The information contained or incorporated by reference in this Current Report on Form 8-K contains certain forward-looking statements, including certain plans, expectations, goals, projections, and statements, which are subject to numerous assumptions, risks, and uncertainties. Actual results could differ materially from those contained or implied by such statements for a variety of factors including: (1) deterioration in the loan portfolio could be worse than expected due to a number of factors such as the underlying value of the collateral could prove less valuable than otherwise assumed and assumed cash flows may be worse than expected; (2) changes in economic conditions; (3) movements in interest rates; (4) competitive pressures on product pricing and services; (5) success and timing of other business strategies; (6) extended disruption of vital infrastructure; and (7) the nature, extent, and timing of governmental actions and reforms, including the Dodd-Frank Wall Street Reform and Consumer Protection Act and future regulations which will be adopted by the relevant regulatory agencies to implement the Act's provisions. Additional factors that could cause results to differ materially from those described above can be found in Huntington's 2009 Annual Report on Form 10-K, and documents subsequently filed by Huntington with the Securities and Exchange Commission. All forward-looking statements contained or incorporated by reference in this Current Report on Form 8-K are based on information available at the time of the release. Huntington assumes no obligation to update any forward-looking statement.

Exhibit 99.2 includes certain ratios, specifically the tangible common equity ratio, and the Tier 1 common risk-based capital ratio, which are non-GAAP financial measures. These non-GAAP financial measures are included in this report because the Federal Reserve indicated that as part of their Supervisory Capital Assessment Program (SCAP), a year-end 2010 Tier 1 common risk-based capital ratio of 4.0% would be needed. Although Huntington is not one of the SCAP bank holding companies, the market has accepted this as a *de facto* standard for being adequately capitalized since 10 of the 19 bank holding companies included in SCAP were directed to increase their capital levels to meet this targeted threshold. Other companies may calculate these financial measures differently. Risk-weighted assets are calculated under regulatory capital rules applicable to us as discussed more fully on page 8 of our Form 10-K. The tangible common equity ratio, tangible assets, and Tier 1 common risk-based capital ratio were calculated as follows:
