NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 THE COMPANY AND BASIS OF PREPARATION.

T. Rowe Price Group derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the sponsored T. Rowe Price mutual funds and other investment portfolios. We also provide our investment advisory clients with related administrative services, including mutual fund transfer agent, accounting and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; and trust services.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require the use of estimates and reflect all adjustments that are, in the opinion of management, necessary to a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. Actual results may vary from our estimates.

The unaudited interim financial information contained in these condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2009 Annual Report.

NOTE 2 INFORMATION ABOUT RECEIVABLES, REVENUES, AND SERVICES.

Accounts receivable from our sponsored mutual funds for advisory fees and advisory-related administrative services aggregate \$130.1 million at December 31, 2009, and \$135.6 million at September 30, 2010.

Revenues (in millions) from advisory services provided under agreements with our sponsored mutual funds and other investment clients include:

Investors that we serve are primarily domiciled in the United States of America; investment advisory clients domiciled outside the United States account for more than 12% of our assets under management at September 30, 2010.

Fees for advisory-related administrative services provided to our sponsored mutual funds during the first nine months of the year were \$187.5 million in 2009 and \$197.6 million in 2010. Fees for these services during the third quarter were \$61.7 million in 2009 and \$66.0 million in 2010.

NOTE 4 DEBT SECURITIES HELD BY AND CUSTOMER DEPOSITS AT SAVINGS BANK SUBSIDIARY.

Our savings bank subsidiary holds investments in marketable debt securities, including mortgage- and other asset-backed securities, which are accounted for as available-for-sale. The following table (in millions) details the components of these investments.

	12/31/2009		9/30/2010	
	Fair value	Unrealized holding gains (losses)	Fair value	Unrealized holding gains (losses)
Investments with temporary impairment (30 securities in 2010) of				
Less than 12 months	\$ 14.4	\$ (.3)	\$ 6.7	\$ (.1)

Total	24.2	(1.1)	13.2	(.4)
Investments with unrealized holding gains	158.4	4.4	173.7	5.0
Total debt securities	\$ 182.6	\$ 3.3	\$ 186.9	\$ 4.6
Aggregate cost	\$ 179.3		\$ 182.3	

The unrealized losses in these investments were generally caused by changes in interest rates and market liquidity, and not by changes in credit quality. We intend to hold these securities to their maturities, which generally correlate to the maturities of our customer deposits, and believe it is more-likely-than not that we will not be required to sell any of these securities before recovery of their amortized cost. Accordingly, impairment of these investments is considered temporary.

The estimated fair value of our customer deposit liability, based on discounting expected cash outflows at maturity dates that range up to five years, using current interest rates offered for deposits with the same dates of maturity, was \$164.9 million at December 31, 2009, and \$167.6 million at September 30, 2010.

Other investments	1.6	1.5
Sponsored mutual fund investments held as trading	1.8	1.9
INR non-deliverable forward contract	.9	
Total other investments	\$ 45.7	\$ 195.5

On January 20, 2010, we purchased a 26% equity interest in UTI Asset Management Company and an affiliate from existing stockholders for 6.5 billion Indian rupees (INR) or \$142.4 million, plus transaction costs of \$3.2 million of which \$2.0 million was paid in 2009. We are accounting for this investment using the equity method of accounting whereby its carrying value is adjusted to reflect our share of UTI's earnings and losses, the unrealized gain or loss resulting from the translation of UTI's financial statements into U.S. dollars and dividends received. Our share of UTI's earnings recognized for the first nine months of 2010 totaled \$2.8 million.

In conjunction with our signing of the definitive UTI purchase agreements in November 2009, we entered into a series of rolling non-deliverable forward contracts to economically hedge the foreign currency exchange rate exposure relating to the UTI acquisition price. We recognized non-operating investment income of \$2.2 million in January 2010 in the valuation and settlement of these contracts.

NOTE 6 FAIR VALUE MEASUREMENTS.

We determine the fair value of our investments using broad levels of inputs as defined by related accounting standards:

Level 1 quoted prices in active markets for identical securities.

Level 2 observable inputs other than level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 unobservable inputs reflecting our own assumptions based on the best information available. We do not value any investments using level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with the investments. There were no transfers in or out of the levels. The following table summarizes our investments (in millions) that are recognized in our balance sheet using fair value measurements determined based on the differing levels of inputs.

Outstanding assuming dilution	263.6	261.8	261.3	264.6

Weighted average common shares outstanding assuming dilution reflects the potential additional dilution, determined using the treasury stock method that could occur if outstanding stock options were exercised. For the third quarter of 2010, the weighted average common shares outstanding assuming dilution excludes the effect of 17.8 million outstanding stock options with an average exercise price of \$51.48 that, when taken together with related unrecognized compensation expense, are out-of-the-money. The weighted average common shares outstanding assuming dilution for the first nine months of 2010 excludes 14.1 million outstanding stock options with an average exercise price of \$52.09.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

T. Rowe Price Group, Inc.:

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries (the Company) as of September 30, 2010, the related condensed consolidated statements of income for the three- and nine-month periods ended September 30, 2010 and 2009, the related condensed consolidated statements of cash flows for the nine-month periods ended September 30, 2010 and 2009, and the related condensed consolidated statement of stockholders' equity for the nine-month period ended September 30, 2010. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of December 31, 2009, and the related consolidated statements of income, stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 5, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

GENERAL.

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in our sponsored mutual funds and other managed investment portfolios. Investment advisory clients domiciled outside the United States account for more than 12% of our assets under management at September 30, 2010.

We manage a broad range of U.S., international and global stock, bond, and money market mutual funds and other investment portfolios, which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management affect our revenues and results of operations.

We remain debt-free with substantial liquidity and resources that allow us to take advantage of attractive growth opportunities, invest in key capabilities including investment professionals and technologies and, most importantly, provide our clients with strong investment management expertise and service both now and in the future.

On January 20, 2010, we purchased a 26% equity interest in UTI Asset Management Company and an affiliate from existing stockholders for 6.5 billion Indian rupees (INR) or \$142.4 million. During the first nine months of 2010, we repurchased 5.0 million shares of our common stock for \$240.0 million. We funded the investment in UTI and the share repurchases with existing cash balances and cash generated from operations.

We decided in the fourth quarter 2010 that we will make a capital contribution to certain of our sponsored money market mutual funds. We are making this contribution to offset the cumulative net losses realized by those funds in recent years in order to allay any fund shareholder concerns that might arise as a result of new SEC disclosure rules. This fourth quarter contribution to the funds will result in a one-time pretax charge of approximately \$17 million. Our sponsored money market mutual funds have net assets totaling approximately \$28 billion at September 30, 2010.

BACKGROUND.

U.S. equity markets recovered their second quarter 2010 losses despite a volatile third quarter. After moving higher in July on favorable second quarter corporate earnings reports, equity markets weakened again in August amid concerns that the economic recovery was faltering, as evidenced by a rise in the unemployment rate to 9.6% and continued weakness in the housing market despite historically low mortgage rates. In September, the equity markets rebounded strongly on better than expected economic data, particularly in the manufacturing sector, and reassurance from the Federal Reserve that the central bank would employ their monetary policy tools, as needed, to help promote economic recovery. With the slow pace of the economic recovery continuing and both actual inflation and inflation expectations at low levels, the Federal Reserve maintained the target funds rate near zero.

The S&P 500 Index of large-cap companies in leading industries of the U.S. economy posted a third quarter gain of 11.3%, in contrast to the 11.4% loss in the second quarter 2010. For the quarter, the NASDAQ Composite Index, which is heavily weighted with technology companies, returned 12.3% (excluding dividends). This strong third quarter performance helped push the year-to-date returns for these indexes into positive territory, a return of 3.9% and 4.4%, respectively.

Other equity markets around the world posted strong gains in the third quarter as well, despite lingering concerns over European debt, the stability of the Chinese economic recovery, and fears of a double-dip recession in the U.S. Returns to U.S. investors were boosted as the dollar weakened against other currencies. Emerging markets fared best, particularly in Europe, the Middle East and Africa, as developed markets continued to confront economic pressures. The MSCI Emerging Markets Index returned 18.2% while the MSCI EAFE Index, which measures the performance of mostly large-cap stocks in Europe, Australasia and the Far East, returned 16.5%. These indexes ended the first nine months of 2010 up 11.0% and 1.5%, respectively.

Long-term Treasury yields continued to fall in the third quarter. By the end of the third quarter, the yield on the benchmark 10-year U.S. Treasury was 2.53%, a decrease of 44 basis points from June 30, 2010. On the shortest end of the yield curve, the annual yield for one-month treasury bills was .14%.

U.S. fixed income securities continued to see positive returns in the third quarter. While long-term Treasuries performed well due to the skepticism about the strength and durability of the economic recovery, corporate bonds also

experienced good returns as investors sought higher yields and were attracted by generally solid balance sheets. The Barclays Capital U.S. Aggregate Index gained 2.5% in the third quarter and 7.9% for the first nine months of 2010. The Barclays Capital Global Aggregate Ex-US Dollar Bond Index was up 10.9% in the third quarter 2010, and 6.4% for the year-to-date due in part to a weakening U.S. dollar. For the first nine months of 2010, the Credit Suisse High Yield Index gained 10.9%, while the J.P. Morgan Emerging Markets Index Plus gained 14.5%.

Investors entrusted net inflows of \$23.4 billion to our investment management during the first nine months of 2010, including \$8.0 billion in the third quarter. Market appreciation and income added \$25.0 billion to assets under management for the first nine months of 2010. Assets under our management totaled \$439.7 billion at September 30, 2010, up 48.6 billion from June 30, 2010. The changes (in billions) in 2010 have occurred as follows.

	Quarter ended 3/31/2010	Quarter ended 6/30/2010	Quarter ended 9/30/2010	First nine months ended 9/30/2010
Assets under management at beginning of period	\$ 391.3	\$ 419.0	\$ 391.1	\$ 391.3

Assets under management at September 30, 2010, include \$320.9 billion in stock and blended asset investment portfolios and \$118.8 billion in fixed income investment portfolios. The investment portfolios that we manage consist of \$258.7 billion in the T. Rowe Price mutual funds distributed in the United States and \$181.0 billion in other investment portfolios, including separately managed accounts, sub-advised funds, and other sponsored investment portfolios including common trust funds and mutual funds offered to investors outside the U.S. and through variable annuity life insurance plans.

We incur significant expenditures to attract new investment advisory clients and additional investments from our existing clients. These efforts involve costs that generally precede any future revenues that we might recognize from additions to our assets under management.

RESULTS OF OPERATIONS.

Third quarter 2010 versus third quarter 2009.

Investment advisory revenues increased 20.4%, or \$85.2 million, to \$502.5 million in the third quarter of 2010 as average assets under our management increased \$74.9 billion to \$416.1 billion. The average annualized fee rate earned on our assets under management was 47.9 basis points during the third quarter of 2010 down from the 48.5 basis points earned in the 2009 quarter. Money market fees of \$5.2 million were voluntarily waived to maintain a positive yield for fund investors in the 2010 quarter and were greater than the \$1.4 million of fees waived in the comparable 2009 period. We waived these fees beginning in 2009 and anticipate such fee waivers in the fourth quarter of 2010 and into 2011.

Net revenues increased \$88.0 million, or 17.7%, to \$586.1 million. Operating expenses of \$324.2 million in the third quarter of 2010 were up \$33.4 million, or 11.5% from the comparable 2009 quarter. Overall, net operating income of \$261.9 million for the third quarter of 2010 was 26.3% higher than the \$207.3 million earned in the 2009 quarter. The increase in our average assets under management and resulting advisory revenue increased our operating margin for the third quarter 2010 to 44.7% from 41.6% in the comparable 2009 quarter. Net income increased \$36.2 million from the third quarter of 2009 to \$169.1 million and diluted earnings per share on our common stock increased 28.0% to \$.64 from \$.50 in the 2009 quarter.

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the U.S. increased 18.9%, or \$54.8 million, to \$344.2 million. Average mutual fund assets under management in the third quarter of 2010 were \$245.9 billion, an increase of 20.4% from the average for the comparable 2009 quarter. Mutual fund assets at September 30, 2010 were \$258.7 billion, an increase of \$25.2 billion, or 10.8% from the end of June 2010.

Net inflows to the sponsored mutual funds were \$1.1 billion during the third quarter of 2010, including \$700 million originating in our target-date retirement funds. Fund net inflows are presented net of \$1.0 billion of assets transferred to our sponsored target-date retirement trusts from our target-date retirement funds during the quarter. Net inflows of \$1.8 billion added to the bond funds were offset by net outflows of \$.6 billion from the stock and blended asset funds and \$.1 billion from the money market funds. The Short-Term Bond and Tax Free Income Funds had net inflows of \$.4 billion and \$.3 billion, respectively. Market appreciation and income increased our mutual fund assets under management by \$24.1 billion during the third quarter of 2010.

Investment advisory revenues earned on the other investment portfolios that we manage increased \$30.4 million, or 23.8%, from the third quarter of 2009, to \$158.3 million. Average assets in these portfolios were \$170.2 billion during the third quarter of 2010, an increase of \$33.3 billion, or 24.3%, from the 2009 quarter. Ending assets at September 30, 2010 were \$181.0 billion, up \$23.4 billion from the end of June 2010. Net inflows of \$6.9 billion in the 2010 quarter were sourced primarily from institutional investors in and outside the U.S. and third party financial intermediaries. These inflows included \$1.0 billion of assets transferred from the target-date retirement funds into target-date retirement trusts. Market appreciation and income increased assets under management in these portfolios by \$16.5 billion.

Administrative fees increased \$2.9 million from the third quarter of 2009 to \$82.9 million. This change includes a \$2.3 million increase in our mutual fund servicing revenue and \$2.0 million increase in 12b-1 distribution and service fees recognized on higher average assets under management in the Advisor and R classes of our sponsored mutual funds. These increases are offset by a \$1.8 million decrease in brokerage fees resulting from the reduction in per-trade commissions charged beginning July 1, 2010 to customers with substantial assets. Changes in administrative fees are

generally offset by a similar change in the related operating expenses that are incurred to distribute Advisor and R class fund shares through third party intermediaries and to provide services to the funds and their investors. Compensation and related costs increased \$17.9 million, or 9.1%, compared to the third quarter of 2009. This increase is attributable to a \$10.0 million increase over the prior year's quarter in our annual variable compensation programs, which are based on our operating results and other factors such as our relative risk-adjusted investment performance, and the high quality of our investor services. The 2010 quarter also includes an increase of \$4.0 million in salaries expense from the 2009 quarter, which results from an increase in our average staff size of nearly 2.5% coupled with a modest increase in our associates' base salaries at the beginning of the year. At September 30, 2010, we employed 4,975 associates up 3.6% from the 4,802 associates employed at the end of 2009. Increases in temporary employment expenses and other employee costs make up the balance of the change from the 2009 period. Advertising and promotion expenditures were up \$5.6 million, or 43.1%, compared to the third quarter of 2009 in response to investor interest in recovering markets. We currently expect that our advertising and promotion expenditures for the fourth quarter of 2010 will be up about \$5.0 million from the comparable 2009 quarter. We vary our level of spending based on market conditions and investor demand as well as our efforts to expand our investor base in the U.S. and abroad.

Occupancy and facility costs together with depreciation and amortization expense were up \$1.8 million versus the 2009 period. The costs for our facilities, upgrading technology capabilities and related maintenance have all risen to meet increased business demands.

Other operating expenses increased \$8.1 million, or 20.7%, from the third quarter of 2009, including an increase of \$2.0 million in distribution and service expenses recognized on higher average assets under management in our Advisor and R classes of mutual fund shares that are sourced from financial intermediaries. These costs are offset by an equal increase in our administrative revenues recognized from the 12b-1 fees discussed above. Consulting fees, travel costs, other professional fees and other operating costs have all risen from the third quarter of 2009 to meet increasing business demands.

Our non-operating investment activity, which includes interest income as well as the recognition of investment gains and losses, increased \$3.7 million from the comparable 2009 quarter. The increase includes \$1.3 million of additional investment gains realized on the sale of mutual fund investments as we rebalanced our portfolio and \$1.8 million of equity earnings from our investment in UTI.

The third quarter 2010 provision for income taxes as a percentage of pretax income is 37.6%, down from our estimate for the full year 2010 of 38.0% due to certain discrete period adjustments made to our prior years' tax accruals.

First nine months of 2010 versus first nine months of 2009.

Investment advisory revenues were up 35.2%, or \$381.9 million, to nearly \$1.5 billion in the first nine months of 2010 as average assets under our management increased \$106.3 billion to \$408.9 billion. The average annualized fee rate earned on our assets under management was 47.9 basis points during the nine months of 2010, unchanged from the basis points earned during the comparable 2009 period and down slightly from the 48.1 basis points earned during the 2009 year. We have waived \$18.4 million in money market advisory fees for the first nine months of 2010.

Net revenues increased \$394.9 million, or 29.8%, to \$1.7 billion. Operating expenses grew \$113.0 million to \$966.0 million in the first nine months of 2010, an increase of 13.2% from the comparable 2009 period. Overall, net operating income for year-to-date 2010 increased \$281.9 million, or 59.7%, to \$753.7 million. Our operating margin for the first nine months of 2010 was 43.8%, up from 35.6% for the 2009 period. Our net income increased \$199.5 million, or 71.0% to \$480.6 million from the 2009 period. Diluted earnings per share on our common stock is \$1.81 for the first nine months of 2010, an increase of \$.74 from \$1.07 earned in the 2009 period.

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the United States increased 35.0%, or \$262.5 million, to about \$1.0 billion. Year-to-date 2010 average mutual fund assets were \$243.6 billion, an increase of 35.0% from the average for the comparable 2009 period. Net inflows into the mutual funds during the first nine months of 2010 were \$10.4 billion, including \$4.8 billion originating in our target-date retirement funds. Our bond funds had net inflows of \$6.3 billion, including \$1.4 billion into the New Income Fund, \$1.3 billion into the Short-Term Bond Fund, \$.6 billion into the Tax-Free Income Fund and \$.5 billion into each of the Emerging Market Bond and International Bond Funds. Our stock and blended asset funds added \$4.6 billion of net inflows. The Value Fund had net inflows of \$1.2 billion, while the Mid-Cap Value, Growth Stock, and Equity Index 500 Funds each added at least \$600 million for a combined total of \$2.1 billion in net inflows. The money market funds had net outflows of \$500 million. Higher market valuations and income increased fund assets by \$15.6 billion.

Investment advisory revenues earned on the other investment portfolios that we manage increased \$119.4 million, or 35.7%, to \$453.9 million. Average assets in these portfolios were \$165.3 billion during the first nine months of 2010, an increase of 35.4% from the 2009 period. Net inflows from institutional investors in and outside the U.S. and third party financial intermediaries were \$13.0 billion and market appreciation and income added \$9.4 billion.

Administrative fees increased \$12.5 million to \$251.2 million during the first nine months of 2010. The change in these revenues includes a \$9.2 million increase of 12b-1 distribution and service fees recognized on higher assets under management in the Advisor and R classes of our sponsored mutual funds. Increases in our defined contribution plan and mutual fund servicing revenue of \$4.9 million were offset by a \$2.5 million decrease in brokerage fees due to a reduction in per-trade commissions charged beginning July 1, 2010 to customers with substantial assets.

Compensation and related costs, increased \$65.6 million, or 11.5%, compared to the first nine months of 2009. The largest part of the increase is attributable to a \$59.6 million increase in our interim accrual for our annual variable compensation programs. Higher temporary employment expenses, other employee benefits and employee related costs

for the first nine months of 2010 were offset by lower salaries resulting from the impact of the nonrecurring severance costs recognized in the 2009 period and our year-to-date 2010 average head count decreasing 4.0% from the first nine months of 2009.

Advertising and promotion expenditures were up \$12.8 million, or 25.9%, compared to year-to-date 2009 in response to improved market conditions and investor sentiment over the last twelve months.

Other operating expenses increased \$33.5 million, or 31.4%, from the first nine months of 2009, including an increase of \$9.2 million in distribution and service expenses recognized on higher average assets under management in our Advisor and R classes of mutual fund shares that are sourced from financial intermediaries. These costs are offset by an equal increase in our administrative revenues recognized from the 12b-1 fees discussed above. The remaining increase is a result of other operating costs, including consulting fees, travel costs and other professional services, incurred to meet increasing business demands.

Our non-operating investment income activity resulted in a net gain of \$18.1 million for the first nine months of 2010 compared to a net loss of \$22.9 million in the 2009 period. This change of \$41.0 million includes \$36.1 million in other than temporary impairments recognized on our investments in sponsored mutual funds in the first nine months of 2009. The change also includes \$2.2 million in gains recognized in the 2010 period for the settlement and valuation of a series of non-deliverable forward contracts used to economically hedge the foreign currency exposure associated with the UTI acquisition price and \$2.8 million in equity earnings from our investment in UTI.

CAPITAL RESOURCES AND LIQUIDITY.

Operating activities during the first nine months of 2010 provided cash flows of \$711.5 million, up \$244.9 million from 2009, including a \$199.5 million increase in net income and an \$86.1 million increase in timing differences in the cash settlement of our assets and liabilities. These increases are offset by the impact of \$36.1 million in other than temporary impairments of our investments in sponsored mutual funds that were experienced in the first nine months of 2009 and did not reoccur in 2010. Our interim operating cash outflows do not include bonus compensation that is accrued throughout the year before being substantially paid out in December.

Net cash used in investing activities totaled \$265.1 million, up \$123.0 million from the 2009 period, primarily from the purchase of a 26% equity interest in UTI for \$142.4 million plus related transaction costs incurred in the 2010 period of \$1.2 million. We made \$8.9 million less net investments into our sponsored mutual funds in 2010 compared to the 2009 period. The change also includes \$10.4 million in fewer investments made in debt securities held by our savings bank.

Net cash used in financing activities was \$379.3 million in the first nine months of 2010, up \$175.0 million from the 2009 period. We increased our stock repurchases by expending \$181.1 million more than in the first nine months of 2009. Dividends paid during the first nine months of 2010 increased \$16.6 million from the 2009 period due primarily to a \$.02 increase in our quarterly per-share dividend. Cash proceeds from option exercises were up \$21.7 million in 2010 compared to 2009 as the higher market valuations of our common stock experienced in the early part of 2010 led employees to exercise.

Our cash and mutual fund investments at September 30, 2010 were \$1.5 billion, and we have no debt. Given the availability of these financial resources, we do not maintain an available external source of liquidity. We anticipate property and equipment expenditures for the full year 2010 to be about \$130 million and expect to fund them from our cash balances.

NEW ACCOUNTING STANDARDS.

We have considered all other newly issued accounting guidance that is applicable to our operations and the preparation of our consolidated statements, including that which we have not yet adopted. We do not believe that any such guidance will have a material effect on our financial position or results of operation.

FORWARD-LOOKING INFORMATION.

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to: our revenues, net income and earnings per share on common stock; changes in the amount and composition of our assets under management; our expense levels and possible expense savings; our estimated effective income tax rate; and our expectations regarding financial markets, future transactions and investments, and other conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, of our Form 10-K Annual Report for 2009. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors including, among other things: cash inflows and outflows in the T. Rowe Price mutual funds and other managed investment portfolios; fluctuations in global financial markets that result in appreciation or depreciation of the assets under our management; our introduction of new mutual funds and investment portfolios; and changes in retirement savings trends relative to participant-directed investments and defined contribution plans. The ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the Price mutual funds and other managed investment portfolios as compared to competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; competitive conditions in the mutual fund, asset management, and broader financial services sectors; and our level of success in implementing our strategy to expand our business. Our revenues are substantially dependent on fees earned under contracts with the

Price funds and could be adversely affected if the independent directors of one or more of the Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements. Non-operating investment income (loss) will also fluctuate primarily due to the size of our investments and changes in their market valuations.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the United States and to further penetrate our distribution channels within the United States; variations in the level of total compensation expense due to, among other things, bonuses, stock option grants, other incentive awards, changes in our employee count and mix, and competitive factors; any goodwill impairment that may arise; fluctuation in foreign currency exchange rates applicable to our investment in and the costs of our international operations; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including but not limited to effects on costs that we incur and effects on investor interest in mutual funds and investing in general, or in particular classes of mutual funds or other investments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There has been no material change in the information provided in Item 7A of the Form 10-K Annual Report for 2009.

Item 4. Controls and Procedures.

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2010. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of September 30, 2010, are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the third quarter of 2010, and has concluded that there was no change during the third quarter of 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood that an adverse determination in one or more pending claims would have a material adverse effect on our financial position or result of operations is remote.

Item 1A. Risk Factors.

There has been no material change in the information provided in Item 1A of our Form 10-K Annual Report for 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Repurchase activity during the third quarter of 2010 conducted pursuant to the Board of Directors' June 5, 2008, authorization follows.
