Item 8.01 Other Events.

Effective for the quarter ended March 31, 2011, the Company modified its definition of operating earnings and operating earnings available to common shareholders to exclude impacts related to certain variable annuity guarantees and market value adjustments associated with surrenders or terminations of contracts (Market Value Adjustments) to better conform to the way it manages and assesses its business. Operating earnings and operating earnings available to common shareholders results for prior periods have been adjusted to conform to this modified definition.

Operating earnings and operating earnings available to common shareholders should not be viewed as substitutes for GAAP income (loss) from continuing operations, net of income tax and GAAP net income (loss) available to MetLife, Inc.'s common shareholders, respectively. The Company believes the presentation of operating earnings and operating earnings available to common shareholders as the Company measures it for management purposes enhances the understanding of our performance by highlighting the results of operations and the underlying profitability drivers of the business. See note (1) to the schedules below.

The following additional adjustments are made to GAAP revenues, in the line items indicated, in calculating operating revenues:

Universal life and investment-type product policy fees exclude the amortization of unearned revenue related to NIGL and NDGL and certain variable annuity guaranteed minimum income benefits (GMIB) fees (GMIB Fees);

Net investment income: (i) includes amounts for scheduled periodic settlement payments and amortization of premium on derivatives that are hedges of investments but do not qualify for hedge accounting treatment, (ii) includes income from discontinued real estate operations, (iii) excludes certain amounts related to contractholder-directed unit-linked investments, (iv) excludes post-tax operating earnings adjustments relating to insurance joint ventures accounted for under the equity method and (v) excludes certain amounts related to securitization entities that are variable interest entities (VIEs) consolidated under GAAP; and

Other revenues are adjusted for settlements of foreign currency earnings hedges.

The following adjustments are made to GAAP expenses, in the line items indicated, in calculating operating expenses:

Policyholder benefits and claims and policyholder dividends exclude (i) changes in the policyholder dividend obligation related to NIGL and NDGL, (ii) inflation-indexed benefit adjustments associated with contracts backed by inflation-indexed investments and amounts associated with periodic crediting rate adjustments based on the total return of a contractually referenced pool of assets, (iii) benefits and hedging costs related to GMIBs (GMIB Costs) and (iv) Market Value Adjustments;

Interest credited to policyholder account balances includes adjustments for scheduled periodic settlement payments and amortization of premium on derivatives that are hedges of policyholder account balances but do not qualify for hedge accounting treatment and amounts related to net investment income earned on contractholder-directed unit-linked investments;

Amortization of deferred policy acquisition costs and value of business acquired (VOBA) exclude amounts related to (i) NIGL and NDGL, (ii) GMIB Fees and GMIB Costs, and (iii) Market Value Adjustments;

Amortization of negative VOBA excludes amounts related to Market Value Adjustments;

Interest expense on debt excludes certain amounts related to securitization entities that are VIEs consolidated under GAAP; and

Prior period results have been adjusted to conform to this new presentation of segments.
