NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE A — BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial statements and with the instructions to Form 10-Q of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. However, in the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the six months ended June 30, 2009, are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. For further information, please refer to the consolidated financial statements and footnotes thereto included in the Company's Form 10-K for the year ended December 31, 2008.

NOTE B — SUMMARY OF ORGANIZATION

The First Bancshares, Inc., Hattiesburg, Mississippi (the "Company"), was incorporated June 23, 1995, under the laws of the State of Mississippi for the purpose of operating as a bank holding company. The Company's primary asset is its interest in its wholly-owned subsidiary, The First, A National Banking Association.

At June 30, 2009, the Company had approximately \$485.1 million in assets, \$321.3 million in loans, \$391.9 million in deposits, and \$42.2 million in shareholders' equity. For the six months ended June 30, 2009, the Company reported a net income of \$372,000 (\$243,000 applicable to common shareholders).

In the first, second and third quarters of 2008, the Company declared and paid quarterly dividends of \$.075 per common share for each quarter and in the fourth quarter of 2008, no dividend was paid.

No dividend was paid on common shares in the first and second quarters of 2009.

NOTE C – PREFERRED STOCK AND WARRANT

On February 6, 2009, as part of the U.S. Department of Treasury's ("Treasury") Capital Purchase Program ("CPP"), the Company received a \$5.0 million equity investment by issuing 5 thousand shares of Series A, no par value preferred stock to the Treasury pursuant to a Letter Agreement and Securities Purchase Agreement that was previously disclosed by the Company. The Company also issued a warrant to the Treasury allowing it to purchase 54,705 shares of the Company's common stock at an exercise price of \$13.71. The warrant can be exercised immediately and has a term of 10 years.

The non-voting Series A preferred shares issued, with a liquidation preference of \$1 thousand per share, will pay a cumulative cash dividend quarterly at 5% per annum during the first five years the preferred shares are outstanding, resetting to 9% thereafter if not redeemed. The CPP also includes certain restrictions on dividend payments of the Company's lower ranking equity and the ability to purchase its outstanding common shares.

The Company allocated the proceeds received from the Treasury on a pro rata basis to the Series A preferred stock and the warrant based on their relative fair values. The Company assigned \$.3 million and \$4.7 million to the warrant and the Series A preferred stock, respectively. The resulting discount on the Series A preferred stock is being accreted up to the \$5.0 million liquidation amount over the five year expected life of the Series A preferred stock.

NOTE D — EARNINGS APPLICABLE TO COMMON SHAREHOLDERS

Basic per share data is calculated based on the weighted-average number of common shares outstanding during the reporting period. Diluted per share data includes any dilution from potential common stock outstanding, such as exercise of stock options.

Accumulated Other Comprehensive Income (Loss) beginning of period	(409)	494
Accumulated Other Comprehensive Income (Loss), end of period	\$ (312)	\$ 19

NOTE F — FAIR VALUE OF ASSETS AND LIABILITIES

Effective January 1, 2008, the Corporation adopted Statement of Financial Accounting Standards No. 157 (“FAS 157”), Fair Value Measurements. FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. FAS 157 has been applied prospectively as of the beginning of the period.

FAS 157 defines the fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

In accordance with FAS 157, the Corporation groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

- Level 1: Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2: Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or comparable assets or liabilities which use observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets and liabilities.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying balance sheet.

Available-for-Sale Securities

The fair value of available-for-sale securities is determined by various valuation methodologies. Where quoted market prices are available in an active market, securities are classified within Level 1. The Corporation has no securities classified within Level 1. If quoted market prices are not available, then fair values are estimated by using pricing models or quoted prices of securities with similar characteristics. Level 2 securities include U.S. Treasury securities, obligations of U.S. government corporations and agencies, obligations of states and political subdivisions, mortgage-backed securities and collateralized mortgage obligations. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy.

The following table presents the Corporation's assets that are measured at fair value on a recurring basis and the level within the FAS 157 hierarchy in which the fair value measurements fall as of June 30, 2009 and December 31, 2008 (in thousands):

June 30, 2009

	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities	\$ 112,328	\$ 0	\$ 107,061	\$ 5,267

December 31, 2008

	Fair Value	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities	\$ 99,679	\$ 0	\$ 99,679	\$ 0

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value on a non-recurring basis and recognized in the accompanying balance sheets, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Impaired Loans

Loans for which it is probable that the Corporation will not collect all principal and interest due according to contractual terms are measured for impairment in accordance with the provisions of Financial Accounting Standard No. 114 ("FAS 114"), Accounting by Creditors for Impairment of a Loan. Allowable methods for estimating fair value include using the fair value of the collateral for collateral dependent loans or, where a loan is determined not to be collateral dependent, using the discounted cash flow method.

If the impaired loan is identified as collateral dependent, then the fair value method of measuring the amount of impairment is utilized. This method requires obtaining a current independent appraisal of the collateral and applying a discount factor to the value. If the impaired loan is determined not to be collateral dependent, then the discounted cash flow method is used. This method requires the impaired loan to be recorded at the present value of expected future cash flows discounted at the loan's effective interest rate. The effective interest rate of a loan is the contractual interest rate adjusted for any net deferred loan fees or costs, premiums or discount existing at origination or acquisition of the loan. Impaired loans are classified within Level 2 of the fair value hierarchy.

Other Real Estate Owned

Other real estate owned acquired through loan foreclosure is initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. The adjustment at the time of foreclosure is recorded through the allowance for loan losses. Due to the subjective nature of establishing the fair value when the asset is acquired, the actual fair value of the other real estate owned or foreclosed asset could differ from the original estimate. If it is determined the fair value declines subsequent to foreclosure, a valuation allowance is recorded through non-interest expense. Operating costs associated with the assets after acquisition are also recorded as non-interest expense. Gains and losses on the disposition of other real estate owned and foreclosed assets are netted and posted to other non-interest expense. Other real estate owned measured at fair value on a non-recurring basis at June 30, 2009, amounted to \$1.4 million.

The following table presents the fair value measurement of assets and liabilities measured at fair value on a nonrecurring basis and the level within the FAS 157 fair value hierarchy in which the fair value measurements fall at June 30, 2009 and December 31, 2008.

June 30, 2009

	Fair Value	Fair Value Measurements Using Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 5,086	\$ 0	\$ 5,086	\$ 0
Other real estate owned	\$ 1,441	\$ 0	\$ 1,441	\$ 0

December 31, 2008

	Fair Value	Fair Value Measurements Using Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 6,101	\$ 0	\$ 6,101	\$ 0
Other real estate owned	\$ 1,629	\$ 0	\$ 1,629	\$ 0

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value:

Cash and Cash Equivalents – For such short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment in securities available-for-sale and held-to-maturity – The fair value measurement for securities available-for-sale was discussed earlier. The same measurement approach was used for securities held-to-maturity.

Loans – The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits – The fair values of demand deposits are, as required by Statement No. 107, equal to the carrying value of such deposits. Demand deposits include noninterest-bearing demand deposits, savings accounts, NOW accounts, and money market demand accounts. The fair value of variable rate term deposits, those repricing within six months or less, approximates the carrying value of these deposits. Discounted cash flows have been used to value fixed rate term deposits and variable rate term deposits repricing after six months. The discount rate used is based on interest rates currently being offered on comparable deposits as to amount and term.

Short-Term Borrowings – The carrying value of any federal funds purchased and other short-term borrowings approximates their fair values.

FHLB and Other Borrowings – The fair value of the fixed rate borrowings are estimated using discounted cash flows, based on current incremental borrowing rates for similar types of borrowing arrangements. The carrying amount of any variable rate borrowing approximates its fair value.

Subordinated Debentures – The subordinated debentures bear interest at a variable rate and the carrying value approximates the fair value.

Off-Balance Sheet Instruments – Fair values of off-balance sheet financial instruments are based on fees charged to enter into similar agreements. However, commitments to extend credit do not represent a significant value until such commitments are funded or closed. Management has determined that these instruments do not have a distinguishable fair value and no fair value has been assigned.

	As of June 30, 2009		As of December 31, 2008

NOTE G — SECURITIES

The following disclosure of the estimated fair value of financial instruments is made in accordance with FASB Statement No. 107, Disclosures About Fair Value of Financial Instruments. The estimated fair value amounts have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is necessarily required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

A summary of the amortized cost and estimated fair value of available-for-sale securities and held-to-maturity securities at June 30, 2009, follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-sale securities:				
Obligations of U.S. Government Agencies	\$ 30,417	\$ 519	\$ 73	\$ 30,863
Tax-exempt and taxable obligations of states and municipal subdivisions	34,108	482	335	34,255
Mortgage-backed securities	33,255	802	167	33,890
Corporate obligations	13,899	23	1,512	12,410
Other	1,229	-	319	910
Total	\$ 112,908	\$ 1,826	\$ 2,406	\$ 112,328
Held-to-maturity securities:				
Mortgage-backed securities	\$ 12	\$ 0	\$ 0	\$ 12

NOTE H — ALLOWANCE FOR LOAN LOSSES

The Company has developed policies and procedures for evaluating the overall quality of its credit portfolio and the timely identification of potential problem loans. Management's judgment as to the adequacy of the allowance is based upon a number of assumptions which it believes to be reasonable, but which may not prove to be accurate, particularly given the Company's short operating history and rapid growth. Thus, there can be no assurance that charge-offs in future periods will not exceed the allowance for loan losses or that additional increases in the loan loss allowance will not be required.

The Company's allowance consists of two parts. The first part is determined in accordance with Financial Accounting Standard No. 5, Accounting for Contingencies (SFAS No. 5). The Company's determination of this part of the allowance is based upon quantitative and qualitative factors. A loan loss history based upon the prior four years is utilized in determining the appropriate allowance. Historical loss factors are determined by graded and ungraded loans by loan type. These historical loss factors are applied to the loans by loan type to determine an indicated allowance. The loss factors of peer groups are considered in the determination of the allowance and are used to assist in the establishment of a long term loss history for areas in which this data is unavailable and incorporated into the qualitative factors to be considered. The historical loss factors may also be modified based upon other qualitative factors including but not limited to local and national economic conditions, trends of delinquent loans, changes in lending policies and underwriting standards, concentrations, and management's knowledge of the loan portfolio. These factors require judgment upon the part of management and are based upon state and national economic reports received from various institutions and agencies including the Federal Reserve Bank, United States Bureau of Economic Analysis, Bureau of Labor Statistics, meetings with the Company's loan officers and loan committees, and data and guidance received or obtained from the Company's regulatory authorities.

The second part of the allowance is determined in accordance with Financial Accounting Standard No. 114, Accounting by Creditors for Impairment of a Loan (SFAS No. 114). Impaired loans are determined based upon a review by internal loan review and senior loan officers. Impaired loans are loans for which the bank does not expect to receive contractual interest and/or principal by the due date. A specific allowance is assigned to each loan determined to be impaired based upon the value of the loan's underlying collateral. Appraisals are used by management to determine the value of the collateral.

The sum of the two parts constitutes management's best estimate of an appropriate allowance for loan losses. When the estimated allowance is determined, it is presented to the Company's audit committee for review and approval on a quarterly basis.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis. Impaired loans not deemed collateral dependent are analyzed according to the ultimate repayment source, whether that is cash flow from the borrower, guarantor or some other source of repayment. Impaired loans are deemed collateral dependent if in the Company's opinion the ultimate source of repayment will be generated from the liquidation of collateral.

The Company discontinues accrual of interest on loans when management believes, after considering economic and business conditions and collection efforts, that a borrower's financial condition is such that the collection of interest is doubtful. Generally, the Company will place a delinquent loan in nonaccrual status when the loan becomes 90 days or more past due. At the time a loan is placed in nonaccrual status, all interest which has been accrued on the loan but remains unpaid is reversed and deducted from earnings as a reduction of reported interest income. No additional interest is accrued on the loan balance until the collection of both principal and interest becomes reasonably certain.

NOTE I – REGULATORY EXAM

During a recent examination by our banking regulators, the Company was asked to hire an independent outside expert to evaluate our trust preferred securities for OTTI. After the evaluation of our trust preferred securities, no adjustment was needed for the quarter ended March 31, 2009.

NOTE J – SUBSEQUENT EVENTS

Subsequent events have been evaluated through August 13, 2009, which is the date the financial statements were available to be issued. For the second quarter ended June 30, 2009, the Company recognized an impairment loss of \$71,000 on trust preferred securities.

ITEM NO. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS 2 OF OPERATIONS

FINANCIAL CONDITION

The following discussion contains "forward-looking statements" relating to, without limitation, future economic performance, plans and objectives of management for future operations, and projections of revenues and other financial items that are based on the beliefs of the Company's management, as well as assumptions made by and information currently available to the Company's management. The words "expect," "estimate," "anticipate," and "believe," as well as similar expressions, are intended to identify forward-looking statements. The Company's actual results may differ materially from the results discussed in the forward-looking statements, and the Company's operating performance each quarter is subject to various risks and uncertainties that are discussed in detail in the Company's filings with the Securities and Exchange Commission, including the "Risk Factors" section in the Company's most recently filed Form 10-K.

The First represents the primary asset of the Company. The First reported total assets of \$483.9 million at June 30, 2009, compared to \$473.8 million at December 31, 2008. Loans decreased \$2.6 million, or .8%, during the first six months of 2009. Deposits at June 30, 2009, totaled \$392.2 million compared to \$378.6 million at December 31, 2008. For the six month period ended June 30, 2009, The First reported net income of \$.58 million compared to \$1.44 million for the six months ended June 30, 2008.

NONPERFORMING ASSETS AND RISK ELEMENTS

Diversification within the loan portfolio is an important means of reducing inherent lending risks. At June 30, 2009, The First had no concentrations of ten percent or more of total loans in any single industry or any geographical area outside its immediate market areas.

At June 30, 2009, The First had loans past due as follows:

	(\$ In Thousands)
Past due 30 through 89 days	\$ 5,013
Past due 90 days or more and still accruing	1,077

The accrual of interest is discontinued on loans which become ninety days past due (principal and/or interest), unless the loans are adequately secured and in the process of collection. Nonaccrual loans totaled \$5.8 million at June 30, 2009, an increase of \$2.5 million from December 31, 2008. This increase is due to the weakening real estate markets. These weakening economic conditions are incorporated into the methodology of determining the amount of our allowance for loan losses by adjusting historical loss factors. Any other real estate owned is carried at fair value, determined by an appraisal. Other real estate owned (consisting of foreclosed properties) totaled \$1.4 million at June 30, 2009. A loan is classified as a restructured loan when the interest rate is materially reduced or the term is extended beyond the original maturity date because of the inability of the borrower to service the debt under the original terms. The First had \$1.9 million in restructured loans at June 30, 2009.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity is adequate with cash and cash equivalents of \$26.3 million as of June 30, 2009. In addition, loans and investment securities repricing or maturing within one year or less exceed \$148 million at June 30, 2009. Approximately \$37.3 million in loan commitments could fund within the next six months and other commitments, primarily standby letters of credit, totaled \$.8 million at June 30, 2009.

There are no known trends or any known commitments or uncertainties that will result in The First's liquidity increasing or decreasing in a material way.

Total consolidated equity capital at June 30, 2009, is \$42.2 million, or approximately 8.7% of total assets. The Company currently has adequate capital positions to meet the minimum capital requirements for all regulatory agencies. The Company's capital ratios as of June 30, 2009, were as follows:

Tier 1 leverage	10.54%
Tier 1 risk-based	14.36%
Total risk-based	15.06%

On June 30, 2006, The Company issued \$4,124,000 of floating rate junior subordinated deferrable interest debentures to The First Bancshares Statutory Trust 2 in which the Company owns all of the common equity. The debentures are the sole asset of the Trust. The Trust issued \$4,000,000 of Trust Preferred Securities (TPSs) to investors. The Company's obligations under the debentures and related documents, taken together, constitute a full and unconditional guarantee by the Company of the Trust's obligations under the preferred securities. The preferred securities are redeemable by the Company in 2011, or earlier in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier 1 capital is no longer permitted, or certain other contingencies arise. The preferred securities must be redeemed upon maturity of the debentures in 2036. Interest on the preferred securities is the three month London Interbank Offer Rate (LIBOR) plus 1.65% and is payable quarterly. The terms of the subordinated debentures are identical to those of the preferred securities. On July 27, 2007, the Company issued \$6,186,000 of floating rate junior subordinated deferrable interest debentures to The First Bancshares Statutory Trust 3 in which the Company owns all of the common equity. The debentures are the sole asset of Trust 3. The Trust issued \$6,000,000 of Trust Preferred Securities (TPSs) to investors. The Company's obligations under the debentures and related documents, taken together, constitute a full and unconditional guarantee by the Company of the Trust's obligations under the preferred securities. The preferred securities are redeemable by the Company in 2012, or earlier in the event the deduction of related interest for federal income taxes is prohibited, treatment as Tier 1 capital is no longer permitted, or certain other contingencies arise. The preferred securities must be redeemed upon maturity of the debentures in 2037. Interest on the preferred securities is the three month LIBOR plus 1.40% and is payable quarterly. The terms of the subordinated debentures are identical to those of the preferred securities. In accordance with the provisions of FASB Interpretation No. 46R (FIN 46R), Consolidation of Variable Interest Entities, An Interpretation of ARB No. 51, the trusts are not included in the consolidated financial statements.

RESULTS OF OPERATIONS

The Company had a net income of \$181,000 for the three months ended June 30, 2009, compared with consolidated net income of \$339,000 for the same period last year.

Net interest income after provision for loan losses decreased to \$3,510,000 from \$3,718,000 for the three months ended June 30, 2009, or a decrease of 5.6% as compared to the same period in 2008. Earning assets through June 30, 2009, decreased \$20.5 million and interest-bearing liabilities also decreased \$24.6 million when compared to June 30, 2008, reflecting a decrease of 4.3% and 6.2%, respectively.

Noninterest income for the three months ended June 30, 2009, was \$675,000 compared to \$915,000 for the same period in 2008, reflecting a decrease of \$240,000 or 26.2%. Included in noninterest income are service charges on deposit accounts, which for the three months ended June 30, 2009, totaled \$485,000 compared to \$570,000 for the same period in 2008. A one time gain on the sale of bank property of \$92,000 was recognized during the second quarter of 2008.

The provision for loan losses was \$464,000 in the three months ended June 30, 2009, compared with \$634,000 for the same period in 2008. The allowance for loan losses of \$5.3 million at June 30, 2009 (approximately 1.66% of loans) is considered by management to be adequate to cover losses inherent in the loan portfolio. The level of this allowance is dependent upon a number of factors, including the total amount of past due loans, general economic conditions, and management's assessment of potential losses. This evaluation is inherently subjective as it requires estimates that are susceptible to significant change. Ultimately, losses may vary from current estimates and future additions to the allowance may be necessary. Thus, there can be no assurance that charge-offs in future periods will not exceed the allowance for loan losses or that additional increases in the loan loss allowance will not be required. Management evaluates the adequacy of the allowance for loan losses quarterly and makes provisions for loan losses based on this evaluation.

Noninterest expenses decreased by \$215,000 or 5.2% for the three months ended June 30, 2009, when compared with the same period in 2008. We achieved this overall decrease even with the FDIC special assessment of \$215,000 that was accrued during the first quarter.

ITEM NO. 3.

CONTROLS AND PROCEDURES

As of June 30, 2009, (the "Evaluation Date"), we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms.

There have been no changes, significant or otherwise, in our internal controls over financial reporting that occurred during the quarter ended June 30, 2009, that have materially affected, or are reasonably likely to affect, our internal control over financial reporting.

ITEM NO. 4.

RECENT ACCOUNTING PRONOUNCEMENTS

In February 2007, the Financial Accounting Standards Board ("FASB") issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115 ("SFAS No. 159") which permits an entity to choose to measure many financial instruments and certain other items at fair value. Most of the provisions in SFAS No. 159 are elective; however, the amendment to FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, applies to all entities with available-for-sale and trading securities. The FASB's stated objective in issuing this standard is as follows: "to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions."

The fair value option established by SFAS No. 159 permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity will report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option: (a) may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; (b) is irrevocable (unless a new election date occurs); and (c) is applied only to entire instruments and not to portions of instruments. We have not adopted the provisions of SFAS No. 159 with regard to any assets or liabilities as of June 30, 2009.

In December 2007, FASB issued Statement No. 141R, Business Combinations (“SFAS No. 141R”). Under SFAS No. 141, organizations utilized the announcement date as the measurement date for the purchase price of the acquired entity. SFAS No. 141R requires measurement at the date the acquirer obtains control of the acquiree, generally referred to as the acquisition date. SFAS No. 141R will have a significant impact on the accounting for transaction and restructuring costs, as well as the initial recognition of contingent assets and liabilities assumed during a business combination. Under SFAS No. 141R, adjustments to the acquired entity’s deferred tax assets and uncertain tax position balances occurring outside the measurement period are recorded as a component of the income tax expense, rather than goodwill. SFAS No. 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. As the provisions of SFAS No. 141R are applied prospectively, the impact to the Company cannot be determined until a transaction occurs.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (“SFAS No. 160”), which will require noncontrolling interests (previously referred to as minority interests) to be treated as a separate component of equity, not as a liability or other item outside of permanent equity. SFAS No. 160 applies to the accounting for noncontrolling interests and transactions with noncontrolling interest holders in consolidated financial statements. SFAS No. 160 is effective for periods beginning on or after December 15, 2008. Earlier application is prohibited. SFAS No. 160 will be applied prospectively to all noncontrolling interests, including any that arose before the effective date except that comparative period information must be recast to classify noncontrolling interests in equity, attribute net earnings and other comprehensive income to noncontrolling interests, and provide other disclosures required by SFAS No. 160. The Company does not expect the adoption of SFAS No. 160 to have any impact on its financial position, results of operation, and cash flows.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133 (“SFAS No. 161”). SFAS No. 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of derivative instruments and related gains and losses, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The statement provides only for enhanced disclosures. The Company does not participate in derivative instruments or hedging activities. Therefore, adoption will have no impact on our financial position, results of operations, and cash flows.

In February 2008, the FASB issued FSP 157-2, Effective Date of FASB Statement No. 157, which deferred the effective date for one year for certain nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) and was effective January 1, 2009. The adoption of FSP 157-2 during the first quarter of 2009 did not have a material impact on the Company’s financial condition or results of operations.

In April 2008, the FASB issued FSP 142-3, Determination of the Useful Life of Intangible Assets, which amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets (“SFAS No. 142”). The intent of the FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141R and other U.S. generally accepted accounting principles. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008. The adoption of FSP 142-3, during the first quarter of 2009, did not have a material impact on the Company’s financial condition or results of operations.

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Principles, (“SFAS No. 162”) which is intended to improve financial reporting by identifying a consistent framework, or hierarchy, for selecting accounting principles to be used in preparing financial statements that are presented in conformity with U.S. generally accepted accounting principles for nongovernmental entities. SFAS No. 162 will be effective for fiscal periods after July 1, 2009. The Company will adopt the provisions of SFAS No. 162, when required, but does not expect the impact to be material to the Company’s financial condition or results of operations.

In October 2008, the FASB issued FSP No. 157-3, Determining the Fair Value of a Financial Asset in a Market That is Not Active, which clarifies the application of SFAS No. 157, Fair Value Measurements, in an inactive market. Application issues clarified include: how management’s internal assumptions should be considered when measuring fair value when relevant observable data do not exist; how observable market information in a market that is not active should be considered when measuring fair value; and how the use of market quotes should be considered when assessing the relevance of observable and unobservable data available to measure fair value. FSP 157-3 was effective immediately and did not have a material impact on the Company’s financial condition or results of operations.

In December 2008, the FASB issued FSP No. 132(R)-1, Employers’ Disclosures about Postretirement Benefit Plan Assets, which provides guidance on an employer’s disclosures about plan assets of a defined benefit pension or other postretirement plan. The objectives of the disclosures are to provide users of financial statements with an understanding of how investment allocation decisions are made; the major categories of plan assets; the inputs and valuation techniques used to measure fair value of plan assets; the effect of fair value measurements using significant unobservable inputs (Level 3) on changes in plan assets for the period; and significant concentrations on risk within plan assets. FAS No. 132(R)-1 is effective for fiscal years ending after December 15, 2009. The Company is assessing the impact of adopting FSP No. 132(R)-1.

In January 2009, FASB issued Emerging Issues Task Force (“EITF”) 99-20-1, Amendments to the Impairment Guidance of EITF Issue No. 99-20. EITF No. 99-20-1 replaces the requirement to use market participant assumptions when determining future cash flows and, instead, requires an assessment of whether it is probable that there has been an adverse change in estimated cash flows. It requires an entity to consider all available information relevant to the collectability of the security, including information about past events, current conditions, and reasonable and supportable forecasts when developing estimates of future cash flows. EITF 99-20-1 is effective for interim and annual reporting periods ending after December 15, 2008, and shall be applied prospectively. The adoption of EITF 99-20-1 did not have a material impact on the Company’s financial condition or results of operations.

In February 2009, the FASB issued FSP 141(R)-a, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination that Arise from Contingencies that amends provisions related to the initial recognition and measurement, subsequent measurement and disclosure of assets and liabilities arising from contingencies in a business combination. The FSP is effective for all business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The impact on the Company’s financial condition or results of operations is dependent on the extent of future business combinations.

In April 2009, the Financial Accounting Standards Board (FASB) issued three amendments in the form of FASB Staff Positions (“FSP”) to the fair value measurement, disclosure and other-than-temporary impairment standards:

FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions that are Not Orderly, provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be

necessary to estimate fair value in accordance with FAS 157.

FSP FAS 157-4 clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of evidence to determine whether the transaction is orderly. It also provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairment, clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time sufficient to allow for anticipated recovery in fair value to avoid recognizing an other-than-temporary impairment. This change does not affect the need to forecast recovery of the value of the security through either cash flows or market price.

In instances when a determination is made that an other-than-temporary impairment exists but the investor does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, FSP FAS 115-2 and FAS 124-2 change the presentation and amount of the other-than-temporary impairment recognized in the income statement. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income.

FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments amends FASB Statement No. 107 ("FAS 107"), Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. FAS 107-1 also amends APB Opinion No. 28, Interim Financial Reporting, to require those disclosures in summarized financial information at interim reporting periods.

All three FASB Staff Positions discussed herein include substantial additional disclosure requirements. The effective date for these new standards is the same: interim and annual reporting periods ending after June 15, 2009. The Company adopted these standards at June 30, 2009 and there was not a material impact on its consolidated financial statements.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On October 8, 2007 The First Bancshares, Inc. (the "Company") and its subsidiary, The First, A National Banking Association (the "Bank") were formally named as defendants and served with a First Amended Complaint in litigation styled Nick D. Welch v. Oak Grove Land Company, Inc., Fred McMurry, David E. Johnson, J. Douglas Seidenburg, The First, a National Banking Association, The First Bancshares, Inc., and John Does 1 through 10, Civil Action No. 2006-236-CV4, pending in the Circuit Court of Jones County, Mississippi, Second Judicial District (the "First Amended Complaint").

The allegations by Welch against the Company and the Bank include counts of 1) Intentional Misrepresentation and Omission; 2) Negligent Misrepresentation and/or Omission; 3) Breach of Fiduciary Duty; 4) Breach of Duty of Good Faith and Fair Dealing; and 5) Civil Conspiracy. The First Amended Complaint served by Welch on October 8, 2007 added the Company and the Bank as defendants in this ongoing litigation. The First Amended Complaint seeks damages from all the defendants, including \$2,420,775.00, annual dividends for the year 2006 in the amount of \$.30 per share, punitive damages, and attorneys' fees and costs, and is more fully described in Form 8-K filed by the Company on October 10, 2007. Each of the Company and the Bank deny any liability to Welch, and they intend to defend vigorously against this lawsuit.

The Defendants removed the case to the United States District Court for the Southern District of Mississippi, Hattiesburg Division, on March 12, 2008 based upon the Court's federal question jurisdiction. On April 11, 2008, the Plaintiff filed a Motion to Remand the case to the Circuit Court of Jones County, Mississippi. The Motion to Remand was granted, and the case is currently pending in the Circuit Court of Jones County, Mississippi, Second Judicial District. The case is set for trial on Monday, November 30, 2009 in the Circuit Court of Jones County, Mississippi.

ITEM 1A. RISK FACTORS

There are no material changes in the Company's risk factors since December 31, 2008. Please refer to the Annual Report on Form 10-K of The First Bancshares, Inc., filed with the Securities and Exchange Commission on March 31, 2009.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITY AND USE OF PROCEEDS

Not Applicable

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

At the Company's annual meeting of stockholders held May 21, 2009, the following proposals were approved:

Proposal No. 1:

The following individuals were elected to serve as Class II directors of the Company for terms that expire at the annual meeting of stockholders to be held in 2012:

David E. Johnson
Michael W. Chancellor
Andrew D. Stetelman
Ralph T. Simmons
Charles R. Lightsey

Set forth below is the number of votes cast for, against, or withheld, with respect to each nominee for office:

	For	Against	Withheld
David E. Johnson	1,985,459		6,286
Michael W. Chancellor	1,984,859		6,886
Andrew D. Stetelman	1,985,859		5,886
Ralph T. Simmons	1,930,725		61,020
Charles R. Lightsey	1,985,859		5,886
