II. BUSINESS

1. Business Overview

A. Industry Characteristics

As of September 30, 2009, the number of domestic mobile phone subscribers reached 47.5 million and, with more than 95% penetration rate, the Korean mobile communication market can be considered to have reached its maturation stage. However, considering the number of European countries with penetration rates exceeding 100%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in network-related technology evidenced by the world s first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services and other related contents.

Independent Accountants Review Report

English Translation of a Report Originally Issued in Korean To the Stockholders and Board of Directors of SK Telecom Co., Ltd.

We have reviewed the accompanying non-consolidated statement of financial position of SK Telecom Co., Ltd. (the Company) as of September 30, 2009, the related non-consolidated statements of income for the three months and nine months ended September 30, 2009 and 2008, and non-consolidated statements of changes in stockholders equity and cash flows for the nine months ended September 30, 2009 and 2008, all expressed in Korean won. These non-consolidated financial statements are the responsibility of the Company s management. Our responsibility is to issue a report on these non-consolidated financial statements based on our reviews.

We conducted our reviews in accordance with standards for review of interim financial statements in the Republic of Korea. Those standards require that we plan and perform the review to obtain moderate assurance as to whether the non-consolidated financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the non-consolidated financial statements referred to above are not presented fairly, in all material respects, in conformity with accounting principles generally accepted in the Republic of Korea.

We have previously audited, in accordance with auditing standards generally accepted in the Republic of Korea, the non-consolidated statement of financial position of the Company as of December 31, 2008, and the related non-consolidated statements of income, appropriations of retained earnings, changes in stockholders—equity and cash flows for the year then ended (not presented herein); and in our report dated January 30, 2009, we expressed an unqualified opinion on those non-consolidated financial statements. The accompanying non-consolidated statement of financial position as of December 31, 2008, which is comparatively presented, does not differ in material respects from such audited non-consolidated statement of financial position.

Our reviews also comprehended the translation of the Korean won amounts into U.S. dollar amounts and nothing has come to our attention that causes us to believe that such translation has not been made in conformity with the basis stated in Note 2. Such U.S. dollar amounts are presented solely for the convenience of readers of financial statements.
