APPRAISAL REPORT

RJ-0284/08-01B

1/5 COPIES

REPORT: RJ-0284/08-01B

BASE DATE: October 31, 2008

APPLICANTS: TERMINAL QUÍMICO DE ARATU S/A - TEQUIMAR, with head office located at Via Matoim, s/nº, Porto de Aratu, Candeias, State of Bahia, registered with the General Roster of Corporate Taxpayers (CNPJ/MF) under no. 14.688.220/0001-64, hereinafter called TEQUIMAR, and;

ULTRAPAR PARTICIPAÇÕES S.A., with head office located at Av. Brigadeiro Luiz Antonio, nº. 1.343, 9º andar, São Paulo, State of São Paulo, registered with the General Roster of Corporate Taxpayers (CNPJ/MF) under no. 33.256.439/0001-39, hereinafter called ULTRAPAR

OBJECTS: UNIÃO TERMINAIS E ARMAZÉNS GERAIS LTDA, with head office located at Rua União, nº. 765, sala 122, Mauá, State of São Paulo, registered with the General Roster of Corporate Taxpayers (CNPJ/MF) under no. 50.280.387/0001-55, hereinafter called UNIÃO TERMINAIS or UT; and

LEXINGTON PARTICIPAÇÕES LTDA, with head office located at Rua Araújo Porto Alegre, 36, 4º andar, City and State of Rio de Janeiro, registered with the General Roster of Corporate Taxpayers (CNPJ/MF) under no. 09.469.509/0001-52, hereinafter called LEXINGTON.

PURPOSE: Calculation of the net profit value of the shares of UNIÃO TERMINAIS and LEXINGTON, in order to assess the applicability of Article 256, II, c) of Act no. 6.404/76 (Corporate Law), based on the acquisition of the totality of shares of UNIÃO TERMINAIS and LEXINGTON by TEQUIMAR.

EXECUTIVE SUMMARY

APSYS CONSULTORIA EMPRESARIAL Ltda. was hired by TEQUIMAR and by ULTRAPAR to calculate the net profit value of the shares of UNIÃO TERMINAIS and LEXINGTON, in order to assess the applicability of Article 256, II, c), of Act no. 6.404/76 (Corporate Law) based on the acquisition of UNIÃO TERMINAIS and LEXINGTON by TEQUIMAR.

In this report, we used the future profitability method to calculate the net profit of UNIÃO TERMINAIS and LEXINGTON. The future profitability method is based on retrospective analysis and scenario projection. The economic-financial modeling starts from the definition of the macroeconomic, sales, cost and investment premises of the company or business facility being appraised. The macroeconomic premises used in this work are based on estimates disclosed by IBGE (Brazilian Institute of Geography and Statistics), PIB (Gross Domestic Product), BANCO CENTRAL (Central Bank), BNDES (Brazil's National Development Bank), etc. Projections of volume and sales price of services, production, costs and investment were estimated in accordance with the historical performance of UNIÃO TERMINAIS and LEXINGTON, as well as with the multi-annual projections of the companies.

INTRODUCTION

APSYS CONSULTORIA EMPRESARIAL Ltda hereinafter called APSIS, with head office located at Rua São José, nº. 90, grupo 1.802, in the City of Rio de Janeiro, State of Rio de Janeiro, registered with the General Roster of Corporate Taxpayers (CNPJ/MF) under no. 27.281.922/0001-70, was hired by TEQUIMAR and ULTRAPAR to calculate the net profit value per share of UNIÃO TERMINAIS and LEXINGTON in order to assess the applicability of Article 256, II, c), of Act no. 6.404/76 (Corporate Law), based on the acquisition of UNIÃO TERMINAIS and LEXINGTON.

In preparing this report, data and information supplied by third parties were used, in the form of documents and verbal interview with clients. The estimates used in this process are based on documents and information, which include, among others, the following:

§	Bylaws or Articles of Incorporation of the companies;
§	Financial statements of the group's companies;
§	Organization chart and corporate holdings;

The APSIS team responsible for the coordination and performance of this work consists of the following professionals:

§	AMILCAR DE CASTRO project manager
§	ANA CRISTINA FRANÇA DE SOUZA civil engineer post-graduated in accounting sciences (CREA/RJ 91.1.03043-4)
§	CESAR DE FREITAS SILVESTRE accountant (CRC/RJ 044779/O-3)
§	CLAUDIO MARÇAL DE FREITAS accountant (CRC/RJ 55029/O-1)
§	FLAVIO LUIZ PEREIRA accountant (CRC/RJ 022016-O-9)
§	LUIZ PAULO CESAR SILVEIRA mechanical engineer master of business management (CREA/RJ 89.1.00165-1)
§	MARCELO UNFER PARABONI business manager post-graduated in financial management (CRA/RJ 20-47.164-6)
§	MARGARETH GUIZAN DA SILVA OLIVEIRA civil engineer (CREA/RJ 91.1.03035-3)
	RICARDO DUARTE CARNEIRO MONTEIRO civil engineer

post-graduated in economic engineering (CREA/RJ 30137-D)

§ SÉRGIO FREITAS DE SOUZA
economist (CORECON/RJ 23521-0)

§ WASHINGTON FERREIRA BRAGA

2. PRINCIPLES AND QUALIFICATIONS

This report strictly complies with the fundamental principles described below.

§ The consultants and appraisers have no personal bias towards the subject matter involved in this report nor derive any advantage from it.

§ The professional fees of APSIS are not, in any way, subject to the conclusions of this report.

§ The report was prepared by APSIS and no one, other than the consultants themselves, prepared the analyses and respective conclusions.

§ In this report, one assumes that the information received from third parties is correct, and the sources thereof are contained in said report.

§ To the best knowledge and credit of the consultants, the analyses, opinions and conclusions presented in this report are based on data, diligence, research and surveys that are true and correct.

§ APSIS assumes full responsibility for the matter of Appraisal Engineering, including implicit appraisals, in the exercise their honorable functions, primarily established in the appropriate laws, codes or regulations.

§ For projection purposes, we start from the premise of the inexistence of liens or encumbrances of any nature, judicial or extrajudicial, affecting the purpose of the relevant work, other than those listed in this report.

§ This Report meets the specifications and criteria established by the standards of the Brazilian Association of Technical Standards (ABNT), the specifications and criteria established by USPAP (Uniform Standards of Professional Appraisal Practice), in addition to the requirements imposed by different bodies, such as: the Treasury Department, the Central Bank of Brazil, CVM (the Brazilian equivalent to the US Securities and Exchange Commission), SUSEP (Private Insurance Superintendence), etc.

§ The report presents all the restrictive conditions imposed by the methodologies adopted, which affect the analyses, opinions and conclusions contained in the same.

§ APSIS declares that it does not have any direct or indirect interests in the companies contemplated in this report or their respective controllers or in the operation to which the "Protocol and Justification" refer, there being not relevant circumstance, which may characterize conflict or communion of interests, whether potential or current, to the issuance of this Appraisal Report.

§ In the course of our work, the controllers and managers of the companies contemplated in this report did not direct, limit, hinder or practice any acts, which have or may have compromised access, use or knowledge of information, property, documents or work methodologies relevant to the quality of our conclusions.

§ The Report was prepared in strict compliance with the postulates set forth in the Professional Code of Ethics of CONFEA – Federal Council of Engineering, Architecture and Agronomy and of the Legal Institute of Engineering.

APSIS CONSULTORIA
REPORT RJ-0284/08-01B

3.

RESPONSIBILITY LIMITS

§ In the preparation of this report, APSIS used historic data and information audited by third parties or not audited and projected non-audited data, supplied in writing or verbally by the company's management or obtained from the sources mentioned. Therefore, APSIS assumed as true the data and information obtained for this report and does not have any responsibility in connection with their truthfulness.

§ Our work was developed for use by the applicants aiming at the already described objectives. It may, thus, be disclosed as part of the documents related to the corporate reorganization of TEQUIMAR, with the mention of this work in related publications being authorized, and it may further be filed at CVM and in the American Securities and Exchange Commission – SEC, as well as made available to shareholders and third parties, including through the websites of the companies involved.

§ We highlight that understanding of the conclusion of this report will take place by reading it and its attachments in full. Therefore, conclusions from partial reading may not be extracted.

§ The scope of this work did not include audit of the financial statements or revision of the works performed by its auditors.

§ We do not take responsibility for occasional losses to the applicants or to their shareholders, directors, creditors or other parties as a result of the use of data and information supplied by the company and set forth in this report.

§ The analyses and conclusions contained herein are based on several premises, held on this date, of future operational projections, such as: macroeconomic factors, amounts practiced by the market, exchange rate variations, sale prices, volumes, market share, revenues, taxes, investments, operational margins, etc. Thus, future results may differ from any prediction or estimate contained in this report.

§ This appraisal does not reflect events and their respective impact, having occurred after the date of issue of this report.

4. APPRAISAL OF UNIÃO TERMINAIS AND LEXINGTON

4.1. METHODOLOGY USED

INCOME APPROACH: FUTURE PROFITABILITY

This method defines the company's future profitability by way of its projected net profit, the result of which is then brought to present market value.

The projection period for net profit is determined by considering the time the company will take to introduce a stable operational activity, that is, without operational variations deemed relevant. Net profit is then brought to current market value through the use of a discount rate which will reflect the risk associated to the market, to the company and to capital structure.

PROJECTION FOR FUTURE RESULTS

To calculate future profitability we used Net Profit as a measure for income, where:

Profit before non-cash items, interest and taxes (EBITDA)

(-) Non-cash items (depreciation and amortization)

(-) Financial revenues and expenses

(=) Net profit before taxes (EBIT)

(-) Income Tax and Social Contribution (IR/CSSL)

(=) Net profit after taxes

RESIDUAL VALUE

Perpetuity is contemplated after the end of the projection period, which considers all the results to be generated after the last projection year and their respective growth. The company's residual value (perpetuity) is generally estimated through the use of the constant growth model. This model assumes that net profit will have constant perpetual growth after the end of the projection period. This model calculates the value of perpetuity in the last year of the projection period by means of the geometric progression model, and then brings it forward to the first projection year.

DISCOUNT RATE

The discount rate to be used to calculate the present value of net profits assessed in projected cash flow represents the rate of return on the company's own capital, which will require greater profitability than that achieved from a standard risk investment.

APSIS CONSULTORIA
REPORT RJ-0284/08-01B

4.2.

PROFILING OF UNIAO TERMINAIS

Founded in December, 1978, UNIÃO TERMINAIS is a wholly owned company of Unipar - União de Indústrias Petroquímicas S/A. In the capacity of Port Operator, UNIÃO TERMINAIS provides services of storage and transportation of liquid bulk in general, in its own Terminals in Santos and Rio de Janeiro.

All Terminals operate under the General Warehousing system, with all storage tanks bonded and interconnected to Siscomex (Integrated Foreign Trade System). Starting from November 04, 2002, the Santos Terminal was granted authorization by the Secretariat of Federal Revenues to operate under a Bonded Warehouse System. The terminals of UNIÃO TERMINAIS were built according to applicable Technical Standards and have all the licenses required towards the performance of their activities, being an integrating company of the Chemicals Distribution Institute - Terminals (CDI-T) since November, 2004, by way of their Santos Terminal.

APSYS CONSULTORIA
REPORT RJ-0284/08-01B

9

SANTOS TERMINAL

Located in the district of Alemoa, of easy access, alongside Anchieta Highway, the Terminal comprises a 102.000m³ tank storage park allocated to 115 tanks of various sizes, made of carbon steel, with or without lining, as well as of inox stainless steel, on property land measuring 89.000m². It is authorized and qualified to operate with inflammable and non-inflammable products.

The Terminal is connected to the Alemoa pier by an eight-line pipeline, three of which being Ø 8" carbon steel lines, three being Ø 8" inox stainless steel lines and two being Ø 10" 316L inox stainless steel lines, and it has an efficient pumping system. It comprises three mooring berths with enough draft to operate vessels of up to 60.000 TDW. The loading and unloading facilities for tank trucks allow for a simultaneous operation of up to twenty-eight trucks.

In the railway segment, the Terminal is provided with facilities which allow for loading and unloading operations of up to six simultaneous railway cars. In addition, the Terminal has two electronic scales for the weighing of tank trucks, one of which having a 60-ton capacity and the other having an 80-ton capacity, the latter being capable of operating with "bi-train" trucks.

The Terminal comprises residual water and gas treatment systems for all tanks, as well as its own laboratory and a specialized quality-control team for: products, tank cleaning and release, lines and equipment. It comprises circulation areas, electronic highway scales, maneuver rooms, a system for transferring products between tanks, a fire fighting system, tank and line inertization systems and an environmental protection system, such as: a high-level alarm, closed-circuit operations, among others.

APSIS CONSULTORIA
REPORT RJ-0284/08-01B
10

RIO TERMINAL

Located in the district of Caju, within the organized port area, it comprises a 17.000m³ tank storage park with twenty-four 1.000, 500 and 300m³ carbon steel tanks.

The Terminal is connected to the Caju pier by four lines and has enough draft to operate vessels of up to 50.000 TDW. The Terminal facilities allow for simultaneous ship, truck and railway car loading and unloading operations, as well as for transfers between tanks.

The Terminal offers operational facilities, such as: fire fighting and environmental protection systems, electronic highway scales and computerized management controls.

APSIS CONSULTORIA
REPORT RJ-0284/08-01B

11

4.3.

PROFILING OF LEXINGTON

Lexington is a holding company, with no operational activities. The operating assets of Lexington are concentrated in the company UNIÃO VOPAK ARMAZÉNS GERAIS LTDA, of which it holds 50% interest.

UNIÃO VOPAK

UNIÃO VOPAK, a 50% Lexington and 50% Vopak company, is located in the district of Rocio, in the city of Paranaguá, within the organized port area. It comprises a 60.000m³ tank storage park with 25 carbon steel tanks of various sizes.

The Terminal is connected to the Liquid Bulk pier of the Port of Paranaguá by three lines and has enough draft to operate vessels of up to 40.000 TDW. The Terminal facilities allow for simultaneous ship, truck and railway car loading and unloading operations, as well as for transfers between tanks. The Terminal offers operational facilities, such as: fire fighting and environmental protection systems, electronic highway scales and computerized management controls, which have conferred the Terminal with the ISO 9001 certificate.

APSIS CONSULTORIA
REPORT RJ-0284/08-01B

4.4. APPRAISAL – NET PROFIT VALUE OF SHARES

The income approach was adopted in this report so as to comply with the criteria for appraisal of the net profit value of shares, as set forth in article 256, II, c) of Act no. 6.404 (Corporate Law). These criteria are used to assess the Net Profit value of shares through the projection of future net profits, which are brought to present market value through the use of an appropriate discount rate (see item 4.1).

Projections were carried out on the basis of the projected EBITDA of UNIÃO TERMINAIS and LEXINGTON. A realistic scenario was adopted upon real EBITDA growth along the projected period.

The following premises were contemplated for projections:

- § Stand-alone operations;
- § Projected market growth on the basis of the Gross Domestic Product (PIB);
- § Profile of costs and rates on current bases;
- § Profile of investments on current bases;
- § Expansion of 30 thousand m³ in YEAR 6.
- § The method is based on the generation of discounted net profit flow;

§ Net profit was analytically projected for a 10-year period, from 2009 to 2018, and perpetuity was contemplated after YEAR11;

§ The fiscal year from November 01 to October 31 was contemplated as the yearly period.

§ The flow was projected in nominal currency and present value was calculated upon the nominal rate of discount (where inflation is contemplated);

§ Unless indicated otherwise, values were expressed in thousands of reals.

§ To predict the results of future business years of UNIÃO TERMINAIS and LEXINGTON, we used each company's balance sheet as of October 2008 as the starting balance.

ATTACHMENT 2

GLOSSARY

ASSETS APPROACH – valuation methodology in which all assets and liabilities (including unregistered ones) have their value adjusted according to their market values.

BETA – measurement of a stock systematic risk, price trend of a certain stock to be related to changes in a certain index.

BUSINESS RISK – uncertainty level for realizing future returns expected for the business, which do not result from financial leverage.

CAPITAL STRUCTURE – breakdown of the capital invested in a company, including own capital (equity) and third-parties capital (indebtedness).

CAPITALIZATION – conversion of a simple period of economic benefits into value.

CAPITALIZATION RATE – any divisor used for converting economic benefits into value in a simple period.

CAPM – Capital Asset Pricing Model -model in which the cost of capital for any stock or group of stocks is equivalent to the risk-free rate added to a risk premium, provided by the systematic risk of the stock or group of stocks under analysis.

CASH FLOW – cash generated by an asset, group of assets or company during a certain period of time. Usually, such term is complemented by a qualification, depending on the context (operating, non-operating, etc)

COMPANY – commercial, industrial, service or investment entity performing an economic entity.

CONSTRUCTION EQUIVALENT AREA – constructed area on which the corresponding construction unit cost equivalence is applied, as provided by the principles of NB-140 of ABNT (Brazilian Association of Technical Rules).

CONTROL – power to direct the company strategic, politic and administrative management.

CONTROLLING PREMIUM – value or percentage of a controlling stocks pro rata value over the non-controlling stocks pro rata value, which reflect the controlling power.

COST OF CAPITAL – expected return rate required by the market for attracting funds for a determined investment.

CURRENT VALUE – It is the value for replacing an existing asset for a new one, depreciated according its physical conditions.

DISCOUNT FOR LACK OF CONTROL – value or percentage deducted from the 100%-pro rata value of a company value, which reflects the lack of part or whole control.

DISCOUNT FOR LACK OF LIQUIDITY – value or percentage deducted from the 100% pro rata value of a company value, which reflects the lack of liquidity.

DISCOUNT RATE – any divisor used for converting a future economic benefit flow into present value.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortization.

ECONOMIC BENEFIT – benefits such as revenues, net income, net cash flow, etc.

ELECTRIC DAMAGE VALUE – It is an estimation of the cost for repairing or replacing the parts of an asset in case of electric damage. Values are scheduled in percentages of the Replacing Value and were calculated through equipment's manual analysis and the repairing maintenance expertise of APSIS' technicians.

FAIR MARKET VALUE – value for which a certain asset change its ownership between a potential seller and a potential buyer, when both parties are aware of relevant facts and none of them are under pressure to make the deal.

GOODWILL – intangible asset referring to name, reputation, client portfolio, loyalty, localization and other similar items that cannot be identified separately.

HOMOGENIZED AREA – usable, private or constructed area with mathematical treatments for valuation purposes, according to criteria set forth by APSIS, based on the real state market.

INCOME APPROACH – valuation methodology by converting to present value expected economic benefits.

INSURANCE MAXIMUM VALUE – It is the maximum value of an asset for which it is advisable to insure it. Such criterion establishes that the asset which depreciation is higher than 50% should have a Insurance Maximum Value equivalent to twice the Current Value; and, an asset which depreciation is lower than 50%, should have a Insurance Maximum Value equivalent to the Replacing Value.

INSURANCE VALUE – It is the value for which the Insurance Company assumes the risks, and it is not applied on land and foundations, except in special cases.

INTANGIBLE ASSETS – non-physical assets such as brands, patents, rights, contracts, industrial secrets that provide the owner with rights and values.

INTERNAL RETURN RATE – discount rate in which the present value of the future cash flow is equivalent to the investment cost.

INVESTED CAPITAL – sum of own capital and third-parties capital invested in a company. Third-parties capital is usually related to debts with short and long term interests to be specified in the valuation context.

INVESTED CAPITAL CASH FLOW – cash flow generated by the company to be reverted to financiers (interests and amortizations) and shareholders (dividends) after operating costs and expenses and capital expenditures.

INVESTMENT VALUE – value for a particular investor, based on particular interests for a certain asset such as synergy with other companies of an investor, different perceptions of risk and future performances, etc.

ISSUE DATE – date on which the valuation report is ended, when valuation conclusions are presented to the client.

LEVERAGED BETA – beta value reflecting the indebtedness in the capital structure.

LIQUIDATION VALUE – It is the value of a sale on sale in the market, out of its original productive process. In other words, it is the value that would be verified in case the asset was deactivated and put up for sale separately, considering costs of disassembly or demolition (in case of real estate), storage and transportation.

LIQUIDITY – capacity to rapidly convert a certain asset into cash or into a debt payment.

MARKET APPROACH – valuation methodology, which utilizes multiples that result from the sale price of similar assets.

MARKET NET EQUITY – see assets approach.

MULTIPLE – market value of a company, stock or invested capital, divided by a company’s measurement (revenues, income, client volume, etc.).

NON-OPERATING ASSETS – assets that are not directly related to the company operating activity (whether they generate revenue or not) and that may be sold without affecting its operation.

OPERATING ASSETS – assets that are necessary for the company operation.

PERPETUITY VALUE – value at the end of the projective period to be added to the cash flow.

PRESENT VALUE – value of a future economic benefit on a specific date, calculated by the application of a discount rate.

PRIVATE AREA – usable area including building elements (such as walls, columns, et c) and elevators hall (in some cases).

REFERENCE DATE – specific date (day, month and year) to apply the valuation.

RESIDUAL VALUE – It is the value of a new or old asset projected for a certain date, limited to the date on which such asset turns into scrap, considering that during such period of time, the asset will be operating.

REPLACING VALUE (FOR A NEW ASSET) – value based on the price (usually at market current prices) or replacing an asset for a new equal or similar one.

SCRAP VALUE – It is the asset value at the end of its useful life, considering its disassembly or demolition value (in case of real estate), storage and transportation.

SUPPORTING DOCUMENTATION – discount rate is a return rate used to convert into present value a payable or receivable amount.

TANGIBLE ASSETS – physical assets such as lands, constructions, machines and equipment, furniture and appliances, etc.

USEFUL AREA – usable area of a real estate, measures by the internal face of its walls.

USEFUL LIFE – period of time during which an asset may generate economic benefits
VALUATION – act or process through which the value of a company, stock interest or other asset is determined.

VALUATION METHODOLOGY – the approaches used for preparing valuing calculations in order to indicate the value of a company, stock interest or other asset.

VALUE – price denominated in monetary quantity.

WACC (Weighted Average Cost of Capital) – model in which the cost of capital is determined by the weighted average of the value.
