TIMET ANNOUNCES FIRST QUARTER 2003 RESULTS

DENVER, COLORADO . . . April 23, 2003 . . . Titanium Metals Corporation ("TIMET" or the "Company") (NYSE: TIE) reported a loss for the first quarter of 2003 of \$13.6 million, or \$4.29 per share, compared to a loss in the first quarter of 2002 of \$80.4 million, or \$25.47 per share. Excluding the impact of the cumulative effect of change in accounting principle relative to the Company's asset retirement obligations, the Company reported a net loss of \$13.4 million, or \$4.23 per share, for the first quarter of 2003. Excluding the impact of the cumulative effect of change in accounting principle relative to the Company's impairment of its goodwill, the Company reported a net loss of \$36.1 million, or \$11.43 per share, for the first quarter of 2002.

Sales of \$99.3 million in the first quarter of 2003 were 5% lower than the year-ago period. The decrease resulted principally from a 14% decrease in mill product sales volume, a 12% decrease in melted product selling prices and a 1% decrease in mill product selling prices expressed in U.S. dollars (using actual foreign currency exchange rates prevailing during the respective periods), partially offset by a 53% increase in melted product sales volume and changes in customer and product mix. In billing currencies (which exclude the effects of foreign currency translation), mill product selling prices decreased 6% from the year-ago period. Substantially all melted products are sold in U.S. dollars.

As compared to the fourth quarter of 2002, mill product sales volume in the first quarter of 2003 increased 14%, while selling prices expressed in U.S. dollars decreased 1%. In billing currencies, first quarter 2003 mill product selling prices decreased 3% from fourth quarter 2002 levels. Melted product sales volume increased 95% in the first quarter of 2003 as compared to the fourth quarter of 2002, and melted product selling prices increased 6% during such period.

The Company's backlog at the end of March 2003 was approximately \$165 million, unchanged from the end of December 2002. The Company's backlog at the end of March 2002 was approximately \$175 million.

The Company was in a net cash position at March 31, 2003 of \$11.9 million, consisting of \$26.6 million of cash less \$14.7 million of debt (excluding capital lease obligations). The Company's unused borrowing availability under its U.S. and European credit agreements was approximately \$130 million at March 31, 2003.

All share and per share disclosures presented in this release for the first quarter of 2002 have been adjusted to give effect to the Company's previously reported one-for-ten reverse stock split.

The Company's results during the first quarter of 2002 include the previously reported impairment charge to other non-operating expense of \$27.5 million, or \$8.71 per share, related to the Company's investment in Special Metals Corporation.

J. Landis Martin, Chairman and CEO, said, "Our current outlook for the full year 2003 is for sales to be approximately \$365 million to \$375 million. At this level, we would expect an operating loss, before any potential restructuring or other special charges, of \$10 million to \$20 million and a net loss of \$30 million to \$40 million for the full year 2003."

Mr. Martin continued, "While our projected results for 2003 have improved

Edgar Filing: TITANIUM METALS CORP - Form 8-K

slightly from our earlier estimates, the outlook for 2003 remains difficult given the softness in the commercial aerospace market. Because of this, we continue to work on reducing costs in all areas of the Company, as well as lowering inventories and improving margins. These efforts include aggressive spending reductions, supplier price concessions, salaried headcount reductions and manufacturing process improvements. We remain committed to increasing the scope of those cost reduction efforts to improve our bottom line performance. On a longer-term basis, we continue to evaluate certain facility and product line consolidation opportunities toward the goal of meaningfully reducing our fixed cost structure."

The statements in this release and the conference call relating to matters that are not historical facts are forward-looking statements that represent management's beliefs and assumptions based on currently available information. Forward-looking statements can be identified by the use of words such as "believes," "intends," "may," "will," "looks," "should," "could," "anticipates," "expects" or comparable terminology or by discussions of strategies or trends. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it cannot give any assurances that these expectations will prove to be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly affect expected results. Actual future results could differ materially from those described in such forward-looking statements, and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that could cause actual results to differ materially are risks and uncertainties including, but not limited to, the cyclical nature of the commercial aerospace industry, the performance of aerospace manufacturers and the Company under their long-term agreements, the difficulty in forecasting demand for titanium products, global economic and political conditions, global productive capacity for titanium, changes in product pricing and costs, the impact of long-term contracts with vendors on the ability of the Company to reduce or increase supply or achieve lower costs, the possibility of labor disruptions, fluctuations in currency exchange rates, control by certain stockholders and possible conflicts of interest, uncertainties associated with new product development, the supply of raw materials and services, changes in raw material and other operating costs (including energy costs), possible disruption of business or increases in the cost of doing business resulting from terrorist activities or global conflicts, the Company's ability to achieve reductions in its cost structure and other risks and uncertainties. Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected. The Company assumes no duty to update any forward-looking statements. The financial information contained in this release is subject to future correction and revision and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's most recent reports on Form 10-K and Form 10-Q, as each may be amended from time to time, filed with the Securities and Exchange Commission.

As previously announced, TIMET will host a conference call to discuss its first quarter results on April 23, 2003 at 10:30 a.m. EDT. The conference call will be hosted by J. Landis Martin, Chairman and Chief Executive Officer. The conference call will be webcast at www.timet.com or participants may access the call by dialing (800) 289-0485 (domestic) or (913) 981-5518 (international). A replay of the webcast will be available through April 30, 2003 on the TIMET website and at CCBN's individual investor center. Participants may also access

Edgar Filing: TITANIUM METALS CORP - Form 8-K

the replay by dialing 888-203-1112 (domestic) or 719-457-0820 (international) with access code 748986.

TIMET, headquartered in Denver, Colorado, is a leading worldwide producer of titanium metal products. Information on TIMET is available on the internet at <http://www.timet.com>.
