change in Net Assets from Operations

MACC experienced a decrease of \$1,052,637 in net assets at the end of the first quarter of fiscal year 2006, and the resulting net asset value per share was \$5.12 as of December 31, 2005, as compared to \$5.54 as of September 30, 2005.

MACC has five portfolio investments valued at cost, has recorded unrealized appreciation on nine portfolio investments, and has recorded unrealized depreciation on fourteen portfolio investments. The decrease in net assets recorded during the current year first quarter was primarily the result of decreases in the fair value of eight portfolio investments. Valuations from quarter to quarter are affected by a portfolio company's short term performance that changes unrealized depreciation and unrealized appreciation in the

quarter. This may or may not be indicative of the long term performance of the portfolio company.

MACC is not currently making investments in new portfolio companies, and is instead using any excess cash generated from portfolio investment liquidity events to prepay MorAmerica Capital's outstanding SBA guaranteed debentures when appropriate. MACC recorded significant reductions in its interest expense and management fees in the first quarter of the current fiscal year as a result of these prepayments. These reductions contributed to a significant improvement in MACC's investment expense, net for the current year first quarter, as compared to the prior year first quarter.

While the economy continues to perform well, it is not even in all sectors.

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

Portfolio companies have had to deal with high energy costs, high raw material costs, and in some cases flat or decreased sales. The recent hurricanes, gas prices, world tensions, terrorism, and the continuing conflict in Iraq increase the uncertainty of future performance. Management believes MACC's investment portfolio may benefit from an anticipated robust market for corporate acquisitions and investments. The overall activity in the market for corporate acquisitions is strong and MACC expects to exit several investments in 2006.

Financial Condition, Liquidity and Capital Resources

To date, MACC has relied upon several sources to fund its investment activities, including MACC's cash and money market accounts and the Small Business Investment Company ("SBIC") leverage program operated by the Small Business Administration (the "SBA").

As an SBIC, MorAmerica Capital is required to comply with the regulations of the SBA (the "SBA Regulations"). These regulations include the capital impairment rules, as defined by Regulation 107.1830 of the SBA Regulations. As of December 31, 2005, the capital of MorAmerica Capital was impaired less than the 55% maximum impairment percentage permitted under SBA Regulations. MorAmerica Capital's impairment percentage was 43% at December 31, 2005. MorAmerica Capital is also currently limited by the SBA Regulations in the amount of distributions it may make to MACC.

As of December 31, 2005, MACC's cash and cash equivalents totaled \$4,667,849. MACC has a commitment for an additional \$6,500,000 in SBA guaranteed debentures, which expires on September 30, 2007. MorAmerica Capital and three other SBICs have entered into an agreement with the SBA in connection with an arbitration settlement. As a result of the terms of this agreement, MACC does not believe that MorAmerica Capital will have access to the SBIC capital program in fiscal year 2006. Subject to the other risks and uncertainties described in this quarterly report, MACC believes that its existing cash and money market accounts and other anticipated cash flows will provide adequate funds for MACC's anticipated cash requirements during fiscal year 2006, including follow-on portfolio investment activities, interest payments on outstanding debentures payable, and administrative expenses. In light of the agreement with SBA, at the present time MACC is not making new investments, is prudently selling portfolio companies and is using the resulting proceeds to reduce debt by prepaying SBA guaranteed debentures when appropriate.

16

Debentures payable are composed of \$16,790,000 in principal amount of SBA-guaranteed debentures issued by MACC's subsidiary, MorAmerica Capital, which mature as follows: \$3,500,000 in fiscal year 2010, \$5,835,000 in fiscal year 2011, and \$7,455,000 in fiscal year 2012. MACC anticipates that MorAmerica Capital will not be able to refinance these debentures through the SBIC capital program when they mature. The following table shows our significant contractual obligations for the repayment of debt and other contractual obligations as of December 31, 2005:

Payments due by period

Contractual Obligations

Less than

More

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

	Total -----	1 Year -----	1-3 Years -----	3-5 Years -----	5 Ye -----
SBA Debentures	\$16,790,000	---	---	3,500,000	13,29
Incentive Fees Payable(1)\$	566,426	---	---	---	56

(1) Accrued incentive fees payable to the investment advisor are subordinated to all amounts payable by MorAmerica Capital to the SBA, including outstanding SBA-guaranteed debentures, and any losses the SBA may incur in connection with the settlement of arbitration proceedings occurring in late 2004.

MACC currently anticipates that it will rely primarily on its current cash and cash equivalents and its cash flows from operations to fund its cash requirements during fiscal year 2006. Although management believes these sources will provide sufficient funds for MACC to meet its fiscal year 2006 investment level objective and other anticipated cash requirements, there can be no assurances that MACC's cash flows from operations will be as projected, or that MACC's cash requirements will be as projected.

Portfolio Activity

MACC's primary business is investing in and lending to businesses through investments in subordinated debt (generally with detachable equity warrants), preferred stock and common stock. MACC, however, is not currently making new investments. The total portfolio value of investments in publicly and non-publicly traded securities was \$24,552,369 at December 31, 2005 and \$25,845,548 at September 30, 2005. During the three months ended December 31, 2005, MACC invested \$103,370 in follow-on investments in four existing portfolio companies. Management views investment objectives for any given year as secondary in importance to MACC's overriding concern of investing in only those portfolio companies which satisfy MACC's investment criteria. As noted above, MACC does not expect to make any investments in new portfolio companies during fiscal year 2006, but may invest up to \$500,000 in follow-on investments in existing portfolio companies, subject to further adjustment based on current economic and operating conditions.

MACC frequently co-invests with other funds managed by MACC's investment advisor. When it makes any co-investment with these related funds, MACC follows certain procedures consistent with orders of the Securities and Exchange Commission for related

party co-investments to reduce or eliminate conflict of interest issues. All of the \$103,370 invested during the current year first quarter represented co-investments with funds managed by MACC's investment advisor.

Critical Accounting Policy

Investments in securities traded on a national securities exchange (or reported on the NASDAQ national market) are stated at the bid price on the final day of the period. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by MACC's Board of Directors. Among the factors considered in determining the fair value of

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

investments are the cost of the investment; developments, including recent financing transactions, since the acquisition of the investment; the financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates on similar debt securities; and other factors generally pertinent to the valuation of investments. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

In the valuation process, MorAmerica Capital uses financial information received monthly, quarterly, and annually from its portfolio companies which includes both audited and unaudited financial statements. This information is used to determine financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses. Under the provisions of SOP 90-7, the fair value of loans and investments in portfolio securities on February 15, 1995, the fresh-start date, is considered the cost basis for financial statement purposes.

Determination of Net Asset Value

The net asset value per share of MACC's outstanding common stock is determined quarterly, as soon as practicable after and as of the end of each calendar quarter, by dividing the value of total assets minus total liabilities by the total number of shares outstanding at the date as of which the determination is made.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

MACC is subject to market risk from changes in market interest rates that affect the fair value of MorAmerica Capital's debentures payable determined in accordance with Statement of Financial Accounting Standards No. 107, *Disclosures About Fair Value of Financial Instruments*. The estimated fair value of MorAmerica Capital's outstanding debentures payable at December 31, 2005, was \$18,037,000, with a cost of \$16,790,000. Fair value of MorAmerica Capital's outstanding debentures payable is calculated by discounting cash flows through estimated maturity using a SBA borrowing rate currently available (5.8% at December 31, 2005) for debt of similar original maturity. None of MorAmerica Capital's outstanding debentures payable are publicly traded. Market risk is estimated as the potential

18

increase in fair value resulting from a hypothetical 0.5% decrease in interest rates. Actual results may differ.

December 31, 2005

Fair Value of Debentures Payable \$ 18,037,000

Amount Above Cost	\$ 1,247,000
Additional Market Risk	\$ 391,000

Item 4. Controls and Procedures

As of the end of the period covered by this report, in accordance with Item 307 of Regulation S-K promulgated under the Securities Act of 1933, as amended, the Chief Executive Officer and Chief Financial Officer of MACC (the "Certifying Officers") have conducted evaluations of MACC's disclosure controls and procedures. As defined under Sections 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the term "disclosure controls and procedures" means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. The Certifying Officers have reviewed MACC's disclosure controls and procedures and have concluded that those disclosure controls and procedures are effective as of the date of this Quarterly Report on Form 10-Q. In compliance with Section 302 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. 1350), each of the Certifying Officers executed an Officer's Certification included in this Quarterly Report on Form 10-Q.

As of the date of this Quarterly Report on Form 10-Q, there have not been any significant changes in MACC's internal controls or other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
