Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

### Item 2.02. Results of Operations and Financial Condition

OGE Energy Corp. (the Company) is the parent company of Oklahoma Gas and Electric Company (OG&E), a regulated electric utility with approximately 735,000 customers in Oklahoma and western Arkansas, and Enogex Inc. and its subsidiaries (Enogex), a natural gas pipeline business with principal operations in Oklahoma and Arkansas.

On May 4, 2005, the Company issued a press release describing the Company's consolidated financial results for the quarter ended March 31, 2005, which is furnished as Exhibit 99.01 and incorporated herein by reference. As described in the press release, the Company reported earnings of \$0.06 per share for the first quarter of 2005, compared with \$0.12 per share for the first quarter of 2004. Lower earnings were due primarily to lower gross margins on revenues (gross margin) at Enogex and higher expenses at both Enogex and OG&E, which more than offset higher gross margins at OG&E. For further information, see the press release attached as Exhibit 99.01.

OG&E posted a loss of \$0.02 per share in the first quarter of 2005, compared with break-even results for the first quarter of 2004. Enogex posted earnings of \$0.09 per share in the first quarter of 2005, compared with earnings of \$0.15 per share for the first quarter of 2004. The holding company posted a loss of \$0.01 per share in the first quarter of 2005, compared with a loss of \$0.03 per share for the first quarter of 2004.

## OGE Energy Corp. Announces 1<sup>st</sup> Quarter Results

OKLAHOMA CITY OGE Energy Corp. (NYSE: OGE), the parent company of Oklahoma Gas and Electric Company (OG&E) and Enogex Inc., today reported earnings of \$0.06 per share for the three months ended March 31, compared with earnings of \$0.12 per share for the first quarter of 2004.

Lower earnings were due primarily to lower gross margins at Enogex and higher expenses at both Enogex and OG&E, which more than offset higher gross margins at OG&E.

OG&E, a regulated electric utility, posted a loss of \$0.02 per share in the first quarter, compared with break-even results in the comparable period last year. Enogex, an unregulated natural gas pipeline business, recorded earnings of \$0.09 per share, compared with \$0.15 per share in the year-ago quarter. The holding company, which primarily has interest expenses but no operating revenues, posted a loss of \$0.01 per share, compared with a loss of \$0.03 per share in the first quarter of 2004.

Results for the first quarter were down at both OG&E and Enogex compared to last year, said Steven E. Moore, OGE Energy chairman, president and CEO. The results at OG&E reflect the need for rate relief, which we will be pursuing later this year. At Enogex, despite the lower first quarter, we expect the continuing strong commodity price environment to be reflected in Enogex's gathering and processing businesses, enabling us to increase the Company's 2005 earnings guidance to between \$1.65 and \$1.75 per share.

### Discussion of First Quarter 2005

OGE Energy reported consolidated operating revenues of \$1.28 billion in the first quarter, compared with \$1.04 billion a year earlier. The first-quarter gross margin on revenues was \$190 million, compared with \$187 million in the year-earlier quarter. Operating income was \$26 million in the first quarter, compared with \$31 million in the year-earlier quarter. Net income was \$5.3 million in the first quarter, compared \$10.2 million a year ago.

OG&E reported gross margin on revenues of \$126 million in the first quarter, compared with \$121 million in the comparable quarter last year, despite milder weather. Heating-degree days were 7 percent below the 2004 quarter and 15 percent below normal in the first quarter of 2005. The higher margin was primarily the result of customer growth and a seasonal over-collection of revenues associated with the new cogeneration credit rider that will be returned to customers later in the year.

The higher first-quarter gross margins at OG&E were offset by increased expenses for electric system reliability projects. OG&E recorded a net loss of \$1.7 million in the first quarter, compared with break-even results a year ago.

Enogex reported gross margin on revenues of \$63 million in the first quarter, compared with \$66 million in the comparable quarter last year. Net income was \$8.1 million, compared with \$12.8 million in the first quarter of 2004. Gross margins were \$2.5 million higher in the gathering and processing business, \$0.6 million lower in the transportation and storage business and \$4.4 million lower in the marketing business.

### 2005 Outlook

OGE Energy increased its consolidated earnings guidance for 2005 to \$1.65 - \$1.75 per share, from \$1.50 - \$1.60 per share previously. This is primarily due to an increase in projected earnings at Enogex as a result of continued strength in commodity prices. It assumes about 90.5 million average diluted shares outstanding. The earnings guidance includes a utility earnings range between \$106 million and \$110 million or \$1.17 to \$1.22 per share, assuming a 1 to 2 percent growth in gross margins from customer growth, normal weather, recovery of Enogex gas transportation and storage costs at the \$41.9 million level recommended by the Oklahoma Corporation Commission Administrative Law Judge, no change in base rates, and regulatory lag in recovering costs of the McClain plant acquisition. The earnings guidance also includes Enogex earnings in a range between \$49 million and \$56 million or \$0.54 to \$0.62 per share, which assumes commodity spread projections of between \$2.02 and \$2.56 per MMBtu and natural gas liquids price projections of between \$0.82 and \$0.89 per gallon in 2005. The holding company earnings guidance is a loss between \$6 million and \$8 million, or \$.07 to \$.09 per share, with lower interest expenses.

**Conference Call Webcast**

OGE Energy will host a conference call for discussion of the results and the outlook for 2005 on Wednesday, May 4, at 8 a.m. CDT. The conference, hosted by James R. Hatfield, senior vice president and CFO, will be available through [www.oge.com](http://www.oge.com).

OGE Energy is the parent company of Oklahoma Gas and Electric Company (OG&E), which serves approximately 735,000 customers in a service territory spanning 30,000 square miles in Oklahoma and western Arkansas, and of Enogex Inc., a natural gas pipeline business with principal operations in Oklahoma and Arkansas.

Some of the matters discussed on this news release may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words anticipate, believe, estimate, expect, intend, project, objective, plan, possible, potential, project and similar expressions. Actual results may vary materially. Factors that could cause actual results to differ materially include, but are not limited to: general economic conditions, including the availability of credit, actions of rating agencies and their impact on capital expenditures; the Company's ability and the ability of its subsidiaries to obtain financing on favorable terms; prices of electricity, natural gas and natural gas liquids, each on a stand-alone basis and in relation to each other; business conditions in the energy industry; competitive factors including the extent and timing of the entry of additional competition in the markets served by the Company; unusual weather; federal or state legislation and regulatory decisions (including the proceeding currently pending before the OCC related to OG&E's recovery of the costs billed to it by Enogex for gas transportation and storage services) and initiatives that affect cost and investment recovery, have an impact on rate structures or affect the speed and degree to which competition enters the Company's markets; environmental laws and regulations that may impact the Company's operations; changes in accounting standards, rules or guidelines; creditworthiness of suppliers, customers and other contractual parties; the higher degree of risk associated with the Company's

nonregulated business compared with the Company's regulated utility business; and other risk factors listed in the reports filed by the Company with the Securities and Exchange Commission.
