- (1) Also includes any sale of the notes and the underlying common stock by pledgees, donees, transferees or other successors in interest that receive such securities by pledge, gift, distribution or other non-sale related transfer from the named selling securityholders. Information about other selling securityholders will be set forth in future prospectus supplements or in other documents that we file from time to time with the Securities and Exchange Commission that are incorporated by reference in the prospectus, if required. See "Where You Can Find More Information" in the prospectus.
- (2) Excludes common stock issuable upon conversion of the selling securityholder's notes.
- (3) Assumes conversion of all of the selling securityholder's notes at a conversion rate of 12.9783 per note and a cash payment in lieu of the issuance of any fractional share interest. However, this conversion rate is subject to adjustment as described under "Description of the Notes -- Conversion Rights" in the prospectus. As a result, the number of shares of

common stock issuable upon conversion of the notes may increase or decrease in the future.

- (4) Reflects rounding down of fractional common stock issuable to each selling securityholder upon conversion of the notes.
- (5) Calculated based on Rule 13d-3 of the Securities Exchange Act of 1934 using 27,737,075 shares of common stock outstanding as of April 30, 2004. In calculating this amount, we did not treat as outstanding the common stock issuable upon conversion of notes.
- (6) Consists of 9,000 shares held by Allstate Insurance Company, 3,100 shares held by Allstate Retirement Plan and 1,100 shares held by Agents Pension Plan.
- (7) The figures in these columns are based on information supplied to us, as of May 26, 2004, by the respective selling security holders named in the table. As of that date, these selling securityholders had supplied us with information indicating that, collectively, they owned more than \$305,000,000 aggregate principal amount of notes (which would be convertible into more than 3,958,382 shares of common stock), reflecting, we believe, that one or more selling securityholders supplied us with information for inclusion in the table and then sold their notes in transactions exempt from the registration requirements of the Securities Act to persons who also supplied us with information with respect to the same notes. However, since this prospectus supplement would not be applicable to any sale of notes after they have been publicly sold utilizing this prospectus supplement or a prior prospectus supplement or prospectus, no more than \$305,000,000 principal amount of notes, nor more than 3,958,382 shares of common stock, could be sold utilizing this prospectus supplement. Accordingly, the \$305,000,000 and the 3,958,382 share totals in these columns have been retained and represent the maximum principal amount of notes and maximum number of shares of common stock that could be sold hereunder.

The above table sets forth information as of May 26, 2004, based on information supplied to us by the selling securityholders named in the table. The selling securityholders listed in the above table may have sold or transferred, in transactions exempt from the registration requirements of the Securities Act, some or all of their notes since the date on which the information was supplied to us and presented in the above table. Information about the selling securityholders may change over time. Any changed information supplied to us will be set forth in future prospectus supplements.

Investing in the notes involves risks that are described in the "Risk Factors" section beginning on page 9 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement. Any representation to the contrary is a criminal offense.

The date of this prospectus supplement is May 27, 2004.
