Disclaimer

Prices provided through the website are indicative only and thus may reflect estimates or approximations rather than actual prices at which we would transact in a note or other financial instrument. These prices may be generated by an automatic system that takes various factors into consideration, including information obtained from third parties. We may carry the related notes or financial instruments on our books at prices other than those provided through the website. In addition, assuming no change in market conditions and all other relevant factors remaining constant, any secondary prices will likely be lower than the issue price since the issue prices included, and the secondary market prices are likely to exclude, commission, discounts, costs or mark-ups with respect to the notes or financial instruments, as well as the profit component included in the cost of hedging our obligations under these securities.

Prices on the website (including those of listed securities on any U.S. securities exchange or quotation system) might lag actual market prices. Prices should therefore be used as a general guide only and should not be understood as the price at which we would purchase or make a bid for a security or as a guarantee by us of the accuracy or currency of such prices or of the realizable value of the related securities.

The information on the website reflects certain assumptions and is derived from proprietary models based upon well recognized financial principles and reasonable estimates about market conditions. Valuations and prices based on other models or different assumptions may yield different results. The information may not reflect the prices or valuation you would obtain from any other source, or which you would receive from another dealer.

Information on the website regarding the performance of a security or the underlying or any other financial instrument always relates to the past. Past performance is not indicative of future results.
