As filed with the Securities and Exchange Commission on April 3, 2007

Registration No. 333-

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM N-2
REGISTRATION STATEMENT
UNDER**

THE SECURITIES ACT OF 1933

o Pre-Effective Amendment No.

o Post-Effective Amendment No.

ALLIED CAPITAL CORPORATION

(Exact Name of Registrant as Specified in Charter)

1919 Pennsylvania Avenue, N.W.

Washington, D.C. 20006-3434

(202) 721-6100

(Address and Telephone Number, including Area Code, of Principal Executive Offices)

William L. Walton, Chairman and Chief Executive Officer

Allied Capital Corporation

1919 Pennsylvania Avenue, N.W.

Washington, D.C. 20006-3434

(Name and Address of Agent for Service)

Copies of information to:

Cynthia M. Krus, Esq.

Steven B. Boehm, Esq.

Sutherland Asbill & Brennan LLP

1275 Pennsylvania Avenue, N.W.

Washington, D.C. 20004-2415

Approximate Date of Proposed Public Offering:

From time to time after the effective date of the Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box. x

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered⁽¹⁾	Proposed Maximum Aggregate Principal Amount⁽²⁾	Amount of Registration Fee⁽³⁾
Debt Securities	\$1,380,000,000	\$1,500,000,000	\$42,366

- (1) In reliance upon Rule 429 under the Securities Act of 1933, this amount is in addition to the amount previously registered by the Registrant under a registration statement on Form N-2 (File No. 333-133755). All amounts unsold under the prospectus contained in such prior Registration Statement (a total of \$120,000,000) are carried forward into this Registration Statement, and the prospectus contained as a part of this Registration Statement shall be deemed to be combined with the prospectus contained in the above- referenced registration statement, which has previously been filed.
- (2) Estimated solely for the purpose of computing the registration fee pursuant to Rule 457(o) of the Securities Act of 1933, as amended.
- (3) In reliance upon Rule 429 under the Securities Act of 1933, all amounts unsold under a registration statement on Form N-2 (File No. 333-133755) (a total of \$120,000,000) are carried forward into this Registration Statement. A registration fee of \$12,840 has been paid previously with respect to such securities. The registration fee of \$42,366 relates solely to the registration of the aggregate principal amount of \$1,380,000,000 of one or more series of debt securities not previously registered.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until this registration statement shall become effective on such date as the Commission, acting pursuant to Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

**PROSPECTUS (SUBJECT TO COMPLETION)
ISSUED , 2007**

**\$1,500,000,000
Debt Securities**

We may offer, from time to time, up to an aggregate principal amount of \$1,500,000,000 of one or more classes or series of debt securities, including notes, debentures, medium-term notes, commercial paper, retail notes or similar obligations evidencing indebtedness in one or more offerings.

The debt securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

We are an internally managed closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940.

Our investment objective is to achieve current income and capital gains. We seek to achieve our investment objective by investing in primarily private middle market companies in a variety of industries. No assurances can be given that we will continue to achieve our objective.

Please read this prospectus, the accompanying prospectus supplement, if any, and the pricing supplement, if any, before investing in our debt securities and keep it for future reference. The prospectus and the accompanying prospectus supplement, if any, and the pricing supplement, if any, will contain important information about us that a prospective investor should know before investing in our debt securities. We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission. This information is available free of charge by contacting us at 1919 Pennsylvania Avenue, N.W., Washington, DC, 20006 or by telephone at (202) 721-6100 or on our website at www.alliedcapital.com. The SEC also maintains a website at www.sec.gov that contains such information.

You should review the information set forth under Risk Factors on page 9 of this prospectus before investing in our debt securities.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of our debt securities unless accompanied by a prospectus supplement and, if applicable, a pricing supplement.

April , 2007

We have not authorized any dealer, salesman or other person to give any information or to make any representation other than those contained in this prospectus or any prospectus supplement, if any, or any pricing supplement, if any, to this prospectus. You must not rely upon any information or representation not contained in this prospectus or any such supplements as if we had authorized it. This prospectus and any such supplements do not constitute an offer to sell or a solicitation of any offer to buy any security other than the registered securities to which they relate, nor do they constitute an offer to sell or a solicitation of an offer to buy any securities in any jurisdiction to any person to whom it is unlawful to make such an offer or solicitation in such jurisdiction. The information contained in this prospectus and any such supplements is accurate as of the dates on their covers; however, the prospectus and any supplements will be updated to reflect any material changes.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission using the shelf registration process. Under the shelf registration process, which constitutes a delayed offering in reliance on Rule 415 under the Securities Act of 1933, as amended, we may offer, from time to time, up to \$1,500,000,000 in aggregate principal amount of debt securities on the terms to be determined at the time of the offering. The debt securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the debt securities we may offer. Each time we use this prospectus to offer debt securities, we will provide a prospectus supplement and, if applicable, a pricing supplement that will contain specific information about the terms of that offering. Please carefully read this prospectus and any such supplements together with the additional information described under **Where You Can Find Additional Information** in the **Prospectus Summary** and **Risk Factors** sections before you make an investment decision.

A prospectus supplement and, if applicable, a pricing supplement may also add to, update or change information contained in this prospectus.

(i)

PROSPECTUS SUMMARY

The following summary contains basic information about this offering. It may not contain all the information that is important to an investor. For a more complete understanding of this offering, we encourage you to read this entire prospectus and the documents that are referred to in this prospectus, together with any accompanying supplements.

In this prospectus or any accompanying supplement, unless otherwise indicated, Allied Capital, we, us or our refer to Allied Capital Corporation and its subsidiaries.

BUSINESS (Page 67)

We are a business development company in the private equity business and we are internally managed. We provide long-term debt and equity capital to primarily private middle market companies in a variety of industries. We have participated in the private equity business since we were founded in 1958 and have financed thousands of companies nationwide. Our investment objective is to achieve current income and capital gains.

We believe the private equity capital markets are important to the growth of small and middle market companies because such companies often have difficulty accessing the public debt and equity capital markets. We use the term middle market to include companies with annual revenues typically between \$50 million and \$500 million. We believe that we are well positioned to be a source of capital for such companies.

We primarily invest in the American entrepreneurial economy. At December 31, 2006, our private finance portfolio included investments in 145 companies that generate aggregate annual revenues of over \$13 billion and employ more than 90,000 people.

We generally target companies in less cyclical industries with, among other things, high returns on invested capital, management teams with meaningful equity ownership, well-constructed balance sheets, and the ability to generate free cash flow. As a private equity investor, we spend significant time and effort identifying, structuring, performing due diligence, monitoring, developing, valuing, and ultimately exiting our investments.

Our investment activity is primarily focused on making long-term investments in the debt and equity of primarily private middle market companies. Debt investments may include senior loans, unitranche debt (a single debt investment that is a blend of senior and subordinated debt terms), or subordinated debt (with or without equity features). Equity investments may include a minority equity stake in connection with a debt investment or a substantial equity stake in connection with a buyout transaction. In a buyout transaction, we generally invest in senior debt, subordinated debt and equity (preferred and/or voting or non-voting common) where our equity ownership represents a significant portion of the equity, but may or may not represent a controlling interest.

Our investments in the debt and equity of primarily private middle market companies are generally long-term in nature and are privately negotiated, and no readily available market exists for them. This makes our investments highly illiquid and, as result, we cannot readily trade them. When we make an investment, we enter into a long-term arrangement where our ultimate exit from that investment may be three to ten years in the future.

The capital we provide is used by portfolio companies to fund buyouts, acquisitions, growth, recapitalizations, note purchases, or other types of financings.

Our investments are typically structured to provide recurring cash flow in the form of interest income to us as the investor. In addition to earning interest income, we may structure our investments to generate income from management, consulting, diligence, structuring, or other fees. We may also enhance our total return from capital gains through equity features, such as nominal cost warrants, or by investing in equity investments.

We provide managerial assistance to our portfolio companies, including, but not limited to, management and consulting services related to corporate finance, marketing, human resources, personnel and board member recruiting, business operations, corporate governance, risk management and other general business matters.

We have elected to be taxed as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, otherwise referred to as the Code. As such, we are not subject to corporate level income taxation on income we timely distribute to our stockholders as dividends. See Tax Status. We pay regular quarterly dividends based upon an estimate of annual taxable income available for distribution to shareholders and the amount of taxable income carried over from the prior year for distribution in the current year. Since 1963, our portfolio has provided sufficient ordinary taxable income and realized net capital gains to sustain or grow our dividends over time.

We are a Maryland corporation and a closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, which we refer to as the 1940 Act.

As a business development company, we are required to meet certain regulatory tests, the most significant relating to our investments and borrowings. A business development company is required to invest at least 70% of its assets in eligible portfolio companies. A business development company must also maintain a coverage ratio of assets to senior securities of at least 200%. See Certain Government Regulations and Risk Factors.

Our executive offices are located at 1919 Pennsylvania Avenue, N.W., Washington, DC, 20006-3434 and our telephone number is (202) 721-6100. In addition, we have regional offices in New York, Chicago, and Los Angeles.

Our Internet website address is www.alliedcapital.com. Information contained on our website is not incorporated by reference into this prospectus and you should not consider information contained on our website to be part of this prospectus.

DETERMINATION OF NET ASSET VALUE (Page 92)

Our portfolio investments are generally recorded at fair value as determined in good faith by our Board of Directors in the absence of readily available public market values.

Pursuant to the requirements of the 1940 Act, we value substantially all of our portfolio investments at fair value as determined in good faith by the Board of Directors on a quarterly basis. Since there is typically no readily available market value for the investments in our portfolio, our Board of Directors determines in good faith the fair value of these portfolio investments pursuant to our valuation policy and consistently applied valuation process.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses. Instead, we are required to specifically value each individual investment on a quarterly basis. We will record unrealized depreciation on investments when we believe that an investment has become impaired, including where collection of a loan or realization of an equity security is doubtful, or when the enterprise value of the portfolio company does not currently support the cost of our debt or equity investment. Enterprise value means the entire value of the company to a potential buyer, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. We will record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value and/or our equity security has appreciated in value. Without a readily available market value and because of the inherent uncertainty of valuation, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

We adjust the valuation of our portfolio quarterly to reflect the change in the value of each investment in our portfolio. Any changes in value are recorded in our statement of operations as net change in unrealized appreciation or depreciation.

PLAN OF DISTRIBUTION *(Page 157)*

We may offer, from time to time, up to \$1,500,000,000 aggregate principal amount of debt securities, including notes, debentures, medium-term notes, commercial paper, retail notes or similar obligations evidencing indebtedness, on terms to be determined at the time of the offering.

Our debt securities may be offered at prices and on terms described in one or more supplements to this prospectus. Our debt securities may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplements to this prospectus relating to any offering of debt securities will identify any agents or underwriters involved in the sale of our debt securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated.

We may not offer our debt securities if our BDC asset coverage ratio would be less than 200% after giving effect to such offering. We may not sell debt securities pursuant to this prospectus without delivering a prospectus supplement and, if applicable, a pricing supplement describing the method and terms of the offering of such debt securities.

USE OF PROCEEDS *(Page 19)*

We intend to use the net proceeds from selling debt securities for general corporate purposes, which includes investing in debt or equity securities in primarily privately negotiated transactions, repayment of indebtedness, acquisitions and other general corporate purposes.

The supplements to this prospectus relating to any offering of debt securities will more fully identify the use of proceeds from such offering.

RISK FACTORS (Page 9)

Investment in our debt securities involves a number of significant risks relating to our business and our investment objective that you should consider before investing in our debt securities.

Our portfolio of investments is generally illiquid. Our portfolio includes securities primarily issued by private companies. These investments may involve a high degree of business and financial risk; they are illiquid, and may not produce current returns or capital gains. If we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current value of such investments. We may be required to liquidate some or all of our portfolio investments to meet our debt service obligations or in the event we are required to fulfill our obligations under agreements pursuant to which we guarantee the repayment of indebtedness by third parties.

An economic slowdown may affect the ability of a portfolio company to engage in a liquidity event, which is a transaction that involves the sale or recapitalization of all or part of a portfolio company. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income and assets. Numerous other factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan, a downturn in its industry or negative economic conditions.

Our total investment in companies may be significant individually or in the aggregate. As a result, if a significant investment in one or more companies fails to perform as expected, our financial results could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies.

We may not borrow money unless we maintain asset coverage for indebtedness of at least 200%, which may affect returns to shareholders. We borrow funds to make investments. As a result, we are exposed to the risks of leverage, which may be considered a speculative investment technique. Borrowings, also known as leverage, magnify the potential for gain and loss on amounts invested and therefore increase the risks associated with investing in our securities.

A large number of entities and individuals compete for the same kind of investment opportunities as we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making otherwise attractive investments.

Our business of making private equity investments and positioning them for liquidity events also may be affected by current and future market conditions.

To maintain our status as a business development company, we must not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets.

We may not be able to pay dividends and failure to qualify as a regulated investment company for tax purposes could have a material adverse effect on the income available for debt service or distributions to our shareholders, which may have a material adverse effect on our total return to common shareholders, if any.

Also, we are subject to certain risks associated with valuing our portfolio, changing interest rates, accessing additional capital, fluctuating financial results, and operating in a regulated environment.

The market value of our debt securities may be volatile due to market factors that may be beyond our control.

CERTAIN ANTI-TAKEOVER PROVISIONS *(Page 140)*

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from making an acquisition proposal for Allied Capital. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price for our common stock.

RATIOS OF EARNINGS TO FIXED CHARGES *(Page 17)*

Our ratio of earnings to fixed charges for the five years ended December 31, 2006, was 3.6, 12.3, 4.3, 3.4, and 4.2, respectively. For more information, see the section entitled *Ratios of Earnings to Fixed Charges* in this prospectus.

SENIOR SECURITIES *(Page 64)*

At December 31, 2006, we had \$1.9 billion of outstanding indebtedness bearing a weighted average annual interest cost of 6.5%. If our portfolio fails to produce adequate returns, we may be unable to make interest or principal payments on our indebtedness when they are due, which could give rise to a default on and acceleration of our indebtedness. In order for us to cover annual interest payments on indebtedness, we had to achieve annual returns on our assets of at least 2.5% as of December 31, 2006, which returns were achieved.

SELECTED CONDENSED CONSOLIDATED FINANCIAL DATA

You should read the condensed consolidated financial information below with the Consolidated Financial Statements and Notes thereto included herein. Financial information at and for the years ended December 31, 2006, 2005, 2004, and 2003, has been derived from our financial statements that were audited by KPMG LLP. See **Management's Discussion and Analysis of Financial Condition and Results of Operations** below for more information.

- (1) Effective January 1, 2006, we adopted the provisions of Statement No. 123 (Revised 2004), *Share-Based Payment*. See Management's Discussion and Analysis of Financial Condition and Results of Operations below.
- (2) Dividends are based on taxable income, which differs from income for financial reporting purposes. Net investment income and net realized gains are the most significant components of our annual taxable income from which dividends are paid. See Management's Discussion and Analysis of Financial Condition and Results of Operations below.
- (3) See Senior Securities and Management's Discussion and Analysis of Financial Condition and Results of Operations for more information regarding our level of indebtedness.
- (4) We determine net asset value per common share as of the last day of the period presented. The net asset values shown are based on outstanding shares at the end of each period presented.
- (5) As a business development company, we are generally required to maintain a minimum ratio of 200% of total assets to total borrowings.
- (6) Dividends declared per common share for the fourth quarter of 2006 included the regular quarterly dividend of \$0.62 per common share and an extra dividend of \$0.05 per common share. Dividends declared per common share for the fourth quarter of 2005 included the regular quarterly dividend of \$0.58 per common share and an extra dividend of \$0.03 per common share.

**WHERE YOU CAN FIND
ADDITIONAL INFORMATION**

We have filed with the SEC a registration statement on Form N-2 together with all amendments and related exhibits under the Securities Act of 1933. The registration statement contains additional information about us and the debt securities being offered by this prospectus.

We file annual, quarterly and current reports, proxy statements and other information with the SEC under the Securities Exchange Act of 1934. You can inspect any materials we file with the SEC, without charge, at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. The information we file with the SEC is available free of charge by contacting us at 1919 Pennsylvania Avenue, N.W., Washington, DC, 20006-3434, or by telephone at (202) 721-6100 or on our website at www.alliedcapital.com. The SEC also maintains a web site that contains reports, proxy statements and other information regarding registrants, including us, that file such information electronically with the SEC. The address of the SEC's web site is www.sec.gov. Information contained on our website or on the SEC's web site about us is not incorporated into this prospectus and you should not consider information contained on our website or on the SEC's web site to be part of this prospectus.

RISK FACTORS

Investing in Allied Capital involves a number of significant risks relating to our business and investment objective. As a result, there can be no assurance that we will achieve our investment objective.

Our portfolio of investments is illiquid. We generally acquire our investments directly from the issuer in privately negotiated transactions. The majority of the investments in our portfolio are subject to certain restrictions on resale or otherwise have no established trading market. We typically exit our investments when the portfolio company has a liquidity event such as a sale, recapitalization, or initial public offering of the company. The illiquidity of our investments may adversely affect our ability to dispose of debt and equity securities at times when we may need to or when it may be otherwise advantageous for us to liquidate such investments. In addition, if we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current value of such investments.

Investing in private companies involves a high degree of risk. Our portfolio primarily consists of long-term loans to and investments in middle market private companies. Investments in private businesses involve a high degree of business and financial risk, which can result in substantial losses for us in those investments and accordingly should be considered speculative. There is generally no publicly available information about the companies in which we invest, and we rely significantly on the diligence of our employees and agents to obtain information in connection with our investment decisions. If we are unable to identify all material information about these companies, among other factors, we may fail to receive the expected return on our investment or lose some or all of the money invested in these companies. In addition, these businesses may have shorter operating histories, narrower product lines, smaller market shares and less experienced management than their competition and may be more vulnerable to customer preferences, market conditions, loss of key personnel, or economic downturns, which may adversely affect the return on, or the recovery of, our investment in such businesses. As an investor, we are subject to the risk that a portfolio company may make a business decision that does not serve our interest, which could decrease the value of our investment. Deterioration in a portfolio company's financial condition and prospects may be accompanied by deterioration in any collateral for the loan.

Substantially all of our portfolio investments are recorded at fair value as determined in good faith by our Board of Directors and, as a result, there is uncertainty regarding the value of our portfolio investments. At December 31, 2006, portfolio investments recorded at fair value were 92% of our total assets. Pursuant to the requirements of the 1940 Act, we value substantially all of our investments at fair value as determined in good faith by our Board of Directors on a quarterly basis. Since there is typically no readily available market value for the investments in our portfolio, our Board of Directors determines in good faith the fair value of these investments pursuant to a valuation policy and a consistently applied valuation process.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining fair value in good faith, we generally obtain financial and other information from portfolio companies, which may represent unaudited, projected or proforma financial information. Unlike banks, we are not

permitted to provide a general reserve for anticipated loan losses; we are instead required by the 1940 Act to specifically value each individual investment on a quarterly basis and record unrealized depreciation for an investment that we believe has become impaired, including where collection of a loan or realization of an equity security is doubtful, or when the enterprise value of the portfolio company does not currently support the cost of our debt or equity investment. Enterprise value means the entire value of the company to a potential buyer, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. We will record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value and/or our equity security has appreciated in value. Without a readily available market value and because of the inherent uncertainty of valuation, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Our net asset value could be affected if our determination of the fair value of our investments is materially different than the value that we ultimately realize.

We adjust quarterly the valuation of our portfolio to reflect the Board of Directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our statement of operations as net change in unrealized appreciation or depreciation.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of the companies in which we have made or will make investments may be susceptible to economic slowdowns or recessions. An economic slowdown may affect the ability of a company to repay our loans or engage in a liquidity event such as a sale, recapitalization, or initial public offering. Our nonperforming assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions also may decrease the value of any collateral securing some of our loans. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income, and assets.

Our business of making private equity investments and positioning them for liquidity events also may be affected by current and future market conditions. The absence of an active senior lending environment or a slowdown in middle market merger and acquisition activity may slow the amount of private equity investment activity generally. As a result, the pace of our investment activity may slow. In addition, significant changes in the capital markets could have an effect on the valuations of private companies and on the potential for liquidity events involving such companies. This could affect the timing of exit events in our portfolio and could negatively affect the amount of gains or losses upon exit.

Our borrowers may default on their payments, which may have a negative effect on our financial performance. We make long-term unsecured, subordinated loans and invest in equity securities, which may involve a higher degree of repayment risk. We primarily invest in companies that may have limited financial resources, may be highly leveraged and may be unable to obtain financing from traditional sources. Numerous factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan, a downturn in its industry, or negative economic conditions. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on its secured assets, which could trigger cross defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks

senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on our subordinated loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may have a negative effect on our financial results.

Our private finance investments may not produce current returns or capital gains. Our private finance investments are typically structured as unsecured debt securities with a relatively high fixed rate of interest and with equity features such as conversion rights, warrants, or options, or as buyouts of companies where we invest in debt and equity securities. As a result, our private finance investments are generally structured to generate interest income from the time they are made and may also produce a realized gain from an accompanying equity feature. We cannot be sure that our portfolio will generate a current return or capital gains.

Our financial results could be negatively affected if a significant portfolio investment fails to perform as expected. Our total investment in companies may be significant individually or in the aggregate. As a result, if a significant investment in one or more companies fails to perform as expected, our financial results could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies. At December 31, 2006, our largest investments at value were in Mercury Air Centers, Inc. and Business Loan Express, LLC (BLX), which represented 5.0% and 4.3% of our total assets, respectively, and 2.2% and 4.4% of our total interest and related portfolio income, respectively, for the year ended December 31, 2006.

BLX is a non-bank lender that participates in the Small Business Administration (SBA) 7(a) Guaranteed Loan Program and, as a result, is subject to certain risks associated with changes in government funding, ongoing audits, inspections and investigations, and changes in SBA laws or regulations. The Office of the Inspector General of the SBA and the United States Secret Service have announced an ongoing investigation of allegedly fraudulently obtained SBA-guaranteed loans issued by BLX. We understand that BLX is working cooperatively with the SBA with respect to this matter so that it may remain a preferred lender in the SBA 7(a) program and retain the ability to sell loans into the secondary market. The ultimate resolution of these matters could have a material adverse impact on BLX's financial condition and, as a result, our financial results could be negatively affected. There may be other investigations initiated by the Office of the Inspector General of the SBA or the U.S. Department of Justice in the future. See Management's Discussion and Analysis Private Finance, Business Loan Express, LLC and Recent Developments for further information and discussion on these matters.

We borrow money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us. Borrowings, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. The debt securities we may issue pursuant to this prospectus, the prospectus supplement, and the applicable pricing supplement, if any, are a form of such borrowings. We borrow from and issue senior debt securities to banks, insurance companies, and other lenders or investors. Holders of these senior securities have fixed dollar claims on our consolidated assets that are superior to the claims of our common shareholders. If the value of our consolidated assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not leveraged. Conversely, if the value of our consolidated assets decreases, leveraging would cause net asset value to decline more

sharply than it otherwise would have had we not leveraged. Similarly, any increase in our consolidated income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our consolidated income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. Leverage is generally considered a speculative investment technique. We and, indirectly, our stockholders will bear the cost associated with our leverage activity. Our revolving line of credit and notes payable contain financial and operating covenants that could restrict our business activities, including our ability to declare dividends if we default under certain provisions.

At December 31, 2006, we had \$1.9 billion of outstanding indebtedness bearing a weighted average annual interest cost of 6.5% and a debt to equity ratio of 0.67 to 1.00. If our portfolio of investments fails to produce adequate returns, we may be unable to make interest or principal payments on our indebtedness when they are due. In order for us to cover annual interest payments on indebtedness, we must achieve annual returns on our assets of at least 2.5% as of December 31, 2006, which returns were achieved.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below. The calculation assumes (i) \$4,887.5 million in total assets, (ii) an average cost of funds of 6.5%, (iii) \$1,899.1 million in debt outstanding and (iv) \$2,841.2 million of shareholders equity.

	Assumed Return on Our Portfolio (net of expenses)						
	-20%	-10%	-5%	0%	5%	10%	20%
Corresponding return to shareholder	-38.75%	-21.55%	-12.95%	-4.35%	4.26%	12.86%	30.06%

We may not borrow money unless we maintain asset coverage for indebtedness of at least 200%, which may affect returns to shareholders. We must maintain asset coverage for total borrowings of at least 200%. Our ability to achieve our investment objective may depend in part on our continued ability to maintain a leveraged capital structure by borrowing from banks, insurance companies or other lenders or investors on favorable terms. There can be no assurance that we will be able to maintain such leverage. If asset coverage declines to less than 200%, we may be required to sell a portion of our investments when it is disadvantageous to do so. As of December 31, 2006, our asset coverage for senior indebtedness was 250%.

Changes in interest rates may affect our cost of capital and net investment income. Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase, which would reduce our net investment income. We use a combination of long-term and short-term borrowings and equity capital to finance our investing activities. We utilize our revolving line of credit as a means to bridge to long-term financing. Our long-term fixed-rate investments are

financed primarily with long-term fixed-rate debt and equity. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. We have analyzed the potential impact of changes in interest rates on interest income net of interest expense.

Assuming that the balance sheet as of December 31, 2006, were to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical immediate 1% change in interest rates would have affected net income by approximately 1% over a one year horizon. Although management believes that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of the assets on the balance sheet and other business developments that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by this estimate.

We will continue to need additional capital to grow because we must distribute our income. We will continue to need capital to fund growth in our investments. Historically, we have borrowed from financial institutions or other investors and have issued equity securities to grow our portfolio. A reduction in the availability of new debt or equity capital could limit our ability to grow. We must distribute at least 90% of our taxable ordinary income, which excludes realized net long-term capital gains, to our shareholders to maintain our eligibility for the tax benefits available to regulated investment companies. As a result, such earnings will not be available to fund investment originations. In addition, as a business development company, we are generally required to maintain a ratio of at least 200% of total assets to total borrowings, which may restrict our ability to borrow in certain circumstances. We intend to continue to borrow from financial institutions or other investors and issue additional debt and equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, it could limit our ability to grow, which could have a material adverse effect on the value of our debt securities or common stock.

Loss of regulated investment company tax treatment would substantially reduce net assets and income available for debt service and dividends. We have operated so as to qualify as a regulated investment company under Subchapter M of the Code. If we meet source of income, asset diversification, and distribution requirements, we will not be subject to corporate-level income taxation on income we timely distribute to our stockholders as dividends. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our stockholders because in certain cases we may recognize income before or without receiving cash representing such income. If we fail to qualify as a regulated investment company, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which would substantially reduce the amount of income available for debt service and distributions to our stockholders. Even if we qualify as a regulated investment company, we generally will be subject to a corporate-level income tax on the income we do not distribute. If we do not distribute at least 98% of our annual taxable income in the year earned, we generally will be required to pay an excise tax on amounts carried over and distributed to shareholders in the next year equal to 4% of the amount by which 98% of our annual taxable income exceeds the distributions from such income for the current year.

There is a risk that our common stockholders may not receive dividends or distributions. We intend to make distributions on a quarterly basis to our stockholders. We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a business development company, we may be limited in our ability to make distributions. Also, certain of our credit facilities limit our ability to declare dividends if we default under certain provisions. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of the tax benefits available to us as a regulated investment company. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue discount. The increases in loan balances as a result of contractual payment-in-kind arrangements are included in income in advance of receiving cash payment and are separately included in the change in accrued or reinvested interest and dividends in our consolidated statement of cash flows. Since we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a regulated investment company.

We operate in a competitive market for investment opportunities. We compete for investments with a large number of private equity funds and mezzanine funds, other business development companies, investment banks, other equity and non-equity based investment funds, and other sources of financing, including specialty finance companies and traditional financial services companies such as commercial banks. Some of our competitors may have greater resources than we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making otherwise attractive investments.

Our business depends on our key personnel. We depend on the continued services of our executive officers and other key management personnel. If we were to lose any of these officers or other management personnel, such a loss could result in inefficiencies in our operations and lost business opportunities, which could have a negative effect on our business.

Changes in the law or regulations that govern us could have a material impact on us or our operations. We are regulated by the SEC. In addition, changes in the laws or regulations that govern business development companies, regulated investment companies, and real estate investment trusts may significantly affect our business. Any change in the law or regulations that govern our business could have a material impact on us or our operations. Laws and regulations may be changed from time to time, and the interpretations of the relevant laws and regulations also are subject to change, which may have a material effect on our operations.

Failure to invest a sufficient portion of our assets in qualifying assets could preclude us from investing in accordance with our current business strategy. As a business development company, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See Certain Government Regulations. Therefore, we may be precluded from investing in what we believe are attractive investments if such investments

are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could lose our status as a business development company, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making additional investments in existing portfolio companies, which could result in the dilution of our position, or could require us to dispose of investments at inopportune times in order to comply with the 1940 Act. If we were forced to sell nonqualifying investments in the portfolio for compliance purposes, the proceeds from such sale could be significantly less than the current value of such investments.

Results may fluctuate and may not be indicative of future performance. Our operating results may fluctuate and, therefore, you should not rely on current or historical period results to be indicative of our performance in future reporting periods. Factors that could cause operating results to fluctuate include, but are not limited to, variations in the investment origination volume and fee income earned, changes in the accrual status of our loans and debt securities, variations in timing of prepayments, variations in and the timing of the recognition of net realized gains or losses and changes in unrealized appreciation or depreciation, the level of our expenses, the degree to which we encounter competition in our markets, and general economic conditions.

Our common stock price may be volatile. The trading price of our common stock may fluctuate substantially. The price of the common stock may be higher or lower than the price paid by stockholders, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include, but are not limited to, the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of securities of business development companies or other financial services companies;

volatility resulting from trading in derivative securities related to our common stock including puts, calls, long-term equity anticipation securities, or LEAPs, or short trading positions;

changes in laws or regulatory policies or tax guidelines with respect to business development companies or regulated investment companies;

actual or anticipated changes in our earnings or fluctuations in our operating results or changes in the expectations of securities analysts;

general economic conditions and trends;

loss of a major funding source; or

departures of key personnel.

The trading market or market value of our publicly issued debt securities may be volatile. Upon issuance, our publicly issued debt securities will not have an established trading market. We cannot assure you that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and

market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical to these debt securities;

the supply of debt securities trading in the secondary market, if any;

the redemption or repayment features, if any, of these debt securities;

the level, direction and volatility of market interest rates generally; and

market rates of interest higher or lower than rates borne by the debt securities.

You should also be aware that there may be a limited number of buyers when you decide to sell your debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Our credit ratings may not reflect all risks of an investment in the debt securities. Our credit ratings are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the publicly issued debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

Terms relating to redemption may materially adversely affect your return on the debt securities. If your debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if your debt securities are subject to mandatory redemption, we may be required to redeem your debt securities also at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In this circumstance, you may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as your debt securities being redeemed.

RATIOS OF EARNINGS TO FIXED CHARGES

For the five years ended December 31, 2006, the ratios of earnings to fixed charges of the Company, computed as set forth below, were as follows:

	Year Ended December 31,				
	2006	2005	2004	2003	2002
Earnings to Fixed Charges*	3.6	12.3	4.3	3.4	4.2

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) income tax expense (benefit), including excise tax expense plus fixed charges. Fixed charges include interest expense, a portion of rent expense and preferred stock dividend expense. We have assumed that one-third of the annual rent expense represents fixed charges.

*Earnings include the net change in unrealized appreciation or depreciation. Net change in unrealized appreciation or depreciation can vary substantially from year to year. Excluding the net change in unrealized appreciation or depreciation, the earnings to fixed charges ratio would be 8.2, 6.4, 5.2, 4.4, and 4.2 for the five years ended December 31, 2006, respectively.

Disclosure Regarding Forward-Looking Statements

Information contained or incorporated by reference in this prospectus, and any prospectus supplement and pricing supplement, if any, accompanying this prospectus contains forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate or continue or the negative or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth above in the Risk Factors section. Other factors that could cause actual results to differ materially include:

changes in the economy and general economic conditions;

risks associated with possible disruption in our operations due to terrorism;

future changes in laws or regulations and conditions in our operating areas; and

other risks and uncertainties as may be detailed from time to time in our public announcements and SEC filings.

The matters described in Risk Factors and certain other factors noted throughout this prospectus and any prospectus supplement and pricing supplement, if any, accompanying this prospectus and in any exhibits to the registration statement of which this prospectus is a part, constitute cautionary statements identifying important factors with respect to any such forward-looking statements, including certain risks and uncertainties, that could cause actual results to differ materially from those in such forward-looking statements.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be incorrect. Important assumptions include our ability to originate new investments, maintain certain margins and levels of profitability, access the capital markets for debt and equity capital, the ability to meet regulatory requirements and the ability to maintain certain debt to asset ratios. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus and any prospectus supplement and pricing supplement, if any, accompanying this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus and the date on the cover of any such supplements with respect to such supplements.

USE OF PROCEEDS

We intend to use the net proceeds from selling debt securities for general corporate purposes, which may include investing in debt or equity securities in primarily privately negotiated transactions, repayment of indebtedness, acquisitions and other general corporate purposes. Because our primary business is to provide long-term debt and equity capital to primarily middle-market companies, we are continuously identifying, reviewing and, to the extent consistent with our investment objective, funding new investments. As a result, we typically raise capital as we deem appropriate to fund such new investments. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

We anticipate that substantially all of the net proceeds of any offering of debt securities will be used as described above or in any prospectus supplement and pricing supplement, if any, accompanying this prospectus. Pending investment, we intend to invest the net proceeds of any offering of debt securities in time deposits, income-producing securities with maturities of three months or less that are issued or guaranteed by the federal government or an agency of the federal government, high quality debt securities maturing in one year or less from the time of investment or other qualifying investments. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of any offering of debt securities, pending full investment, are held in lower-yielding time deposits and other short-term instruments.

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock is traded on the New York Stock Exchange under the symbol ALD. The following table lists the high and low closing sales prices for our common stock, the closing sales price as a percentage of net asset value (NAV) and quarterly dividends per share. On April 2, 2007, the last reported closing sale price of our common stock was \$28.90 per share.

	NAV ⁽¹⁾	Closing Sales Price		Premium of High Sales Price to NAV ⁽²⁾	Premium of Low Sales Price to NAV ⁽²⁾	Declared Dividends
		High	Low			
Year ended December 31, 2005						
First Quarter	\$15.22	\$27.84	\$24.89	183%	164%	\$0.57
Second Quarter	\$17.01	\$29.29	\$25.83	172%	152%	\$0.57
Third Quarter	\$17.37	\$29.17	\$26.92	168%	155%	\$0.58
Fourth Quarter	\$19.17	\$30.80	\$26.11	161%	136%	\$0.58
Extra Dividend						\$0.03
Year ended December 31, 2006						
First Quarter	\$19.50	\$30.68	\$28.51	157%	146%	\$0.59
Second Quarter	\$19.17	\$31.32	\$28.77	163%	150%	\$0.60
Third Quarter	\$19.38	\$30.88	\$27.30	159%	141%	\$0.61
Fourth Quarter	\$19.12	\$32.70	\$29.99	171%	157%	\$0.62
Extra Dividend						\$0.05
Year ended December 31, 2007						
First Quarter	*	\$32.98	\$28.05	*	*	\$0.63
Second Quarter (through April 2, 2007)	*	\$28.90	\$28.90	*	*	*

(1) Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low closing sales price divided by NAV.

* Not determinable at the time of filing.

Our common stock continues to trade in excess of net asset value. There can be no assurance, however, that our shares will continue to trade at a premium to our net asset value.

We intend to pay quarterly dividends to shareholders of our common stock. The amount of our quarterly dividends is determined by our Board of Directors. Our Board of Directors has established a dividend policy to review the dividend rate quarterly, and may adjust the quarterly dividend rate throughout the year. See Management's Discussion and Analysis of Financial Condition and Results of Operations Dividends and Distributions and Tax Status. There can be no assurance that we will achieve investment results or maintain a tax status that will permit any particular level of dividend payment. Certain of our credit facilities limit our ability to declare dividends if we default under certain provisions.

We maintain an opt in dividend reinvestment plan for our common shareholders. As a result, if our Board of Directors declares a dividend, then our shareholders will receive cash dividends, unless they specifically opt in to the dividend reinvestment plan to reinvest their dividends and receive additional shares of common stock. See Dividend Reinvestment Plan.

**MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The information contained in this section should be read in conjunction with our Consolidated Financial Statements and the Notes thereto. In addition, this prospectus contains certain forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate, or continue or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth in Risk Factors above. Other factors that could cause actual results to differ materially include:

changes in the economy;

risks associated with possible disruption in our operations due to terrorism;

future changes in laws or regulations and conditions in our operating areas; and

other risks and uncertainties as may be detailed from time to time in our public announcements and SEC filings.

Financial or other information presented for private finance portfolio companies has been obtained from the portfolio companies, and this financial information presented may represent unaudited, projected or pro forma financial information, and therefore may not be indicative of actual results. In addition, the private equity industry uses financial measures such as EBITDA or EBITDAM (Earnings Before Interest, Taxes, Depreciation, Amortization and, in some instances, Management fees) in order to assess a portfolio company's financial performance and to value a portfolio company. EBITDA and EBITDAM are not intended to represent cash flow from operations as defined by U.S. generally accepted accounting principles and such information should not be considered as an alternative to net income, cash flow from operations or any other measure of performance prescribed by U.S. generally accepted accounting principles.

OVERVIEW

As a business development company, we are in the private equity business. Specifically, we provide long-term debt and equity investment capital to companies in a variety of industries. Our private finance activity principally involves providing financing to middle market U.S. companies through privately negotiated long-term debt and equity investment capital. Our financing is generally used to fund buyouts, acquisitions, growth, recapitalizations, note purchases, and other types of financings. We generally invest in private companies though, from time to time, we may invest in companies that are public but lack access to additional public capital. Our investment objective is to achieve current income and capital gains.

Our portfolio composition at December 31, 2006, 2005, and 2004, was as follows:

	2006	2005	2004
Private finance	97%	96%	76%
Commercial real estate finance ⁽¹⁾	3%	4%	24%

(1) On May 3, 2005, we completed the sale of our portfolio of non-investment grade commercial mortgage-backed securities and real estate related collateralized debt obligation bonds and preferred shares investments. Upon the completion of this transaction, our lending and investment activity has been focused primarily on private finance investments.

Our earnings depend primarily on the level of interest and dividend income, fee and other income, and net realized and unrealized gains or losses on our investment portfolio after deducting interest expense on borrowed capital, operating expenses and income taxes, including excise tax. Interest income results from the stated interest rate earned on a loan or debt security and the amortization of loan origination fees and discounts. The level of interest income is directly related to the balance of the interest-bearing investment portfolio outstanding during the year multiplied by the weighted average yield. Our ability to generate interest income is dependent on economic, regulatory, and competitive factors that influence new investment activity, interest rates on the types of loans we make, the level of repayments in the portfolio, the amount of loans and debt securities for which interest is not accruing and our ability to secure debt and equity capital for our investment activities.

Because we are a regulated investment company for tax purposes, we intend to distribute substantially all of our annual taxable income available for distribution to shareholders as dividends to our shareholders. See Other Matters below.

PORTFOLIO AND INVESTMENT ACTIVITY

The total portfolio at value, investment activity, and the yield on interest-bearing investments at and for the years ended December 31, 2006, 2005, and 2004, were as follows:

	At and for the Years Ended December 31,		
	2006	2005	2004
(\$ in millions)			
Portfolio at value	\$4,496.1	\$3,606.4	\$3,013.4
Investments funded ⁽¹⁾	\$2,437.8	\$1,675.8	\$1,524.5
Change in accrued or reinvested interest and dividends ⁽²⁾	\$ 11.3	\$ 6.6	\$ 52.2
Principal collections related to investment repayments or sales	\$1,055.3	\$1,503.4	\$ 909.2
Yield on interest-bearing investments ⁽³⁾	11.8%	12.8%	14.0%

(1) Investments funded included investments acquired through the issuance of our common stock as consideration totaling \$7.2 million and \$3.2 million, respectively, for the years ended December 31, 2005 and 2004. See also Private Finance below.

(2) Includes changes in accrued or reinvested interest of \$3.1 million for the year ended December 31, 2006, related to our investments in money market securities.

(3)

The weighted average yield on interest-bearing investments is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total interest-bearing investments at value. The weighted average yield is computed as of the balance sheet date.

Private Finance

The private finance portfolio at value, investment activity, and the yield on loans and debt securities at and for the years ended December 31, 2006, 2005, and 2004, were as follows:

	At and for the Years Ended December 31,					
	2006		2005		2004	
	Value	Yield⁽²⁾	Value	Yield⁽²⁾	Value	Yield⁽²⁾
(\$ in millions)						
Portfolio at value:						
Loans and debt securities:						
Senior loans	\$ 405.2	8.4%	\$ 239.8	9.5%	\$ 234.6	8.5%
Unitranche debt	799.2	11.2%	294.2	11.4%	43.9	14.8%
Subordinated debt	1,980.8	12.9%	1,560.9	13.8%	1,324.4	14.9%
Total loans and debt securities	3,185.2	11.9%	2,094.9	13.0%	1,602.9	13.9%
Equity securities	1,192.7		1,384.4		699.2	
Total portfolio	\$4,377.9		\$3,479.3		\$2,302.1	
Investments funded ⁽¹⁾	\$2,423.4		\$1,462.3		\$1,140.8	
Change in accrued or reinvested interest and dividends	\$ 7.2		\$ 24.6		\$ 45.6	
Principal collections related to investment repayments or sales ⁽³⁾	\$1,015.4		\$ 703.9		\$ 551.9	

(1) Investments funded for the years ended December 31, 2006 and 2004, included debt investments in certain portfolio companies received in conjunction with the sale of such companies. See Private Finance, Investments Funded below.

(2) The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. The weighted average yield is computed as of the balance sheet date.

(3) Includes collections from the sale or repayment of senior loans totaling \$322.7 million, \$301.8 million, and \$35.6 million for the years ended December 31, 2006, 2005, and 2004, respectively.

Our investment activity is focused on making long-term investments in the debt and equity of primarily private middle market companies. Debt investments may include senior loans, unitranche debt (a single debt investment that is a blend of senior and subordinated debt terms), or subordinated debt (with or without equity features). The junior debt that we invest in that is lower in repayment priority than senior debt is also known as mezzanine debt. Equity investments may include a minority equity stake in connection with a debt investment or a substantial equity stake in

connection with a buyout transaction. In a buyout transaction, we generally invest in senior and/or subordinated debt and equity (preferred and/or voting or non-voting common) where our equity ownership represents a significant portion of the equity, but may or may not represent a controlling interest.

We intend to take a balanced approach to private equity investing that emphasizes a complementary mix of debt investments and buyout investments. The combination of these two types of investments provides current interest and related portfolio income and the potential for future capital gains. To address the current market, our strategy is to focus on buyout and recapitalization transactions where we can manage risk through the structure

and terms of our debt and equity investments and where we can potentially realize more attractive total returns from both current interest and fee income and future capital gains. We are also focusing our debt investing on smaller middle market companies where we can provide both senior and subordinated debt or unitranche debt, where our combined current yield may be lower than traditional subordinated debt only. We believe that providing both senior and subordinated debt or unitranche debt provides us with greater protection in the capital structures of our portfolio companies. The yield on loans and debt securities will vary from period to period depending on the level of lower-yielding senior debt in the portfolio.

The level of investment activity for investments funded and principal repayments for private finance investments can vary substantially from period to period depending on the number and size of investments that we make or that we exit and many other factors, including the amount of debt and equity capital available to middle market companies, the level of merger and acquisition activity for such companies, the general economic environment, and the competitive environment for the types of investments we make. We believe that merger and acquisition activity in the middle market is strong, which has resulted in an increase in private finance investment opportunities, as well as increased repayments.

It has been and we believe it will continue to be a highly competitive market for winning new investments. As a result, we have continued to build our business development team to increase the number of potential investments that we see. We also believe that it is important to be disciplined in our investing activities, carefully considering investment risk and return. For 2006, we reviewed over \$65 billion in prospective investments and we closed on approximately 3% of the potential new investments that we reviewed. This compares to over \$45 billion reviewed and approximately 3% closed for 2005. We continue to have an active pipeline of new investments under consideration and we believe that merger and acquisition activity for middle market companies will remain strong in 2007.

Investments Funded. Investments funded and the weighted average yield on loans and debt securities funded for the years ended December 31, 2006, 2005, and 2004, consisted of the following:

2006 Investments Funded

Debt Investments		Buyout Investments		Total
Amount	Weighted Average Yield⁽¹⁾	Amount	Weighted Average Yield	Weighted Average
