One-to-Four Family Residential Real Estate Lending. As of December 31, 2010, \$393.3 million, or 44.1%, of our total loan portfolio consisted of permanent loans secured by one-to-four family residences.

First Savings Bank is a traditional fixed-rate portfolio lender when it comes to financing residential home loans. In 2010, we originated \$14.6 million in one-to-four family residential loans, most of which had fixed-rates and fixed terms. Most of our residential loan originations during 2010 were in connection with the refinance of an existing loan. At December 31, 2010, \$225.3 million or 56.5% of our one-to-four family residential portfolio consisted of owner occupied loans with \$173.4 million or 43.5% consisting of non-owner occupied loans. In addition, at December 31, 2010 \$359.7 million, or 90.2%, of our one-to-four family residential loan portfolio consisted of fixed-rate loans. Substantially all of our one-to-four family residential loans require both monthly principal and interest payments.

We also originate a limited number of jumbo fixed-rate loans that we retain in our portfolio. Loans originated with balances greater than \$417,000 are generally considered jumbo except those originated in King, Pierce and Snohomish counties where the threshold for purchase by Freddie Mac and Fannie Mae is \$567,500. One-to-four family residential loans classified as jumbo fixed-rate loans totaled \$87.2 million and consisted of 123 loans at December 31, 2010. The loans in this portfolio have been priced at rates of 0.25% to 1.00% higher than the standard rates quoted on conventional loans. As of December 31, 2010, \$3.0 million of our jumbo loan portfolio was over 90 days past due and there were two loans totaling \$1.2 million that were past due over 60 days but less than 90 days. The remaining loans in the jumbo loan portfolio were performing in accordance with their loan repayment terms. Charged-off, one-to-four family residential loans totaled \$24.6 million for the year ended December 31, 2010 of which \$4.4 million were jumbo loans. For the years ended December 31, 2009 and 2008, charged-off one-to-four family residential loans totaled \$6.0 million, of which \$1.9 million were jumbo loans, and none, respectively.

Our fixed-rate, one-to-four family residential loans are normally originated with 15 to 30 year terms, although such loans typically remain outstanding for substantially shorter periods, particularly in a declining interest rate environment. In addition, substantially all one-to-four family residential loans in our loan portfolio contain due-on-sale clauses providing that we may declare the unpaid amount due and payable upon the sale of the property securing the loan. Typically, we enforce these due-on-sale clauses to the extent permitted by law and as a standard course of business. The average loan maturity is a function of, among other factors, the level of purchase and sale activity in the real estate market, prevailing interest rates and the interest rates payable on outstanding loans.

Our lending policy generally limits the maximum loan-to-value ratio on mortgage loans secured by owner-occupied properties to 90% of the lesser of the appraised value or the purchase price. The maximum loan-to-value ratio on one-to-four family loans secured by non-owner occupied properties is generally 80% with exceptions requiring Loan Committee approval. Properties securing our one-to-four family residential loans are appraised by independent appraisers approved by us. We require the borrowers to obtain title, hazard and, if necessary, flood insurance. We generally do not require earthquake insurance because of competitive market factors.

Our construction loans to individuals to build their personal residences typically are structured as construction/permanent loans permitting one closing for both the construction loan and the permanent financing. Prior to making a commitment to fund a construction loan, we require an appraisal of the post construction value of the project by an independent appraiser. During the construction phase, which typically lasts for 12 to 18 months, an approved inspector or our designated loan officer makes periodic inspections of the construction site and loan proceeds are disbursed directly to the contractor or borrower as construction progresses. Typically, disbursements are made in monthly draws during the construction period. Construction loans require interest only payments during the construction phase and are structured to be converted to fixed-rate permanent loans at the end of the construction phase. At December 31, 2010, our total owner-occupied construction loans to individuals amounted to \$460,000 or 0.1% of the one-to-four family residential loan balance.

Loans secured by rental properties represent a unique credit risk to us and, as a result, we adhere to more stringent underwriting guidelines. Of primary concern in non-owner occupied real estate lending is the consistency

7

of rental income of the property. Payments on loans secured by rental properties depend primarily on the tenants continuing ability to pay rent to the property owner, who is our borrower or, if the property owner is unable to find a tenant, the property owners ability to repay the loan without the benefit of a rental income stream. In addition, successful operation and management of non-owner occupied properties, including property maintenance standards, may affect repayment. As a result, repayment of such loans may be subject to adverse conditions in the real estate market or the economy. We generally require borrowers and loan guarantors, if any, to provide annual financial statements and we consider and review a rental income cash flow analysis of the borrower as well as the net operating income of the property, the borrower's expertise, credit history and profitability and the value of the underlying property. These loans are generally secured by a first mortgage on the underlying collateral property along with an assignment of rents and leases. If the borrower has multiple loans for rental properties with us, the loans are typically not cross-collateralized.

One-to-four family residential loans are approved by the Loan Committee, Executive Committee, the Board of Directors, or with the approval of two signers above the recommending loan officer depending upon the individual loan amount and the aggregate loan relationship balance for the borrower. At December 31, 2010, \$22.7 million of our one-to-four family residential loans were delinquent in excess of 90 days or in nonaccrual status, the majority of which are related to our merchant builder relationships.

Multifamily and Commercial Real Estate Lending. Multifamily and commercial real estate loans are approved by Loan Committee, Executive Committee, the Board of Directors, or with the approval of two signers above the recommending loan officer depending upon the individual loan amount and the aggregate loan relationship balance for the borrower. As of December 31, 2010, \$144.9 million, or 16.2% of our total loan portfolio was secured by multifamily real estate and \$272.7 million, or 30.6% of our loan portfolio was secured by commercial real estate properties. Our commercial real estate loans are typically secured by office and medical buildings, retail shopping centers, mini-storage facilities, industrial use buildings and warehouses. Substantially all of our multifamily and commercial real estate loans are secured by properties located in our primary market area.

Multifamily and commercial real estate loans generally are priced at a higher rate of interest than one-to-four family residential loans and generally have a maximum loan-to-value ratio of 75% of the lesser of the appraised value or purchase price for multifamily and 70% for commercial real estate. Typically, these loans have higher loan balances, are more complex to evaluate and monitor and involve a greater degree of risk than one-to-four family residential loans. Often payments on loans secured by multifamily or commercial properties are dependent on the successful operation and management of the property; therefore, repayment of these loans may be affected by adverse conditions in the real estate market or the economy. We generally require and obtain loan guarantees from financially capable parties based upon the review of personal financial statements. If the borrower is a corporation or partnership, we generally require and obtain personal guarantees from the principals based upon a review of their personal financial statements and individual credit reports.

The average loan size in our multifamily and commercial real estate loan portfolios was \$868,000 and \$992,000, respectively, as of December 31, 2010. We currently target individual multifamily and commercial real estate loans between \$1.0 million and \$5.0 million; however, we can by policy originate loans to one borrower up to 15% of the Bank's risk-based capital. The largest multifamily loan as of December 31, 2010 was a 121 unit apartment building with a net outstanding principal balance of \$9.0 million located in Pierce County. As of December 31, 2010, the largest commercial real estate loan had a net outstanding balance of \$12.6 million and was secured by a medical office building located in Pierce County. These loans were classified as performing according to their respective loan repayment terms.

We also make construction loans for commercial development projects. The projects include multifamily, retail, office/warehouse and office buildings. These loans generally have an interest-only payment phase during construction

and generally convert to permanent financing when construction is complete. Disbursement of funds is at our sole discretion and is based on the progress of construction. Generally the maximum loan-to-value ratio applicable to these loans is 75% of the appraised post-construction value. At December 31, 2010, multifamily and commercial real estate rollover construction loans amounted to \$32.5 million, or 7.8% of the combined multifamily and commercial real estate loan portfolio.

The credit risk related to multifamily and commercial real estate loans is considered to be greater than the risk related to one-to-four family residential loans because the repayment of multifamily and commercial real estate loans typically is dependent on the income stream from the real estate securing the loan as collateral and the successful operation of the borrower's business, which can be significantly affected by adverse conditions in the real estate markets or in the economy generally. For example, if the cash flow from the borrower's project is reduced due to leases not being obtained or renewed, the borrower's ability to repay the loan may be classified as impaired. In addition, many of our multifamily and commercial real estate loans are not fully amortizing and contain large balloon payments upon maturity. These balloon payments may require the borrower to either sell or refinance the underlying property in order to make the balloon payment.

If we foreclose on a multifamily or commercial real estate loan, our holding period for the collateral typically is longer than for one-to-four family residential mortgage loans because there are fewer potential purchasers of the collateral. Our multifamily and commercial real estate loans generally have relatively large balances to single borrowers or related groups of borrowers. Accordingly, if we make any errors in judgment in the collectibility of our multifamily or commercial real estate loans, any resulting charge-offs may be larger on a per loan basis than those incurred with our residential or consumer loan portfolios. No multifamily loans were delinquent in excess of 90 days or classified in nonaccrual status and 23 commercial real estate loans totaling \$7.3 million were 90 days or more delinquent or in nonaccrual status at December 31, 2010. Commercial real estate loans totaling \$8.0 million were charged-off during the year ended December 31, 2010 as compared to \$2.8 million and none for the years ended December 31, 2009 and 2008, respectively. There were no multifamily loans charged-off during the years ended December 31, 2010, 2009 and 2008.

Construction/Land Development Loans. We have been an originator of construction/land development loans to residential builders since 1977 for the construction of single-family residences, condominiums, townhouses and residential developments located in our market area. Our land development loans are generally made to builders intending to develop lots for their own use at a later date. At December 31, 2010, our total construction/land development loans amounted to \$56.5 million, or 6.3%, of our total loan portfolio. At December 31, 2010, our one-to-four family residential construction lending and land development loans to builders amounted to approximately \$26.8 million and \$27.3 million, respectively. The \$107.5 million decrease in this portfolio from December 31, 2009 to December 31, 2010 was the result of our concerted efforts working with our current construction loan customers, not expanding this line of business during these troubling economic times, charge-offs, the migration of problem loans to other real estate owned ("OREO") and loan payoffs. Our construction/land development loan portfolio has experienced the highest delinquency rate as well as has the largest amount of nonperforming loans as compared to other types of loans within our loan portfolio. Construction/land development loans classified as nonperforming totaled \$32.9 million, net of undisbursed funds at December 31, 2010. At that date, the undisbursed portion of our construction/land development loans totaled \$3.1 million.

At the dates indicated, the composition of our total construction/land development loan portfolio and the related nonperforming loans in this portfolio were as follows:

	Total Loans		December 31, Nonperforming loans	
	2010	2009	2010	2009
	(In thousands)			
One-to-four family residential:				
Construction speculative	\$26,848	\$95,699	\$15,240	\$53,100
Multifamily:				

Edgar Filing: - Form

Construction speculative	1,283	3,624	1,283	3,624
Commercial:				
Construction speculative	1,108	1,129	--	706
Land development	27,262	63,501	17,416	23,168
Total construction/land development (1)(2)	\$56,501	\$163,953	\$33,939	\$80,598

(footnotes continued on following page)

- (1) Loans in process for construction/land development at December 31, 2010 and 2009 were \$3.1 million and \$23.2 million, respectively. Loans in process for nonperforming construction/land development loans at December 31, 2010 and 2009 were \$1.1 million and \$8.8 million, respectively.
- (2) We do not include construction loans that will convert to permanent loans in the construction/land development category. We consider these loans to be “rollovers” in that one loan is originated for both the construction loan and permanent financing. These loans are classified according to the underlying collateral. As a result, at December 31, 2010, we had \$5.4 million, or 1.3% of our total one-to-four family residential loan portfolio, \$28.4 million, or 10.4% of our total commercial real estate portfolio and \$4.1 million, or 2.8% of our total multifamily loan portfolio in these “rollover” type of loans. Loans in process for these loans at December 31, 2010 were \$6.6 million.

The following table includes construction/land development loans by county at December 31, 2010:

County	Loan Balance (1) (Dollars in thousands)	Percent of Loan Balance
King	\$ 20,168	37.76 %
Pierce	10,756	20.14
Kitsap	7,298	13.66
Thurston	6,004	11.24
Whatcom	4,381	8.20
All other	4,805	9.00
Total	\$ 53,412	100.00 %

(1) Net of undisbursed funds.

Loans to finance the construction of single-family homes and subdivisions are generally offered to builders in our primary market areas. The maximum loan-to-value ratio applicable to these loans is generally 70% to 80% of the appraised market value upon completion of the project. In addition, a minimum of 25% verified equity is generally also required. Development plans are required from builders prior to committing to the loan. We require that builders maintain adequate insurance coverage. While maturity dates for residential construction loans are largely a function of the estimated construction period of the project and generally do not exceed one year, land development loans generally are for 18 to 24 months. Substantially all of our residential construction loans have adjustable-rates of interest based on The Wall Street Journal Prime Rate. During the term of construction, the accumulated interest on the loan is either added to the principal of the loan through an interest reserve, or billed monthly. We have interest reserves on \$1.3 million of our total construction spec loans, with undisbursed funds totaling \$500,000. When these loans with reserves exhaust their original reserves set up at origination, no new reserves are created for the loan unless the loan is re-analyzed and it is determined that there are funds remaining per the updated analysis. Construction loan proceeds are disbursed periodically in increments as construction progresses and as inspections by our approved inspectors warrant. Total outstanding net loan amounts for land development loans generally range from \$69,000 to \$5.2 million with an average individual loan commitment at December 31, 2010, of \$1.4 million. At December 31, 2010, our largest construction/land development loan had a total principal balance of \$5.2 million and was secured by a first mortgage lien on a housing development located in King County. At December 31, 2010, our three largest borrowing relationships for construction/land development loans had aggregate net outstanding loan balances of \$14.5 million, \$9.4 million and \$3.8 million all of which were classified as impaired except for the \$9.4 million relationship. These balances do not include other lending relationships we may have with these borrowers.

Edgar Filing: - Form

Our construction/land development loans are based upon estimates of costs in relation to values associated with the completed project. Construction/land development lending involves additional risks when compared with permanent residential lending because funds are advanced upon the collateral for the project based on an estimate of costs that will produce a future value at completion. Because of the uncertainties inherent in estimating construction costs, as well as the market value of the completed project and the effects of governmental regulation on real

property, it is relatively difficult to evaluate accurately the total funds required to complete a project and the related loan-to-value ratio. For this reason, this type of lending also typically involves higher loan principal amounts and is often concentrated with a small number of builders. These loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project and the ability of the borrower to sell or lease the property or obtain permanent take-out financing, rather than the ability of the borrower or guarantor to repay principal and interest. If our appraisal of the value of a completed project proves to be overstated, we may have inadequate security for the repayment of the loan upon completion of construction of the project and may incur a loss. At December 31, 2010, we had \$32.9 million of net construction/land development loans to ten builders that were classified as nonperforming and impaired of which \$32.6 million of those loans were in excess of 90 days delinquent. Construction/land development loans of \$32.1 million were charged-off during the year ended December 31, 2010. Charge-offs for this loan category were \$26.3 million and \$432,000 for 2009 and 2008. Further, as a result of the slowdown in the housing market, we have extended some of the construction loans to permit completion of the project or to allow the borrower additional time to market the underlying collateral. Most of these loans mature within 12 to 18 months. To the extent future conditions hinder timely sales or the borrower cannot otherwise refinance with a third party lender, our nonperforming construction loans may increase. For more information regarding loan delinquencies and impaired loans see "Asset Quality" under Item 1.

Consumer Lending. We offer a limited variety of consumer loans to our customers, consisting primarily of home equity loans, personal lines of credit and savings account loans. Generally, consumer loans have shorter terms to maturity and higher interest rates than mortgage loans. Consumer loans are made with both fixed and variable interest rates and with varying terms. At December 31, 2010, consumer loans amounted to \$19.1 million, or 2.1%, of the total loan portfolio.

At December 31, 2010, the largest component of the consumer loan portfolio consisted of home equity loans, primarily home equity lines of credit, which totaled \$14.5 million, or 75.9%, of the total consumer loan portfolio. Home equity loans are made for purposes such as the improvement of residential properties, debt consolidation and education expenses. The majority of these loans are secured by a first or second mortgage on residential property. At origination, the loan-to-value ratio is primarily 90% or less, when taking into account both the balance of the home equity loans and the first mortgage loan. Home equity lines of credit allow for a ten-year draw period. As of December 31, 2010 the undisbursed portion of the consumer lines of credit totaled \$5.3 million. The interest rate is tied to the prime rate as published in The Wall Street Journal, and may include a margin.

Consumer loans entail greater risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by rapidly depreciating assets. In these cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. The remaining deficiency often does not warrant further substantial collection efforts against the borrower beyond obtaining a deficiency judgment. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount that can be recovered on these loans. Home equity lines of credit have greater credit risk than one-to-four family residential mortgage loans because they are secured by mortgages subordinated to the existing first mortgage on the property, which we may or may not hold in our portfolio. We do not have private mortgage insurance coverage on these loans. Adjustable-rate loans may experience a higher rate of default in a rising interest rate environment due to the increase in payment amounts caused by the increase in interest rates as loan rates reset. If current economic conditions deteriorate for our borrowers and their home prices continue to fall, we may also experience higher credit losses from this loan portfolio. Since our home equity loans primarily consist of second mortgage loans, it is unlikely that we will be successful in recovering all, if any, portion of our loan principal amount outstanding in the event of a default. At December 31, 2010, four consumer loans totaling \$57,000 were delinquent in excess of 90 days or in nonaccrual status. Consumer loans

totaling \$790,000 were charged-off during the year ended December 31, 2010. Consumer loans charged-off during the years ended December 31, 2009 and 2008 totaled \$164,000 and none, respectively.

Edgar Filing: - Form

Loan Maturity and Repricing. The following table sets forth certain information at December 31, 2010 regarding the amount of loans repricing or maturing in our portfolio based on their contractual terms to maturity, but does not include prepayments. Loan balances do not include undisbursed loan funds, deferred loan fees and costs and allowance for loan losses.

Loan Solicitation and Processing. The majority of our consumer and residential mortgage loan originations are generated through the Bank and from time to time through outside brokers. We originate multifamily, commercial real estate and construction/land development loans primarily using the Bank's loan officers, with referrals coming from builders, brokers and existing customers.

Edgar Filing: - Form

Upon receipt of a loan application from a prospective borrower, we obtain a credit report and other data to verify specific information relating to the loan applicant's employment, income, and credit standing. All real estate loans requiring an appraisal are done by an independent third-party appraiser. All appraisers are approved by us, and their credentials are reviewed annually, as is the quality of their appraisals.

We use a multi-level approval matrix which establishes lending targets and tolerance levels depending on the type of credit being approved. The matrix also sets minimum credit standards for each of the various types of credits as well as approval limits.

We require title insurance on all real estate loans, and fire and casualty insurance on all secured loans and on home equity loans where the property serves as collateral.

Loan Originations, Servicing, Purchases, Sales and Repayments. For the years ended December 31, 2010 and 2009, our total loan originations were \$59.4 million and \$206.5 million respectively. Total loan originations declined as a result of the challenging economic environment.

One-to-four family residential loans are generally originated in accordance with the guidelines established by Freddie Mac and Fannie Mae, with the exception of our special community development loans originated to satisfy our compliance with the Community Reinvestment Act. Our loans are underwritten by designated real estate loan underwriters internally in accordance with standards as provided by our Board-approved loan policy.

We may sell loans from time to time consistent with our asset and liability management objectives. Fixed-rate residential mortgage loans with terms of 30 years or less and adjustable-rate mortgage loans are generally held in our portfolio. There were no loan sales for the years ended December 31, 2010 and 2009. Loans are generally sold on a non-recourse basis. As of December 31, 2010, our loan servicing portfolio for outside investors was \$41.5 million.

The following table shows total loans originated, purchased, sold and repaid during the periods indicated.

	Years Ended December 31,		
	2010	2009	2008
	(In thousands)		
Loan Originations:

Loan Origination and Other Fees. In some instances, we receive loan origination fees on real estate related products. Loan fees generally represent a percentage of the principal amount of the loan and are paid by the borrower. The amount of fees charged to the borrower on one-to-four family residential loans and on multifamily and commercial real estate loans can range between 0% to 2%. Generally accepted accounting principles require that certain fees received, net of certain origination costs, be deferred and amortized over the contractual life of the

loan. Net deferred fees or costs associated with loans that are prepaid or sold are recognized in income at the time of prepayment or sale. We had \$2.4 million and \$2.9 million of net deferred loan fees as of December 31, 2010 and 2009, respectively.

One-to-four family residential loans are generally originated without a prepayment penalty. The majority of multifamily and commercial real estate loans, however, have prepayment penalties associated with the loans. The majority of the recent multifamily and commercial real estate loan originations have a prepayment penalty of 3% of the principal balance in year one, 2% in year two, 1% in year three and no fees after year three.

Asset Quality

As of December 31, 2010, we had an aggregate of \$61.2 million, or 6.9%, of total loans past due over 60 days consisting of 86 one-to-four family residential loans, 22 commercial real estate loans, 60 construction/land development loans and six consumer loans. We generally assess late fees or penalty charges on delinquent loans of up to 5.00% of the monthly payment. The borrower is given up to a 15 day grace period from the due date to make the loan payment.

We handle collection procedures internally or with the assistance of outside legal counsel. Late charges are incurred when the loan exceeds 10 to 15 days past due depending upon the loan product. When a delinquent loan is identified, corrective action takes place immediately. The first course of action is to determine the cause of the delinquency and seek cooperation from the borrower in resolving the issue whenever possible. Additional corrective action, if required, will vary depending on the borrower, the collateral, if any, and whether the loan requires specific handling procedures as required by the Washington State Deed of Trust Act.

If the borrower is chronically delinquent and all reasonable means of obtaining payments have been exhausted, we will seek to recover the collateral securing the loan according to the terms of the security instrument and applicable law. The following table shows our delinquent loans by the type of loan, net of undisbursed funds, and number of days delinquent as of December 31, 2010:

(1) Balances represent loans, net of undisbursed funds.

(2) These loans are included in the category above “Loans accounted for on a nonaccrual basis.”

(3) Represents foregone interest on nonaccrual loans.

When a loan becomes 90 days past due, we generally place the loan on nonaccrual status unless the credit is well secured and is in the process of collection. Loans may be placed on nonaccrual status prior to being 90 days past due if there is an identified problem such as an impending foreclosure or bankruptcy or if the borrower is unable to meet their scheduled payment obligations. As of December 31, 2010, nonaccrual loans and loans 90 days or more past due were \$62.9 million, net of undisbursed funds, which represents 7.14% of total loans and 5.27% of total

assets. Of the \$22.7 million in nonperforming one-to-four family residential loans \$12.4 million were to builders. Of the \$7.3 million in nonperforming commercial real estate loans, \$2.1 million related to builders and \$5.2 million related to real estate investors.

Our three largest nonperforming loans at December 31, 2010 were as follows:

- A construction/land development loan with an outstanding balance of approximately \$4.4 million. The purpose of the loan was to purchase land in Whatcom County and prepare the land for construction of a 250-unit one-to-four family development with the intent that the loan would be paid-off at the time the borrower was able to secure financing for the construction of the units.
- A one-to-four family speculative construction loan with an outstanding balance of approximately \$1.8 million. The purpose of this loan was to construct seven townhomes located in King County with the intent to sell each one and pay off the loan. This project is not complete and a receiver has been appointed to work with the borrower and the Bank to complete the project.
- A construction/land development loan with an outstanding balance of approximately \$1.8 million. The purpose of the loan was to develop a subdivision with 71 finished lots for one-to-four family construction, of which, 26 lots have been sold. The project is located in Pierce County. The borrower has until September 2011 to sell the remaining lots otherwise the Bank may take a deed in lieu of foreclosure on the remaining lots.

We have made significant progress in reducing our nonperforming loans by \$57.8 million, or 47.9% at December 31, 2010 as compared to December 31, 2009. This was accomplished by transferring nonperforming loans to OREO through the foreclosure process, taking deeds in lieu of foreclosure, accepting short sales and charge-offs. Being a relatively smaller institution, we are able to make decisions regarding offers on OREO and the real estate underlying our nonperforming loans very quickly as compared to the larger institutions where decisions could take upwards of six to twelve months. This has worked to our benefit in reducing the amount of our nonperforming loans and disposing of our OREO.

Edgar Filing: - Form

The following table summarizes our total nonperforming loans, net of undisbursed funds and OREO, at December 31, 2010 by county and by type of loan or property:

	King	County			All	Total	Number	Percent of

One-to-four family residential	\$2,669	\$7,848	\$625	\$2,114	\$597	\$13,853	76	46.02 %
Commercial real estate	563	2,622	--	155	450	3,790	13	12.59
Construction/land development	6,221	1,376	136	1,078	3,648	12,459	40	41.39
Total other real estate owned	\$9,453	\$11,846	\$761	\$3,347	\$4,695	\$30,102	129	100.00 %
Total nonperforming assets	\$35,427	\$27,360	\$3,806	\$13,266	\$13,179	\$93,038	313	

Construction/land development, commercial real estate and multifamily real estate loans have larger individual loan amounts, which have a greater single impact on the total portfolio quality in the event of delinquency or default. We continue to monitor our loan portfolio, and believe there is potential for additions to nonperforming loans, charge-offs, provisions for loan losses, and/or OREO in the future if the housing market and other economic conditions do not improve.

Other Real Estate Owned. Real estate acquired by us as a result of foreclosure or by deed-in-lieu of foreclosure is classified as OREO until it is sold. When the property is acquired, it is recorded at the lower of its cost or the fair market value of the property less selling costs. We had \$30.1 million and \$11.8 million of OREO at December 31, 2010 and 2009, respectively. We have a special assets team whose primary focus is on the prompt and effective management of our troubled, nonperforming assets and to expedite their disposition and minimize any potential losses. During 2010, we have foreclosed or accepted deeds in lieu of foreclosure on 185 properties totaling \$50.2 million. We anticipated continued foreclosure, deed in lieu of foreclosure and short sale activity while we work with our nonperforming loan customers to minimize our loss exposure.

Troubled Debt Restructured Loans. We account for certain loan modifications or restructurings as a “troubled debt restructuring”, or “TDR.” In general, the modification or restructuring of a debt is considered a troubled debt restructuring if we, for economic or legal reasons related to the borrower’s financial difficulties, grant a concession to the borrower that we would not otherwise consider. At December 31, 2010 we had \$74.7 million in troubled debt restructured loans as compared to \$61.5 million at December 31, 2009.

During 2010 we utilized a new strategy for a limited number of our merchant builder borrowing relationships by establishing an “A” and “B” note structure. We created an “A” note which represents a reduced principal balance expected to be fully collected and at a debt service level and loan-to-value ratio acceptable to us. The “A” note is classified as a performing TDR loan as long as the borrower continues to perform in accordance with the note terms. The “B” note represents the amount of the principal reduction portion of the original note and is immediately charged-off. During the year ended December 31, 2010 \$11.1 million of “B” notes were charged-off. The “B” note is held by the Bank and when the borrower pays off the “A” note, the Bank will proceed with collection efforts on the “B” note. At December 31, 2010, 78.2% of our TDR loans were classified as performing compared to 57.7% at December 31, 2009. Of the \$58.4 million of performing TDR loans at December 31, 2010, \$34.2 million were related to an “A” note as a result of an “A” and “B” note workout strategy.

The largest TDR loan relationship was \$18.4 million and included both construction/land development loans as well as one-to-four family residential rental properties located in King and Pierce counties. At December 31, 2010, the amount of undisbursed funds to that builder in connection with the restructured and impaired loans totaled \$8,000.

The following table summarizes our total troubled debt restructured loans:

	December 31,	
	2010	2009
	(In thousands)

Total troubled debt restructured loans	\$ 74,674	\$ 61,479

Classified Assets. Federal regulations provide for the classification of lower quality loans and other assets, as substandard, doubtful or loss. An asset is considered substandard if it is inadequately protected by the current net worth and payment capacity of the borrower or of any collateral pledged. Substandard assets include those characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable, on the basis of currently existing facts, conditions and values. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted.

When we classify problem assets as either substandard or doubtful, we may establish a specific allowance in an amount we deem prudent. General allowances represent loss allowances which have been established to recognize the inherent risk associated with lending activities, but which, unlike specific allowances, have not been specifically allocated to particular problem assets. When an insured institution classifies problem assets as a loss, it is required to charge-off those assets in the period in which they are deemed uncollectible. Our determination as to the classification of our assets and the amount of our valuation allowances is subject to review by the FDIC and the DFI,

which can order the establishment of additional loss allowances or the charge-off of specific loans against established loss reserves. Assets which do not currently expose us to sufficient risk to warrant classification in one of the aforementioned categories but possess weaknesses are designated by us as special mention.

In connection with the filing of periodic reports with the FDIC and in accordance with our loan policy, we regularly review the problem loans in our portfolio to determine whether any loans require classification in accordance with applicable regulations. On the basis of our review of our loans, as of December 31, 2010, \$18.2 million of our loans were classified as special mention, \$75.0 million were classified as substandard, \$345,000 were classified as doubtful and no loans were classified as loss. The primary reason for the decrease in the loans classified as substandard was a result of loan charge-offs, transfers to OREO, subsequent sales of OREO and short sales during the year ended December 31, 2010. During 2010, the Bank took an aggressive approach to reduce nonperforming assets and improve asset quality.

The aggregate amounts of our classified assets, net of undisbursed funds, at the dates indicated were as follows:

	At December 31,	
	2010	2009
	(In thousands)

Total doubtful	\$ 345	\$ 6,530
Total classified assets	\$ 93,512	\$ 222,274

With the exception of these classified loans, of which \$62.9 million were accounted for as nonaccrual loans at December 31, 2010, management is not aware of any loans as of December 31, 2010, where the known credit problems of the borrower would cause us to have serious doubts as to the ability of such borrowers to comply with their present loan repayment terms.

Allowance for Loan Losses ("ALLL"). Management recognizes that loan losses may occur over the life of a loan and that the ALLL must be maintained at a level necessary to absorb specific losses on impaired loans and probable losses inherent in the loan portfolio. Our methodology for analyzing the ALLL consists of two components: general and specific allowances. The general allowance is determined by applying factors to our various groups of loans. Management considers factors such as charge-off history, the prevailing economy, borrower's ability to repay, the regulatory environment, competition, geographic and loan type concentrations, policy and underwriting standards,

nature and volume of the loan portfolio, managements' experience level, our loan review and grading systems, the value of underlying collateral and the level of problem loans in assessing the ALLL. The specific allowance component is created when management believes that the collectibility of a specific loan, has been impaired and a loss is probable. The specific reserves are computed using current appraisals, listed sales prices and other available information less costs to complete, if any, and costs to sell the property. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events differ from predictions.

Our Board of Directors approves the provision for loan losses on a quarterly basis. The allowance is increased by the provision for loan losses, which is charged against current period earnings and decreased by the amount of actual loan charge-offs, net of recoveries.

We believe that the accounting estimate related to the ALLL is a critical accounting estimate because it is highly susceptible to change from period to period requiring management to make assumptions about probable losses inherent in the loan portfolio. The impact of a sudden large loss could deplete the allowance and potentially require increased provisions to replenish the allowance, which would negatively affect earnings.

The provision for loan losses was \$53.1 million, \$51.3 million and \$9.4 million for the years ended December 31, 2010, 2009 and 2008, respectively. The increase in the provision for loan losses was attributable to the level of nonperforming loans, the continued depressed real estate values, the uncertain economic environment in our market area, the FDIC liquidations of financial institutions in the Pacific Northwest and the effect it has had on our market area, the level of charge-offs during 2010 and the increase in the number of requests for loan modifications. The allowance for loan losses was \$22.5 million or 2.6% of total loans at December 31, 2010 as compared to \$33.0 million, or 3.1% of total loans outstanding at December 31, 2009. The level of the allowance is based on estimates, and the ultimate losses may vary from the estimates. Management reviews the adequacy of the allowance for loan losses on a quarterly basis.

A loan is considered impaired when, based on current information and events, it is probable we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments in accordance with the loan agreement. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loans and the borrowers, including length of the delay, the reasons for the delay, the borrower's prior payment record and the amounts of the shortfall in relation to the principal and interest owed. Loans are evaluated for impairment on a loan-by-loan basis. As of December 31, 2010, 2009 and 2008, impaired loans, net of loans in process, were \$121.3 million, \$156.2 million and \$52.5 million, respectively.

The following table summarizes the distribution of the allowance for loan losses by loan category.

	2010			2009			At December 31, 2008

Management believes that it uses the best information available to determine the allowance for loan losses. However, unforeseen market conditions could result in adjustments to the allowance for loan losses and net income could be significantly affected, if circumstances differ substantially from the assumptions used in determining the allowance.

We believe that the allowance for loan losses as of December 31, 2010 was adequate to absorb the probable and inherent risks of loss in the loan portfolio at that date. While we believe the estimates and assumptions used in our determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. Future additions to the allowance may become necessary based upon changing economic conditions, the level of problem loans, business conditions, credit concentrations, increased loan balances, or changes in the underlying collateral of the loan portfolio. In addition, the determination of the amount of First Savings Bank's allowance for loan losses is subject to review by bank regulators as part of the routine examination process, which may result in the establishment of additional loss reserves or the charge-off of specific loans against established loss reserves based upon their judgment of information available to them at the time of their examination.

The following table sets forth an analysis of our ALLL at the dates and for the periods indicated.

Investment Activities

General. Under Washington law, savings banks are permitted to invest in various types of liquid assets, including U.S. Treasury obligations, securities of various federal agencies, certain certificates of deposit of insured banks and savings institutions, banker's acceptances, repurchase agreements, federal funds, commercial paper, investment grade corporate debt securities, and obligations of states and their political sub-divisions.

The investment committee, consisting of the Chief Executive Officer, Chief Financial Officer and Controller of First Savings Bank, has the authority and responsibility to administer our investment policy, monitor portfolio strategies and recommend appropriate changes to policy and strategies to the Board of Directors. On a monthly basis, management reports to the Board a summary of investment holdings with respective market values and all purchases and sales of investment securities. The Chief Financial Officer has the primary responsibility for the management of the investment portfolio and considers various factors when making decisions, including the marketability, maturity and tax consequences of proposed investments. The maturity structure of investments will be affected by various market conditions, including the current and anticipated slope of the yield curve, the level of interest rates, the trend of new deposit inflows and the anticipated demand for funds via deposit withdrawals and loan originations and purchases.

The general objectives of the investment portfolio are to provide liquidity when loan demand is high, to assist in maintaining earnings when loan demand is low and to maximize earnings while satisfactorily managing risk, including credit risk, reinvestment risk, liquidity risk and interest rate risk.

At December 31, 2010, our investment portfolio consisted principally of mortgage-backed securities, U.S. Government Agency obligations and municipal bonds. From time to time, investment levels may increase or decrease depending upon yields available on investment opportunities and management's projected demand for funds for loan originations, deposits and other activities.

Mortgage-Backed Securities. The mortgage-backed securities in our portfolio were comprised of Freddie Mac, Fannie Mae, and Ginnie Mae mortgage-backed securities. The principal on these securities is backed by the U.S. agency issuing the security. The mortgage-backed securities had a weighted-average yield of 3.36% at December 31, 2010.

U.S. Government Agency Obligations. At December 31, 2010, the portfolio had a weighted-average yield of 5.26%.

Municipal Bonds. The municipal bond portfolio was comprised of general obligation bonds (i.e., backed by the general credit of the issuer) and revenue bonds (i.e., backed by revenues from the specific project being financed) issued by various municipalities. All bonds are from issuers located within the State of Washington. The weighted-average yield on the municipal bond portfolio was 7.10% at December 31, 2010.

Federal Home Loan Bank Stock. As a member of the FHLB, we are required to own capital stock in the FHLB. The amount of stock we hold is based on guidelines specified by the FHLB. The redemption of any excess stock we hold is at the discretion of the FHLB. The carrying value of the stock totaled \$7.4 million at December 31, 2010. We did not receive a dividend during the years ended December 31, 2010 and 2009.

Management evaluates FHLB stock for impairment. The determination of whether this investment is impaired is based on our assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as: (1) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, (3) the impact of

legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB and (4) the liquidity position of the FHLB.

On October 25, 2010, the FHLB agreed to the stipulation and issuance of a Consent Order by its primary regulator the Federal Housing Finance Agency (“FHFA”). The Consent Order sets forth requirements for capital management, asset composition and other operational and risk management improvements. Additionally, the FHFA and the FHLB have agreed to a Stabilization Period that ends upon the filing of the FHLB’s June 30, 2011 financial statements. During this period, the FHLB’s classification as undercapitalized will remain in place. Subsequently, the FHLB may begin repurchasing member stock at par and paying dividends, upon achieving and maintaining financial thresholds established by the FHFA as part of the agency’s supervisory process, subject to FHFA’s approval.

Under FHFA regulations, a Federal Home Loan Bank that fails to meet any regulatory capital requirement may not declare a dividend or redeem or repurchase capital stock in excess of what is required for members’ current loans. Based upon an analysis by Standard and Poor’s regarding the Federal Home Loan Banks, they stated that the FHLB System has a special public status (organized under the Federal Home Loan Bank Act of 1932) and because of the extraordinary support offered to it by the U.S. Treasury in a crisis, (though not used), it can be considered an extension of the government. We believe the U.S. government would almost certainly support the credit obligations of the FHLB System. We have determined there is not an other-than-temporary impairment on our FHLB stock investment as of December 31, 2010. For additional information, see Item 1.A. “Risk Factors - Continued Deterioration in the financial position of the FHLB may result in future impairment losses of our investment in FHLB stock.”

The following table sets forth the composition of our investment portfolio at the dates indicated. The amortized cost of the available for sale investments is their net book value.

	2010		At December 31, 2009		2008

Mutual fund	--	--	4,460	4,611	4,611	4,611
Total available for sale	\$163,330	\$164,603	\$95,311	\$97,383	\$147,958	\$149,323

At December 31, 2010, 2009 and 2008 there were no investments held to maturity.

During the year ended December 31, 2010, gross proceeds from sales of investments were \$25.1 million with gross gains of \$864,000 and gross losses of \$21,000.

Management reviews investment securities on an ongoing basis for the presence of other-than-temporary impairment (“OTTI”) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost; extent and nature of the change in fair value; issuer rating changes and trends; whether management intends to sell a security or if it is likely that we will be required to sell the security before recovery of the amortized cost basis of the investment, which may be maturity; and other factors. For debt securities, if management intends to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire

impairment loss would be recognized in earnings as an OTTI. If management does not intend to sell the security and it is not likely that we will be required to sell the security, but management does not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are

discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, i.e., the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (loss). Impairment losses related to all other factors are presented as separate categories within other comprehensive income (loss). Losses related to OTTI at December 31, 2010 and 2009 were none and \$152,000, respectively. For additional information regarding our investments, see Note 3 of Notes to Consolidated Financial Statements contained in Item 8.

The table below sets forth information regarding the carrying value, weighted-average yields and maturities or call dates of our investment portfolio at December 31, 2010. Mortgage-backed securities and the FHLB stock investments have no stated maturity date and are included in the totals column only.

Deposit Activities and Other Sources of Funds

General. Deposits and loan repayments are the major sources of our funds for lending and other investment purposes. Scheduled loan repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are influenced significantly by general interest rates and market conditions. Borrowings from the FHLB are used to supplement the availability of funds from other sources and also as a source of term funds to assist in the management of interest rate risk.

Our deposit composition reflects a mixture of various deposit products. We rely on marketing activities, convenience, customer service and the availability of a broad range of deposit products and services to attract and retain customer deposits.

Deposits. Deposits are attracted from within our market area through the offering of a broad selection of deposit products, including noninterest bearing accounts, NOW accounts, money market deposit accounts, statement savings accounts and certificates of deposit. Deposit account terms vary according to the minimum balance required, the time periods the funds must remain on deposit and the interest rate, among other factors. In determining the terms of our deposit accounts, we consider the development of long-term profitable customer relationships, current market interest rates, current maturity structures, deposit mix, our customer preferences and the profitability of acquiring customer deposits compared to alternative sources.

At December 31, 2010, our deposits totaled \$920.2 million. We had \$510.9 million of jumbo (\$100,000 or more) certificates of deposit of which \$57.8 million were public funds, which represent 55.5% and 6.3%, respectively, of total deposits. There were no brokered deposits at December 31, 2010.

Deposit Activities. The following table sets forth our total deposit activity for the periods indicated.

	Years Ended December 31,		
	2010	2009	2008

Borrowings. Customer deposits are the primary source of funds for our lending and investment activities. We use advances from the FHLB to supplement our supply of lendable funds to meet short-term deposit withdrawal requirements and also to provide longer term funding to better match the duration of selected loan and investment maturities.

Edgar Filing: - Form

As a member of the FHLB, we are required to own capital stock in the FHLB and are authorized to apply for advances on the security of that stock and certain of our mortgage loans and other assets provided certain creditworthiness standards have been met. Advances are individually made under various terms pursuant to several different credit programs, each with its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based on the financial condition of the member institution and the adequacy of collateral pledged to secure the credit. We maintained a credit facility with the FHLB that provides for immediately available advances, subject to acceptable collateral, which at December 31, 2010 was \$317.4 million. At December 31, 2010, outstanding advances from the FHLB, under this credit facility, totaled \$93.1 million.

The following table sets forth information regarding FHLB advances at the end of and during the periods indicated. The table includes both long- and short-term borrowings.

	At or for the Years Ended December 31,					
	2010		2009		2008

Subsidiaries and Other Activities

First Financial Northwest, Inc. First Financial Northwest has two wholly-owned subsidiaries, First Savings Bank Northwest and First Financial Diversified. First Financial Diversified primarily provides escrow services to First Savings Bank, other area lenders and some private individuals. First Financial Diversified also offers limited consumer loans to First Savings Bank's customers, which consist of short-term unsecured loans, second mortgages and, to a lesser extent, home equity loans. At December 31, 2010, loans from First Financial Diversified represented less than two percent of our loan portfolio.

First Savings Bank Northwest. First Savings Bank Northwest is a community-based savings bank primarily serving King and to a lesser extent, Pierce, Snohomish and Kitsap counties, Washington through our full-service banking office located in Renton, Washington. We are in the business of attracting deposits from the public and utilizing those deposits to originate loans.

Competition

We face competition in originating loans and in attracting deposits within our targeted geographic market area. We compete by consistently delivering high-quality, personal service to our customers that results in a high level of customer satisfaction.

Based on the most current FDIC Deposit Market Share Report dated June 30, 2010, we ranked eighth in terms of deposits with a deposit market share of 2.0%, among the 55 FDIC-insured depository institutions located in King County, our primary market area. Our key competitors are Banner Bank, Key Bank, Union Bank, US Bank and Washington Federal. These competitors control 28.4% of the King County deposit market with deposits of \$14.6 billion, of the \$51.5 billion total deposits in King County as of June 30, 2010. Aside from these traditional competitors, credit unions, insurance companies and brokerage firms are also competitors for consumer deposit relationships.

Our competition for loans comes principally from commercial banks, mortgage brokers, thrift institutions, credit unions and finance companies. Several other financial institutions, including those previously mentioned, have greater resources than we do and compete with us for banking business in our targeted market area. These institutions have far more resources than we do and as a result are able to offer a broader range of services such as trust departments, merchant banking and enhanced retail services. Among the advantages of some of these institutions are their ability to make larger loans, finance extensive advertising campaigns, access lower cost funding sources and allocate their investable assets in regions of highest yield and demand. The challenges posed by

such large competitors may impact our ability to originate loans, secure low cost deposits and establish product pricing levels that support our net interest margin goals, which may limit our future growth and earnings prospects.

Employees

At December 31, 2010, we had 112 full-time employees. Our employees are not represented by any collective bargaining group. We consider our employee relations to be good.

How We Are Regulated

The following is a brief description of certain laws and regulations which are applicable to First Financial Northwest and First Savings Bank. Legislation is introduced from time to time in the United States Congress that may affect the operations of First Financial Northwest and First Savings Bank. In addition, the regulations governing us may be amended from time to time by the respective regulators. Any such legislation or regulatory changes in the future could adversely affect us. We cannot predict whether any such changes may occur.

First Savings Bank is regulated by the DFI and the FDIC. First Savings Bank elected, pursuant to Section 10(l) of the Home Owners' Loan Act, as amended, to be treated as a savings association. As a result, First Financial Northwest is a registered savings and loan holding company subject to regulation of the OTS.

Recently Enacted Regulatory Reform

On July 21, 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd Frank Act"). The financial reform and consumer protection act imposes new restrictions and an expanded framework of regulatory oversight for financial institutions, including depository institutions. In addition, the new law changes the jurisdictions of existing bank regulatory agencies and in particular transfers the regulation of savings and loan holding companies from the OTS to the Board of Governors of the Federal Reserve System ("Federal Reserve"), effective one year from the effective date of the legislation. The following discussion summarizes significant aspects of the new law that may affect First Savings Bank and First Financial Northwest. Regulations implementing these changes have not been promulgated, so we cannot determine the full impact on our business and operations at this time.

The following aspects of the financial reform and consumer protection act are related to the operations of First Savings Bank:

- A new independent consumer financial protection bureau will be established within the Federal Reserve, empowered to exercise broad regulatory, supervisory and enforcement authority with respect to both new and existing consumer financial protection laws. Smaller financial institutions, like First Savings Bank, will be subject to supervision and enforcement by their primary federal banking regulator with respect to federal consumer financial protection laws.
- The Federal Deposit Insurance Act was amended to direct federal regulators to require depository institution holding companies to serve as a source of strength for their depository institution subsidiaries.
- Tier 1 capital treatment for "hybrid" capital items like trust preferred securities is eliminated subject to various grandfathering and transition rules.
 - The current prohibition on payment of interest on demand deposits will be repealed, effective July 21, 2011.
- Deposit insurance is permanently increased to \$250,000 and unlimited deposit insurance for noninterest-bearing transaction accounts and IOLTA accounts is extended through December 31, 2012.

- Deposit insurance assessment base will be the depository institution's total average assets minus the sum of its average tangible equity during the assessment period.

- The minimum reserve ratio of the Deposit Insurance Fund increased to 1.35% of estimated annual insured deposits or assessment base; however, the FDIC is directed to "offset the effect" of the increased reserve ratio for insured depository institutions with total consolidated assets of less than \$10 billion.

The following aspects of the financial reform and consumer protection act are related to the operations of First Financial Northwest:

- The Federal Reserve will have authority over savings and loan holding companies. The regulations of the Office of Thrift Supervision will remain in effect until modified by the Federal Reserve as applicable.
- Thrift holding companies will be subject to the same capital requirements as bank holding companies in five years.
- The Securities and Exchange Commission is authorized to adopt rules requiring public companies to make their proxy materials available to shareholders for nomination of their own candidates for election to the board of directors.
- Public companies will be required to provide their shareholders with a non-binding vote: (i) at least once every three years on the compensation paid to executive officers and (ii) at least once every six years on whether they should have a "say on pay" vote every one, two or three years.
- A separate, non-binding shareholder vote will be required regarding golden parachutes for named executive officers when a shareholder vote takes place on mergers, acquisitions, dispositions or other transactions that would trigger the parachute payments.
- Securities exchanges will be required to prohibit brokers from using their own discretion to vote shares not beneficially owned by them for certain "significant" matters, which include votes on the election of directors, executive compensation matters and any other matter determined to be significant.
- Stock exchanges, which does not include the OTC Bulletin Board, will be prohibited from listing the securities of any issuer that does not have a policy providing for (i) disclosure of its policy on incentive compensation payable on the basis of financial information reportable under the securities laws and (ii) the recovery from current or former executive officers, following an accounting restatement triggered by material noncompliance with securities law reporting requirements, of any incentive compensation paid erroneously during the three-year period preceding the date on which the restatement was required that exceeds the amount that would have been paid on the basis of the restated financial information.
- Disclosure in annual proxy materials will be required concerning the relationship between the executive compensation paid and the financial performance of the issuer.
- Item 402 of Regulation S-K will be amended to require companies to disclose the ratio of the Chief Executive Officer's annual total compensation to the median annual total compensation of all other employees.

Smaller reporting companies are exempt from complying with the internal control auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act. It is difficult to predict at this time what specific impact the Dodd-Frank Act and the yet to be written implementing rules and regulations will have on community banks. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our interest expense.

Regulation and Supervision of First Savings Bank

General. As a state-chartered savings bank, First Savings Bank is subject to applicable provisions of Washington law and regulations of the DFI. State law and regulations govern First Savings Bank's ability to take

deposits and pay interest, to make loans on or invest in residential and other real estate, to make consumer loans, to invest in securities, to offer various banking services to its customers and to establish branch offices. Under state law, savings banks in Washington State also generally have all of the powers that federal savings banks have under federal laws and regulations. First Savings Bank is subject to periodic examination and reporting requirements by and of the DFI.

Insurance of Accounts and Regulation by the FDIC. First Savings Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. The Dodd-Frank Act permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor and non-interest-bearing transaction accounts and IOLTA accounts have unlimited deposit insurance through December 31, 2012. As insurer, the FDIC imposes deposit insurance premiums and is authorized to conduct examinations of and to require reporting by FDIC-insured institutions. It also may prohibit any FDIC-insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious risk to the insurance fund. The FDIC also has the authority to initiate enforcement actions against savings institutions, after giving the OTS opportunity to take such action, and may terminate the deposit insurance if it determines that the institution has engaged in unsafe or unsound practices or is in an unsafe or unsound condition.

First Savings Bank entered into a Stipulation to the Issuance of a Consent Order ("Order") with the FDIC and the DFI, which became effective September 24, 2010. The FDIC has also notified First Savings Bank that it may not appoint any new director or senior executive officer or change the responsibilities of any current senior executive officers without notifying the FDIC. In addition, First Savings Bank may not make indemnification and severance payments without complying with certain statutory restrictions, including prior written approval of the FDIC. For additional information, see Item 1.A. "Risk Factors-Certain regulatory restrictions were recently imposed on us: lack of compliance could result in monetary penalties and/or additional regulatory actions."

The FDIC assesses deposit insurance premiums on each FDIC-insured institution quarterly based on annualized rates for one of four risk categories applied to its deposits subject to certain adjustments. Each institution is assigned to one of four risk categories based on its capital, supervisory ratings and other factors. Well capitalized institutions that are financially sound with only a few minor weaknesses are assigned to Risk Category I. Risk Categories II, III and IV present progressively greater risks to the Deposit Insurance Fund. Under FDIC's risk-based assessment rules, effective until April 1, 2011, the initial base assessment rates prior to adjustments range from 12 to 16 basis points for Risk Category I and are 22 basis points for Risk Category II, 32 basis points for Risk Category III and 45 basis points for Risk Category IV. Initial base assessment rates are subject to adjustments based on an institution's unsecured debt, secured liabilities and brokered deposits, such that the total base assessment rates after adjustments range from 7 to 24 basis points for Risk Category I, 17 to 43 basis points for Risk Category II, 27 to 58 basis points for Risk Category III and 40 to 77.5 basis points for Risk Category IV. Rates increase uniformly by 3 basis points effective January 1, 2011.

In addition to the regular quarterly assessments, due to losses and projected losses attributed to failed institutions, the FDIC imposed a special assessment of 5 basis points on the amount of each depository institution's assets reduced by the amount of its Tier 1 capital (not to exceed 10 basis points of its assessment base for regular quarterly premiums) as of June 30, 2009, which was collected on September 30, 2009.

As a result of a decline in the reserve ratio (the ratio of the Deposit Insurance Fund to estimated insured deposits) and concerns about expected failure costs and available liquid assets in the Deposit Insurance Fund, the FDIC has adopted a rule requiring each insured institution to prepay on December 30, 2009 the estimated amount of its quarterly assessments for the fourth quarter of 2009 and all quarters through the end of 2012 (in addition to the regular quarterly assessment for the third quarter which was due on December 30, 2009). The prepaid amount is recorded as an asset with a zero risk-weight and the institution will continue to record quarterly expenses for deposit insurance. For

purposes of calculating the prepaid amount, assessments were measured at the institution's assessment rate as of September 30, 2009, with a uniform increase of 3 basis points effective January 1, 2011 and were based on the institution's assessment base for the third quarter of 2009, with deposit growth assumed quarterly at an annual rate of 5%. If events cause actual assessments during the prepayment period to vary from the prepaid amount, institutions will pay excess assessments in cash or receive a rebate of prepaid amounts not exhausted after collection of assessments due on June 13, 2013, as applicable. Collection of the prepayment does not preclude the FDIC from changing assessment rates or revising the risk-based assessment system in the future. The rule includes a process for exemption from the prepayment for institutions whose safety and soundness would be affected adversely.

As required by the Dodd-Frank Act, the FDIC has adopted rules effective April 1, 2011, under which insurance premium assessments are based on an institution's total assets minus its tangible equity (defined as Tier 1 capital) instead of its deposits. Under these rules, an institution with total assets of less than \$10 billion will be assigned to a Risk Category as described above and a range of initial base assessment rates will apply to each category, subject to adjustment downward based on unsecured debt issued by the institution and, except for an institution in Risk Category I, adjustment upward if the institution's brokered deposits exceed 10% of its domestic deposits, to produce total base assessment rates. Total base assessment rates range from 2.5 to 9 basis points for Risk Category I, 9 to 24 basis points for Risk Category II, 18 to 33 basis points for Risk Category III and 30 to 45 basis points for Risk Category IV, all subject to further adjustment upward if the institution holds more than a de minimis amount of unsecured debt issued by another FDIC-insured institution. The FDIC may increase or decrease its rates by 2.0 basis points without further rulemaking. In an emergency, the FDIC may also impose a special assessment.

In October 2008, the FDIC introduced the Temporary Liquidity Guarantee Program (the "TLGP"), a program designed to improve the functioning of the credit markets and to strengthen capital in the financial system during this period of economic distress. The TLGP has two components: 1) a Debt Guarantee Program ("DGP"), guaranteeing newly issued senior unsecured debt and 2) a Transaction Account Guarantee Program ("TAGP"), providing a full guarantee of noninterest bearing deposit transaction accounts, Negotiable Order of Withdrawal ("NOW") accounts paying less than 0.5% annual interest and interest on lawyers trust accounts ("IOLTA"), regardless of the amount. First Savings Bank does not participate in the DGP but did participate in the TAGP. Under the Dodd-Frank Act and the FDIC rules, separate temporary coverage for noninterest bearing transaction accounts and IOLTA accounts became effective on December 31, 2010, terminating on December 31, 2012, so that all funds held in such accounts are fully insured, without limit. Further, unlike the TAGP, all U.S. depository institutions insured by the FDIC must participate; there is no opt out provision. The FDIC does charge a separate assessment for the temporary coverage provided under the Dodd-Frank Act.

The Dodd-Frank Act establishes 1.35% as the minimum reserve ratio. The FDIC has adopted a plan under which it will meet this ratio by September 30, 2020, the deadline imposed by the Dodd-Frank Act. The Dodd-Frank requires the FDIC to offset the effect on institutions with assets less than \$10 billion of the increase in the statutory minimum reserve ratio to 1.35% from the former statutory minimum of 1.15%. The FDIC has not yet announced how it will implement this offset. In addition to the statutory minimum ratio the FDIC must designate a reserve ratio, known as the designated reserve ratio ("DRR"), which may exceed the statutory minimum. The FDIC has established 2.0% as the DRR.

Federally insured institutions are required to pay a Financing Corporation assessment in order to fund the interest on bonds issued to resolve thrift failures in the 1980s. For the quarterly period ended December 31, 2010, the Financing Corporation assessment equaled 1.04 basis points for each \$100 in domestic deposits. These assessments, which may be revised based upon the level of Deposit Insurance Fund deposits, will continue until the bonds mature in the years 2017 through 2019. For 2010, the Bank incurred \$104,000 in FICO assessments.

The FDIC may terminate the deposit insurance of any insured depository institution, including First Savings Bank, if it determines after a hearing that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. It also may suspend deposit insurance temporarily during the hearing process for the permanent termination of insurance, if the institution meets certain criteria. If insurance of accounts is terminated, the accounts at the institution at the time of the termination, less subsequent withdrawals, shall continue to be insured for a period of six months to two years, as determined by the FDIC. We are not aware of any practice, condition or violation that might lead to termination of First Savings Bank's deposit insurance.

Edgar Filing: - Form

Prompt Corrective Action. Federal statutes establish a supervisory framework based on five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. An institution's category depends upon where its capital levels are in relation to relevant capital measures, which include a risk-based capital measure, a leverage ratio capital measure and certain other factors. The federal banking agencies have adopted regulations that implement this statutory framework. Under these

regulations, an institution is treated as well capitalized if its ratio of total capital to risk-weighted assets is 10% or more, its ratio of core capital to risk-weighted assets is 6% or more, its ratio of core capital to adjusted total assets (leverage ratio) is 5% or more and it is not subject to any federal supervisory order or directive to meet a specific capital level. In order to be adequately capitalized, an institution must have a total risk-based capital ratio of not less than 8%, a Tier 1 risk-based capital ratio of not less than 4% and a leverage ratio of not less than 4%. An institution that is not well capitalized is subject to certain restrictions on brokered deposits, including restrictions on the rates it can offer on its deposits generally. Any institution which is neither well capitalized nor adequately capitalized is considered undercapitalized.

Undercapitalized institutions are subject to certain prompt corrective action requirements, regulatory controls and restrictions which become more extensive as an institution becomes more severely undercapitalized. Failure by institutions to comply with applicable capital requirements would, if unremedied, result in progressively more severe restrictions on its activities and lead to enforcement actions, including, but not limited to, the issuance of a capital directive to ensure the maintenance of required capital levels and, ultimately, the appointment of the FDIC as receiver or conservator. Banking regulators will take prompt corrective action with respect to depository institutions that do not meet minimum capital requirements. Additionally, approval of any regulatory application filed for their review may be dependent on compliance with capital requirements.

Although First Savings Bank met the financial ratios for "well capitalized" status at December 31, 2010 based on financial statements prepared in accordance with generally accepted accounting principles in the United States and the general percentages in the regulatory guidelines, First Savings Bank is no longer regarded as "well capitalized" for federal regulatory purposes as a result of the deficiencies cited in the Order. As a result of this reclassification, our FDIC deposit insurance premiums increased and First Savings Bank became subject to restrictions on brokered deposits.

Standards for Safety and Soundness. The federal banking regulatory agencies have prescribed, by regulation, guidelines for all insured depository institutions relating to: internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings and compensation, fees and benefits. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. Each insured depository institution must implement a comprehensive written information security program that includes administrative, technical and physical safeguards appropriate to the institution's size and complexity and the nature and scope of its activities. The information security program also must be designed to ensure the security and confidentiality of customer information, protect against any unanticipated threats or hazards to the security or integrity of such information, protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to any customer and ensure the proper disposal of customer and consumer information. Each insured depository institution must also develop and implement a risk-based response program to address incidents of unauthorized access to customer information in customer information systems. If the FDIC determines that First Savings Bank fails to meet any standard prescribed by the guidelines, the agency may require First Savings Bank to submit to the agency an acceptable plan to achieve compliance with the standard. FDIC regulations establish deadlines for the submission and review of such safety and soundness compliance plans. We are not aware of any conditions relating to these safety and soundness standards which would require submission of a plan of compliance by First Savings Bank.

Capital Requirements. Federally insured savings institutions, such as First Savings Bank, are required to maintain a minimum level of regulatory capital. FDIC regulations recognize two types, or tiers, of capital: core ("Tier 1") capital and supplementary ("Tier 2") capital. Tier 1 capital generally includes common shareholders' equity and noncumulative perpetual preferred stock, less most intangible assets. Tier 2 capital, which is recognized up to 100% of Tier 1 capital for risk-based capital purposes (after any deductions for disallowed intangibles and disallowed deferred tax assets),

Edgar Filing: - Form

includes such items as qualifying general loan loss reserves (up to 1.25% of risk-weighted assets), cumulative perpetual preferred stock, long-term preferred stock (original maturity of at least 20 years), certain perpetual preferred stock, hybrid capital instruments including mandatory convertible debt, term subordinated debt, intermediate-term preferred stock (original average maturity of at least five years) and net unrealized holding gains on equity securities (subject to certain limitations); provided, however, the amount of term

subordinated debt and intermediate term preferred stock that may be included in Tier 2 capital for risk-based capital purposes is limited to 50.0% of Tier 1 capital.

The FDIC currently measures an institution's capital using a leverage limit together with certain risk-based ratios. The FDIC's minimum leverage capital requirement specifies a minimum ratio of Tier 1 capital to average total assets. Most banks are required to maintain a minimum leverage ratio of at least 3% to 4% of total assets. At December 31, 2010, First Savings Bank had a Tier 1 leverage capital ratio of 11.73%. The FDIC retains the right to require a particular institution to maintain a higher capital level based on its particular risk profile.

FDIC regulations also establish a measure of capital adequacy based on ratios of qualifying capital to risk-weighted assets. Assets are placed in one of four categories and given a percentage weight based on the relative risk of that category. In addition, certain off-balance-sheet items are converted to balance-sheet credit equivalent amounts and each amount is then assigned to one of the four categories. Under the guidelines, the ratio of total capital (Tier 1 capital plus Tier 2 capital) to risk-weighted assets must be at least 8% and the ratio of Tier 1 capital to risk-weighted assets must be at least 4%. In evaluating the adequacy of a bank's capital, the FDIC may also consider other factors that may affect a bank's financial condition. Such factors may include interest rate risk exposure, liquidity, funding and market risks, the quality and level of earnings, concentration of credit risk, risks arising from nontraditional activities, loan and investment quality, the effectiveness of loan and investment policies and management's ability to monitor and control financial operating risks.

The DFI requires that net worth equal at least five percent of total assets. At December 31, 2010, First Savings Bank had Tier 1 risk-based capital of 18.38%.

The table below sets forth First Savings Bank's capital position under the prompt corrective action regulations of the FDIC at December 31, 2010 and 2009 and the requirements pursuant to the Order. The Bank's Tier 1 capital ratio was 11.73% and our Total risk-based capital ratio was 19.65% at December 31, 2010 which exceeded the requirements of the Order of 10% and 12%, respectively.

	At December 31,			
	2010		2009	
	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)			
Bank equity capital under GAAP	\$ 142,482		\$ 164,988	
Total risk-based capital	\$ 151,782	19.65 %	\$ 174,480	20.49 %
Total risk-based capital requirement	61,793	8.00	68,107	8.00
Excess	\$ 89,989	11.65 %	\$ 106,373	12.49 %
Tier 1 risk-based capital	\$ 141,970	18.38 %	\$ 163,492	19.20 %
Tier 1 risk-based capital requirement	30,896	4.00	34,054	4.00
Excess	\$ 111,074	14.38 %	\$ 129,438	15.20 %
Tier 1 leverage capital	\$ 141,970	11.73 %	\$ 163,492	12.46 %
Tier 1 leverage capital requirement	48,403	4.00	52,472	4.00
Excess	\$ 93,567	7.73 %	\$ 111,020	8.46 %

Pursuant to minimum capital requirements of the FDIC, the Bank is required to maintain a leverage ratio (capital to assets ratio) of 4% and risk-based capital ratios of Tier 1 capital and total capital (to total risk-weighted assets) of 4%

and 8%, respectively. The Order requires the Bank to maintain Tier 1 capital and total risk-based capital ratios at a minimum of 10% and 12%, respectively. As of December 31, 2010 and 2009, the Bank was classified as an “adequately capitalized” institution under the criteria established by the FDIC.

First Savings Bank's management believes that, under the current regulations, First Savings Bank will continue to meet its minimum capital requirements in the foreseeable future. However, events beyond the control of First Savings Bank, such as a downturn in the economy in areas where it has most of its loans, could adversely affect future earnings and, consequently, the ability of First Savings Bank to meet its capital requirements.

Federal Home Loan Bank System. First Savings Bank is a member of the FHLB, which is one of 12 regional Federal Home Loan Banks that administer the home financing credit function of savings institutions. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. It makes loans or advances to members in accordance with policies and procedures, established by the Board of Directors of the Federal Home Loan Bank, which are subject to the oversight of the Federal Housing Finance Board. All advances from the Federal Home Loan Bank are required to be fully secured by sufficient collateral as determined by the Federal Home Loan Bank. In addition, all long-term advances are required to provide funds for residential home financing. See "Business - Deposit Activities and Other Sources of Funds - Borrowings."

As a member, First Savings Bank is required to purchase and maintain stock in the FHLB. At December 31, 2010, the Bank had \$7.4 million in FHLB stock, which was in compliance with this requirement. First Savings Bank did not receive any dividends from the FHLB for the year ended December 31, 2010. Subsequent to December 31, 2008, the FHLB announced that it was below its regulatory risk-based capital requirement and it is now precluded from paying dividends or repurchasing capital stock. The FHLB is not anticipated to resume dividend payments until its financial results improve. The FHLB has not indicated when dividend payments may resume.

The Federal Home Loan Banks continue to contribute to low- and moderately-priced housing programs through direct loans or interest subsidies on advances targeted for community investment and low- and moderate-income housing projects. These contributions have affected adversely the level of Federal Home Loan Bank dividends paid and could continue to do so in the future. These contributions could also have an adverse effect on the value of Federal Home Loan Bank stock in the future. A reduction in value of First Savings Bank's Federal Home Loan Bank stock may result in a corresponding reduction in its capital.

Emergency Economic Stabilization Act of 2008. In October 2008, the Emergency Economic Stabilization Act of 2008, or EESA, was enacted. The EESA authorizes the Department of the Treasury to purchase from financial institutions and their holding companies up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions and their holding companies in a troubled asset relief program, or TARP. The purpose of TARP is to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase their lending to customers and to each other. Under the TARP Capital Purchase Program, or CPP, the Treasury will purchase debt or equity securities from participating institutions. The TARP also will include direct purchases or guarantees of troubled assets of financial institutions. Participants in the CPP are subject to executive compensation limits and are encouraged to expand their lending and mortgage loan modifications. We did not apply for, or receive, any funds from the TARP CPP primarily because of the additional capital raised in our mutual to stock conversion that was completed in October 2007. EESA also included additional provisions directed at bolstering the economy, which we were able to participate in, such as the temporary increase in FDIC insurance coverage of deposit accounts, which increased from \$100,000 to \$250,000 through December 31, 2013.

Real Estate Lending Standards. FDIC regulations require First Savings Bank to adopt and maintain written policies that establish appropriate limits and standards for real estate loans. These standards, which must be consistent with safe and sound banking practices, must establish loan portfolio diversification standards, prudent underwriting standards, loan administration procedures and documentation and approval and reporting requirements. First Savings Bank is obligated to monitor conditions in its real estate markets to ensure that its standards continue to be appropriate for current market conditions. First Savings Bank's Board of Directors is required to review and approve First Savings

Bank's standards at least annually. The FDIC has published guidelines for compliance with these regulations, including supervisory limitations on loan-to-value ratios for different categories of real estate loans. Under the guidelines, the aggregate amount of all loans in excess of the supervisory loan to value ratios should not exceed 100% of total capital and the total of all loans for commercial, agricultural, multifamily or other

non-one-to-four family residential properties in excess of the supervisory loan-to-value ratios should not exceed 30% of total capital. Loans in excess of the supervisory loan to value ratio limitations must be identified in First Savings Bank's records and reported at least quarterly to First Savings Bank's Board of Directors. First Savings Bank is in compliance with the record and reporting requirements. As of December 31, 2010, First Savings Bank's aggregate loans in excess of the supervisory loan-to-value ratios were 9.7% of total risk-based capital and First Savings Bank's loans on construction, commercial, multifamily or other non-one-to-four family residential properties in excess of the supervisory loan to value ratios were 3.4% of total risk-based capital. The increase in the loan-to-value ratios was a result of the decrease in real estate values that we have experienced during the year ended December 31, 2010 primarily related to our nonperforming assets.

Activities and Investments of Insured State-Chartered Financial Institutions. Federal law generally limits the activities and equity investments of FDIC-insured, state-chartered banks to those that are permissible for national banks. An insured state bank is not prohibited from, among other things, (1) acquiring or retaining a majority interest in a subsidiary, (2) investing as a limited partner in a partnership the sole purpose of which is direct or indirect investment in the acquisition, rehabilitation or new construction of a qualified housing project, provided that such limited partnership investments may not exceed 2% of the bank's total assets, (3) acquiring up to 10% of the voting stock of a company that solely provides or reinsures directors', trustees' and officers' liability insurance coverage or bankers' blanket bond group insurance coverage for insured depository institutions and (4) acquiring or retaining the voting shares of a depository institution owned by another FDIC-insured institution if certain requirements are met.

Washington State has enacted a law regarding financial institution parity. Primarily, the law affords Washington-chartered commercial banks the same powers as Washington-chartered savings banks. In order for a bank to exercise these powers, it must provide 30 days notice to the Director of Financial Institutions and the Director must authorize the requested activity. In addition, the law provides that Washington-chartered savings banks may exercise any of the powers of Washington-chartered commercial banks, national banks and federally-chartered savings banks, subject to the approval of the Director in certain situations. Finally, the law provides additional flexibility for Washington-chartered commercial and savings banks with respect to interest rates on loans and other extensions of credit. Specifically, they may charge the maximum interest rate allowable for loans and other extensions of credit by federally-chartered financial institutions to Washington residents.

Environmental Issues Associated With Real Estate Lending. The Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") is a federal statute that generally imposes strict liability on, all prior and present "owners and operators" of sites containing hazardous waste. However, Congress asked to protect secured creditors by providing that the term "owner and operator" excludes a person whose ownership is limited to protecting its security interest in the site. Since the enactment of the CERCLA, this "secured creditor exemption" has been the subject of judicial interpretations which have left open the possibility that lenders could be liable for cleanup costs on contaminated property that they hold as collateral for a loan. To the extent that legal uncertainty exists in this area, all creditors, including First Savings Bank, that have made loans secured by properties with potential hazardous waste contamination (such as petroleum contamination) could be subject to liability for cleanup costs, which costs often substantially exceed the value of the collateral property.

Federal Reserve System. The Federal Reserve Board requires that all depository institutions maintain reserves on transaction accounts or non-personal time deposits. These reserves may be in the form of cash or noninterest-bearing deposits with the regional Federal Reserve Bank. Negotiable order of withdrawal accounts and other types of accounts that permit payments or transfers to third parties fall within the definition of transaction accounts and are subject to reserve requirements, as are any non-personal time deposits at a savings bank. As of December 31, 2010, First Savings Bank's vault cash exceeded its Regulation D reserve requirements.

Edgar Filing: - Form

Affiliate Transactions. Federal laws strictly limit the ability of banks to engage in certain transactions with their affiliates, including their bank holding companies. Transactions deemed to be a “covered transaction” under Section 23A of the Federal Reserve Act and between a subsidiary bank and its parent company or any nonbank subsidiary of the bank holding company are limited to 10% of the subsidiary bank’s capital and surplus and, with respect to the parent company and all such nonbank subsidiaries, to an aggregate of 20% of the subsidiary

bank's capital and surplus. Further, covered transactions that are loans and extensions of credit generally are required to be secured by eligible collateral in specified amounts. Federal law also requires that covered transactions and certain other transactions listed in Section 23B of the Federal Reserve Act between a bank and its affiliates be on terms as favorable to the bank as transactions with nonaffiliates.

Community Reinvestment Act. Banks are also subject to the provisions of the Community Reinvestment Act of 1977 ("CRA"), which requires the appropriate federal bank regulatory agency to assess a bank's performance under the CRA in meeting the credit needs of the community serviced by the bank, including low and moderate income neighborhoods. The regulatory agency's assessment of the bank's record is made available to the public. Further, a bank's CRA performance must be considered in connection with a bank's application, to among other things, establish a new branch office that will accept deposits, relocate an existing office or merge or consolidate with, or acquire the assets or assume the liabilities of, a federally regulated financial institution or banks that are involved in certain acquisitions by a savings and loan holding company. First Savings Bank received a "satisfactory" rating during its most recent examination.

Dividends. The amount of dividends payable by First Savings Bank to First Financial Northwest depends upon First Savings Bank's earnings and capital position, and is limited by federal and state laws. According to Washington law, First Savings Bank may not declare or pay a cash dividend on its capital stock if it would cause its net worth to be reduced below (1) the amount required for liquidation accounts or (2) the net worth requirements, if any, imposed by the Director of the Washington Department of Financial Institutions. Dividends on First Savings Bank's capital stock may not be paid in an aggregate amount greater than the aggregate retained earnings of First Savings Bank, without the approval of the Director of the Washington Department of Financial Institutions.

The amount of dividends actually paid during any one period is strongly affected by First Savings Bank's policy of maintaining a strong capital position. Federal law further provides that no insured depository institution may pay a cash dividend if it would cause the institution to be "undercapitalized," as defined in the prompt corrective action regulations. Moreover, the federal bank regulatory agencies also have the general authority to limit the dividends paid by insured banks if such payments are deemed to constitute an unsafe and unsound practice.

Under the Order, First Savings Bank is not able to pay dividends to First Financial Northwest without the prior approval of the DFI and the FDIC. For additional information, see Item 1.A. "Risk Factors- Certain regulatory restrictions were recently imposed on us: lack of compliance could result in monetary penalties and/or additional regulatory actions."

Privacy Standards. The Gramm-Leach-Bliley Financial Services Modernization Act of 1999 ("GLBA") modernized the financial services industry by establishing a comprehensive framework to permit affiliations among commercial banks, insurance companies, securities firms and other financial service providers. First Savings Bank is subject to FDIC regulations implementing the privacy protection provisions of the GLBA. These regulations require First Savings Bank to disclose its privacy policy, including informing consumers of its information sharing practices and informing consumers of their rights to opt out of certain practices.

Qualified Thrift Lender Test. Under Section 2303 of the Economic Growth and Regulatory Paperwork Reduction Act of 1996, a savings association must comply with the Qualified Thrift Lender test by either meeting the Qualified Thrift Lender test set forth in the Home Owners' Loan Act and implementing regulations or qualifying as a domestic building and loan association as defined in Section 7701(a)(19) of the Internal Revenue Code of 1986. A savings bank subsidiary of a savings and loan holding company that does not comply with the Qualified Thrift Lender test must comply with the following restrictions on its operations:

-

Edgar Filing: - Form

the institution may not engage in any new activity or make any new investment, directly or indirectly, unless the activity or investment is permissible for a national bank;

- the branching powers of the institution are restricted to those of a national bank; and

- payment of dividends by the institution are subject to the rules regarding payment of dividends by a national bank.

Upon the expiration of three years from the date the institution ceases to meet the Qualified Thrift Lender test, it must cease any activity and not retain any investment not permissible for a national bank (subject to safety and soundness considerations).

As of December 31, 2010, First Savings Bank maintained 75.8% of its portfolio assets in qualified thrift investments and, therefore, met the Qualified Thrift Lender test.

Other Consumer Protection Laws and Regulations. First Savings Bank is subject to a broad array of federal and state consumer protection laws and regulations that govern almost every aspect of its business relationships with consumers. While the list set forth below is not exhaustive, these include the Truth-in-Lending Act, the Truth in Savings Act, the Electronic Fund Transfer Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Real Estate Settlement Procedures Act, the Home Mortgage Disclosure Act, the Fair Credit Reporting Act, the Fair Debt Collection Practices Act, the Right to Financial Privacy Act, the Home Ownership and Equity Protection Act, the Consumer Leasing Act, the Fair Credit Billing Act, the Homeowners Protection Act, the Check Clearing for the 21st Century Act, laws governing flood insurance, laws governing consumer protections in connection with the sale of insurance, federal and state laws prohibiting unfair and deceptive business practices and various regulations that implement some or all of the foregoing. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, collecting loans and providing other services. Failure to comply with these laws and regulations can subject First Savings Bank to various penalties, including but not limited to, enforcement actions, injunctions, fines, civil liability, criminal penalties, punitive damages and the loss of certain contractual rights.

Regulation and Supervision of First Financial Northwest

General. First Financial Northwest is subject to regulation as a savings and loan holding company under the Home Owners' Loan Act, as amended, instead of being subject to regulation as a bank holding company under the Bank Holding Company Act of 1956 because First Savings Bank made an election under Section 10(l) of the Home Owners' Loan Act, in connection with the mutual to stock conversion, to be treated as a "savings association" for purposes of Section 10 of the Home Owners' Loan Act. As a result, First Financial Northwest registered with the OTS and is subject to OTS regulations, examinations, supervision and reporting requirements relating to savings and loan holding companies. First Financial Northwest is also required to file certain reports with, and otherwise comply with the rules and regulations of the Securities and Exchange Commission. As a subsidiary of a savings and loan holding company, First Savings Bank is subject to certain restrictions in its dealings with First Financial Northwest and affiliates thereof.

First Financial Northwest is a nondiversified unitary savings and loan holding company within the meaning of federal law. Generally, companies that become savings and loan holding companies following the May 4, 1999 grandfather date in the Gramm-Leach-Bliley Act of 1999 may engage only in the activities permitted for financial institution holding companies under the law for multiple savings and loan holding companies.

Although savings and loan holding companies are not currently subject to specific capital requirements or specific restrictions on the payment of dividends or other capital distributions, Federal regulations do prescribe such restrictions on subsidiary savings institutions as described above. Because First Savings Bank is treated as a savings association subsidiary of a savings and loan holding company, it must notify the OTS 30 days before declaring any dividend to First Financial Northwest. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the OTS and the OTS has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of First Savings Bank.

Capital Requirements for First Financial Northwest

Under the Dodd-Frank Act, savings and loan holding companies will not be subject to any capital requirements for five years. The OTS, however, expects First Financial Northwest to support First Savings Bank, including providing additional capital to First Savings Bank when it does not meet its capital requirements. Under the Dodd-Frank Act, the federal banking regulators must require any company that controls an FDIC-insured depository institution to serve as a source of strength for the institution, with the ability to provide financial assistance if the institution suffers financial distress, effective when the responsibilities of the OTS are transferred to the Federal Reserve.

Acquisition of Control. Under the federal Change in Bank Control Act, a notice must be submitted to the OTS if any person (including a company), or group acting in concert, seeks to acquire “control” of a savings and loan holding company or savings association. An acquisition of control can occur upon the acquisition of 10% or more of the voting stock of a savings and loan holding company or savings institution or as otherwise defined by the OTS. Under the Change in Bank Control Act, the OTS has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquiror and the anti-trust effects of the acquisition. Any company that so acquires control would then be subject to regulation as a savings and loan holding company.

Restrictions on Dividends. First Financial Northwest's ability to declare and pay dividends may depend in part on dividends received from First Savings Bank. The Revised Code of Washington regulates the distribution of dividends by savings banks and states, in part, that dividends may be declared and paid out of accumulated net earnings, provided that the bank continues to meet its surplus requirements. In addition, dividends may not be declared or paid if First Savings Bank is in default in payment of any assessment due the FDIC. On April 14, 2010, in connection with our most recent examination by the OTS, the members of the Board of Directors of First Financial Northwest entered into an informal supervisory agreement (a memorandum of understanding (“MOU)). Under the terms of the MOU, First Financial Northwest agreed, among other things, to provide notice to and obtain written non-objection from the OTS prior to declaring a dividend. For additional information, see Item 1.A. “Risk Factors- Certain regulatory restrictions were recently imposed on us: lack of compliance could result in monetary penalties and/or additional regulatory actions.”

Limitations on Transactions with Affiliates. Transactions between savings institutions and any affiliate are governed by Sections 23A and 23B of the Federal Reserve Act. An affiliate of a savings institution is any company or entity which controls, is controlled by or is under common control with the savings institution. In a holding company context, the holding company and any companies which are controlled by such holding companies are affiliates of the savings institution. Generally, Section 23A limits the extent to which the savings institution or its subsidiaries may engage in “covered transactions” with any one affiliate to an amount equal to 10% of the institution’s capital stock and surplus and contain an aggregate limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus. Section 23B applies to “covered transactions” as well as certain other transactions and requires that all transactions be on terms substantially the same, or at least as favorable, to the savings institution as those provided to a nonaffiliate. The term “covered transaction” includes the making of loans to, purchase of assets from and issuance of a guarantee to an affiliate and similar transactions. Section 23B transactions also include the provision of services and the sale of assets by a savings institution to an affiliate. In addition to the restrictions imposed by Sections 23A and 23B, Section 11 of the Home Owners’ Loan Act prohibits a savings institution from (1) making a loan or other extension of credit to an affiliate, except for any affiliate which engages only in certain activities which are permissible for bank holding companies or (2) purchasing or investing in any stocks, bonds, debentures, notes or similar obligations of any affiliate, except for affiliates which are subsidiaries of the savings institution.

Edgar Filing: - Form

In addition, Sections 22(g) and (h) of the Federal Reserve Act place restrictions on loans to executive officers, directors and principal shareholders. Under Section 22(h), loans to a director, executive officer or greater than 10% shareholder of a savings institution and certain affiliated interests, may not exceed, together with all other outstanding loans to such person and affiliated interests, the savings institution's loans to one borrower limit (generally equal to 15% of the institution's unimpaired capital and surplus). Section 22(h) also requires that loans to

directors, executive officers and principal shareholders be made on terms substantially the same as offered in comparable transactions to other persons unless the loans are made pursuant to a benefit or compensation program that (1) is widely available to employees of the institution and (2) does not give preference to any director, executive officer or principal shareholder, or certain affiliated interests, over other employees of the savings institution. Section 22(h) also requires prior board approval for certain loans. In addition, the aggregate amount of extensions of credit by a savings institution to all insiders cannot exceed the institution's unimpaired capital and surplus. Furthermore, Section 22(g) places additional restrictions on loans to executive officers. At December 31, 2010, First Savings Bank was in compliance with these restrictions.

Restrictions on Acquisitions. Except under limited circumstances, savings and loan holding companies are prohibited from acquiring, without prior approval of the Director of the OTS, (1) control of any other savings institution or savings and loan holding company or substantially all the assets thereof or (2) more than 5% of the voting shares of a savings institution or holding company thereof which is not a subsidiary. Except with the prior approval of the Director of the OTS, no director or officer of a savings and loan holding company or person owning or controlling by proxy or otherwise more than 25% of such company's stock, may acquire control of any savings institution, other than a subsidiary savings institution, or of any other savings and loan holding company.

The Director of the OTS may only approve acquisitions resulting in the formation of a multiple savings and loan holding company which controls savings institutions in more than one state if: (1) the multiple savings and loan holding company involved controls a savings institution which operated a home or branch office located in the state of the institution to be acquired as of March 5, 1987; (2) the acquiror is authorized to acquire control of the savings institution pursuant to the emergency acquisition provisions of the Federal Deposit Insurance Act or (3) the statutes of the state in which the institution to be acquired is located specifically permit institutions to be acquired by the state-chartered institutions or savings and loan holding companies located in the state where the acquiring entity is located (or by a holding company that controls such state-chartered savings institutions).

Federal Securities Laws. First Financial Northwest's common stock is registered with the Securities and Exchange Commission under Section 12(b) of the Securities Exchange Act of 1934, as amended. We are subject to information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934.

Sarbanes-Oxley Act of 2002. First Financial Northwest, as a public company, is subject to the Sarbanes-Oxley Act of 2002, which implements a broad range of corporate governance and accounting measures for public companies designed to promote honesty and transparency in corporate America and better protect investors from corporate wrongdoing. The Sarbanes-Oxley Act of 2002 was signed into law by President Bush on July 30, 2002 in response to public concerns regarding corporate accountability in connection with several accounting scandals. The stated goals of the Sarbanes-Oxley Act are to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws.

The Sarbanes-Oxley Act includes very specific additional disclosure requirements and new corporate governance rules, requires the Securities and Exchange Commission and securities exchanges to adopt extensive additional disclosure, corporate governance and other related rules and mandates further studies of certain issues by the Securities and Exchange Commission and the Comptroller General.

Taxation

Federal Taxation

Edgar Filing: - Form

General. First Financial Northwest and First Savings Bank are subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to First Financial Northwest or First Savings Bank. The tax years still open for review by the Internal Revenue Service are 2006 through 2009.

Beginning in 2007, First Financial Northwest files a consolidated federal income tax return with First Savings Bank. Accordingly, any cash distributions made by First Financial Northwest to its shareholders are considered to be taxable dividends and not as a non-taxable return of capital to shareholders for federal and state tax purposes.

Method of Accounting. For federal income tax purposes, First Financial Northwest currently reports its income and expenses on the accrual method of accounting and uses a fiscal year ending on December 31 for filing its federal income tax return.

Minimum Tax. The Internal Revenue Code imposes an alternative minimum tax at a rate of 20% on a base of regular taxable income plus certain tax preferences, called alternative minimum taxable income. The alternative minimum tax is payable to the extent such alternative minimum taxable income is in excess of an exemption amount. Net operating losses can offset no more than 90% of alternative minimum taxable income. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. First Savings Bank has not been subject to the alternative minimum tax, nor does it have any such amounts available as credits for carryover.

Net Operating Loss Carryovers. A financial institution may carry back net operating losses to the preceding five taxable years and forward to the succeeding 20 taxable years. This provision applies to losses incurred in taxable years beginning after August 6, 1997.

Charitable Contribution Carryovers. We may carryforward charitable contributions to the succeeding five taxable years. The utilization of the charitable contribution carryforward may not exceed 10% of taxable income as defined by the federal taxation laws. At December 31, 2010, First Financial Northwest had a charitable contribution carryforward for federal income tax purposes of \$4.8 million. This carryforward was generated from our creation of the First Financial Northwest Foundation to which we contributed a block of stock in connection with the mutual to stock conversion, having a market value of \$16.9 million. During the year ended December 31, 2010, we recorded an additional valuation allowance of \$2.8 million relating to our charitable contribution carryforward. At December 31, 2010, this valuation allowance totaled \$4.8 million. This amount represents the tax effect of the estimated amount of the First Financial Northwest's charitable contribution carryforward that management believes will not be utilized in the next three years.

Corporate Dividends-Received Deduction. First Financial Northwest may eliminate from its income dividends received from First Savings Bank as a wholly-owned subsidiary of First Financial Northwest which files a consolidated return with First Savings Bank. The corporate dividends-received deduction is 100%, or 80%, in the case of dividends received from corporations with which a corporate recipient does not file a consolidated tax return, depending on the level of stock ownership of the payor of the dividend. Corporations which own less than 20% of the stock of a corporation distributing a dividend may deduct 70% of dividends received or accrued on their behalf.

Washington State Taxation

First Financial Northwest and its subsidiaries are subject to a business and occupation tax imposed under Washington state law at the rate of 1.80% of gross receipts. In addition, various municipalities also assess business and occupation taxes at differing rates. Interest received on loans secured by first lien mortgages or deeds of trust on residential properties, rental income from properties, and certain investment securities are exempt from this tax.

An audit by the Washington State Department of Revenue was completed for the years 2005 through 2008. The findings resulted in an immaterial amount paid to the State of Washington.

Executive Officers of First Financial Northwest, Inc.

Edgar Filing: - Form

The current executive officers of First Financial Northwest consist of the same individuals who are executive officers of First Savings Bank. The business experience for at least the past five years for the executive officers of First Financial Northwest or First Savings Bank is set forth below.

44

Victor Karpiak, age 56, is Chairman of the Board, President and Chief Executive Officer of First Financial Northwest and First Savings Bank. Prior to his appointment as President of First Savings Bank in 1999, he served as Executive Vice President and Chief Financial Officer. Mr. Karpiak has served as President and Chief Financial Officer of First Financial Holdings, MHC and First Financial of Renton, predecessors of First Financial Northwest, since they were established in 2002. In January 2005, he was appointed Chairman of the Board and Chief Executive Officer of First Financial Holdings, MHC, First Financial of Renton and First Savings Bank. He has been with First Savings Bank for 33 years.

Kari A. Stenslie, age 46, is Vice President and Chief Financial Officer of First Financial Northwest and First Savings Bank. Prior to joining First Financial Northwest on February 19, 2008, she was employed by First Mutual Bancshares, Inc. Bellevue, Washington and its subsidiary, First Mutual Bank, from 1988 to 2008 in accounting related positions. From 1999 until its acquisition in February 2008 she was First Mutual's Senior Vice President and Controller. Ms. Stenslie is a certified public accountant with 21 years of financial institution experience. She received her Bachelor of Arts degree in Business from Seattle University. Ms. Stenslie's professional affiliations include the American Institute of Certified Public Accountants, Washington State Society of Certified Public Accountants and the Institute of Management Accountants.

Herman "Rob" Robinson, age 65, is Senior Vice President and Chief Lending Officer of First Savings Bank. Prior to joining First Savings Bank on June 1, 2010, Mr. Robinson was Senior Vice President, Senior Credit Approval Officer at East West Bank, the successor to United Commercial Bank, from 2000 to May 2010. Mr. Robinson has over 40 years of banking experience. During his banking career, Mr. Robinson has held positions such as Chief Credit Officer, Manager of Special Credits and Senior Vice President and Manager of Commercial Lending at various banks.

M. Scott Gaspard, age 57, is Senior Vice President, External Affairs of First Financial Northwest and First Savings Bank. Prior to joining First Financial Northwest on January 1, 2009, he was Senior Vice President, Manager Government and Industry Relations at Washington Mutual, Inc. from 2003 until December 31, 2008. Before that, Mr. Gaspard served as an officer of the Washington Financial League from 1979 to 2003, becoming President in 1981. Mr. Gaspard received his Bachelor of Science degree in Business Administration from the University of Puget Sound.

Roger Elmore, age 44, is Vice President of First Financial Northwest and Senior Vice President and Chief Administrative Officer of First Savings Bank. Prior to his promotion in 2008, Mr. Elmore served as Vice President and Senior Operations Officer of First Savings Bank, a position he had held since 2004. Before that Mr. Elmore was Vice President Risk Operations Division Manager at Washington Mutual Bank from 2001 through 2004. Prior to 2001, Mr. Elmore held numerous management positions at Washington Mutual Bank.

Item 1A. Risk Factors.

An investment in our common stock is subject to risks inherent in our business. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included in this report. In addition to the risks and uncertainties described below, other risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and results of operations. The value or market price of our common stock could decline due to any of these identified or other risks and you could lose all or part of your investment.

Certain regulatory restrictions were recently imposed on us: lack of compliance could result in monetary penalties and/or additional regulatory actions.

Edgar Filing: - Form

The Bank entered into a Stipulation to the Issuance of a Consent Order (the "Order") by the FDIC and the DFI, which became effective on September 24, 2010. Under the terms of the Order, the Bank is required, among other things, to take certain measures in the areas of management, capital, classified assets, loan loss allowance

determination, lending, liquidity management, and board oversight. Specifically, the Order requires that the Bank maintain a Tier 1 capital ratio and a total risk-based capital ratio of at least 10% and 12%, respectively, and reduce assets classified as substandard at the time of its most recent examination to below 65% by March 2011. The Bank must also revise its lending and collection and written funds management and liquidity policies, including a plan to reduce its reliance on non-core funding sources, revise its policy for determining the allowance for loan losses, develop a plan to reduce its commercial real estate concentrations and submit to regulators a strategic business plan and independent management study. The Order specifies certain timeframes for meeting these requirements and the Bank must furnish periodic progress reports to the FDIC and DFI regarding its compliance with the Order. In addition, the Bank will not be able to pay cash dividends to First Financial Northwest without prior approval from the FDIC and DFI.

On April 14, 2010, in connection with our most recent examination by the OTS, the members of the Board of Directors of First Financial Northwest entered into an informal supervisory agreement (a memorandum of understanding ("MOU)). Under the terms of the MOU, the Company agreed, among other things, to provide notice to and obtain written non-objection from the OTS prior to the Company (a) declaring a dividend or redeeming any capital stock; and (b) incurring, issuing, renewing or repurchasing any new debt. In addition, both the Company and the Bank must obtain prior regulatory approval before adding any new director or senior executive officer or changing the responsibilities of any current senior executive officer or pay pursuant to or by entering into certain severance and other forms of compensation agreements.

At December 31, 2010, First Savings Bank each exceeded all current regulatory capital requirements, including the requirements included in the Order (See Item 1, "Business Regulation," and Note 13 of the Notes to the Consolidated Financial Statements for additional information regarding regulatory capital requirements for First Savings Bank for the year ended December 31, 2010.) and the Bank has implemented a comprehensive plan in an attempt to achieve full compliance with the Order. The Order also requires assets classified as substandard as a percentage of Tier 1 capital plus ALLL, at the time of the most recent examination, be below 65% by March 2011. As of December 31, 2010, the Bank met this requirement and continues to reduce these adversely classified assets.

The Order and MOU will remain in effect until stayed, modified, terminated or suspended by the FDIC and the DFI and OTS, as the case may be. If either the Company or the Bank failed to comply with the Order or the MOU, respectively, it could be subject to various remedies, including among others, the regulator's exercise of powers to enjoin "unsafe or unsound" practices, to require affirmative action to correct any conditions resulting from any violation or practice, to direct an increase in capital, to restrict growth, to remove officers and/or directors and to assess civil monetary penalties. Management of the Bank has been taking action and implementing programs to comply with the requirements of the Order. Although compliance will be determined by the FDIC and the DFI, management believes that the Bank will comply in all material respects with the Order. Any of these regulators may determine at their sole discretion that the matters covered in the Order have not been addressed satisfactorily, or that any current or past actions, violations, or deficiencies could be the subject of further regulatory enforcement actions. Such enforcement actions could involve penalties or limitations on our business and negatively affect our ability to implement our business plan, pay dividends on our common stock or the value of our common stock as well as our financial condition and results of operations.

Our business may continue to be adversely affected by downturns.

Substantially all of our loans are to businesses and individuals in the state of Washington. A continuing decline in the economies of the four counties in which we operate, which we consider to be our primary market area, could have a material adverse effect on our business, financial condition, results of operations and prospects. In particular, Washington has experienced substantial home price declines and increased foreclosures and has experienced above average unemployment rates.

A further deterioration in economic conditions in the market area we serve could result in the following consequences, any of which could have a materially adverse impact on our business, financial condition and results of operations:

46

- loan delinquencies, problem assets and foreclosures may increase;
 - demand for our products and services may decline;
- collateral for loans made may decline further in value, in turn reducing customers' borrowing power, reducing the value of assets and collateral associated with existing loans; and
 - the amount of our low-cost or noninterest-bearing deposits may decrease.

Our construction/land development loans are based upon estimates of costs and the value of the completed project.

We make construction/land development loans to contractors and builders primarily to finance the construction of single-family homes and subdivisions. We originate these loans whether or not the collateral property underlying the loan is under contract for sale. At December 31, 2010, construction/land development loans totaled \$56.5 million, or 6.3% of our total loan portfolio. Land loans, which are loans made with land as security, totaled \$27.3 million, or 3.1%, of our total loan portfolio at December 31, 2010. Land loans include raw land and land acquisition and development loans. In addition, at December 31, 2010 we had \$5.4 million of one-to-four family construction loans and \$32.5 million of commercial and multifamily construction loans structured to be converted to permanent loans at the end of the construction phase.

Construction/land development lending generally involves additional risks because funds are advanced upon the security of the project, which is of uncertain value prior to its completion. Because of the uncertainties inherent in estimating construction costs, as well as the market value of the completed project and the effects of governmental regulation of real property, it is relatively difficult to evaluate accurately the total funds required to complete a project and the related loan-to-value ratio. In addition, because of current uncertainties in the residential real estate market, property values have become more difficult to determine than they have historically been. This type of lending also typically involves higher loan principal amounts and is often concentrated with a small number of builders. A further downturn in housing, or the real estate market, could increase loan delinquencies, defaults and foreclosures, and significantly impair the value of our collateral and our ability to sell the collateral upon foreclosure. Many of our builders have more than one loan outstanding with us and also have residential mortgage loans for rental properties with us. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss.

These loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project and the ability of the borrower to sell or lease the property or obtain permanent take-out financing, rather than the ability of the borrower or guarantor to repay principal and interest. These loans are also generally more difficult to monitor. In addition, speculative construction loans to a builder are often associated with homes that are not pre-sold and thus pose a greater potential risk than construction loans to individuals on their personal residences. At December 31, 2010, \$29.2 million of our construction/land development loans were for speculative construction loans and \$32.9 million, or 58.2%, of our construction/land development loans were classified as nonperforming.

Our level of commercial real estate loans may expose us to increased lending risks.

While commercial real estate lending may potentially be more profitable than single-family residential lending, it is generally more sensitive to regional and local economic conditions, making loss levels more difficult to predict. Collateral evaluation and financial statement analysis in these types of loans requires a more detailed analysis at the time of loan underwriting and on an ongoing basis. In our primary market areas of King, Pierce, Snohomish and Kitsap counties, Washington, the housing market has slowed, with weaker demand for housing, higher inventory levels and longer marketing times. A further downturn in housing, or in the real estate market, could increase loan delinquencies, defaults and foreclosures, and significantly impair the value of our collateral and our ability to sell the

collateral upon foreclosure. Many of our commercial borrowers have more than one loan outstanding with us. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss.

At December 31, 2010, we had \$417.6 million of commercial and multifamily real estate loans, representing 46.8% of our total loan portfolio. These loans typically involve higher principal amounts than other types of loans and repayment is dependent upon income generated, or expected to be generated, by the property securing the loan in amounts sufficient to cover operating expenses and debt service, which may be adversely affected by changes in the economy or local market conditions. For example, if the cash flow from the borrower's project is reduced as a result of leases not being obtained or renewed, the borrower's ability to repay the loan may be impaired. Commercial and multifamily mortgage loans also expose a lender to greater credit risk than loans secured by residential real estate because the collateral securing these loans typically cannot be sold as easily as residential real estate. In addition, many of our commercial and multifamily real estate loans are not fully amortizing and contain large balloon payments upon maturity. Such balloon payments may require the borrower to either sell or refinance the underlying property in order to make the payment, which may increase the risk of default or non-payment.

A secondary market for most types of commercial real estate and construction loans is not readily liquid, so we have less opportunity to mitigate credit risk by selling part or all of our interest in these loans. As a result of these characteristics, if we foreclose on a commercial or multifamily real estate loan, our holding period for the collateral typically is longer than for one-to-four family residential loans because there are fewer potential purchasers of the collateral. Accordingly, charge-offs on commercial and multifamily real estate loans may be larger on a per loan basis than those incurred with our residential or consumer loan portfolios.

Our concentration in non-owner occupied real estate loans may expose us to increased credit risk.

At December 31, 2010, \$173.4 million, or 43.5% of our one-to-four family residential mortgage loan portfolio and 19.4% of our total loan portfolio, consisted of loans secured by non-owner occupied residential properties. At December 31, 2010, nonperforming, non-owner occupied one-to-four family residential loans amounted to \$14.7 million. Prior to foreclosure, loans that were classified as non-owner occupied residential properties and are now classified as held as other real estate owned ("OREO"), amounted to \$11.9 million at December 31, 2010. Loans secured by non-owner occupied properties generally expose a lender to greater risk of non-payment and loss than loans secured by owner occupied properties because repayment of such loans depend primarily on the tenant's continuing ability to pay rent to the property owner, who is our borrower, or, if the property owner is unable to find a tenant, the property owner's ability to repay the loan without the benefit of a rental income stream. In addition, the physical condition of non-owner occupied properties is often below that of owner occupied properties due to lax property maintenance standards, which has a negative impact on the value of the collateral properties. Furthermor
