Nicholas-Applegate Convertible & Income Funds Letter to Shareholders

April 16, 2008

Dear Shareholder:

We are pleased to provide you with the annual reports of the Nicholas-Applegate Convertible & Income Fund and Nicholas-Applegate Convertible & Income Fund II (collectively, the Funds) for the fiscal year ended February 29, 2008.

The convertible market finished the reporting period with relatively flat returns, falling 0.58%, as measured by the Merrill Lynch All-Convertible Index. The convertible market outperformed the S&P 500 Index, which returned (3.59)% for the period. It trailed the Dow Jones Industrial Average, which advanced 2.23%.

During February 2008, industry-wide developments in the auction-rate preferred markets caused auctions for the Funds' auction-rate preferred shares (ARPS) to fail, as described in Note 5 in the accompanying notes to Financial Statements. At the time this report is being prepared, it is not possible to predict how and when full or partial liquidity will return, if at all, to the closed-end fund ARPS market. Additional information regarding ARPS, failed auctions and potential solutions to address the unprecedented lack of liquidity of the ARPS due to recent failed auctions can be accessed on the Fund's website <http://www.allianzinvestors.com/closedendfunds>.

Please refer to the following pages for more information on the Funds. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds' shareholder servicing agent at (800) 331-1710. You will also find a wide range of information and resources on our Web site, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Funds' investment manager, and Nicholas-Applegate Capital Management LLC, the Funds' sub-adviser, we thank you for investing with us.

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess

Fund Insights

February 29, 2008 (unaudited)

For the 12-months ended February 29, 2008, Nicholas-Applegate Convertible & Income Fund returned (6.33)% on net asset value and (13.63)% on market price.

For the 12-months ended February 29, 2008, Nicholas-Applegate Convertible & Income II Fund returned (7.13)% on net asset value and (12.08)% on market price.

The convertible and high yield markets followed the broad equity market lower in the period as there were no significant catalysts to drive the market higher. Slowing corporate profits, widening credit spreads, recession fears, high oil prices, and continued negative subprime news were responsible for the broad equity market pull-back.

Industry performance was mixed and driven by broad market themes. Financial issuer underperformance was clearly the most severe of any industry in the broad markets. The consumer sector also performed poorly. The best performing industries during the twelve month period were healthcare, utilities and energy. These sectors performed well because of favorable operating performance as well as an expected flight to quality.

The Funds' convertible positions were helped by many industries during the period. Healthcare companies rallied in response to better-than-expected corporate profits and positive outlooks. Consumer staple companies benefited from record commodity prices as well as an investor rotation into more defensive industries. Material companies were higher on impressive quarterly results despite a slowing economy.

Select sectors within the Funds' the convertible portfolio's hindered performance in the period. Despite positive performance for the year, select technology issuers pulled back during the period on fears of slowing earnings growth. Automotive companies moved lower on concerns that weaker-than-expected consumer spending would cause auto sales to fall below expectations in 2008. Retail companies continued their move lower as the challenging economic backdrop weighed on consumer spending.

Remarkably, with all of the financial chaos and headlines, the fundamentals of the majority of issuers in the high yield market remained intact. The default rate for 2007 was a record setting low.

Throughout the continued volatility, relative high yield performance was driven by stringent credit selection. We continued to have bonds tendered for as well as companies, demonstrated improving fundamentals, upgraded.

There were negative high yield contributors during the period. In the auto industry bonds, traded lower across the board. Other negative movers included certain retail-related issuers.

(1) **Past performance is no guarantee of future results.** Total return is calculated by subtracting the value of an investment in the Fund at the beginning of each specified period from the value at the end of the period and dividing the remainder by the value of the investment at the beginning of the period and expressing the result as a percentage. The calculation assumes that all of the Fund's income dividends and capital gain distributions have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of more than one year represents the average annual total return.

Returns are calculated by determining the percentage change in net asset value or market share price (as applicable) with all distributions reinvested. The Fund's performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods; returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares or changes in Fund distributions.

An investment in the Fund involves risk, including the loss of principal. Total return, price, market yield and market net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is typically a one-time public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is equal to the total
