Accumulated other comprehensive loss	(108,503)	(61,709)
Shareholders' equity using US GAAP	2,569,004	2,334,572

The adjustment to accumulated other comprehensive income (loss) is comprised of the following:

	2010	2009
	\$	\$
Fair value of derivatives (7)	(8,627)	
Pension liability (9)	(99,876)	(61,709)
Accumulated other comprehensive loss	(108,503)	(61,709)

The estimated pension amount that will be amortized from accumulated other comprehensive loss into income in 2011 includes an actuarial loss of \$9,566 and past service costs of \$5,776.

Areas of material difference between Canadian and US GAAP and their impact on the consolidated financial statements are as follows:

(1) Amortization of intangible assets

Until September 1, 2001, under Canadian GAAP amounts allocated to broadcast rights were amortized using an increasing charge method which commenced in 1992. Under US GAAP, these intangibles were amortized on a straight-line basis over 40 years. Effective September 1, 2001, broadcast rights are considered to have an indefinite life and are no longer amortized under Canadian and US GAAP.

(2) Deferred charges and credits

The excess of equipment costs over equipment revenues are deferred and amortized under Canadian GAAP. Under US GAAP, these costs are expensed as incurred.

For US GAAP, transaction costs, financing costs and proceeds on bond forward contracts associated with the issuance of debt securities are recorded as deferred charges and deferred credits and amortized to income on a straight-line basis over the period to maturity of the related debt. Under Canadian GAAP, such amounts are recorded as part of the principal balance of debt and amortized to income using the effective interest rate method.

(3) Business acquisition costs

Effective September 1, 2009, under US GAAP, acquisition related costs are recognized separately from business combinations, generally as expenses. Under Canadian GAAP, CICA Handbook Section 1581, acquisition related costs are included as part of the cost of the purchase.

(4) Equity in loss of investee

The earnings of an investee determined under Canadian GAAP has been adjusted to reflect US GAAP.

Under Canadian GAAP, the investment in Star Choice was accounted for using the cost method until CRTC approval was received for the acquisition. When the Company received CRTC approval, the amount determined under the cost method became the basis for the purchase price allocation and equity accounting commenced. Under US GAAP, equity accounting for the investment was applied retroactively to the date the Company first acquired shares in Star Choice.

(5) Gain on sale of subsidiary

In 1997, the Company acquired a 54% interest in Star Choice in exchange for the shares of HomeStar Services Inc., a wholly-owned subsidiary at that time. Under Canadian GAAP, the acquisition of the investment in Star Choice was a non-monetary transaction that did not result in the culmination of the earnings process, as it was an exchange of control over similar productive assets. As a result, the carrying value of the Star Choice investment was recorded at the book value of assets provided as consideration on the transaction. Under US GAAP, the transaction would have been recorded at the fair value of the shares in HomeStar Services Inc. This would have resulted in a gain on disposition of the consideration the Company exchanged for its investment in Star Choice and an increase in the acquisition cost for Star Choice.

(6) Gain on sale of cable systems

Edgar Filing: SHAW COMMUNICATIONS INC - Form 6-K

The gain on sale of cable systems determined under Canadian GAAP has been adjusted to reflect the lower net book value of broadcast rights under US GAAP as a result of item (1) adjustments.

Under Canadian GAAP, no gain was recorded in 1995 on an exchange of cable systems with Rogers Communications Inc. on the basis that this was an exchange of similar productive assets. Under US GAAP the

gain net of applicable taxes is recorded and amortization adjusted as a result of the increase in broadcast rights upon the recognition of the gain.

(7) Fair value of derivatives

Certain derivatives that qualify for cash flow hedge accounting under Canadian GAAP do not qualify for similar treatment for US GAAP.

(8) Subscriber connection fee revenue

Subscriber connection fee revenue is deferred and amortized under Canadian GAAP. Under US GAAP, connection revenues are recognized immediately to the extent of related costs, with any excess deferred and amortized.

(9) Pension liability

Under US GAAP, the Company is required to recognize the funded status of the non-contributory defined benefit pension plan on the Consolidated Balance Sheet and to recognize changes in the funded status in other comprehensive income (loss).

Under Canadian GAAP, the over or under funded status of defined benefit plans is not recognized on the Consolidated Balance Sheet.

(10) Interest costs

Under US GAAP, interest costs are capitalized as part of the historical cost of acquiring certain qualifying assets which require a period of time to prepare for their intended use. Interest capitalization is not required under Canadian GAAP.

(11) Income taxes

Income taxes reflect various items including the tax effect of the differences identified above, the impact of future income tax rate reductions on those differences and an adjustment for the tax benefit related to capital losses that cannot be recognized for US GAAP. The Company records interest and penalties related to income tax positions in income tax expense. The Company and its subsidiaries file income tax returns in either Canadian federal and provincial jurisdictions or United States federal and state jurisdictions. With few exceptions, the Company is no longer subject to income tax examinations for the years before 1999.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2010	2009	2008
	\$	\$	\$
Balance, beginning of year	23,600	25,400	25,600
Decrease for tax positions related to prior years	(6,900)	(1,800)	(2,600)
Increase for tax positions related to current year	600		2,400
Balance, end of year	17,300	23,600	25,400

(b) Advertising costs

Advertising costs are expensed when incurred for both Canadian and US GAAP and for 2010, amounted to \$66,138 (2009 \$52,384; 2008 \$47,656).

(c) Adoption of new accounting pronouncement

Business Combinations

Effective September 1, 2009, the Company adopted FASB Accounting Standards Codification section 805-10

Business Combinations . This revised statement requires assets and liabilities acquired in a business combination, contingent consideration, and certain acquired contingencies to be measured at their fair values as of the date of acquisition. In addition, acquisition-related and restructuring costs are to be recognized separately from business combinations, generally as expenses.
