ALLIANCE GAMING CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

Principles of consolidation

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

The accompanying unaudited condensed consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, which management believes are necessary to present fairly the financial position, results of operations and cash flows of Alliance Gaming Corporation (Alliance or the Company) for the respective periods presented. The results of operations for an interim period are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes in the Company's annual report on Form 10-K for the year ended June 30, 2003.

The accompanying unaudited condensed consolidated financial statements include the accounts of Alliance, and its wholly owned and partially owned, controlled subsidiaries. In the case of Video Services, Inc. (VSI), the Company owns 100% of the voting stock. The Company is entitled to receive 71% of dividends declared by VSI, if any, at such time that dividends are declared.

The Company, through a wholly-owned subsidiary, is the general partner of Rainbow Casino Vicksburg Partnership, L.P. (RCVP), the limited partnership that operates the Rainbow Casino. The limited partner, Rainbow Corporation, an independent third party, is entitled to receive 10% of the net available cash flows after debt service and other items, as defined (which amount increases to 20% of such amount for the proportional revenues above \$35.0 million) each year through December 31, 2010. The Company holds the remaining economic interest in the partnership and consolidates the partnership.

The Company records minority interest expense to reflect the portion of earnings of VSI and RCVP attributable to the minority shareholders.

During the fiscal year ended June 30, 2003, the Company acquired 100 percent of the stock of three companies: Casino Management Systems Software Company (CMS) on November 13, 2002, Micro Clever Consulting Systems Company (MCC) on April 9, 2003 and Honeyframe Systems Company (HSC) on May 28, 2003.

On December 31, 2003, the Company acquired 100% of the assets of U.K. based Crown Gaming from Crown Leisure Limited (Crown). The purchase price in cash was \$3.9 million of which approximately \$1.0 million was allocated to goodwill. The acquisition, which includes Crown's distributorship agreements for a wide variety of automated table games and video bingo machines, strategically builds on the Company's focus towards future growth projected in England.

During the quarter ended March 31, 2004, the Company completed the acquisition of substantially all of the assets and liabilities of MindPlay LLC (MindPlay), a leading developer of advanced table game technologies and completed the acquisition of Sierra Design Group (SDG), a leading supplier of Class II and Class III gaming devices, systems and technology, details of which are included in Note 9.

All significant intercompany accounts and transactions have been eliminated. Certain reclassifications have been made to prior year financial statements to conform to the current year presentation.

Revenue recognition

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

Revenue from sales of gaming machines is generally recognized at the time products are shipped and title has passed to the customer. Games placed with customers on a trial basis are not recognized as revenue until the trial period ends and the customer accepts the games. The Company sells gaming equipment on normal credit terms (generally 2%, net 30) and offers financing to qualified customers for periods generally between 6 and 48 months.

Revenue from sales of computerized monitoring systems is recognized in accordance with the AICPA's Statement of Position 97-2 (SOP 97-2)

Software Revenue Recognition. In accordance with the provisions of SOP 97-2, the contracts for the sales of computerized monitoring units are considered to have multiple elements because they include hardware, software, installation, supervision, training, and post-contract customer support. Accordingly, revenues from the sale of systems are deferred and begin to be recognized at the point when the system is deemed to be functionally operational, and the residual method is used to recognize revenue for the remaining elements as they are delivered, each having vendor-specific objective evidence of relative fair values. Post-contract customer support revenues are recognized over the period of the support agreement (generally one year).

Our Bally Gaming and Systems business unit earns revenues from recurring revenue sources that consist of the operations of the wide-area progressive jackpot systems and revenues from gaming machines placed in a casino on a daily lease or rental basis. Revenue from these sources is recognized based on the contractual terms of the participation or rental agreements and is generally based on a share of money wagered, a share of the net winnings, or on a fixed daily rental rate basis.

In accordance with industry practice, the Company recognizes gaming revenues in its route and casino operations as the net win from gaming machine operations, which is the difference between coins and currency deposited into the machines and payments to customers and, for other games, the difference between gaming wins and losses. The Company recognizes total net win from gaming machines as revenues for route operations, which the Company operates pursuant to revenue-sharing arrangements and revenue-sharing payments (either fixed or variable) as a cost of route operations.

The Company continuously monitors its exposure for credit losses and maintains allowances for anticipated losses.

Capitalized Costs

During fiscal year 2004, Bally Gaming and Systems has experienced an almost four fold increase in the volume of product submissions to the various domestic regulatory bodies, each of which charges fees for the testing and approval of each product. Product testing costs are capitalized once technological feasibility has been established and are amortized, generally over a three year period once the product is placed in service. Product testing costs related to projects that are discontinued are expensed when such determination is made. The year to date fees incurred for such regulatory approvals totaled approximately \$4.0 million. Of these amounts incurred, for the quarter ended March 31, 2004, the Company capitalized a total of \$1.6 million that was directly attributable to products that have been approved and amortization expenses totaled \$0.3 million.

Recently Issued Accounting Pronouncements

In December 2003, the Financial Accounting Standards Board published FASB Interpretation No. 46, Consolidation of Variable Interest Entities (revised December 2003) (FIN46-R), clarifying FIN 46 and exempting certain entities from the provisions of FIN 46. Generally, application of

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

FIN 46-R is required in financial statements of public entities that have interests in structures commonly referred to as special-purpose entities for periods ending after December 15, 2003, and, for other types of VIEs, for periods ending after December 15, 2004. The Company has reviewed this pronouncement and determined it is not applicable.

In December 2003, the FASB issued Statement of Financial Accounting Standard (SFAS) No. 132-R Employers' Disclosures about Pensions and Other Postretirement Benefits an amendment of FASB Statements No. 87, 88, and 106. This statement revises employers' disclosures about pension plans and other postretirement benefit plans. The Company has reviewed this pronouncement and determined it is not applicable.

2. EARNINGS PER SHARE

The following computation of basic and diluted earnings per share and weighted average common and common share equivalents outstanding is as follows (in 000 s except per share amounts):

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2003	2004	2003	2004
Net income from continuing operations	\$ 8,927	\$ 12,241	\$ 23,026	\$ 28,306
Net income from discontinued operations	3,853	1,593	7,865	10,299
Net income	\$ 12,780	\$ 13,834	\$ 30,891	\$ 38,605
Weighted average common shares outstanding	49,294	50,221	48,567	49,334
Effect of dilutive securities	868	1,228	1,014	1,188
Weighted average common and common share equivalents outstanding	50,162	51,449	49,581	50,522
Earnings per basic share:				
Income from continuing operations	\$ 0.18	\$ 0.25	\$ 0.47	\$ 0.57
Income from discontinued operations	0.08	0.03	0.17	0.21
	\$ 0.26	\$ 0.28	\$ 0.64	\$ 0.78
Earnings per diluted share:				
Income from continuing operations	\$ 0.18	\$ 0.24	\$ 0.46	\$ 0.56
Income from discontinued operations	0.07	0.03	0.16	0.20
	\$ 0.25	\$ 0.27	\$ 0.62	\$ 0.76

Diluted earnings per share represent the potential dilution that could occur if all dilutive securities outstanding were exercised. Certain securities do not have a dilutive effect because their exercise price exceeds the average fair market value of the underlying stock during the respective period. Such securities are excluded from the diluted earnings per share calculation and consist of the following (in 000 s):

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2003	2004	2003	2004
Stock options	716	2	716	1,435

The Company accounts for its stock-based employee compensation awards in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). Under APB 25, because the exercise price of the Company's employee stock options equals or exceeds the market price of the underlying stock on the date of grant, no compensation expense is recognized.

In 1998, the Company adopted SFAS No. 123 Accounting for Stock-Based Compensation (SFAS No. 123). Under SFAS No. 123 companies may continue to account for employee stock-based compensation under APB 25, but are required to disclose historical pro-forma net income and earnings per share that would have resulted from the use of the fair value method described in SFAS No. 123.

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure. This Statement amends SFAS No. 123 to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS No. 123 and APB Opinion No. 28 Interim Financial Reporting to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. Under the fair value method, compensation costs are measured using an options pricing model and amortized over the estimated life of the option, which is generally three to ten years, with option forfeitures accounted for at the time of the forfeiture, and all amounts are reflected net of tax. The historical and pro forma net income (assuming an after-tax charge for stock-based compensation) and related per share data are as follows (in 000's, except per share data):

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2003	2004	2003	2004
Net income				
As reported	\$ 12,780	\$ 13,834	\$ 30,891	\$ 38,605

Pro forma net income	\$ 12,163	\$ 12,351	\$ 28,625	\$ 35,228
Earnings per share:

Diluted Pro forma	\$ 0.24	\$ 0.24	\$ 0.58	\$ 0.70

On the date of grant using the Black-Scholes option-pricing model, the following assumptions were used to value the options in the periods indicated:

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2003	2004	2003	2004
Risk-free interest rate	3.5%	3.5%	3.5%	3.5%
Expected volatility	0.28	0.26	0.28	0.26
Expected dividend yield	0	0	0	0
Expected life	3-10 years	3-10 years	3-10 years	3-10 years

The resulting fair values applied to the options granted were \$5.51 and \$9.18 per share for the quarter ended March 31, 2003 and 2004 and were \$6.21 and \$9.24 per share for the nine month periods ended March 31, 2003 and 2004, respectively.

3. DISCONTINUED OPERATIONS

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

In July 2003 the Company announced it had entered into definitive sale agreements for each component of its route operations segment consisting of United Coin Machine Co. (UCMC) and Video Services, Inc. (VSI) and its German wall machine and amusement games segment (Alliance Automaten GmbH & Co. KG dba Bally Wulff).

The sale of Bally Wulff was consummated on July 18, 2003, at which time the Company received \$16.5 million in cash consideration. Pursuant to the sale agreement, the Company used \$5.6 million of the sale proceeds to purchase a 5 million Euro certificate of deposit as collateral for a tax claim currently being negotiated with the German tax authorities, for which the Company has indemnified the buyer. The certificate of deposit is included in Other Assets in the accompanying unaudited financial statements.

The Company has entered into a definitive agreement for the sale of UCMC to the privately held Century Gaming, Inc. based in Montana. The sales price is based on a multiple of EBITDA (as defined in the sale agreement). The

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

closing of this transaction is subject to customary closing conditions, including that the buyer obtain the necessary gaming licenses. This transaction is expected to close in June 2004.

Through a wholly owned subsidiary, Alliance owns 100 percent of the class B voting shares of VSI. Alliance and the owners of the class A shares have entered into a definitive agreement to sell 100 percent of VSI's stock to Gentilly Gaming, LLC. The all-cash transaction is subject to customary closing conditions and is expected to close on June 30, 2004. Concurrent with the sale agreement, VSI has entered into a 12-month operating agreement extension under terms and conditions that are the same as the existing agreement with the Fair Grounds Corporation.

On December 8, 2003 the Company announced that it had entered into an agreement for the sale of its Rail City Casino. The sale was completed on May 3, 2004 and Alliance received cash of \$37.9 million.

As a result of the transactions described above, each of the four businesses is treated as discontinued operations, and their results are presented net of applicable income taxes below income from continuing operations in the accompanying unaudited condensed consolidated statements of operations. In accordance with accounting principles generally accepted in the United States of America, depreciation and amortization for these discontinued operations ceased as of July 1, 2003 for UCMC and VSI and as of December 8, 2003 for Rail City Casino as a result of their designation as assets held for sale. The assets and liabilities of the businesses are now classified as held for sale in the accompanying unaudited condensed consolidated balance sheets. The prior year results have been reclassified to conform to the current year presentation.

Summary operating results for the discontinued operations for UCMC, VSI, Bally Wulff and Rail City Casino are as follows (in 000's):

4. INVENTORIES

Inventories are stated at the lower of cost, determined on a first-in, first-out basis, or market. Cost elements included for work-in-process and finished goods include raw materials, freight, direct labor and manufacturing overhead.

Inventories, net of reserves, consisted of the following (in 000 s):

	June 30, 2003	March 31, 2004
Raw materials	\$ 13,720	\$ 19,479
Work-in-process	789	2,871

Total	\$ 32,102	\$ 53,236

5. DEBT

Long-term debt and lines of credit consisted of the following (in 000 s):

	June 30, 2003	March 31, 2004
Term loan facility	\$ 187,625	\$ 350,000
Revolving credit facility		70,000

Other, generally secured by related equipment	7,432	9,461
	345,215	429,461
Less current maturities	3,537	5,446
Long-term debt, net of current maturities	\$ 341,678	\$ 424,015

The Company's debt structure at June 30, 2003 consisted primarily of a \$190 million term loan facility and a \$23.7 million undrawn revolving credit facility and \$150 million 10% Senior Subordinated Notes (Subordinated Notes). The term loan had an interest rate of LIBOR plus 3.25% (or 4.45% as of June 30, 2003).

On September 5, 2003, the Company completed a senior bank debt refinancing transaction (the Refinancing) whereby the Company entered into a new \$275 million term loan facility and a \$125 million revolving credit facility. Proceeds from the new loans were used to repay the existing

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

bank term loans totaling approximately \$188 million, repay the Subordinated Notes, and to pay transaction fees and expenses. The new term loan had an interest rate of LIBOR plus 2.75%, which was later reduced to LIBOR + 2.50% (or 3.79% as of March 31, 2004), has a 1% per year mandatory principal amortization after the first year, and a 6-year maturity. The revolving credit facility has an interest rate of LIBOR plus 2.50% (or 3.79% as March 31, 2004), and the commitment decreases ratably over its 5-year term to a 60% balloon. During the December 2003 quarter the Company increased the term loan by \$75 million, to a total of \$350 million outstanding. The proceeds were used primarily to fund the acquisition SDG. As a result the Company incurred an additional \$1.3 million in debt issuance costs, which have been capitalized and will be amortized over the remaining term of the loan.

On August 13, 2003, the Company initiated a tender offer and consent solicitation for all of the outstanding Subordinated Notes at a price of 103.33% plus a .25% tender premium which was contingent on the closing of the new bank facility. On September 10, 2003, the tender offer period expired, with \$78.6 million of the Subordinated Notes having been tendered. On September 11, 2003, the Company initiated redemption of the remaining Subordinated Notes at a price of 103.33%, which was completed on September 16, 2003, at which time the Subordinated Notes were fully redeemed.

As a result of the Refinancing described above, the Company recorded a pre-tax charge in the quarter ended September 30, 2003 of \$12.3 million, which includes a \$5.0 million charge for the early extinguishment of the Subordinated Notes, \$7.0 million for the non-cash write off of deferred financing costs, and \$0.3 million in fees and expenses.

The new bank facility is collateralized by substantially all domestic property and is guaranteed by each domestic subsidiary of the Company, other than the entity that holds the Company's interest in its Louisiana and Mississippi operations, and is secured by a Pledge Agreement. The bank facility contains a number of maintenance covenants and other significant covenants that, among other things, restrict the ability of the Company and the ability of certain of its subsidiaries to dispose of assets, incur additional indebtedness and issue preferred stock, pay dividends or make other distributions, enter into certain acquisitions, repurchase equity interests or subordinated indebtedness, issue or sell equity interests of the Company's subsidiaries, engage in mergers or acquisitions, or engage in certain transactions with subsidiaries and affiliates, and that otherwise restrict corporate activities. As of March 31, 2004, the Company is in compliance with these covenants.

6. SEGMENTS AND GEOGRAPHICAL INFORMATION

The Company currently operates in two business segments (exclusive of the two business segments included in discontinued operations): (i) Gaming Equipment and Systems which designs, manufactures and distributes gaming machines and computerized monitoring systems for gaming machines, and (ii) Casino Operations which owns and operates one regional casino. The accounting policies of these segments are consistent with the Company's policies for the unaudited condensed consolidated financial statements.

The table below presents information as to the Company's revenues, intersegment revenues and operating income (loss) by segment (in 000's):

8. COMMITMENTS AND CONTINGENCIES

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

The Company is a party to various lawsuits relating to routine matters incidental to its business. Management does not believe that the outcome of such litigations, in the aggregate, will have a material adverse effect on the Company.

On February 19, 2004, the Company completed the acquisition of MindPlay. The Company purchased substantially all of the assets and liabilities of MindPlay for consideration of \$11.0 million in cash, a promissory note in the amount of \$4.0 million and a warrant to purchase 100,000 shares of Alliance Common Stock, plus transaction fees and expense resulting in total consideration of \$15.9 million. Additional consideration may become payable in cash over the next 13 years upon the MindPlay business unit achieving certain significant revenue and gross margin targets.

Additionally, on March 2, 2004, the Company completed the acquisition of SDG. The Company purchased 100 percent of the outstanding shares of SDG for consideration of approximately \$29.8 million in cash and 662,000 shares of Alliance Common Stock. In addition, the Company assumed approximately \$80 million of debt (including approximately \$72 million of loans payable to Alliance which now has been forgiven), plus transaction fees and expenses, resulting in total initial consideration of \$126.4 million. Additional contingent consideration of up to \$95.6 million may become payable, in equal portions of cash and stock, over the next three fiscal years upon the SDG business unit achieving certain significant revenue and EBITDA targets.

9. ACQUISITIONS

Under the purchase method of accounting, the total purchase price is allocated to the net tangible and intangible assets based upon their estimated fair market values as of the date of the acquisitions. The allocation of the purchase price to goodwill and intangibles is subject to change based on final valuation of net assets (including inventory and property, plant and equipment) and is based upon independent third-party valuations and management's estimates.

SIERRA DESIGN GROUP

On March 2, 2004, Alliance completed the acquisition of 100% of the shares of privately held SDG. Consideration totaled \$126.4 million, and additional contingent consideration of up to \$95.6 million may become payable over the next three years upon the SDG business unit achieving certain revenues and EBITDA targets.

The fair values preliminarily assigned to the SDG assets and liabilities were as follows (in 000's):

Tangible Assets:

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

The following intangible assets of SDG are being amortized with the following lives:

	Lives
Contracts	10
Patents/core technology	8
Trade name/trademark	5

The value assigned to the restricted stock totaled \$11.9 million, and was determined by an independent third-party, and resulted in a 30% discount to the stock price two days before and after the announcement of the acquisition. Pursuant to a loan agreement between Alliance and SDG, Alliance committed to loan SDG up to \$74 million during the pre-acquisition period. As of December 31, 2003, Alliance had advanced \$61.0 million, and as of the acquisition date the loan balance totaled \$72.8 million, which was forgiven as of the acquisition date. Including the loan advances of \$72.8 million, the cash paid for SDG totaled \$108.6 million.

The following unaudited proforma financial information is presented as if the SDG acquisition had been completed at the beginning of the relative period (in 000 s, except per share information).

MINDPLAY

On February 19, 2004, Alliance completed the acquisition of substantially all of the assets and liabilities of MindPlay LLC. The consideration consisted of \$9 million in cash, a note payable totaling \$4.0 million, assumption of \$2.0 million of long-term debt, and warrants to purchase 100,000 Alliance common stock valued at \$1.0 million. Additional contingent consideration is payable over the next 13 years based on certain MindPlay product revenues and gross margin targets.

The fair values preliminarily assigned to the MindPlay assets and liabilities are as follows (in 000 s):

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

ALLIANCE GAMING CORPORATION

FORM 10-Q

March 31, 2004

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview and Summary

We are a diversified, worldwide gaming company that (i) designs, manufactures and distributes gaming machines and computerized monitoring systems for gaming machines; and (ii) owns and operates a casino. Operating under the name Bally Gaming and Systems, we are a worldwide leader in designing, manufacturing and distributing gaming machines, having marketed over 90,000 gaming machines during the past five years. We also design, integrate and sell highly specialized computerized monitoring systems that provide casinos with networked accounting and security services for their gaming machines with over 265,000 game monitoring units installed worldwide. Our dockside casino in Vicksburg, Mississippi offers 12 table games and approximately 930 gaming devices.

Several significant events should be highlighted. In July 2003, we announced our intention to transform our Company from a diversified gaming conglomerate to a technology provider to the gaming industry. In July 2003, we entered into definitive agreements to sell our route operations in Nevada and Louisiana, and our wall machine and amusement games business in Germany. The German business has been sold and the sales of the Nevada and Louisiana route operations are expected to be completed during fiscal 2004. In addition, on December 8, 2003, we announced that we had entered into an agreement for the sale of our Rail City Casino and the sale was completed on May 3, 2004. For purposes of financial reporting, each of these four businesses are now treated as discontinued operations and their results are presented net of applicable income taxes, below income from continuing operations.

In December 2003, we acquired England-based Crown Gaming from Crown Leisure Limited one of the United Kingdom's largest distributors of gaming and amusement machines. In February 19, 2004 we acquired substantially all of the assets and liabilities of MindPlay, a leading developer of advanced table technology and finally on March 2, 2004, we completed the acquisition 100 percent of the outstanding shares of SDG, a leading supplier of Class II and Class III gaming devices, systems and technology.

Over the next several years we believe that the next significant expansion in gaming will be derived from the Video Lottery Terminal (VLT) and the Racino markets both domestically and internationally. SDG's presence in both arenas and more importantly its technology supporting centrally determined gaming and Class II gaming will give us a meaningful presence in these markets and significant head start in capitalizing on the expected growth in these markets.

Liquidity and Capital Resources

As of March 31, 2004, we had \$32.5 million in cash and cash equivalents, and \$55.0 million in unborrowed availability on our revolving credit facility. In addition, we had net working capital of approximately \$156.7 million at March 31, 2004, compared to \$155.2 million at June 30, 2003, excluding liabilities of discontinued operations. The changes within working capital are more fully described in the cash flow section below. Consolidated cash and cash equivalents at March 31, 2004 includes approximately \$2.1 million of cash which is utilized in Casino Operations held in vaults, cages or change banks, as well as \$16.8 million which is held in jackpot reserve accounts we maintain to ensure availability of funds to pay wide-area progressive jackpot awards. In addition, long-term investments of \$2.6 million include investments in Treasury Strips for the previous jackpot winners.

Management believes that cash flows from operating activities, cash and cash equivalents held and the \$125 million revolving credit facility commitment will provide the Company with sufficient capital resources and liquidity for operations. At March 31, 2004, we had no material commitments for capital expenditures.

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

From time to time we become aware of potential acquisition or development opportunities and we may at any time be negotiating with respect to transactions or developments both domestically and internationally. Additionally, we regularly evaluate all of our assets within our portfolio and will continue to consider disposition of assets that, in our opinion, do not represent the best use of our capital. If such transactions occur our capital resources and liquidity may be affected.

Cash Flow

During the nine months ended March 31, 2004, we generated \$68.1 million of cash flows from operating activities of continuing operations, compared to \$25.0 million in the prior year period primarily as the result of a decrease in receivables related to the gaming and systems short-term financing for three significant property openings in the prior year.

During the nine months ended March 31, 2004, cash flow from investing activities of continuing operations included \$10.9 million of cash provided from the sale of Bally Wulff (net of \$5.6 million used to purchase a 5 million Euro certificate of deposit as collateral for a tax claim currently being negotiated with the German tax authorities, for which the Company has indemnified the buyer), offset by net cash used in the acquisitions of Crown of \$3.9 million, SDG for \$108.6 million includes the loan advances of \$72.8 million (See Note for assets and liabilities assumed in acquisitions) and MindPlay of \$11.0 million, capital expenditures totaling \$9.6 million, and costs incurred to produce participation games totaling \$26.4 million.

During the nine months ended March 31, 2004, \$73.7 million cash was provided by financing activities of continuing operations resulting from a \$70 million increase in term loans and \$350.0 million of proceeds from the issuance of long-term debt and \$6.6 million of cash provided from the exercise of stock options, offset by the \$337.6 million payoff of debt from refinancing, \$7.0 million of refinancing costs, \$5.4 million of premium paid on the early redemption of the subordinated notes and principal payments on long term debt totaling \$3.0 million.

Our Bally Gaming and Systems business unit reported an overall increase in revenues of 24% for the quarter and 23% for the year-to-date period when compared to the prior year periods. Bally game sales division reported an increase in revenues of 5% for the quarter and an increase of 8% for the year-to-date period. New units sold decreased 9% during the quarter and remained flat for the year-to-date period. The 9% decrease in new units sold for the quarter on a comparative basis reflects customer requested delays in delivering gaming units. The average new-unit selling price (excluding OEM games) increased 1% for the quarter and 8% for the year-to-date period.

Included in the Bally Gaming and Systems revenue discussed above is the revenue contribution from SDG, which totaled \$15.2 million for the 29 days of March 2004 following the completion of the acquisition of SDG. SDG's revenues from game sales totaled \$11.5 million and included the sale of 590 devices in the Washington and Rhode Island markets. SDG's gaming operations contributed \$3.7 million in revenues from its daily-fee games discussed below.

Bally Systems division reported an increase in revenues of 44% for the quarter and 53% for the year-to-date period, when compared to the prior year periods, driven by a 4% decrease in game monitoring units shipped, offset by a continued increase in the average selling price per unit, increased sales of software licenses for eTICKET, the industry's leading single-wire TITO solution, as well as sales of its bonusing and promotions software. Bally Systems recurring hardware and software revenues for the quarter increased to \$5.3 million, resulting from the larger base of installed systems, which now stands at approximately 265,000 units in 213 casinos world-wide.

The Gaming Operations division reported an increase of 55% in revenues for the quarter and an increase of 28% for the year-to-date period when compared to the prior year periods, driven by the 50% increase for the quarter and the 33% increase for the year-to-date-period in the average installed base of wide-area progressive (WAP) and daily-fee games deployed, which now total 1,670 and 5,780, respectively. This unit increase was driven by increases in the daily-fee games deployed during the quarter led by the installation of a combined 1,710 video lottery terminals for the three Racino properties that opened in New York during the quarter (820 Bally units, 890 SDG units). In addition to the New York placements, the gross placements for all other daily-fee and WAP games totaled 1,630 units, and there were 890 units returned resulting in a 740 net increase in the installed base of games on a sequential basis as of March 31, 2004 compared to December 31, 2003. The base of recurring fee games now includes those from SDG, consisting of 10,700 in Washington and 4,200 Class II/Central determination games primarily in Oklahoma and Florida, and 200 Raining Diamonds games.

For the quarter ended March 31, 2004, the overall gross margin percentage for Bally Gaming and Systems increased to 59% and to 60% for the year-to-date period, primarily as a result of an increase in higher margin in Gaming and Systems operation revenues.

During the nine months ended March 31, 2004, cash flow from investing activities of continuing operations included

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

Selling, general and administrative expenses increased 27% over the prior year quarter, as a result of an overall increase in payroll, advertising and marketing expenses. Selling, general and administrative costs as a percentage of this business unit's revenue remained constant at 24% for the quarter and 22% for the year-to-date period. Research and development costs increased 62% for the quarter and 66% for the year-to-date period, resulting from an increase in headcount and consulting fees. Total depreciation expense increased 64% over the prior year quarter and 52% for the year-to-date period, driven by the increase in the installed base of wide-area progressive and daily-fee games and as a result of the previously disclosed acquisitions.

During fiscal year 2004, Bally Gaming and Systems has experienced an almost four fold increase in the volume of product submissions to the various domestic regulatory bodies, each of which charges fees for the testing and approval of each product. Product testing costs are capitalized once technological feasibility has been established and are amortized, generally over a three year period once the product is placed in service. Product testing costs related to projects that are discontinued are expensed when such determination is made. The year-to-date fees incurred for such regulatory approvals and classified as Research and Development Cost exceeded \$4.0 million. Of these amounts incurred, for the quarter ended March 31, 2004, the Company capitalized a total of \$1.6 million that was directly attributable to products that have been approved and recorded amortization expense totaling \$0.3 million for the quarter.

Rainbow Casino revenues increased 3% for the quarter and 3% for the year-to-date-period, when compared to the prior year periods. The revenue increase in the quarter is a result of a 16% increase in net win per day per gaming machine to \$161, offset by 2% decrease in the average number of gaming machines for the quarter. The revenue increase for the year-to-date is a result of a 4% increase in net win per day per gaming machine to \$148, offset by 1% decrease in the average number of gaming machines.

The gross margin for Casino Operations as a percentage of revenues increased to 60% for the quarter as compared to 63% for the prior year quarter. This increase was a result of decreases in certain operating costs. Cost of casino revenues includes gaming taxes, rental costs and direct labor including payroll taxes and benefits. The gross margin as a percentage of revenue increased to 61% for the year-to-date compared to 58% in the prior year period, primarily as a result of the reduction in headcount due to the conversion to cashless.

The overall selling, general and administrative expenses increased 5% over the prior year quarter, as a result of an increase in advertising and promotional expenses. Selling, general and administrative costs as a percentage of this business unit's revenue increased to 22% in the current quarter compared to 21% in the prior year quarter. Selling, general and administrative costs as a percentage of this business unit's revenue for the year-to-date period decreased slightly to 23% from 24%. This decrease is primarily a result of lower headcount. Total depreciation expense increased 20% over the prior year quarter and 29% for the year-to-date period, as a result of the capital improvements made to the Rainbow Casino in the prior year.

Discontinued Operations

As previously discussed, we announced that we had entered into definitive agreements for the sale of our two route operations in July 2003 and the sale of our Rail City Casino in December 2003. For purposes of financial reporting, these three business units are now treated as discontinued operations.

Rail City Casino

As previously discussed, we announced that we had entered into definitive agreements for the sale of our two route operations in July 2003 and the sale of our Rail City Casino in December 2003. For purposes of financial reporting, these three business units are now treated as discontinued operations.

Average Number of Table Games	8	6	8	7

Rail City Casino revenues increased 9% for the quarter and increased 9% for the year-to-date period, when compared to the prior year periods. The revenue improvement in the quarter was attributable to a 4% increase in the average number of gaming machines and 6% increase in net win per day per gaming machine to \$96. The revenue increase for the year-to-date is due to a 5% increase in the average number of gaming machines and a 7% increase in net win per day per gaming machine to \$92.

The gross margin for Casino Operations as a percentage of revenues increased to 49% for the quarter and to 47% for the year-to-date period. This increase was a result of decreases in certain operating costs. Cost of casino revenues includes gaming taxes, rental costs and direct labor including payroll taxes and benefits.

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

The overall selling, general and administrative expenses decreased 8% over the prior year quarter, as a result of a decrease in advertising and promotional expenses. For the year-to-date period selling, general and administrative costs increased by 2% compared to the prior year period, as a result of an increase in payroll and payroll related costs. Selling, general and administrative costs as a percentage of this business unit's revenue decreased to 15% in the current quarter and to 16% for the year-to-date period. In accordance with generally accepted accounting principles, depreciation and amortization for this discontinued operation ceased as of December 8, 2003 as a result of its designation as assets held for sale. Had depreciation and amortization expense been recorded for the current period, operating income for the discontinued operation would have decreased by \$0.3 million for the quarter and \$0.5 million for the year-to-date period.

The sale of the Rail City Casino to The Sands Regent was completed on May 3, 2004.

Revenues from the Nevada route operations increased 14% for the quarter and 7% for the year-to-date period. For the quarter the increase was attributable to a 5% increase in the average number of gaming machines for the quarter and an increase in the average net win per gaming machine per day of 7% to \$74.00 from \$69.00. For the year-to-date period the increase is attributable to a 6% increase in the average net win per gaming machine per day to \$70.50 from \$66.60 and a slight increase in an average number of gaming machines deployed. Gamblers Bonus, a cardless players club and player tracking system, continued to have a favorable impact on the net win per day. As of March 31, 2004, the Gamblers Bonus product was installed in over 4,230 gaming machines at approximately 435 locations statewide or 51% of the installed base of gaming machines.

Revenues from Louisiana route operations increased 23% for the quarter and 13% for the year-to-date period. For the quarter the increase is a result of a 17% increase in the net win per gaming machine per day to \$71.10 from \$60.50 and a 5% increase in the number of units deployed compared to the prior year quarter. For the year-to-date period the increase is a result of a 9% increase in the net win per gaming machines per day to \$61.80 from \$56.50 and a 4% increase in the number of units deployed compared to the prior year period.

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

For the quarter ended March 31, 2004, the overall gross margin percentage for the Route Operations remained relatively constant at 16%. The overall selling, general and administrative expenses in the quarter increased 1% and 6% for the year-to-date period, primarily as a result of an increase in payroll and payroll related costs. Selling, general and administrative costs as a percentage of revenue remained at 6% compared to the prior year quarter.

The results of the Nevada and Louisiana Route operations for the quarter and the nine months ended March 31, 2003 include depreciation and amortization expense. In accordance with generally accepted accounting principles, depreciation and amortization for these discontinued operations ceased as of July 1, 2003 as a result of their designation as assets held for

sale. Had depreciation and amortization expense been recorded for the current period, operating income for the discontinued operations would have decreased by \$3.6 million for the quarter and \$10.9 million for the year-to-date period.

Income tax expense	\$ 4,653	\$ 6,234	\$ 14,609	\$ 15,944

The general and administrative expenses decreased 4% over the prior year quarter. This decrease was driven by lower corporate litigation costs and a recovery of certain legal costs previously paid. Total depreciation expense decreased 46% for the quarter as a result of lower amortization expenses due to lower capitalized costs in the recent debt refinancing transaction.

Interest expense (net of interest income) for the current quarter totaled \$2.8 million compared to \$6.2 million in the prior year period. The lower interest expense in the current quarter reflects reduced interest in the current rates post-refinancing. Interest income during the quarter ended March 31, 2004 included \$1.5 million of interest on the loans to SDG, which ceased upon the acquisition of SDG on March 2, 2004.

The nine months ended March 31, 2004, reflect a \$12.3 million refinancing charge recorded in the first quarter consisting primarily of a \$5.0 million prepayment penalty for the redemption of our Subordinated Notes, a non-cash charge of \$7.0 million to write off the deferred financing costs, and \$0.3 million of fees and expenses. We recorded a tax benefit from these charges totaling approximately \$4.8 million.

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

The continuing operations tax rate of 34% for the quarter and 36% for the year-to-date period reflects the realization of research and development tax credits and a reconciliation of certain deferred tax assets and liabilities to the 2003 tax return.

We believe that the analysis of EBITDA is a useful adjunct to operating income, net income, cash flows and other GAAP-based measures. However, EBITDA should not be construed as an alternative to net income (loss) or cash flows from operating, investing and financing activities determined in accordance with GAAP or as a measure of liquidity. EBITDA is a common measure of performance in the gaming industry but may not be comparable to similarly titled measures reported by other companies. We disclose EBITDA primarily because it is a performance measure used by management in evaluating the performance of our business units and is one of several performance measures used in our management incentive plan. Additionally, EBITDA is utilized as a performance measure in covenants for our bank credit agreement.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Currency Rate Fluctuations

We derive revenues from our non-U.S. subsidiaries, all of which revenues are denominated in their local currencies, and their results are affected by changes in the relative values of non-U.S. currencies and the U.S. dollar. Most of the currencies in countries in which we have foreign operations strengthened versus the U.S. dollar in 2003 and 2004, which resulted in assets and liabilities denominated in local currencies being translated into less dollars. We do not currently utilize hedging instruments.

Market Risks

During the normal course of our business, we are routinely subjected to a variety of market risks, examples of which include, but are not limited to, interest and currency rate movements, collectibility of accounts and notes receivable, and recoverability of residual values on leased assets. We continually assess these risks and have established policies and practices designed to protect against the adverse effects of these and other potential exposures. Although we do not anticipate any material losses in these risk areas, no assurances can be made that material losses will not be incurred in these areas in the future.

We have performed a sensitivity analysis of our financial instruments, which consist of our cash and cash equivalents and debt. We have no derivative financial instruments. In performing the sensitivity analysis, we define risk of loss as the hypothetical impact on earnings of changes in the market interest rates or currency exchange rates.

The results of the sensitivity analysis at March 31, 2004, are as follows:

Interest Rate Risk:

As of March 2004, we had total debt of approximately \$429.5 million, consisting primarily of the new \$350 million term loan and the initial \$70 million borrowing on the revolver. The interest rate for each loan is set on the borrowing date and is effective for the term outstanding. If the LIBOR rates were to increase or decrease by 100 basis points, with all other factors remaining constant, earnings would decrease or increase by approximately \$4.3 million on a pre-tax basis.

Foreign Currency Exchange Rate Risk:

Edgar Filing: ALLIANCE GAMING CORP - Form 10-Q

Our foreign subsidiaries generally use their domestic currency as their functional currency. A 10% fluctuation in the exchange rates of these currencies against the U.S. dollar would result in a corresponding change in earnings reported in the consolidated group of approximately \$90,000.

ITEM 4. DISCLOSURE CONTROLS AND PROCEDURES

The Company's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the company's disclosure controls and procedures as defined in Securities Exchange Act Rule 13a-15(e) as described at the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective. During the period covered by this report there have been no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting.
