TO BUSINESS AND MEDICAL EDITORS:

EDAP TMS S.A. 2007 Second Quarter Revenues Increase

European Growth Continues, HIFU Division Returns to Profitability

Retains Experienced North American Prostate Cancer Leader to Drive USA Programs

LYON, France, Aug. 30 /PRNewswire-FirstCall/ -- EDAP TMS S.A. (Nasdaq: EDAP), the global leader in High Intensity Focused Ultrasound (HIFU) treatment of prostate cancer and the international leader in the development, production, and distribution of a wide portfolio of minimally invasive medical devices primarily for the treatment of urological diseases today reported financial

Edgar Filing: EDAP TMS SA - Form 6-K

results for the second quarter 2007 and updated its HIFU growth expectations.

Key highlights include:

- * HIFU RPP Revenues increased 40% year over year on significant treatment growth and response to the company's marketing initiatives. Year to date 23 new centers, including 12 in the second quarter, have launched bringing the total global base to 155 sites with additional sites signing on monthly.
- * Total revenues are the highest reported in recent quarters due to the mix of equipment sales coupled with high revenue contribution from the recurring RPP programs at a growing number of sites. At June 30 the company reported cash of Euro 9.0 million, having used only Euro 325,000 in the second quarter as a result of increased device sales and RPP levels compared to the prior year.
- * The HIFU division grew revenues 45% as compared with 2006 same quarter revenues. In the second quarter and first six months of 2007 the HIFU division reported an operating profit of Euro 354,000 and Euro 20,000 respectively due to shifts in revenue mix and strong margins.
- * The company continued its progress on the US trials by adding Dr. John Rewcastle as its Group Medical Director, a well known and highly regarded prostate cancer expert. Rewcastle's main mission and target will be to lead EDAP's FDA approval process, which is a major and positive step forward for the company in the US.
- * Clinical activity continues to grow including recent successes reported in studies designed to demonstrate the effectiveness of Ablatherm-HIFU in additional cancer stages through the use of combination therapy, a common practice in later stage cancers. Early indications suggest Ablatherm is particularly well suited for combination with hormonal therapy in later stage cancers such as T2c where the device has not previously seen regular use.

EXECUTIVE COMMENTS

Marc Oczachowski, EDAP TMS Chief Executive Officer commented: "The second quarter is a record among recent quarters with revenue of nearly 6 million Euros. EDAP continues its high growth in RPP revenues with a 40% increase on the first half of Fiscal 2007 compared with last year. Already July and August, typically slow summer months due to holidays prevalent in Europe look promising with a comparable high growth rate. We are preparing for more growth in our RPP programs based on refinement of the marketing and sales efforts launched to achieve this success. We are adjusting our communications with direct feedback from our subsidiaries and their local customers, including passing further control over marketing plans and budgets to each major country manager in Europe rather than centralizing these decisions from headquarters. These regional actions will bring even higher efficacy and response to our conversion plans for both patients and urologists for Ablatherm-HIFU.

"We are also pleased to already see significant benefit from the addition of John Rewcastle to lead our medical efforts, including management of the FDA programs. Dr. Rewcastle is the leading authority comparing devices available on HIFU for prostate cancer. His decision to join EDAP affirms what our science has shown conclusively -- EDAP secures consistent, statistically predictive efficacy outcomes for patients while delivering some of the lowest complication rates in areas crucial for quality of life, especially in the area of incontinence and

Edgar Filing: EDAP TMS SA - Form 6-K

also in impotence through the opportunity to preserve the erectile nerves. As men are diagnosed earlier in life, the importance of Ablatherm's ability to protect a man's quality of life will only increase.

"The revenue growth and decreased loss in the second quarter results confirm again the validity of our high growth RPP program. EDAP's revenues are still significantly, and this quarter positively, affected by the Ablatherm device sales despite the growth already achieved in our recurring revenues. We know as a matter of fact that HIFU machine sales are unpredictable from one quarter to the other. This dependence will decrease as EDAP increases revenues in RPP lines among the total group revenues, an effort already achieving much success."

FINANCIAL RESULTS

EDAP's second quarter and first half results show significant growth from the higher contribution of the company's RPP business lines and the effect of revenue diversification. Second quarter revenues increased 28% compared to first quarter revenue due to the sale of two Ablatherm units in the second quarter. Continued growth in recurring RPP and services revenues will ultimately reduce the swing effect of device sales.

Gross profit at the group level in the first six months is Euro 4.3 million reflecting gross margins of 41.1%, down slightly from the prior year due to changes in UDS sales mix and currency while HIFU margins remain steady at 60% for the first half. Second quarter HIFU margins were 61 percent, up 4% compared to the prior year period.

Group operating loss was Euro 712,000 in the second quarter and Euro 1.9 million year to date. Operating loss includes FDA trial expenses and higher costs for the expanded marketing and sales support fueling HIFU revenue growth. The company recorded \$300,000 in benefit from the exercise of warrants by its former partner in the US as well as increased cash investment in inventory assets ahead of second half sales and the launch of the company's new Sonolith I-sys requiring inventory investment for the near term. Cash position remains strong at Euro 9.0 million, or \$12.1 million US, at June 30.

The HIFU revenue reached Euro 4.4 million at the end of June 2007, Euro 2.8 million in the second quarter alone. This is an increase 45.4% over the second quarter of 2006 and 74.7% over Q1 2007. The increase includes the sale of two Ablatherm units with additional sales expected in the second half and the steady growth of RPP sales, up 40.2% over the first six months of 2006.

The second quarter revenue increase helped the HIFU division past breakeven at the end of June, with a Euro 354,000 Operating Profit in the quarter and a Euro 20,000 profit in the first half, despite the increase in marketing expenses by 19% over the first half 2006.

UDS revenue remains recurring and globally stable at Euro 3.1 million in the second quarter, up 2.4% and 27.5% over Q1 2007 and Q4 2006 respectively, and down 5.2% for the first half of 2007 as compared to 2006, with a six month revenue of Euro 6.2 million. The decrease of Euro 300,000 in the six months is primarily connected to negative exchange rate impacts of Euro 200,000 on the Japanese Yen, and to a lower number of machines sold (18 lithotripters in 2007 versus 21 in 2006), partially offset by a 9% increase in the average price due to product and country mix.

UDS Gross Margin decreased by 6.5 points to 27.5% year to date in 2007. The decrease is due to the exchange rate effect on machines sold in Japan to date and mix as a higher portion of products were sold including optional equipment. Options increase revenue, but are purchased from third parties decreasing the global margin rate. The already identified appetite for

Edgar Filing: EDAP TMS SA - Form 6-K

full-option high-range litho machines drove the development of the new Sonolith I-sys litho machine to be launched in Autumn this year, to help sustain and grow the UDS revenue.

Eric Soyer, EDAP TMS Chief Financial Officer, commented: "As we had indicated, the first quarter had a high cash investment due to increases in inventory to prepare for equipment sales such as shown in the second quarter. More importantly, the recent results demonstrate the success of the business model in balancing recurring revenue sources with less predictable equipment sales. We intend to continue growing the recurring RPP and services portion of our business to ultimately secure profitable operations. EDAP's strong cash management allows it the flexibility to address needs on two continents from a position of strength, making investments that will secure long term future growth and profitability for shareholders."

US PROGRAMS: REWCASTLE BRINGS FDA EXPERTISE, NORTH AMERICAN PRESENCE

EDAP continues its ongoing US clinical sessions in pursuit of future FDA approval for Ablatherm-HIFU under its direct efforts. EDAP has full rights to all revenue and profit earned in future US activities with growing treatment demand from centers participating in the EDAP study. Both patients and doctors report early success with the Ablatherm-HIFU activities mirroring the highly predictive outcomes observed over more than a decade of European clinical examination. Dr. Rewcastle will lead the trial programs in the United States including center selection, medical communications, FDA activities and education efforts to make doctors aware of the study and HIFU's existing medical documentation to help them evaluate appropriate patient selection criteria for Ablatherm-HIFU under the study protocols.

Dr. Rewcastle commented: "Although I expected to see the trial embraced, the level of interest within the urological community has been surprising. There are many more centers interested in participating in the clinical trial that we can accommodate -- both top level academic centers and high quality community practices. Thankfully, this is a very good problem to have in terms of accruing patients to a clinical trial. For physicians and patients alike, I believe HIFU will ultimately become the treatment of choice for men diagnosed with low risk prostate cancer within the next decade. HIFU is attractive to patients due to the non-invasive nature of the procedure and its low complication rate. More importantly, however, is the emerging clinical data that is establishing the durability of the treatment and solidifying HIFU's role as a primary prostate cancer therapy."

Conference Call and Webcast

Management will host a conference call today, August 30, at noon Eastern Time, 6:00 p.m. Paris Time. Interested investors may join the call live by dialing (866) 463-5401 from the United States or +1 (212) 457-9857 from international locations and entering PIN code 762482#. Investors may also listen to the live call online at <http://www.edap-tms.com>.

Investors unable to join the call can access a playback of the conference call by telephone or online. To access the replay, please dial (866) 439-4554 or +1 (212) 457-9844 and using access code 334818# beginning one hour after the end of the call until September 30, 2007, or visit the company's Web site at <http://www.edap-tms.com>.

About EDAP TMS S.A.

EDAP TMS S.A. develops and markets Ablatherm, the most advanced and clinically proven choice for High Intensity Focused Ultrasound (HIFU) treatment

Edgar Filing: EDAP TMS SA - Form 6-K

of localized prostate cancer. HIFU treatment is shown to be a minimally invasive and effective treatment option with a low occurrence of side effects. Ablatherm-HIFU is generally recommended for patients with localized prostate cancer (stages T1-T2) who are not candidates for surgery or who prefer an alternative option, or for patients who failed radiotherapy treatment. The company is also developing this technology for the potential treatment of certain other types of tumors. EDAP TMS S.A. also produces and commercializes medical equipment for treatment of urinary tract stones using Extra-corporeal Shockwave Lithotripsy (ESWL).

For more information on the Company, contact Magnolia Investor Relations at (469) 362-5960, the Corporate Investor Relations Dept at +33 (0)4 78 26 40 46 or see the Company's Web sites at <http://www.edap-tms.com> and <http://www.hifu-planet.com>.

In addition to historical information, this press release contains forward-looking statements that involve risks and uncertainties. These include statements regarding the Company's growth and expansion plans. Such statements are based on management's current expectations and are subject to a number of uncertainties and risks that could cause actual results to differ materially from those described in these forward-looking statements. Factors that may cause such a difference include, but are not limited to, those described in the Company's filings with the Securities and Exchange Commission. Ablatherm- HIFU treatment is in clinical trials but not yet FDA approved or marketed in the United States.
