Exhibit 99.1: Press release issued November 29, 2007 in which the Registrant announced that assay results from nine additional drill holes continue to point towards a significant upgrade and expansion of gold and copper resources at the Mitchell deposit. Mitchell is one of three gold-copper porphyry deposits on the Registrant's 100% owned Kerr-Sulphurets project near Stewart, British Columbia, Canada. The project is well located close to the operating Eskay Creek mine and its all-weather road to Stewart. Highway #37 also offers excellent access to several possible sites staked for processing facilities.
