TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. The Company

Tronox Incorporated (the company), a Delaware Corporation was formed on May 17, 2005, in preparation for the contribution and transfer by Kerr-McGee Corporation (Kerr-McGee) of certain entities, including those comprising substantially all of its chemical business (the Contribution). The company has one reportable segment representing the company's pigment business. The pigment segment primarily produces and markets titanium dioxide pigment (TiO₂) and has production facilities in the United States, Australia, Germany and The Netherlands. The pigment segment also includes heavy minerals production operated through our joint venture. The heavy minerals production is integrated with our Australian pigment plant, but also has third-party sales of minerals not utilized by the company's pigment operations. Electrolytic and other chemical products (which does not constitute a reportable segment) represents the company's other operations which are comprised of electrolytic manufacturing and marketing operations, all of which are located in the United States. The company has in the past operated or held businesses or properties, or currently holds properties, that do not relate to the current chemical business.

The terms Tronox or the company are used interchangeably in these condensed consolidated financial statements to refer to the consolidated group or to one or more of the companies that are part of the consolidated group.

Formation

The Contribution was completed in November 2005, along with the recapitalization of the company, whereby common stock held by Kerr-McGee converted into approximately 22.9 million shares of Class B common stock. An initial public offering (IPO) of Class A common stock was completed on November 28, 2005. Prior to the IPO, Tronox was a wholly owned subsidiary of Kerr-McGee. Pursuant to the terms of the Master Separation Agreement dated November 28, 2005, among Kerr-McGee, Kerr-McGee Worldwide Corporation and the company (the MSA), the net proceeds from the IPO of \$224.7 million were distributed to Kerr-McGee.

Following the IPO, approximately 43.3% of the total outstanding common stock of Tronox was held by the general public and 56.7% was held by Kerr-McGee. The holders of Class A common stock and Class B common stock have identical rights, except that holders of Class A common stock are entitled to one vote per share, while holders of Class B common stock are entitled to six votes per share on all matters to be voted on by stockholders.

On March 8, 2006, Kerr-McGee's Board of Directors declared a dividend of the company's Class B common stock owned by Kerr-McGee to its stockholders (the Distribution). The Distribution was completed on March 30, 2006, resulting in Kerr-McGee having no ownership or voting interest in the company.

2. Basis of Presentation and Accounting Policies

These statements should be read in conjunction with the audited consolidated and combined financial statements and the related notes which are included in the company's Annual Report on Form 10-K for the year ended December 31, 2006. The interim condensed consolidated financial information furnished herein is unaudited. The information reflects all adjustments (which include only normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and results of operations for the periods included in the report.

The following prior-year amounts have been reclassified to conform with the current-year presentation. Where applicable, changes to line item amounts in the company's Condensed Consolidated Statements of Operations are disclosed. These changes had no impact on income from continuing operations or net income.

Sales rebates, previously presented with accounts payable, are now presented with accrued liabilities in the company's Condensed Consolidated Balance Sheets.

Vendor commissions, previously a reduction of net sales, have been reclassified as selling, general and administrative expenses. The increase in net sales and selling, general and administrative expenses for the three and six-month periods ending June 30, 2006, were \$1.1 million and \$1.9 million, respectively.

Reimbursements for out-of-pocket selling expenses previously accounted for as a reduction of selling, general and administrative expenses have been reclassified as net sales. The increase in net sales and selling, general and administrative expenses for the three and six-month periods ending June 30, 2006, were \$2.0 million and \$3.8 million, respectively.

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Railcar expenses previously accounted for as selling, general and administrative expenses have been reclassified as cost of goods sold. The increase in cost of goods sold and corresponding decrease in selling, general and administrative expenses for both the three and six-month periods ending June 30, 2006, was \$0.8 million.

In connection with the company's adoption of the transition provisions of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 158, *Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans*, the 2006 financial statements included in the company's Annual Report on Form 10-K contained a misstatement in the presentation of other comprehensive income (loss). The unrecognized prior service cost and actuarial loss totaling \$95.5 million recorded in the company's Consolidated Balance Sheet as of December 31, 2006, should have been presented only as an adjustment to the balance of accumulated other comprehensive loss as of December 31, 2006, and not as part of comprehensive income (loss) for the period then ended. The presentation in the company's Consolidated and Combined Statement of Comprehensive Income (Loss) and Business/Stockholders' Equity for the year ended December 31, 2006, and in the related Notes to Consolidated and Combined Financial Statements will be revised in the company's Annual Report on Form 10-K for the year ending December 31, 2007, to reflect comprehensive income of \$28.5 million for the year ended December 31, 2006, versus comprehensive loss of \$67.0 million previously reported.

In July 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes*, (FIN 48). The company adopted FIN 48 as of January 1, 2007. FIN 48 clarifies the application of SFAS No. 109 by defining criteria that an uncertain tax position must meet in order to be recognized in an enterprise's financial statements. FIN 48 also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The guidance required application through recognition of a cumulative effect adjustment to opening retained earnings in the period of adoption, with no charge to current earnings for prior periods. The results for prior periods have not been restated. As a result of the adoption of FIN 48, the company recognized a \$9.3 million charge to the January 1, 2007, balance of retained earnings. The total amount of unrecognized tax positions at January 1, 2007, was \$60.7 million.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The company is reviewing SFAS No. 157 to determine the impact on its financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - including an Amendment of FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities*. The company is currently assessing whether or not the provisions of SFAS No. 159 will be implemented and what the financial statement impact would be, if any. If the company chooses to implement SFAS No. 159, the effective date would be January 1, 2008.

3. Statement of Operations Data

The components of other income, net are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(In millions)			
Net foreign currency transaction gain (loss)	\$ (1.2)	\$ 3.8	\$ (1.5)	\$ 8.1
Equity in net earnings of equity method investees	1.3	4.7	2.0	4.7
Provision for litigation settlements		(3.7)		(3.7)
Interest income	0.5	0.6	1.3	1.3
Other income (expense)	0.1	(0.1)	0.6	(0.7)
Total	\$ 0.7	\$ 5.3	\$ 2.4	\$ 9.7

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables set forth the computation of basic and diluted earnings per share from continuing operations for the periods indicated.

	Three Months Ended June 30, 2007			Three Months Ended June 30, 2006		
	Loss from Continuing Operations	Shares	Per- Share Loss	Loss from Continuing Operations	Shares	Per- Share Loss
	(In millions, except per share amounts)					
Basic earnings per share	\$ (20.0)	40.7	\$ (0.49)	\$ (5.7)	40.4	\$ (0.14)
Effect of dilutive securities: Restricted stock and stock options						
Diluted earnings per share	\$ (20.0)	40.7	\$ (0.49)	\$ (5.7)	40.4	\$ (0.14)

	Six Months Ended June 30, 2007			Six Months Ended June 30, 2006		
	Loss from Continuing Operations	Shares	Per- Share Loss	Income from Continuing Operations	Shares	Per- Share Income
	(In millions, except per share amounts)					
Basic earnings per share	\$ (29.0)	40.7	\$ (0.71)	\$ 17.9	40.4	\$ 0.44
Effect of dilutive securities: Restricted stock and stock options					0.5	
Diluted earnings per share	\$ (29.0)	40.7	\$ (0.71)	\$ 17.9	40.9	\$ 0.44

Stock options outstanding of approximately 786,000 at June 30, 2007, were out of the money, thus, antidilutive. The average exercise price of these antidilutive options was \$14.69. Since the company incurred a loss from continuing operations for the three months and six months ended June 30, 2007, no dilution of the loss per share would result from an additional 1.6 million potentially dilutive shares outstanding at June 30, 2007. The company also incurred a loss from continuing operations for the three months ended June 30, 2006; thus, no dilution of the loss per share resulted from 2.2 million potentially dilutive shares outstanding at June 30, 2006.

4. Balance Sheet Data

Accounts receivable, net, consists of the following:

5. Summarized Combined Financial Information of Affiliates

The company has investments in Basic Management, Inc. and Subsidiaries (a corporation in which the company has a 31% interest, whose combined financial statements include The LandWell Company, L.P., a limited partnership in which the company has a 29% direct interest). The amount of equity in net earnings of these investees the company has recognized is disclosed in Note 3. Summarized unaudited income statement information of the significant investees is as follows:

Three Months Ended	Six Months Ended
-------------------------------	-------------------------

	June 30,		June 30,	
	2007	2006	2007	2006
	(In millions)			
Gross revenues	\$ 8.9	\$ 25.9	\$ 16.8	\$ 27.3
Gross profit	6.9	22.0	12.8	22.6
Income before taxes	5.2	20.2	9.4	19.0
Net income	4.4	16.7	8.1	15.9

6. Long-Term Debt

The company is required, under the terms of the credit agreement, to remit a certain percentage of excess cash flow (ECF Percentage, as defined in the credit agreement) as a prepayment of the principal. As a result, in addition to the normal quarterly installments, the first such annual mandatory payment, in the amount of \$11.1 million, was paid in April 2007 based on the ECF Percentage for the fiscal year 2006.

The terms of the credit agreement provide for customary representations and warranties, affirmative and negative covenants, and events of default. In March 2007, the company requested and obtained approval for an amendment to the financial covenants in the credit agreement. The amendment maintains the original Total

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Leverage Ratio and the Interest Coverage Ratio (both as defined in the credit agreement) at 3.75:1 and 2:1, respectively, through December 31, 2007. For fiscal year 2008, the Total Leverage Ratio must be no more than 3.50:1 and the Interest Coverage Ratio must be at least 2.5:1 in the first two quarters and 3.00:1 in the last two quarters. The amendment did not modify the limit on capital expenditures, which is \$130 million in 2007 and 2008.

Concurrent with the IPO, Tronox Worldwide LLC and Tronox Finance Corp. issued \$350 million in aggregate principal amount of 9 1/2% senior unsecured notes due 2012 in a private offering. The company and all of its other 100%-owned domestic subsidiaries fully and unconditionally and jointly and severally guarantee the notes. The issuers, Tronox Worldwide LLC and Tronox Finance Corp, and all subsidiary guarantors are 100% owned by the company.

7. Comprehensive Income (Loss)

Comprehensive income (loss), net of taxes, consists of the following:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(In millions)			
Net income (loss)	\$ (21.2)	\$ (14.4)	\$ (30.6)	\$ 6.2
After tax changes in:				
Foreign currency translation adjustments	3.6	15.4	6.9	21.4
Cash flow hedge activity:				
Unrealized gain (loss)	(0.6)	(1.1)	0.4	(1.6)
Reclassification adjustments		0.1	0.8	0.3
Benefit plan activity:

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The company adopted the provisions of FIN 48 as of January 1, 2007. As a result of the adoption of FIN 48, the company recognized a \$9.3 million charge to the January 1, 2007, balance of retained earnings. The gross amount of unrecognized tax positions at January 1, 2007, was \$60.7 million. If recognized, the net benefit associated with approximately \$54.5 million of that reserve for unrecognized tax benefits would affect the effective income tax rate.

The net increases in unrecognized tax benefits, during the three and six month periods ended June 30, 2007, which would affect the effective income tax rate were \$5.2 million and \$6.3 million, respectively. Both of these amounts include tax related to our German income tax audit for the years 1998 through 2001 as well as interest and the effect of foreign exchange translation.

The company anticipates a decrease of approximately \$2.2 million, during the next twelve months, in the unrecognized tax benefit primarily related to transactions involving the effects of foreign currency translation and transfer pricing for tax positions where the statute will lapse.

The company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. During the six months ended June 30, 2007, the company recognized approximately \$2.3 million in gross interest, including the effect of foreign exchange translation. Of this increase, \$1.6 million of interest was recognized during the three-month period ended June 30, 2007. As of January 1, 2007, the company had approximately \$7.9 million accrued for the gross payment of interest and penalties. The equivalent amount at June 30, 2007, was \$10.4 million.

The Internal Revenue Service has completed its examination of the company's U.S. Federal income tax returns for all years through 2002 and is currently conducting an examination of the years 2003 through 2005. The years through 1998 have been closed with the exception of issues for which a refund claim has been filed. A German audit is being conducted for the years 1998 through 2001. No periods have closed with respect to Australia, Germany, Switzerland or The Netherlands (periods subsequent to the acquisition in 2000). The company believes that it has made adequate provision for income taxes that may be payable with respect to years open for examination; however, the ultimate outcome is not presently known and, accordingly, additional provisions may be necessary.

9. Discontinued Operations

The following table presents pretax loss from discontinued operations by type of cost and total after-tax loss from discontinued operations for the periods indicated:

	Three Months		Six Months Ended	
	Ended June 30, 2007	2006	2007	2006
	(In millions)			
Environmental provisions/(reimbursements)(1)	\$ (1.2)	\$ 10.0	\$ 0.3	\$ 10.2
Litigation provisions, legal and other costs(1)	3.2	3.8	2.3	8.4
Total pretax loss	2.0	13.8	2.6	18.6

Tax benefit	(0.8)	(5.1)	(1.0)	(6.9)
Total after-tax loss	\$ 1.2	\$ 8.7	\$ 1.6	\$ 11.7

(1) Legal and environmental costs are allocated to discontinued operations on a specific identification basis. Other costs are primarily comprised of insurance and ad valorem taxes.

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****10. Retirement Plans**

The following table presents the components of net periodic pension and postretirement cost and total retirement expense for the periods indicated:

	Retirement Plans		Postretirement Plans	
	Three Months Ended June 30,			
	2007	2006	2007	2006
	(In millions)			
Service cost	\$ 3.0	\$ 2.5	\$ 0.4	\$ 0.4
Interest cost	7.1	6.8	2.1	2.1
Expected return on plan assets	(9.9)	(9.6)

Total retirement expense	\$ 1.7	\$ 0.8	\$ 2.7	\$ 2.6

	Retirement Plans		Postretirement Plans	
	Six Months Ended June 30,			
	2007	2006	2007	2006
	(In millions)			
Service cost	\$ 5.9	\$ 3.1	\$ 0.8	\$ 0.4
Interest cost	14.1	7.6	4.2	2.1
Expected return on plan assets	(19.7)	(10.4)		
Net amortization				
Prior service cost (credit)	1.4	0.7	(0.6)	(0.3)
Net actuarial loss	1.7	0.6	0.9	0.4
Sub-total net periodic cost	3.4	1.6	5.3	2.6
Allocated benefit plan expense from Kerr-McGee		0.7		2.6
Total retirement expense	\$ 3.4	\$ 2.3	\$ 5.3	\$ 5.2

11. Employee Stock-Based Compensation

The company's Long Term Incentive Plan (LTIP) authorizes the issuance of certain stock-based awards including fixed-price stock options, restricted stock awards and performance awards, among others. In January 2007, the compensation committee of the Board of Directors authorized the issuance of approximately 460,000 stock options, 171,000 restricted stock-based awards and 5,000,000 performance units. Performance units are awards that management intends to settle in cash at the end of a three-year performance cycle (as defined in the LTIP). The contractual life and vesting period for performance units directly relate to the performance cycle and are generally three years. Performance units are liability awards (as defined by applicable accounting guidance) and are based on achievement of specified shareholder return targets, including a comparison to the returns of peer group companies for the same performance period. Liability awards are required to be remeasured on a quarterly basis until the settlement date at the end of the vesting period. Employees terminating their employment due to retirement, death or disability, retain the right to receive a pro-rata payout under the performance units awards.

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The company estimates valuation assumptions for stock option and performance unit awards. For stock options, the company uses the Black-Scholes option-pricing model and significant inputs and assumptions are summarized in the table below.

	January 2007 Assumptions
Grant-date share price	\$ 15.19
Exercise price	\$ 15.19
Risk-free interest rate	4.67%
Expected dividend yield	1.32%
Expected volatility	36%
Expected life (years)	6.4
Per-unit fair value of options granted	\$ 5.89

For performance units, the company uses a Monte Carlo simulation model to estimate fair value at the end of each reporting period. This model uses multiple input variables to determine the probability of satisfying the award's market conditions. Inputs into the model include the following for Tronox and peer group companies: total shareholder return from the beginning of the performance cycle through the measurement date, volatility, risk-free rates and correlation of Tronox's and peer group companies' total shareholder return. The inputs are based on historical capital market data. The total fair-value-based obligation associated with awards expected to vest is further adjusted to reflect the extent to which employee services necessary to earn the awards have been rendered. Compensation cost for any given period equals the increase or decrease in the liability for awards outstanding and expected to vest.

For the three months ended June 30, 2007 and 2006, compensation expense related to all stock-based awards, totaled \$1.8 million and \$1.5 million, respectively. For the six months ended June 30, 2007 and 2006, compensation expense related to all stock-based awards totaled \$4.9 million and \$5.5 million, respectively. Accelerated compensation expense resulting from awards issued to retirement eligible employees totaled \$1.5 million and \$1.3 million, respectively, in the six-month periods ending June 30, 2007 and 2006.

12. Contingencies

The following table summarizes the contingency reserve balances, provisions, payments and settlements for the six months ended June 30, 2007, as well as balances, accruals and receipts of reimbursements of environmental costs from other parties.

Reserves for Litigation	Reserves for	
	Environmental Remediation(1)	Reimbursements Receivable(2)
	(In millions)	

Edgar Filing: TRONOX INC - Form 10-Q

Balance, December 31, 2006	\$	15.0	\$	223.9	\$	71.4
Provisions/accruals		0.5		5.5		3.5
Payments/settlements		(3.7)		(15.1)		(14.9)
Balance, June 30, 2007	\$	11.8	\$	214.3	\$	60.0

- (1) Provisions for environmental remediation and restoration include \$2.6 million related to the company's former forest products operations. These charges are reflected in the Condensed Consolidated Statements of Operations as a component of loss from discontinued operations (net of taxes).
- (2) Accruals for environmental remediation and restoration reimbursements include \$2.3 million related to the company's former thorium compounds manufacturing operations, which are reflected in the Condensed Consolidated Statements of Operations as a component of loss from discontinued operations (net of taxes).

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Management believes, after consultation with its internal legal counsel, that currently the company is reserved adequately for the probable and reasonably estimable costs of known environmental matters and other contingencies. However, additions to the reserves may be required as additional information is obtained that enables the company to better estimate its liabilities, including liabilities at sites now under review. At this time, however, the company cannot reliably estimate a range of future additions to the reserves for any individual site or for all sites collectively. Reserves for environmental sites are based, among other factors, on assumptions regarding the volumes of contaminated soils and groundwater involved, as well as associated excavation, transportation and disposal costs.

The company provides for costs related to contingencies when a loss is probable and the amount is reasonably estimable. It is not possible for the company to reliably estimate the amount and timing of all future expenditures related to environmental and legal matters and other contingencies because, among other reasons:

Some sites are in the early stages of investigation, and other sites may be identified in the future.

Remediation activities vary significantly in duration, scope and cost from site to site depending on the mix of unique site characteristics, applicable technologies and regulatory agencies involved.

Remediation requirements are difficult to predict at sites where remedial investigations have not been completed or final decisions have not been made regarding remediation requirements, technologies or other factors that bear on remediation costs.

Environmental laws frequently impose joint and several liability on all potentially responsible parties (PRPs), and it can be difficult to determine the number and financial condition and possible defenses of PRPs and their respective shares of responsibility for clean-up costs.

Environmental laws and regulations, as well as enforcement policies and clean-up levels, are continually changing, and the outcome of court proceedings, alternative dispute resolution proceedings (including mediation) and discussions with regulatory agencies are inherently uncertain.

Unanticipated construction problems and weather conditions can hinder the completion of environmental remediation.

Some legal matters are in the early stages of investigation or proceeding or their outcomes otherwise may be difficult to predict, and other legal matters may be identified in the future.

The inability to implement a planned engineering design or use planned technologies and excavation or extraction methods may require revisions to the design of remediation measures, which can delay remediation and increase costs.

The identification of additional areas or volumes of contamination and changes in costs of labor, equipment and technology generate corresponding changes in environmental remediation costs.

Current and former operations of the company require the management of regulated materials and are subject to various environmental laws and regulations. These laws and regulations will obligate the company to clean up various sites at which petroleum, chemicals, low-level radioactive substances and/or other materials have been contained, disposed of or released. Some of these sites have been designated Superfund sites by the U.S. Environmental Protection Agency (the EPA), pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) or state equivalents. Similar environmental laws and regulations and other requirements exist in foreign countries in which the company operates.

Following are discussions regarding certain environmental sites and litigation of the company.

Environmental

Henderson, Nevada

In 1998, Tronox LLC decided to exit the ammonium perchlorate business. At that time, Tronox LLC curtailed operations and began preparation for the shutdown of the associated production facilities in Henderson, Nevada, that produced ammonium perchlorate and other related products. Manufacture of perchlorate compounds began at

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Henderson in 1945 in facilities owned by the U.S. government. The U.S. Navy expanded production significantly in 1953 when it completed construction of a plant for the manufacture of ammonium perchlorate. The U.S. Navy continued to own the ammonium perchlorate plant, as well as other associated production equipment at Henderson, until 1962, when the plant was purchased by a predecessor of the company. The ammonium perchlorate produced at the Henderson facility was used primarily in federal government defense and space programs. Perchlorate that may have originated, at least in part, from the Henderson facility has been detected in nearby Lake Mead and the Colorado River, which contribute to municipal water supplies in Arizona, Southern California and Southern Nevada.

Tronox LLC began decommissioning the facility and remediating associated perchlorate contamination, including surface impoundments and groundwater, when it decided to exit the business in 1998. In 1999 and 2001, Tronox LLC entered into consent orders with the Nevada Division of Environmental Protection (the NDEP) that require it to implement both interim and long-term remedial measures to capture and remove perchlorate from groundwater. In April 2005, Tronox LLC entered into an amended consent order with the NDEP that requires, in addition to the capture and treatment of groundwater, the closure of a certain impoundment related to the past production of ammonium perchlorate, including treatment and disposal of solution and sediment contained in the impoundment. A separate agreement reached in 1996 with the NDEP also requires Tronox LLC to test for various potential contaminants at the site, which is ongoing. The second phase of the site investigation including preparation of a risk assessment is expected to be completed by mid-2008. Results of testing may lead to further site characterization and remediation, the costs of which, if any, are not currently included in the financial reserves discussed below.

In 1999, Tronox LLC initiated the interim measures required by the consent orders. A long-term remediation system is operating in compliance with the consent orders. Initially, the remediation system was projected to operate through 2007. However, studies of the decline of perchlorate levels in the groundwater indicate that Tronox LLC may need to operate the system through 2011. The scope, duration and cost of groundwater remediation likely will be driven in the long term by drinking water standards regarding perchlorate, which to date have not been formally established by applicable state or federal regulatory authorities. The EPA and other federal and state agencies continue to evaluate the health and environmental risks associated with perchlorate as part of the process for ultimately setting drinking water standards. One state agency, the California Environmental Protection Agency has set a public health goal for perchlorate, and the EPA has established a reference dose for perchlorate, which are preliminary steps to setting drinking water standards. The establishment of applicable drinking water standards could materially affect the scope, duration and cost of the long-term groundwater remediation that Tronox LLC is required to perform.

Financial Reserves As of June 30, 2007, reserves for environmental remediation at Henderson totaled \$27.6 million, which included \$2.7 million recorded in the second quarter of 2007 related to expanded sampling and the development of a risk assessment plan pertaining to the 1996 agreement with the NDEP. As noted above, the long-term scope, duration and cost of groundwater remediation and impoundment closure are uncertain and, therefore, additional costs beyond those accrued may be incurred in the future. However, the amount of any additional costs cannot be reasonably estimated at this time.

Litigation In 2000, Tronox LLC initiated litigation against the United States seeking contribution for its Henderson response costs. The suit was based on the fact that the government owned the plant in the early years of its operation, exercised significant control over production at the plant and the sale of products produced at the plant, even while not the owner, and was the largest consumer of products produced at the plant. Before trial, the parties agreed to a settlement of the claims against the United States. The settlement was memorialized in a consent decree approved by the court on January 13, 2006. In February 2006, under the consent decree, the United States paid Tronox LLC

\$20.5 million in contribution for past costs. Commencing January 1, 2011, the United States will be obligated to pay 21% of Tronox LLC's remaining response costs at Henderson, if any, related to perchlorate.

Insurance Reimbursement In 2001, Tronox LLC purchased a 10-year, \$100 million environmental cost cap insurance policy for groundwater and other remediation at Henderson. The insurance policy provides coverage after Tronox LLC exhausts a self-insured retention of approximately \$62.3 million (\$61.3 million self-insured retention, plus an additional \$1.0 million retention for certain additional coverage under the policy) and covers only those costs incurred to achieve a clean-up level specified in the policy. As noted above, federal and applicable state

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

agencies have not established a drinking water standard and, therefore, it is possible that Tronox LLC may be required to achieve a clean-up level more stringent than that covered by the policy. If so, the amount recoverable under the policy may be less than the ultimate clean-up cost.

At June 30, 2007, the company had received \$14.0 million of cost reimbursement under the insurance policy, and expects that additional estimated aggregate clean-up cost of \$86.6 million less the \$62.3 million self-insured retention to be covered by the policy (for a net amount of \$24.3 million in potential reimbursement). Included in the \$24.3 million is \$0.7 million accrued in the second quarter of 2007 based on expected reimbursements. The company believes that additional reimbursement of approximately \$24.3 million is probable, and, accordingly, the company has recorded a receivable in the financial statements for that amount.

MSA Reimbursement As of June 30, 2007, the company had a receivable of \$0.5 million from Anadarko Petroleum Corporation, on behalf of Kerr-McGee, representing 50% of the amount of the remediation costs the company has incurred and paid. The receivable has been reflected in accounts receivable in the accompanying Condensed Consolidated Balance Sheets.

West Chicago, Illinois

In 1973, Tronox LLC closed a facility in West Chicago, Illinois, that processed thorium ores for the federal government and for certain commercial purposes. Historical operations had resulted in low-level radioactive contamination at the facility and in surrounding areas. The original processing facility is regulated by the State of Illinois (the State), and four vicinity areas are designated as Superfund sites on the National Priorities List (the NPL).

Closed Facility Pursuant to agreements reached in 1994 and 1997 among Tronox LLC, the City of West Chicago and the State regarding the decommissioning of the closed West Chicago facility, Tronox LLC has substantially completed the excavation of contaminated soils and has shipped those soils to a licensed disposal facility. Surface restoration was completed in 2004, except for areas designated for use in connection with the Kress Creek and Sewage Treatment Plant remediation discussed below. Groundwater monitoring and remediation is expected to continue for approximately seven years.

Vicinity Areas The EPA has listed four areas in the vicinity of the closed West Chicago facility on the NPL and has designated Tronox LLC as a PRP in these four areas. Tronox LLC has substantially completed remedial work for three of the areas (known as the Residential Areas, Reed-Keppler Park and the Sewage Treatment Plant). In June 2007, a Chicago-area newspaper published articles suggesting that certain Residential Area properties were not cleaned up adequately in the 1980s or the 1990s. The company believes the clean-up of all Residential Area properties to be adequate, as the EPA was involved indirectly in the clean-up. The EPA is in the process of verifying the work done on the residential properties.

Work continues at the other NPL site known as Kress Creek. The work involves removal of low level insoluble thorium residues principally in streambanks and streambed sediments. Tronox LLC has reached an agreement with the appropriate federal and state agencies and local communities regarding the characterization and cleanup of the sites, past and future government response costs, and the waiver of natural resource damages claims. The agreement is incorporated in consent decrees, which were approved and entered by the federal court in August 2005. The clean-up work, which began in the third quarter of 2005, is expected to be completed in 2010 and will require excavation of contaminated soils and stream sediments, shipment of excavated materials to a licensed disposal facility and

restoration of affected areas.

Financial Reserves As of June 30, 2007, the company had reserves of \$70.9 million for costs related to the West Chicago facility and vicinity properties. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time. The amount of the reserve is not reduced by reimbursements expected from the federal government under Title X of the Energy Policy Act of 1992 (Title X).

Government Reimbursement Pursuant to Title X, the U.S. Department of Energy (the DOE) is obligated to reimburse the company for certain decommissioning and clean-up costs incurred in connection with the West Chicago sites in recognition of the fact that about 55% of the facility s production was dedicated to U.S. government

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

contracts. The amount authorized for reimbursement under Title X is \$365 million plus inflation adjustments. That amount is expected to cover the government's full share of West Chicago clean-up costs. Through June 30, 2007, the company had been reimbursed approximately \$304.2 million under Title X.

Reimbursements under Title X are provided by congressional appropriations. Historically, congressional appropriations have lagged the company's clean-up expenditures. As of June 30, 2007, the government's share of costs incurred by the company but not yet reimbursed by the DOE totaled approximately \$17.7 million, which includes \$1.2 million accrued in the second quarter of 2007. The company believes that receipt of the remaining \$17.7 million in due course following additional congressional appropriations is probable and has reflected that amount as a receivable in the financial statements. The company will recognize recovery of the government's share of future remediation costs for the West Chicago sites as it incurs the cash expenditures.

Ambrosia Lake, New Mexico

From the late 1950s until 1988, the company operated a uranium mining and milling operation at Ambrosia Lake near Grants, New Mexico, pursuant to a license issued by the Atomic Energy Commission (the AEC), now the Nuclear Regulatory Commission (the NRC). When the operation was sold, the company retained responsibility for certain environmental conditions existing at the site, including mill tailings, selected ponds and groundwater contamination related to the mill tailings and unlined ponds. Since 1989, the unaffiliated current owner of the site, Rio Algom Mining LLC (Rio Algom), has been decommissioning the site pursuant to the license issued by the NRC. Mill tailings, certain impacted surface soils and selected pond sediments have been consolidated in an onsite containment unit. Under terms of the sales agreement, which included provisions capping the liability of Rio Algom, the company became obligated to solely fund the remediation for the items described above when total expenditures exceeded \$30 million, which occurred in late 2000. A decommissioning plan for the remaining impacted soil was submitted by Rio Algom to the NRC in January 2005 and was approved in July 2006. The soil decommissioning plan will take about one to two years to complete. The NRC is continuing to evaluate the current design for erosion control. The state of New Mexico has recently raised issues about certain non-radiological constituents in the groundwater at the site. Groundwater treatment was discontinued after approval by the NRC in February 2006. Discussions regarding these issues are ongoing, and resolution could affect remediation costs and/or delay ultimate site closure.

In addition to those remediation activities described above for which reserves have been established, as described below, Rio Algom is investigating soil contamination potentially caused by past discharge of mine water from the site, for which no reserve has been established.

Financial Reserves As of June 30, 2007, the company had reserves of \$6.8 million for the costs of the remediation activities described above, including groundwater remediation. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Litigation On January 18, 2006, Rio Algom filed suit against Tronox Worldwide LLC in the U.S. District Court for the District of New Mexico. The suit seeks a determination regarding responsibility for certain labor-related and environmental remediation costs. Though Rio Algom seeks no specific amount in its complaint, it has asserted that future groundwater remediation costs for which it believes Tronox Worldwide LLC has responsibility could be as much as \$128 million. Tronox Worldwide LLC believes these costs are hypothetical and unsupported. The case is currently in the discovery phase. On December 14, 2006, the parties participated in a court-ordered settlement conference. The parties did not reach a settlement at the conference. No trial date has been set. The company has not

provided a reserve for this lawsuit beyond the above-mentioned remediation reserve because at this time the probability of a loss and the amount of loss, if any, cannot be reasonably estimated.

Crescent, Oklahoma

Beginning in 1965, Cimarron Corporation (Cimarron) operated a facility near Crescent, Oklahoma, at which it produced uranium and mixed oxide nuclear fuels pursuant to licenses issued by the AEC (now the NRC). Operations at the facility ceased in 1975. Since that time, buildings and soils were decommissioned in accordance with the NRC licenses. In limited areas of the site, groundwater is contaminated with radionuclides, and, in 2003,

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cimarron submitted to the NRC and the Oklahoma Department of Environmental Quality (the ODEQ) a draft remediation work plan addressing the groundwater contamination. In 2005, the company began evaluating available technologies to address remaining groundwater issues. A remediation technology has been selected, and the company submitted for approval an amended plan to the NRC and the ODEQ in December 2006. The plan describes the remediation of the remaining groundwater issues. While there can be no guarantee that the plan will be approved, the company believes the plan represents an appropriate remediation technology.

Financial Reserves As of June 30, 2007, the company had reserves of \$10.3 million for the costs of the remediation activities, including those currently under evaluation by the NRC and the ODEQ, described above. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

New Jersey Wood-Treatment Site

Tronox LLC was named in 1999 as a PRP under CERCLA at a former wood-treatment site in New Jersey at which the EPA is conducting a cleanup. On April 15, 2005, Tronox LLC received a letter from the EPA asserting it is liable under CERCLA as a former owner or operator of the site and demanding reimbursement of costs expended by the EPA at the site. The letter made demand for payment of past costs in the amount of approximately \$179 million, plus interest, though the EPA has informed Tronox LLC that as of December 5, 2006, project costs are approximately \$244 million, plus other future costs and interest and would consider resolving the matter for \$239 million. Tronox LLC did not operate the site, which had been sold to a third party before Tronox LLC succeeded to the interests of a predecessor in the 1960s. The predecessor also did not operate the site, which had been closed before it was acquired by the predecessor. Based on historical records, there are substantial uncertainties about whether or under what terms the predecessor assumed any liabilities for the site. In addition, although it appears there may be other PRPs to whom notice has been given, the company does not know whether the other PRPs have any valid defenses to liability for the site or whether the other PRPs have the financial resources necessary to meet their obligations, if proven. Tronox LLC and the EPA have submitted the matter to nonbinding mediation that could lead to a settlement or resolution of the EPA's demand. In the event the mediation process does not lead to an acceptable solution, Tronox LLC intends to vigorously defend against the EPA's demand.

On June 25, 2007, the New Jersey Department of Environmental Protection and the New Jersey Spill Compensation Fund sued Tronox LLC and unnamed others in Superior Court, Law Division, Somerset County, New Jersey. The plaintiffs allege defendants are responsible for releases from the Federal Creosote Superfund Site that damage the state's groundwater and seek natural resource damages, costs and other appropriate relief.

Financial Reserves As of June 30, 2007, the company had reserves of \$35.0 million for the costs of settling the claim for the remediation activities described above. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time. The company has not provided a reserve for the New Jersey lawsuit because at this time neither the probability of a loss nor the amount thereof can be reasonably estimated.

MSA Reimbursement As of June 30, 2007, the company had a receivable of \$17.5 million representing 50% of the settlement amount that Anadarko Petroleum Corporation, on behalf of Kerr-McGee, has consented to contribute at or before the time the settlement, if accepted, becomes payable. The receivable has been reflected in accounts receivable in the accompanying Condensed Consolidated Balance Sheets.

Sauget, Illinois

From 1927 to 1969, Tronox LLC operated a wood-treatment plant on a 60-acre site in the Village of Sauget (formerly known as Monsanto) in St. Clair County, Illinois. Operations on the property resulted in the contamination of soil sediment, surface water and groundwater at the site with creosote and other substances used in wood treating. In 1988, Tronox LLC entered into a court-approved consent order with the Illinois Attorney General and Illinois Environmental Protection Agency. The investigation and feasibility study for sediments required by the

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

order are complete. Pond sediment removal was completed in 2007, with final pond closure and groundwater investigation expected to be completed in 2008.

Financial Reserves As of June 30, 2007, the company had reserves of approximately \$6.2 million for the remediation activities related to contaminated soils and sediments and pond closure. Additional groundwater characterization will occur upon completion of the soils and sediments removal. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Cleveland, Oklahoma

Triple S Refining Corporation (Triple S), formerly known as Kerr-McGee Refining Corporation, owned and operated a petroleum refinery near Cleveland, Oklahoma, until the facility was closed in 1972. In 1992, Triple S entered into a Consent Order with the Oklahoma Department of Health (later, the ODEQ), which addresses the remediation of air, soil, surface water and groundwater contaminated by hydrocarbons and other refinery related materials. Facility dismantling and several interim remedial measures have been completed. In 2006, the ODEQ approved the remedial design for soil and waste feasibility study, which includes construction of an on-site disposal cell. A feasibility study of surface and groundwater remedial measures is under review by the ODEQ. Duration of remedial activities currently cannot be estimated.

Financial Reserves As of June 30, 2007, the company had reserves of approximately \$3.7 million for the remediation activities described above, including the remedial measures recommended in the feasibility study currently under review. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Cushing, Oklahoma

In 1972, Triple S closed a petroleum refinery it had operated near Cushing, Oklahoma. Prior to closing the refinery, Triple S also had produced uranium and thorium fuel and metal at the site pursuant to licenses issued by the AEC.

In 1990, Triple S entered into a consent agreement with the State of Oklahoma to investigate the site and take appropriate remedial actions related to petroleum refining and uranium and thorium residuals. Investigation and remediation of hydrocarbon contamination is being performed under the oversight of the ODEQ. Remediation to address hydrocarbon contamination in soils is expected to take about four more years. The long-term scope, duration and cost of groundwater remediation are uncertain and, therefore, additional costs beyond those accrued may be incurred in the future.

In 1993, Triple S received a decommissioning license from the NRC, the successor to the AEC's licensing authority, to perform certain cleanup of uranium and thorium residuals. All known radiological contamination has been removed from the site and shipped to a licensed disposal facility, substantially completing the license requirements.

At the company's request, the NRC terminated the site license in 2006, thereby allowing the company to avoid costs that would otherwise be incurred in association with continued license maintenance.

Financial Reserves As of June 30, 2007, the company had reserves of \$10.1 million for the costs of the ongoing remediation and decommissioning work described above. Although actual costs may differ from current estimates, the

amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Jacksonville, Florida

In 1970, Tronox LLC purchased a facility in Jacksonville, Florida, that manufactured and processed fertilizers, pesticides and herbicides. Tronox LLC closed the facility in 1978. In 1988, all structures were removed, and Tronox LLC began site characterization studies. In 2000, Tronox LLC entered into a consent order with the EPA to conduct a remedial investigation and a feasibility study. The remedial investigation was completed and submitted to the EPA in August 2005. A feasibility study was submitted to the EPA in October 2006. The study recommended site soil

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

remediation and excavation, site capping and limited groundwater remediation. The EPA has requested additional sediment data be collected to support the site recommendation. A work plan is currently being prepared to respond to the EPA's request.

Financial Reserves As of June 30, 2007, the company had reserves of \$5.2 million to conduct the clean-up and remediation activities recommended in the feasibility study submitted to the EPA. Although actual costs may differ from the current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Columbus, Mississippi

The Columbus, Mississippi, wood-treating plant ceased operation in July 2003. At that time, the process facilities were decommissioned, although groundwater remediation continues. In 2006, the City of Columbus started a drainage improvement program in nearby Probst Park. During excavation of the drainage ditch, certain amounts of creosote-like materials were discovered by the City of Columbus, Mississippi, and disposed of by the company. The City of Columbus' drainage project continues in 2007 and additional contaminated soil has been identified, which the company expects to remediate.

Financial Reserves As of June 30, 2007, the company had reserves of \$3.0 million related to conducting groundwater treatment and disposal of contaminated soils. Although actual costs may differ from the current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time.

Other Sites

In addition to the sites described above, the company is responsible for environmental costs related to certain other sites. These sites relate primarily to wood treating, chemical production, landfills, mining, and oil and gas refining, distribution and marketing. As of June 30, 2007, the company had reserves of \$35.5 million for the environmental costs in connection with these other sites. Although actual costs may differ from current estimates, the amount of any revisions in remediation costs cannot be reasonably estimated at this time. One such site is a mining site in South Dakota, which the company refers to as Riley Pass, which has a reserve of \$1.3 million at June 30, 2007, as a result of a consent order requiring a predesign and vegetation study. Once the study is complete, additional costs may be required to remediate adjacent areas within the site, but such costs cannot be reasonably estimated at this time.

Master Separation Agreement

Pursuant to the MSA (which recites that it binds successors), Kerr-McGee will reimburse the company for a portion of the environmental remediation costs it incurs and pays (net of any cost reimbursements it recovers or expects to recover from insurers, governmental authorities or other parties). The reimbursement obligation extends to costs incurred at any site associated with any of the company's former businesses or operations.

With respect to any site for which the company has established a reserve as of the effective date of the MSA, 50% of the remediation costs the company incurs in excess of the reserve amount (after meeting a \$200,000 minimum threshold amount) will be reimbursable by Kerr-McGee, net of any amounts recovered or, in the company's reasonable and good faith estimate, that will be recovered from third parties. With respect to any site for which the company has not established a reserve as of the effective date of the MSA, 50% of the amount of the remediation costs the company

incurs and pays (after meeting a \$200,000 minimum threshold amount) will be reimbursable by Kerr-McGee, net of any amounts recovered or, in the company's reasonable and good faith estimate, that will be recovered from third parties. At June 30, 2007, the company had a receivable of \$18.0 million, primarily representing 50% of the settlement offer the company made related to the New Jersey wood-treatment site as described above that Anadarko Petroleum Corporation, on behalf of Kerr-McGee, has consented to contribute at or before the time the settlement, if accepted, becomes payable.

Table of Contents

TRONOX INCORPORATED

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Kerr-McGee's aggregate reimbursement obligation to the company cannot exceed \$100 million and is subject to various other limitations and restrictions. For example, Kerr-McGee is not obligated to reimburse the company for amounts it pays to third parties in connection with tort claims or personal injury lawsuits, or for administrative fines or civil penalties that the company is required to pay. Kerr-McGee's reimbursement obligation also is limited to costs that the company actually incurs and pays within seven years following the completion of the IPO.

Litigation and Claims

Birmingham, Alabama

Until 1995, Triple S operated a petroleum terminal in Birmingham, Alabama. In late 2005, a local church, which is located on property adjacent to the site, demanded payment for damages of approximately \$25 million in connection with a release of petroleum alleged to have occurred at the terminal and threatened litigation. In March 2006, the company filed a lawsuit in federal court seeking a declaration of the parties' rights and injunctive relief. The defendant has moved to dismiss the company's suit and has also filed a countersuit in the circuit court for Jefferson County, Alabama, against the company and third parties seeking property damages, injunctive relief and costs. The company has responded to the motion. In January 2007, the judge in the federal lawsuit issued an order abstaining from exercising jurisdiction over the matter, leaving the case before the Jefferson County circuit court. The company has filed an appeal of the order with the U.S. Court of Appeals in the Eleventh Circuit. The company has not provided a reserve for the litigation because at this time it cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. The company currently believes that the ultimate resolution of the litigation is not likely to have a material adverse effect on the company.

Forest Products Litigation

The company is defending a number of lawsuits related to three former wood-treatment plants in Columbus, Mississippi; Avoca, Pennsylvania; and Texarkana, Texas. All of these lawsuits seek recoveries under a variety of common law and statutory legal theories for personal injuries and/or property damages allegedly caused by exposure to and/or release of chemicals used in the wood-treatment process, primarily creosote. The company currently believes that claims asserted in these lawsuits are without substantial merit and is vigorously defending them.

At Columbus, Mississippi, the consolidated federal case has been set for the initial trial of two plaintiffs in November 2007.

At Avoca, Pennsylvania, 35 state court lawsuits were filed in 2005 by over 4,000 plaintiffs. The plaintiffs have classified their claims into various alleged disease categories. In September 2005, the judge ordered that discovery and the first trial will focus on plaintiffs who allege pre-cancerous skin lesions. The first trial was scheduled for August 2007, but in May 2007 the parties agreed on arbitration as an alternative to this litigation. The judge approved arbitration and placed the lawsuits on an inactive docket. The first arbitration hearing is set for October 2007.

At Texarkana, Texas, the five plaintiffs in the May vs. Tronox case concluded settlement negotiations with the insurer for Tronox LLC in April 2007, with the case being dismissed in June 2007. Similarly, in a separate case (the Avance case), plaintiffs reached settlements with the insurer in July and dismissals are expected to follow soon.

Financial Reserves As of June 30, 2007, the company had reserves of \$11.0 million related to certain forest products litigation. Although actual costs may differ from the current reserves, the amount of any revisions in litigation costs cannot be reasonably estimated at this time. The company currently believes that the ultimate resolution of this forest products litigation is not likely to have a material adverse effect on the company.

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Savannah Plant***

On September 8, 2003, the Environmental Protection Division of the Georgia Department of Natural Resources (the EPD) issued a unilateral Administrative Order to our subsidiary, Tronox Pigments (Savannah) Inc., claiming that the Savannah plant exceeded emission allowances provided for in the facility's Title V air permit. On September 19, 2005, the EPD rescinded the Administrative Order and filed a Withdrawal of Petition for Hearing on Civil Penalties. Accordingly, the proceeding on administrative penalties has been dismissed, without prejudice. After dismissal of the Administrative Order, representatives of the EPD, the EPA and Tronox continued with their discussions regarding a resolution of the alleged violations, with the EPA taking the lead role in these discussions. On December 6, 2006, the EPA informed Tronox Pigments (Savannah) Inc. that it had submitted a civil referral to the U.S. Department of Justice (the DOJ) with respect to the air quality bypass issue and for matters stemming from the EPA led Resource Conservation and Recovery Act (RCRA) Compliance Evaluation Inspection (CEI) that occurred in January 2006. Prior to the filing of any formal action, the DOJ has agreed to a series of settlement negotiations to determine if the matter can be resolved. After discussions with the EPA and the DOJ, Tronox Pigments (Savannah) Inc. tendered an offer of settlement and compromise to the government to settle all outstanding issues in the amount of \$600,000 as a penalty to be paid over an eight month period and approximately \$2.4 million in Supplemental Environmental Projects. The EPA is evaluating terms of the proposed settlement.

Financial Reserves As of June 30, 2007, the company had reserves of \$0.6 million related to Savannah plant emission litigation. Although actual costs may differ from the current reserves, the amount of any revisions in litigation costs cannot be reasonably estimated at this time.

Other Matters

The company is party to a number of legal and administrative proceedings involving environmental and/or other matters pending in various courts or agencies. These proceedings, individually and in the aggregate, are not expected to have a material adverse effect on the company. These proceedings are also associated with facilities currently or previously owned, operated or used by the company and/or its predecessors, some of which include claims for personal injuries, property damages, clean-up costs and other environmental matters. Current and former operations of the company also involve management of regulated materials and are subject to various environmental laws and regulations. These laws and regulations will obligate the company to clean up various sites at which petroleum and other hydrocarbons, chemicals, low-level radioactive substances and/or other materials have been contained, disposed of or released. Some of these sites have been designated Superfund sites by the EPA pursuant to CERCLA or state equivalents. Similar environmental laws and regulations and other requirements exist in foreign countries in which the company operates.

13. Commitments

At June 30, 2007, the company had outstanding letters of credit in the amount of \$68.1 million. These letters of credit have been granted by financial institutions to support our environmental clean-up costs and miscellaneous operational and severance requirements in international locations.

The company has entered into certain agreements that require it to indemnify third parties for losses related to environmental matters, litigation and other claims. No material obligations are presently known and, thus, no reserve

has been recorded in connection with such indemnification agreements.

Table of Contents**TRONOX INCORPORATED****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****14. Reporting by Business Segment and Geographic Locations**

The company has one reportable segment representing the company's pigment business. The pigment segment primarily produces and markets TiO₂ and has production facilities in the United States, Australia, Germany and The Netherlands. The pigment segment also includes heavy minerals production operated through our joint venture. The heavy minerals production is integrated with our Australian pigment plant, but also has third-party sales of minerals not utilized by the company's pigment operations. Electrolytic and other chemical products (which does not constitute a reportable segment) represents the company's other operations which are comprised of electrolytic manufacturing and marketing operations, all of which are located in the United States. Segment performance is evaluated based on segment operating profit (loss), which represents results of segment operations before considering general expenses and environmental provisions related to sites no longer in operation; interest and debt expense; other income, net and income tax provision.

(1) The six months ended June 30, 2006, includes \$20.5 million of reimbursements related to ammonium perchlorate at the company's Henderson facility.

- (2) The three months ended June 30, 2007 and 2006, includes net earnings of equity method investees of \$1.3 million and \$4.7 million, respectively. The six months ended June 30, 2007 and 2006, includes net earnings of equity method investees of \$2.0 million and \$4.7 million, respectively.

15. Related Party Transactions

Tronox conducted transactions with Exxaro Australia Sands Pty Ltd (Exxaro), the company's 50% partner in the Tiwest Joint Venture. The company purchased raw materials used in its production of TiO_2 and also purchased Exxaro's share of TiO_2 produced by the Tiwest Joint Venture. The company also provided administrative services and product research and development activities which were reimbursed by Exxaro. The company made total net payments of \$54.5 million and \$63.3 million during the six months ended June 30, 2007 and 2006, respectively, for these activities and had a net payable to Exxaro totaling \$39.2 million at June 30, 2007. Additionally, the company owes Exxaro \$10.1 million for the outstanding note payable and accrued interest related to the mining tenements acquired in July 2006.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion of management's views on the financial condition and results of operations of the company should be read in conjunction with the audited consolidated and combined financial statements and the related notes which are included in the company's Annual Report on Form 10-K for the year ended December 31, 2006.

Overview

Tronox Incorporated (Tronox or the company), a Delaware Corporation, was formed on May 17, 2005, in preparation for the contribution and transfer by Kerr-McGee Corporation (Kerr-McGee) of certain entities, including those comprising substantially all of its chemical business (the Contribution). We have one reportable segment representing the company's pigment business. The pigment segment primarily produces and markets titanium dioxide pigment (TiO₂) and has production facilities in the United States, Australia, Germany and The Netherlands. The pigment segment also includes heavy minerals production operated through our joint venture (Tiwest). The heavy minerals production is integrated with our Australian pigment plant, but also has third-party sales of minerals not utilized by our pigment operations. Electrolytic and other chemical products (which does not constitute a reportable segment) represents the company's other operations which are comprised of electrolytic manufacturing and marketing operations, all of which are located in the United States. We have in the past operated or held businesses or properties, or currently hold properties, that do not relate to the current chemical business.

The Contribution was completed in November 2005, along with the recapitalization of the company, whereby common stock held by Kerr-McGee converted into approximately 22.9 million shares of Class B common stock. An initial public offering (IPO) of Class A common stock was completed on November 28, 2005. Prior to the IPO, Tronox was a wholly owned subsidiary of Kerr-McGee. Pursuant to the terms of the Master Separation Agreement dated November 28, 2005, among Kerr-McGee, Kerr-McGee Worldwide Corporation and Tronox (the MSA), the net proceeds from the IPO of \$224.7 million were distributed to Kerr-McGee.

Following the IPO, approximately 43.3% of the total outstanding common stock of Tronox was held by the general public and 56.7% was held by Kerr-McGee. The holders of Class A common stock and Class B common stock have identical rights, except that holders of Class A common stock are entitled to one vote per share, while holders of Class B common stock are entitled to six votes per share on all matters to be voted on by stockholders.

On March 8, 2006, Kerr-McGee's Board of Directors declared a dividend of the company's Class B common stock owned by Kerr-McGee to its stockholders (the Distribution). The Distribution was completed on March 30, 2006, resulting in Kerr-McGee having no ownership or voting interest in the company.

General Factors Affecting the Results of Operations

The slow down in North America's housing industry continued throughout the second quarter and has negatively impacted titanium dioxide demand during the three and six-month periods ended June 30, 2007.

Our titanium dioxide plant in Botlek, Netherlands, experienced production difficulties during the second quarter. Necessary repairs were completed in June and production at the plant returned to normal levels in July. The production difficulties resulted in charges of approximately \$3.0 million during the second quarter.

During the second quarter of 2007, we recorded a \$1.5 million provision (net of \$1.2 million of expected reimbursements) for the second phase of environmental site investigation work at our Henderson, Nevada, facility.

In February 2007, we announced a global TiO₂ production strategy that focuses on capturing opportunities presented by our chloride technology expertise, strong customer base and the rapid growth of the Asia-Pacific market.

Consistent with this strategy, we also made the following announcements:

The company, along with its 50% joint venture partner, a subsidiary of Exxaro Resources Limited, has begun the process to increase annual production capacity at the Tiwest TiO₂ plant in Kwinana, Western Australia.

The company is exploring opportunities to optimize the value of its sulfate TiO₂ process plant located in Uerdingen, Germany, including a possible divestiture of the facility. We believe it is important to fully

Table of Contents

evaluate the options to ensure that we maximize value for the company's shareholders and will complete this process as quickly as possible.

Asset Impairment. We have been working on the development of a raw materials feed project to improve efficiencies and reduce costs at our Savannah, Georgia, pigment facility. The initial trials of the project indicated that modifications would be required to achieve a satisfactory economic benefit. During 2006, additional studies were performed to determine the technical requirements needed to achieve operations and the additional cost to complete the project. We are planning a trial to evaluate the effectiveness of the project. The trial will be scheduled when permitting and installation issues are confirmed, which are expected to occur by year end. If it is determined that this is not a viable project, the assets will be written down approximately \$4.0 million to their net realizable value.

Results of Operations***Three Months Ended June 30, 2007 Compared to Three Months Ended June 30, 2006***

Total net sales were \$366.5 million during the three months ended June 30, 2007, a decrease of 2.5% from the 2006 period. The following table presents net sales for the periods indicated:

	Three Months Ended June 30,		
	2007	2006	\$ Change
	(In millions)		
Net sales			
Pigment	\$ 340.2	\$ 352.0	\$ (11.8)
Electrolytic and other chemical products	26.3	23.9	2.4
Total	\$ 366.5	\$ 375.9	\$ (9.4)

Pigment segment net sales decreased \$11.8 million, or 3.4%, to \$340.2 million during the three months ended June 30, 2007, from \$352.0 million during the three months ended June 30, 2006. The decrease was primarily due to lower prices and volumes resulting primarily from the slowdown in North America's housing industry. Changes in the Euro exchange rate partially offset the lower prices. While the foreign exchange impact was an increase to sales of approximately \$7.0 million, lower prices and volumes resulted in a decrease to sales of approximately \$18.8 million.

Electrolytic and other chemical products businesses net sales increased \$2.4 million, or 10.0%, to \$26.3 million during the three months ended June 30, 2007, from \$23.9 million during the three months ended June 30, 2006. Sales increased \$3.5 million due to higher sales volumes of manganese dioxide and sodium chlorate.

Gross margin decreased \$3.8 million, or 11.4%, to \$29.4 million during the three months ended June 30, 2007, from \$33.2 million during the three months ended June 30, 2006. Gross margin percentage decreased to 8.0% during the three months ended June 30, 2007, from 8.8% during the three months ended June 30, 2006, primarily due to lower pricing, higher shipping and handling costs and changes in foreign exchange rates. Lower pricing was primarily attributable to the slowdown in the North America housing industry. Production costs during the quarter were better than in the same period last year primarily due to improved operating conditions in our mining operations and lower input costs and better capacity utilization in the TiO₂ operations than in the prior year. While pricing, volumes and shipping and handling costs accounted for a \$12.2 million decrease in gross margin, improved costs provided an offset of \$10.1 million. The net foreign exchange impact reduced gross margin by \$1.7 million.

Selling, general and administrative expenses increased \$1.7 million, or 6.1%, to \$29.4 million during the three months ended June 30, 2007, from \$27.7 million during the three months ended June 30, 2006. The increase was mainly due to the prior-year reversal of variable compensation related costs and the effects of foreign exchange of approximately \$4.2 million, partially offset by decreases in outside consulting, travel and other expenses of approximately \$2.5 million.

Table of Contents

Total operating loss for the three months ended June 30, 2007, was \$1.5 million, a decrease of \$7.0 million from the 2006 period. The following table presents operating profit (loss), with a reconciliation to consolidated loss from continuing operations before income taxes, for the periods indicated:

	Three Months Ended June 30,		
	2007	2006	\$ Change
	(In millions)		
Operating profit (loss)			
Pigment	\$ 3.7	\$ 10.2	\$ (6.5)
Electrolytic and other chemical products	(0.8)	1.3	(2.1)
Subtotal	2.9	11.5	(8.6)
Corporate and nonoperating sites	(4.4)	(6.0)	1.6
Total operating profit (loss)	(1.5)	5.5	(7.0)
Interest and debt expense	(12.4)	(12.3)	(0.1)
Other income, net	0.7	5.3	(4.6)
Loss from continuing operations before income taxes	\$ (13.2)	\$ (1.5)	\$ (11.7)

Pigment segment operating profit decreased \$6.5 million, or 63.7%, to \$3.7 million during the three months ended June 30, 2007, from \$10.2 million during the three months ended June 30, 2006. The decrease was mainly due to lower selling prices of approximately \$10.3 million, higher selling, general and administrative expenses of approximately \$2.6 million and approximately \$5.0 million for foreign exchange changes and shipping and handling costs, partially offset by lower production costs of approximately \$11.2 million.

Electrolytic and other chemical products businesses operating profit decreased \$2.1 million to a loss of \$0.8 million during the three months ended June 30, 2007, from profit of \$1.3 million during the three months ended June 30, 2006. During the second quarter of 2007, we recorded a \$1.5 million provision (net of \$1.2 million increased receivable for reimbursement) for an environmental assessment at our Henderson, Nevada, facility. In addition, higher manufacturing, shipping and handling costs and higher selling, general and administrative expenses reduced operating profit. Higher manufacturing costs were primarily related to lower capacity utilization to control inventories while also ramping up production of a new product line.

Interest and debt expense increased \$0.1 million to \$12.4 million during the three months ended June 30, 2007, from \$12.3 million during the three months ended June 30, 2006.

Other income decreased \$4.6 million to \$0.7 million during the three months ended June 30, 2007, from \$5.3 million during the three months ended June 30, 2006. The change was mainly due to foreign exchange losses in 2007 compared to gains in 2006 and lower income from equity affiliates partially offset by a provision for litigation settlements recorded in 2006.

We recorded a tax charge of \$4.0 million in the second quarter of 2007 due to additional discussions with German tax authorities pertaining to the company's ongoing income tax audit for the years 1998 through 2001. Additionally, we recorded tax expense on loss from continuing operations as a result of losses in jurisdictions with statutory tax rates generally lower than those jurisdictions where the company had income and due to interest on uncertain tax positions.

Loss from discontinued operations decreased \$7.5 million, or 86.2%, to \$1.2 million during the three months ended June 30, 2007, from \$8.7 million during the three months ended June 30, 2006. The change was primarily attributable to provisions required in 2006 related to additional environmental costs for the former West Chicago site due primarily to a cost increase implemented by the licensed disposal facility used in remediation efforts.

Table of Contents***Six Months Ended June 30, 2007 Compared to Six Months Ended June 30, 2006***

Total net sales were \$705.6 million during the six months ended June 30, 2007, a decrease of 1.3% from the 2006 period. The following table presents net sales for the periods indicated:

	Six Months Ended June 30,		
	2007	2006	\$ Change
	(In millions)		
Net sales			
Pigment	\$ 655.6	\$ 663.6	\$ (8.0)
Electrolytic and other chemical products	50.0	51.1	(1.1)
Total	\$ 705.6	\$ 714.7	\$ (9.1)

Pigment segment net sales decreased \$8.0 million, or 1.2%, to \$655.6 million during the six months ended June 30, 2007, from \$663.6 million during the six months ended June 30, 2006. The decrease was primarily due to lower selling prices and volumes driven by the slowdown in North America's housing industry. The lower pricing and volumes were offset in part by foreign exchange rate changes. While the foreign exchange impact was an increase to sales of approximately \$17.0 million, lower prices and volumes resulted in a decrease to sales of approximately \$25.0 million.

Electrolytic and other chemical products businesses net sales decreased \$1.1 million, or 2.1%, to \$50.0 million during the six months ended June 30, 2007, from \$51.1 million during the six months ended June 30, 2006. Sales decreased \$5.1 million due to lower sales volumes and prices of manganese dioxide, boron specialties and lithium manganese oxide. This decrease was partially offset by increased pricing and volumes of sodium chlorate.

Gross margin decreased \$28.8 million, or 30.0%, to \$67.2 million during the six months ended June 30, 2007, from \$96.0 million during the six months ended June 30, 2006. Gross margin percentage decreased to 9.5% during the six months ended June 30, 2007, from 13.4% during the six months ended June 30, 2006. Lower prices and volumes of approximately \$16.7 million, higher shipping and handling costs of approximately \$4.0 million and higher manufacturing costs of approximately \$6.3 million contributed to the decline in gross margin. Higher manufacturing costs were a result of decreased production in the first quarter to manage inventories. Decreased production resulted in increased fixed costs per tonne sold and, coupled with increased input costs, resulted in lower gross margins. The net foreign exchange impact reduced gross margin by approximately \$1.7 million.

Selling, general and administrative expenses decreased \$1.0 million, or 1.5%, to \$65.0 million during the six months ended June 30, 2007, from \$66.0 million during the six months ended June 30, 2006. The decrease was mainly due to separation related costs in 2006 of approximately \$1.9 million and lower utilization of professional services coupled with cost savings initiatives of approximately \$2.3 million. These were offset by higher compensation cost, which includes the prior-year reversal of variable compensation, of approximately \$1.8 million and the effects of foreign exchange of approximately \$1.5 million.

Total operating profit was \$0.5 million for the six months ended June 30, 2007, a decrease of \$50.0 million from the 2006 period. The following table presents operating profit (loss), with a reconciliation to consolidated income (loss) from continuing operations before income taxes, for the periods indicated:

	Six Months Ended June 30,		
	2007	2006	\$ Change
	(In millions)		
Operating profit (loss)			
Pigment	\$ 11.0	\$ 35.9	\$ (24.9)
Electrolytic and other chemical products	(1.6)	23.1	(24.7)
Subtotal	9.4	59.0	(49.6)
Corporate and nonoperating sites	(8.9)	(8.5)	(0.4)
Total operating profit	0.5	50.5	(50.0)

Table of Contents

Pigment segment operating profit decreased \$24.9 million, or 69.4%, to \$11.0 million during the six months ended June 30, 2007, from \$35.9 million during the six months ended June 30, 2006. The decrease was mainly due to lower selling prices of approximately \$16.8 million, increased shipping and handling costs of approximately \$4.0 million, increased production costs of approximately \$3.3 million, and foreign exchange changes of approximately \$3.2 million, partially offset by a decrease in selling, general and administrative expenses of approximately \$2.5 million.

Electrolytic and other chemical products businesses operating profit decreased \$24.7 million, to a loss of \$1.6 million during the six months ended June 30, 2007, from profit of \$23.1 million during the six months ended June 30, 2006. The income recognized in 2006 consisted mainly of a \$20.5 million reimbursement settlement of our claim against the U.S. for contribution of past costs for ammonium perchlorate remediation at the Henderson, Nevada, facility. Additionally, increased manufacturing costs contributed to the reduced operating profit in the current period. Higher manufacturing costs were primarily related to higher feedstock, maintenance and energy costs as well as lower capacity utilization to control inventories.

Interest and debt expense increased \$0.4 million, or 1.6% percent, to \$24.7 million during the six months ended June 30, 2007, from \$24.3 million during the six months ended June 30, 2006. The increase was primarily due to interest associated with the note payable entered into in connection with the purchase of mining tenements and related mining assets in Australia in July 2006.

Other income decreased \$7.3 million to \$2.4 million during the six months ended June 30, 2007, from \$9.7 million during the six months ended June 30, 2006. The change was mainly due to foreign exchange losses in 2007 compared to gains in 2006 and lower income from equity affiliates, partially offset by a provision for litigation settlements recorded in 2006.

We recorded a tax charge of \$4.0 million during the six months ended June 30, 2007, due to additional discussions with German tax authorities pertaining to the company's ongoing income tax audit for the years 1998 through 2001. Additionally, we recorded tax expense on loss from continuing operations as a result of losses in jurisdictions with statutory tax rates generally lower than those jurisdictions where the company had income and due to interest on uncertain tax positions.

Loss from discontinued operations decreased \$10.1 million, or 86.3%, to \$1.6 million during the six months ended June 30, 2007, from \$11.7 million during the six months ended June 30, 2006. Both periods include losses related to legal and environmental costs associated with our former forest products operations. The change was primarily attributable to provisions required in 2006, related to additional environmental costs for the former West Chicago site due primarily to a cost increase implemented by the licensed disposal facility used in remediation efforts.

Financial Condition and Liquidity

General

Our primary cash needs are for working capital, capital expenditures, environmental cash expenditures and debt service under the senior secured credit facility, the unsecured notes and the note payable due July 2014. We believe that our cash flows from operations, together with available borrowings under our revolving credit facility, will be sufficient to meet these cash needs for the foreseeable future. However, our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. If our cash flows from operations are less than we expect, we may need to raise additional capital. We may also require additional capital to finance our future growth and development, implement additional marketing and sales activities, and fund our ongoing research and development activities.

Additional debt or equity financing may not be available when needed on terms favorable to us or even available to us at all. We are restricted by the terms of the senior secured credit facility and the indenture governing the unsecured notes from incurring additional indebtedness. Under our tax sharing agreement with Kerr-McGee, if we enter into transactions during the two-year period following the Distribution which results in the issuance or acquisition of our shares, and the Internal Revenue Service subsequently determines that Section 355(e) of the

Table of Contents

Internal Revenue Code is applicable to the Distribution, we will be required to indemnify Kerr-McGee for any resulting tax liability.

We have an interest in The LandWell Company LP (LandWell), a limited partnership formed to market or develop land in the Henderson, Nevada, area. LandWell has commenced negotiations with a number of parties who have interest in the development of either part or all of approximately 2,200 contiguous acres of its land in Henderson for eventual use as a new, mixed-use master planned community. However, we do not currently anticipate any cash flows associated with this in 2007. LandWell continues to pursue zoning approval for the development plan, with the City of Henderson currently scheduled to approve zoning in mid-September 2007. This large parcel, in addition to other parcels available for sale by LandWell or under contract, is in the vicinity of our Henderson facility. Cash flows resulting from the sale of the 2,200 contiguous acres of land in the Henderson, Nevada, area must be used to pay down outstanding debt under our senior secured credit facility.

We are making progress in negotiations with interested parties for the sale of parcels of land which are 100% Tronox owned. In June, we executed agreements or letters of intent involving certain parcels of 100% Tronox owned land in the Henderson, Nevada, area.

Of cash and cash equivalents at June 30, 2007, \$26.0 million was held in the U.S. and \$13.7 million was held in other countries.

Cash Flows from Operating Activities. Net cash flows from operating activities during the six months ended June 30, 2007, were a source of \$14.1 million compared to a source of \$13.4 million during the six months ended June 30, 2006. The decreased income for the 2007 period was offset by changes in assets and liabilities.

Cash Flows from Investing Activities. Net cash used in investing activities during the six months ended June 30, 2007, was \$33.8 million compared to \$42.8 million during the six months ended June 30, 2006.

Capital expenditures in the 2007 period were \$33.8 million. Significant projects in 2007 include upgrading the oxidation line and waste treatment facility at the Botlek, Netherlands, facility and process improvement projects at the Hamilton, Mississippi; Henderson, Nevada; Savannah, Georgia; and Uerdingen, Germany, facilities.

Capital expenditures in the 2006 period were \$43.3 million. Significant projects during the 2006 period included changes to convert waste to a saleable product and reduce raw material costs at the Uerdingen, Germany, facility, upgrading the oxidation line at the Botlek, Netherlands, facility and process improvements at the Hamilton, Mississippi, facility for the purpose of producing a new grade of pigment for use in architectural paints.

Capital expenditures in 2007 are expected to be in the range of \$75 to \$80 million, which includes capital for the planned expansion at our Kwinana, Western Australia, pigment plant.

Cash Flows from Financing Activities. Net cash used in financing activities was \$15.0 million and \$5.4 million during the six months ended June 30, 2007 and 2006, respectively. Cash used in 2007 included \$12.0 million in long-term debt payments, \$4.1 million in dividend payments and costs of \$0.3 million to modify debt. These were partially offset by proceeds from stock option exercises of \$1.4 million. The cash used in 2006 consisted of repayment of \$1.0 million of long-term debt and costs of \$2.4 million to complete the issuance of debt in addition to \$2.0 million in dividend payments.

Credit Agreement. In November 2005, our wholly owned subsidiary, Tronox Worldwide LLC, entered into a senior secured credit facility. This facility consists of a \$200 million six-year term loan facility and a five-year multicurrency revolving credit facility of \$250 million.

Interest on amounts borrowed under the senior secured credit facility is payable, at our election, at a base rate or a LIBOR rate, in each case as defined in the agreement. The current margin applicable to LIBOR borrowings is 125 basis points and may range between 100 to 200 basis points depending on our credit rating.

The terms of the credit agreement provide for customary representations and warranties, affirmative and negative covenants, and events of default. In March 2007, we requested and obtained approval for an amendment to the financial covenants in the credit agreement. The amendment maintains the original Total Leverage Ratio and the Interest Coverage Ratio (both as defined in the credit agreement) at 3.75:1 and 2:1, respectively, through December 31, 2007. For fiscal year 2008, the Total Leverage Ratio must be no more than 3.50:1 and the Interest

Table of Contents

Coverage Ratio must be at least 2.5:1 in the first two quarters and 3.00:1 in the last two quarters. The amendment did not modify the limit on capital expenditures, which is \$130 million in 2007 and 2008.

We were in compliance with our financial covenants at June 30, 2007. However, there can be no assurance that we will be in compliance with such covenants in the future. Future compliance with the covenants may be adversely affected by various economic, financial and industry factors. Noncompliance with the covenants would constitute an event of default under the credit agreement, allowing the lenders to accelerate repayment of any outstanding borrowings and/or to terminate their commitments to the credit facility. In the event of any future noncompliance with any covenants, we would seek to negotiate amendments to the applicable covenants or to obtain waivers from our lenders.

We are required, under the terms of the credit agreement, to remit a certain percentage of excess cash flow (ECF Percentage, as defined in the credit agreement) as a prepayment of the principal. As a result, in addition to the normal quarterly installments, the first such mandatory payment, in the amount of \$11.1 million, was paid in April 2007 based on the ECF Percentage for the fiscal year 2006.

Note Payable due July 2014. In July 2006, Tronox Western Australia Pty Ltd, our wholly owned subsidiary, completed the purchase of a 50% undivided interest in additional mining tenements and related mining assets. We acquired the mine tenements by entering into an eight-year note payable agreement. As a result, we had additional debt totaling \$8.8 million as of December 31, 2006. Revaluation of this Australian dollar denominated debt resulted in a balance of \$9.5 million at June 30, 2007.

Off-Balance Sheet Arrangements

We have entered into agreements that require us to indemnify third parties for losses related to environmental matters, litigation and other claims. We have recorded no material obligations in connection with such indemnification obligations as none are currently evaluated as probable of loss. In addition, pursuant to the MSA, we will be required to indemnify Kerr-McGee for all costs and expenses incurred by it arising out of or due to our environmental and other liabilities other than such costs and expenses reimbursable by Kerr-McGee pursuant to the MSA. At June 30, 2007, we had outstanding letters of credit in the amount of \$68.1 million, of which \$67.3 million was issued under our credit agreement, resulting in unused capacity under the revolving credit facility of \$182.7 million. These letters of credit have been granted to us by financial institutions to support our environmental clean-up costs and miscellaneous operational and severance requirements in international locations.

Table of Contents**Outlook**

With increasing demand and limited capacity expansion in the industry, we continue to project a positive long-term outlook for the global titanium dioxide industry. We estimate global demand growth in 2007 will be in the range of 2.8% to 3.2%. Demand remains strong in the Asia-Pacific and European regions, while North American demand continues to be impacted by the weak housing market.

We continue to work with multiple parties as we pursue strategic options for monetizing our only sulfate process TiO₂ plant, which is located in Uerdingen, Germany. We believe it is important to fully evaluate the options to ensure that we maximize the value for the company's shareholders and will complete this process as quickly as possible.

New Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes*, (FIN 48). FIN 48 was effective for fiscal years beginning after December 15, 2006, and clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. FIN 48 clarifies the application of SFAS 109 by defining criteria that an uncertain tax position must meet in order to be recognized in an enterprise's financial statements. FIN 48 also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The guidance required application through recognition of a cumulative effect adjustment to opening retained earnings in the period of adoption, with no charge to current earnings for prior periods. The results for prior periods have not been restated. As a result of the adoption of FIN 48, we recognized a \$9.3 million charge to the January 1, 2007, balance of retained earnings. The total amount of unrecognized tax benefits at January 1, 2007 was \$60.7 million.

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. We are reviewing SFAS No. 157 to determine the impact on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - including an Amendment of FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities*. We are currently assessing whether or not we will choose to implement the provisions of SFAS No. 159 and what the financial statement impact would be, if any. If we choose to implement SFAS No. 159, the effective date would be January 1, 2008.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

We are exposed to market risks, including credit risk, from fluctuations in both foreign currency exchange rates and natural gas prices. To reduce the impact of these risks and to increase the predictability of cash flows, from time to time, we enter into derivative contracts. These derivatives include forward contracts to buy and sell foreign currencies that have not been designated as cash flow hedges. Changes in the fair value of the foreign currency contracts are reflected in other income on the condensed consolidated statement of operations.

The following table presents the notional amounts at the contract exchange rates and the weighted-average contractual exchange rates for contracts to purchase (sell) foreign currencies outstanding at June 30, 2007. All amounts are U.S. dollar equivalents. The estimated fair value of our foreign currency forward contracts is based on the forward exchange rates quoted by financial institutions at the quarter.

	Notional Amount (In millions)	Weighted- Average Contract Rate
Maturing in 2007		
Euro	\$ (14.3)	1.3180
Australian dollar	3.9	.7794

Table of Contents

We also enter into derivative instruments that generally fix the commodity prices to be paid for a portion of our forecasted natural gas purchases. These commodity contracts have been designated and qualified as cash flow hedges.

The following table presents the forecasted percentage hedged and the weighted average price per MMBtu for contracts outstanding at June 30, 2007, to purchase natural gas for our U.S. operations.

	U.S. Natural Gas Purchases	
	Average Contract Price	
	% Hedged	\$/MMBtu
Q3, 2007	91%	\$ 6.94
Q4, 2007	70%	\$ 7.72

Item 4. Controls and Procedures*a) Evaluation of Disclosure Controls and Procedures*

The company maintains a set of disclosure controls and procedures designed to ensure that information required to be disclosed by the company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission (SEC) rules and forms. In addition, the disclosure controls and procedures are designed to ensure that information required to be disclosed by the company is accumulated and communicated to the company's management, including its Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures are effective.

b) Changes in Internal Control over Financial Reporting

There were no changes in the company's internal control over financial reporting during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Statements in this report regarding Tronox Incorporated's or management's intentions, beliefs or expectations, or that otherwise speak to future events, are forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements include those statements preceded by, followed by or that otherwise include the words believes, will, expects, anticipates, intends, estimates, projects, target, goal, plans, objective, outlook, should, or similar words. Future results and developments discussed in these statements may be affected by numerous factors and risks, such as the accuracy of the assumptions that underlie the statements, the market value of Tronox Incorporated's products, demand for consumer products for which Tronox Incorporated's businesses supply raw materials, the financial resources of competitors, changes in laws and

regulations, the ability to respond to challenges in international markets, including changes in currency exchange rates, political or economic conditions in areas where Tronox Incorporated operates, trade and regulatory matters, general economic conditions, and other factors and risks identified in Tronox Incorporated's U.S. Securities and Exchange Commission filings. Actual results and developments may differ materially from those expressed or implied in this Quarterly Report on Form 10-Q. Tronox Incorporated does not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made. Investors are urged to consider closely the disclosures in this Quarterly Report on Form 10-Q and the disclosures and risk factors in Tronox Incorporated's Annual Report on Form 10-K.

Table of Contents

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

Savannah Plant

On September 8, 2003, the Environmental Protection Division of the Georgia Department of Natural Resources (the EPD) issued a unilateral Administrative Order to our subsidiary, Tronox Pigments (Savannah) Inc., claiming that the Savannah plant exceeded emission allowances provided for in the facility's Title V air permit. On September 19, 2005, the EPD rescinded the Administrative Order and filed a Withdrawal of Petition for Hearing on Civil Penalties. Accordingly, the proceeding on administrative penalties has been dismissed, without prejudice. After dismissal of the Administrative Order, representatives of the EPD, the U.S. Environmental Protection Agency (the EPA) and Tronox continued with their discussions regarding a resolution of the alleged violations, with the EPA taking the lead role in these discussions. On December 6, 2006, the EPA informed Tronox Pigments (Savannah) Inc. that it had submitted a civil referral to the U.S. Department of Justice (the DOJ) with respect to the air quality bypass issue and for matters stemming from the EPA led Resource Conservation and Recovery Act (RCRA) Compliance Evaluation Inspection (CEI) that occurred in January 2006. Prior to the filing of any formal action, the DOJ has agreed to a series of settlement negotiations to determine if the matter can be resolved. After discussions with the EPA and the DOJ, the company tendered an offer of settlement and compromise to the government on June 22, 2007, to settle all outstanding issues in the amount of \$600,000 as a cash penalty payable over an eight-month period and approximately \$2.4 million in supplemental environmental projects. The EPA is evaluating the terms of the proposed settlement.

Forest Products

The company is defending a number of lawsuits related to three former wood-treatment plants in Columbus, Mississippi; Avoca, Pennsylvania; and Texarkana, Texas. All these lawsuits seek recoveries under a variety of common law and statutory legal theories for personal injuries and/or property damages allegedly caused by exposure to and/or release of chemicals used in the wood-treatment process, primarily creosote. The company believes that claims asserted in these lawsuits are without substantial merit and is vigorously defending them.

At Columbus, Mississippi, the consolidated federal case has been set for initial trial of two plaintiffs in November 2007.

At Avoca, Pennsylvania, 35 state court lawsuits were filed in 2005 by over 4,000 plaintiffs. The plaintiffs have classified their claims into various alleged disease categories. In September 2005, the judge ordered that discovery and the first trial will focus on plaintiffs who allege precancerous skin lesions. The first trial was scheduled for August 2007, but in May 2007 the parties agreed on arbitration as an alternative to this litigation. The trial judge approved arbitration and placed the lawsuits on an inactive docket. The first arbitration hearing is set for October 2007.

At Texarkana, Texas, the five plaintiffs in May vs. Tronox concluded settlement negotiations with the insurer for Tronox in April 2007, and the case was dismissed in June 2007. Similarly, in a separate case (the Avance case), plaintiffs reached settlements with the insurer in July and dismissals are expected to follow soon.

On June 25, 2007, the New Jersey Department of Environmental Protection and the New Jersey Spill Compensation Fund sued Tronox LLC and unnamed others in Superior Court, Law Division, Somerset County, New Jersey. The plaintiffs allege defendants are responsible for releases from the Federal Creosote Superfund Site that damaged the state's groundwater and seek natural resource damages and other appropriate relief.

For a discussion of other legal proceedings and contingencies, including proceedings related to our environmental liabilities, see our Annual Report on Form 10-K for the year ended December 31, 2006, and Note 12 to the Condensed Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q.

Table of Contents

Item 1A. Risk Factors

The company's Annual Report on Form 10-K for the year ended December 31, 2006, includes a listing of risk factors to be considered by investors in the company's securities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

The 2007 annual meeting of stockholders was held on May 8, 2007. The following matters were voted upon at the 2007 annual meeting:

(1) The stockholders voted in favor of electing Thomas W. Adams as director. There were 124,719,637 votes for the proposal; 3,999,990 votes against the proposal; and 56,340 abstentions.

(2) The stockholders voted in favor of electing Peter D. Kinnear as director. There were 125,013,625 votes for the proposal; 3,701,042 votes against the proposal; and 61,300 abstentions.

(3) The stockholders ratified the appointment of Ernst & Young LLP as the company's independent auditors for 2007. There were 125,372,532 votes for the proposal; 201,306 votes against the proposal; and 3,202,129 abstentions.

Item 5. Other Information

None.

Item 6. Exhibits

- 3.1 Amended and restated Certificate of Incorporation of Tronox Incorporated (incorporated by reference to Exhibit 3.1 of the Registrant's current report on Form 8-K, filed with the Securities and Exchange Commission on December 7, 2005).
- 3.2 Amended and Restated Bylaws of Tronox Incorporated (incorporated by reference to Exhibit 3.2 of the Registrant's current report on Form 8-K, filed with the Securities and Exchange Commission on December 7, 2005).
- 10.1* Continuity Agreement, dated as of July 16, 2007, between Tronox Incorporated and David J. Klvac.
- 31.1* Certification Pursuant to 15 U.S.C. Section 7241, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2* Certification Pursuant to 15 U.S.C. Section 7241, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1* Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2* Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

* Each document marked with an asterisk is filed herewith.
