TABLE OF CONTENTS

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Principles of Consolidation

The accompanying consolidated financial statements include the accounts of AmeriServ Financial, Inc. (the Company) and its wholly-owned subsidiaries, AmeriServ Financial Bank (the Bank), AmeriServ Trust and Financial Services Company (the Trust Company), and AmeriServ Life Insurance Company (AmeriServ Life). The Bank is a Pennsylvania state-chartered full service bank with 16 locations in Pennsylvania. The Trust Company offers a complete range of trust and financial services and administers assets valued at \$2.0 billion that are not reported on the Company's balance sheet at June 30, 2016. AmeriServ Life is a captive insurance company that engages in underwriting as a reinsurer of credit life and disability insurance.

In addition, the Parent Company is an administrative group that provides support in such areas as audit, finance, investments, loan review, general services, and marketing. Significant intercompany accounts and transactions have been eliminated in preparing the consolidated financial statements.

2. Basis of Preparation

The unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. In the opinion of management, all adjustments consisting of normal recurring entries considered necessary for a fair presentation have been included. They are not, however, necessarily indicative of the results of consolidated operations for a full-year.

For further information, refer to the consolidated financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

3. Recent Accounting Pronouncements

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. This Update applies to all entities that hold financial assets or owe financial liabilities and is intended to provide more useful information on the recognition, measurement, presentation, and disclosure of financial instruments. For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. All entities that are not public business entities may adopt the amendments in this Update earlier as of the fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently evaluating the impact the adoption of the standard will have on the Company's results of operations.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments-Credit Losses: Measurement of Credit Losses on Financial Instruments* (ASU 2016-13), which changes the impairment model for most financial assets. This ASU is intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The underlying premise of the ASU is that financial assets measured at amortized cost should be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The allowance for credit losses should

reflect management's current estimate of credit losses that are expected to occur over the remaining life of a financial asset. The income statement will be effected for the measurement of credit losses for newly recognized financial assets, as well as the expected increases or decreases of expected credit losses that have taken place during the period.

ASU 2016-13 is effective for annual and interim periods beginning after December 15, 2019, and early adoption is permitted for annual and interim periods beginning after December 15, 2018. With certain exceptions, transition to the new requirements will be through a cumulative effect adjustment to opening retained earnings as of the beginning of the first reporting period in which the guidance is adopted. In June 2016, the four federal financial institution regulatory agencies issued a joint statement regarding ASU 2016-13 providing their initial supervisory views regarding the standard's implementation, including as it relates to measurement methods, use of vendors, portfolio segmentation, data collection, processes and controls over allowance methodology, and potential impact on capital. The Company is currently evaluating the impact the adoption of the standard will have on the Company's results of operations.

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****4. Earnings Per Common Share**

Basic earnings per share include only the weighted average common shares outstanding. Diluted earnings per share include the weighted average common shares outstanding and any potentially dilutive common stock equivalent shares in the calculation. Treasury shares are excluded for earnings per share purposes. Options to purchase 140,527 common shares, at exercise prices ranging from \$3.18 to \$4.60, were outstanding as of June 30, 2016, but were not included in the computation of diluted earnings per common share because to do so would be antidilutive. Options to purchase 179,304 common shares, at exercise prices ranging from \$3.18 to \$4.70, were outstanding as of June 30, 2015, but were not included in the computation of diluted earnings per common share because to do so would be antidilutive. Dividends on preferred shares are deducted from net income in the calculation of earnings per common share.

5. Consolidated Statement of Cash Flows

On a consolidated basis, cash and cash equivalents include cash and due from depository institutions, interest-bearing deposits and short-term investments in money market funds. The Company made \$445,000 in income tax payments in the first six months of 2016 and \$878,000 in the same 2015 period. The Company made total interest payments of \$3,947,000 in the first six months of 2016 compared to \$3,453,000 in the same 2015 period. The Company had \$40,000 non-cash transfers to other real estate owned (OREO) in the first six months of 2016 compared to \$132,000 non-cash transfers in the same 2015 period.

6. Investment Securities

The cost basis and fair values of investment securities are summarized as follows (in thousands):

Investment securities available for sale (AFS):

	June 30, 2016

Maintaining investment quality is a primary objective of the Company's investment policy which, subject to certain limited exceptions, prohibits the purchase of any investment security below a Moody's Investor's Service or Standard & Poor's rating of A. At June 30, 2016, 79.3% of the portfolio was rated AAA as compared to 79.1% at December 31, 2015. Approximately 8.1% of the portfolio was either rated below A or unrated at June 30, 2016 as compared to 5.7% at December 31, 2015.

The Company sold \$3.2 million AFS securities in the second quarter of 2016 resulting in \$60,000 of gross investment security gains and sold \$7.4 million AFS securities in the first half of 2016 resulting in \$123,000 of gross investment security gains and \$6,000 of gross investment security losses. The Company sold a \$519,000 AFS security for both the second quarter and first six months of 2015 resulting in a \$28,000 gross investment security gain.

The book value of securities, both available for sale and held to maturity, pledged to secure public and trust deposits, and certain Federal Home Loan Bank borrowings was \$100,488,000 at June 30, 2016 and \$87,096,000 at December 31, 2015.

US Agency mortgage-backed securities	33,359	(245)	9,088	(250)	42,447	(495)
Taxable municipal	3,617	(65)			3,617	(65)
Corporate bonds and other securities	8,884	(160)	7,766	(232)	16,650	(392)
Total	\$47,346	\$ (484)	\$17,249	\$ (487)	\$64,595	\$ (971)

The unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase.

There are 18 positions that are considered temporarily impaired at June 30, 2016. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, management does not intend to sell these securities and does not believe it will be required to sell these securities before they recover in value.

Contractual maturities of securities at June 30, 2016 are shown below (in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without prepayment penalties. The duration of the total investment securities portfolio at June 30, 2016 is 27.0 months and is lower than the duration at December 31, 2015 which was 34.2 months. The duration remains within our internal

established guideline range of 24 to 42 months which we believe is appropriate to maintain proper levels of liquidity, interest rate risk, market valuation sensitivity and profitability.

8

7. Loans

The loan portfolio of the Company consists of the following (in thousands):

	June 30, 2016	December 31, 2015
Commercial	\$ 185,540	\$ 181,066
Commercial loans secured by real estate	438,827	421,637
Real estate mortgage	248,709	257,937
Consumer	19,297	20,344
Loans, net of unearned income	\$ 892,373	\$ 880,984

Loan balances at June 30, 2016 and December 31, 2015 are net of unearned income of \$502,000 and \$557,000, respectively. Real estate-construction loans comprised 2.9% and 3.0% of total loans, net of unearned income at June 30, 2016 and December 31, 2015, respectively.

8. Allowance for Loan Losses

The substantially higher than typical provision in the first half of 2016 for the commercial portfolio was necessary to resolve the Company's only meaningful direct loan exposure to the energy industry. These loans are related to a single borrower in the fracking industry who had filed for bankruptcy protection in the fourth quarter of 2015. With the bankruptcy changing from Chapter 11 (reorganization) to Chapter 7 (liquidation) late in the first quarter of 2016, the Company concluded that its previously established reserves on these non-accrual loans were not sufficient to cover the discounted collateral values that will result from the liquidation process. As a result of this action, the Company also experienced heightened net loan charge-offs.

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****8. Allowance for Loan Losses (continued)**

The segments of the Company's loan portfolio are disaggregated to a level that allows management to monitor risk and performance. The loan segments used are consistent with the internal reports evaluated by the Company's management and Board of Directors to monitor risk and performance within various segments of its loan portfolio and therefore, no

further disaggregation into classes is necessary. The overall risk profile for the commercial loan segment is impacted by non-owner occupied CRE loans, which include loans secured by non-owner occupied nonfarm nonresidential properties, as a meaningful but declining portion of the commercial portfolio is centered in these types of accounts.

The residential mortgage loan segment is comprised of first lien amortizing residential mortgage loans and home equity loans secured by residential real estate. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

Management evaluates for possible impairment any individual loan in the commercial or commercial real estate segment with a loan balance in excess of \$100,000 that is in nonaccrual status or classified as a Troubled Debt Restructure (TDR). Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due.

Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and

TABLE OF CONTENTS

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

8. Allowance for Loan Losses (continued)

interest owed. The Company does not separately evaluate individual consumer and residential mortgage loans for impairment, unless such loans are part of a larger relationship that is impaired, or are classified as a TDR.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of three methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral less selling costs for collateral dependent loans. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The need for an updated appraisal on collateral dependent loans is determined on a case-by-case basis. The useful life of an appraisal or evaluation will vary depending upon the circumstances of the property and the economic conditions in the marketplace. A new appraisal is not required if there is an existing appraisal which, along with other information, is sufficient to determine a reasonable value for the property and to support an appropriate and adequate allowance for loan losses. At a minimum, annual documented reevaluation of the property is completed by the Bank's internal Assigned Risk Department to support the value of the property.

When reviewing an appraisal associated with an existing collateral real estate dependent transaction, the Bank's internal Assigned Risk Department must determine if there have been material changes to the underlying assumptions in the appraisal which affect the original estimate of value. Some of the factors that could cause material changes to reported values include:

- the passage of time;
- the volatility of the local market;
- the availability of financing;
- natural disasters;
- the inventory of competing properties;

new improvements to, or lack of maintenance of, the subject property or competing properties upon physical inspection by the Bank;

changes in underlying economic and market assumptions, such as material changes in current and projected vacancy, absorption rates, capitalization rates, lease terms, rental rates, sales prices, concessions, construction overruns and delays, zoning changes, etc.; and/or

environmental contamination.

The value of the property is adjusted to appropriately reflect the above listed factors and the value is discounted to reflect the value impact of a forced or distressed sale, any outstanding senior liens, any outstanding unpaid real estate taxes, transfer taxes and closing costs that would occur with sale of the real estate. If the Assigned Risk Department personnel determine that a reasonable value cannot be derived based on available information, a new appraisal is ordered. The determination of the need for a new appraisal, versus completion of a property valuation by the Bank's Assigned Risk Department personnel rests with the Assigned Risk Department and not the originating account officer.

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****8. Allowance for Loan Losses (continued)**

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary (in thousands).

	June 30, 2016

Commercial loans secured by real estate	3	5	8	11
Interest income recognized on a cash basis on impaired loans	\$ 7	\$ 15	\$ 16	\$ 22

Management uses a nine point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized. The first five Pass categories are aggregated, while the Pass-6, Special Mention, Substandard and Doubtful categories are disaggregated to separate pools. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due, or for which any portion of the loan represents a specific allocation of the allowance for loan losses are placed in Substandard or Doubtful.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan rating process, which dictates that, at a minimum, credit reviews are mandatory for all commercial and commercial mortgage loan relationships with aggregate balances in excess of \$250,000 within a 12-month period. Generally, consumer and residential mortgage loans

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****8. Allowance for Loan Losses (continued)**

are included in the Pass categories unless a specific action, such as bankruptcy, delinquency, or death occurs to raise awareness of a possible credit event. The Company's commercial relationship managers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. Risk ratings are assigned by the account officer, but require independent review and rating concurrence from the Company's internal Loan Review Department. The Loan Review Department is an experienced independent function which reports directly to the Board's Audit Committee. The scope of commercial portfolio coverage by the Loan Review Department is defined and presented to the Audit Committee for approval on an annual basis. The approved scope of coverage for 2016 requires review of a minimum range of 50% to 55% of the commercial loan portfolio.

In addition to loan monitoring by the account officer and Loan Review Department, the Company also requires presentation of all credits rated Pass-6 with aggregate balances greater than \$1,000,000, all credits rated Special Mention or Substandard with aggregate balances greater than \$250,000, and all credits rated Doubtful with aggregate balances greater than \$100,000 on an individual basis to the Company's Loan Loss Reserve Committee on a quarterly basis. Additionally, the Asset Quality Task Force, which is a group comprised of senior level personnel, meets monthly to monitor the status of problem loans.

The following table presents the classes of the commercial and commercial real estate loan portfolios summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk rating system (in thousands).

	June 30, 2016				
	Pass	Special Mention	Substandard	Doubtful	Total
Commercial	\$ 182,450	\$ 190	\$ 2,196	\$ 704	\$ 185,540

Commercial	\$ 174,616	\$ 1,811	\$ 3,318	\$ 1,321	\$ 181,066
Commercial loans secured by real estate	416,331	3,100	2,188	18	421,637
Total	\$ 590,947	\$ 4,911	\$ 5,506	\$ 1,339	\$ 602,703

It is generally the policy of the Bank that the outstanding balance of any residential mortgage loan that exceeds 90-days past due as to principal and/or interest is transferred to non-accrual status and an evaluation is completed to determine the fair value of the collateral less selling costs, unless the balance is minor. A charge down is recorded for any deficiency balance determined from the collateral evaluation. The remaining non-accrual balance is reported as impaired with no specific allowance. It is the policy of the bank that the outstanding balance of any consumer loan that exceeds 90-days past due as to principal and/or interest is charged off. The following tables present the

performing and non-performing outstanding balances of the residential and consumer portfolios (in thousands).

		June 30, 2016	
		Performing	Non-Performing
Real estate	mortgage	\$ 247,832	\$ 877
Consumer		19,297

Total	\$871,866	\$3,422	\$5,147	\$ 549	\$9,118	\$880,984	\$		

An allowance for loan losses (ALL) is maintained to absorb losses from the loan portfolio. The ALL is based on management's continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of non-performing loans.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate.

For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are complemented by consideration of other qualitative factors.

Management tracks the historical net charge-off activity at each risk rating grade level for the entire commercial portfolio and at the aggregate level for the consumer, residential mortgage and small business portfolios. A historical charge-off factor is calculated utilizing a rolling 12 consecutive historical quarters for the commercial portfolios. This historical charge-off factor for the consumer, residential mortgage and small business portfolios are based on a three year historical average of actual loss experience.

The Company uses a comprehensive methodology and procedural discipline to maintain an ALL to absorb inherent losses in the loan portfolio. The Company believes this is a critical accounting policy since it involves significant estimates and judgments. The allowance consists of three elements: 1) an allowance established on specifically identified problem loans, 2) formula driven general reserves established for loan categories based upon historical loss experience and other qualitative factors which include delinquency, non-performing and TDR loans, loan trends, economic trends, concentrations of credit, trends in loan volume,

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****8. Allowance for Loan Losses (continued)**

experience and depth of management, examination and audit results, effects of any changes in lending policies, and trends in policy, financial information, and documentation exceptions, and 3) a general risk reserve which provides support for variance from our assessment of the previously listed qualitative factors, provides protection against credit risks resulting from other inherent risk factors contained in the Company's loan portfolio, and recognizes the model and estimation risk associated with the specific and formula driven allowances. The qualitative factors used in the formula driven general reserves are evaluated quarterly (and revised if necessary) by the Company's management to establish allocations which accommodate each of the listed risk factors.

Pass rated credits are segregated from Criticized and Classified credits for the application of qualitative factors.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

9. Non-performing Assets Including Troubled Debt Restructurings (TDR)

The following table presents information concerning non-performing assets including TDR (in thousands, except percentages):

	June 30, 2016	December 31, 2015
<u>Non-accrual loans</u>		
Commercial	\$ 986	\$ 4,260
Commercial loans secured by real estate	299	18
Real estate mortgage	877	1,788
Total	2,162	6,066
<u>Other real estate owned</u>		
Real estate-mortgage	68	75
Total	68	75
TDR's not in non-accrual		156
Total non-performing assets including TDR	\$ 2,230	\$ 6,297
Total non-performing assets as a percent of loans, net of unearned income, and other real estate owned	0.25 %	0.71 %

The Company had no loans past due 90 days or more for the periods presented which were accruing interest.

The following table sets forth, for the periods indicated, (1) the gross interest income that would have been recorded if

non-accrual loans had been current in accordance with their original terms and had been outstanding throughout the period or since origination if held for part of the period, (2) the amount of interest income actually recorded on such loans, and (3) the net reduction in interest income attributable to such loans (in thousands).

	Three months ended		Six months ended	
	June 30,		June 30,	
	2016	2015	2016	2015
Interest income due in accordance with original terms	\$ 20	\$ 24	\$ 79	\$ 48
Interest income recorded				
Net reduction in interest income	\$ 20	\$ 24	\$ 79	\$ 48

Consistent with accounting and regulatory guidance, the Bank recognizes a TDR when the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower

TABLE OF CONTENTS

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

9. Non-performing Assets Including Troubled Debt Restructurings (TDR) (continued)

that would not normally be considered. Regardless of the form of concession granted, the Bank's objective in offering a TDR is to increase the probability of repayment of the borrower's loan.

To be considered a TDR, both of the following criteria must be met:

the borrower must be experiencing financial difficulties; and the Bank, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that would not otherwise be considered.

Factors that indicate a borrower is experiencing financial difficulties include, but are not limited to:

the borrower is currently in default on their loan(s);
the borrower has filed for bankruptcy;
the borrower has insufficient cash flows to service their loan(s); and
the borrower is unable to obtain refinancing from other sources at a market rate similar to rates available to a non-troubled debtor.

Factors that indicate that a concession has been granted include, but are not limited to:

the borrower is granted an interest rate reduction to a level below market rates for debt with similar risk; or the borrower is granted a material maturity date extension, or extension of the amortization plan to provide payment relief. For purposes of this policy, a material maturity date extension will generally include any maturity date extension, or the aggregate of multiple consecutive maturity date extensions, that exceed 120 days. A restructuring that results in an insignificant delay in payment, i.e. 120 days or less, is not necessarily a TDR. Insignificant payment delays occur when the amount of the restructured payments subject to the delay is insignificant relative to the unpaid principal or collateral value, and will result in an insignificant shortfall in the originally scheduled contractual amount due, and/or the delay in timing of the restructured payment period is insignificant relative to the frequency of payments, the original maturity or the original amortization.

The determination of whether a restructured loan is a TDR requires consideration of all of the facts and circumstances surrounding the modification. No single factor is determinative of whether a restructuring is a TDR. An overall general decline in the economy or some deterioration in a borrower's financial condition does not automatically mean that the borrower is experiencing financial difficulty. Accordingly, determination of whether a modification is a TDR involves a large degree of judgment.

The following table details the loans modified as TDRs during the three month period ended June 30, 2016 (dollars in thousands).

Loans in non-accrual status	# of Loans	Current Balance	Concession Granted
Commercial loan	2	\$ 523	Extension of maturity date

The following table details the loans modified as TDRs during the three month period ended June 30, 2015 (dollars in thousands).

Loans in accrual status	# of Loans	Current Balance	Concession Granted
Commercial loan	1	\$ 204	Extension of maturity date

In all instances where loans have been modified in troubled debt restructurings the pre- and post-modified balances are the same. The specific ALL reserve for loans modified as TDR s was \$523,000 and \$542,000 as of June 30, 2016 and 2015, respectively. All TDR s are individually evaluated for impairment and a related allowance is recorded, as needed.

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****9. Non-performing Assets Including Troubled Debt Restructurings (TDR) (continued)**

Once a loan is classified as a TDR, this classification will remain until documented improvement in the financial position of the borrower supports confidence that all principal and interest will be paid according to terms. Additionally, the customer must have re-established a track record of timely payments according to the restructured contract terms for a minimum of six consecutive months prior to consideration for removing the loan from non-accrual TDR status. However, a loan will continue to be on non-accrual status until, consistent with our policy, the borrower has made a minimum of an additional six consecutive monthly payments in accordance with the terms of the loan.

The Company had no loans that were classified as TDR s or were subsequently modified during each 12-month period prior to the current reporting periods, which begin January 1, 2016 and 2015 (six month periods) and April 1, 2016 and 2015 (three month periods), respectively, and that subsequently defaulted during these reporting periods.

The Company is unaware of any additional loans which are required to either be charged-off or added to the non-performing asset totals disclosed above.

Foreclosed assets acquired in settlement of loans carried at fair value less estimated costs to sell are included in the other assets on the Consolidated Balance Sheet. As of June 30, 2016 and December 31, 2015, a total of \$68,000 and \$75,000, respectively of residential real estate foreclosed assets were included in other assets. As of June 30, 2016, the Company had initiated formal foreclosure procedures on \$244,000 of consumer residential mortgages.

10. Federal Home Loan Bank Borrowings

Total Federal Home Loan Bank (FHLB) borrowings and advances consist of the following (in thousands, except percentages):

Type	At June 30, 2016		Weighted Average Rate	
	Maturing	Amount		
Open Repo Plus Advances	Overnight	\$ 22,575	0.56	%
	2016	11,000	0.83	
	2017	12,000	1.06	
	2018	12,000	1.48	
	2019	8,000	1.67	
	2020 and over	7,042	1.62	
Total advances		50,042	1.29	
Total FHLB borrowings		\$ 72,617	1.06	%

Type	At December 31, 2015		Weighted Average Rate	
	Maturing	Amount		
Open Repo Plus Advances	Overnight	\$ 48,748	0.43	%
	2016	12,000	0.81	
	2017	12,000	1.06	
	2018	12,000	1.48	
	2019	7,000	1.73	
	2020 and over	5,000	1.69	
Total advances		48,000	1.27	
Total FHLB borrowings		\$ 96,748	0.85	%

18

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****10. Federal Home Loan Bank Borrowings (continued)**

The rate on Open Repo Plus advances can change daily, while the rates on the advances are fixed until the maturity of the advance. All FHLB stock along with an interest in certain residential mortgage and CRE loans with an aggregate statutory value equal to the amount of the advances are pledged as collateral to the FHLB of Pittsburgh to support these borrowings.

11. Preferred Stock

On August 11, 2011, pursuant to the Small Business Lending Fund (SBLF), the Company issued and sold to the US Treasury 21,000 shares of its Senior Non-Cumulative Perpetual Preferred Stock, Series E (Series E Preferred Stock) for the aggregate proceeds of \$21 million. The SBLF was a voluntary program sponsored by the US Treasury that encouraged small business lending by providing capital to qualified community banks at favorable rates. The Company used the proceeds from the Series E Preferred Stock issued to the US Treasury to repurchase all 21,000 shares of its outstanding preferred shares previously issued to the US Treasury under the Capital Purchase Program.

On January 27, 2016, we redeemed the Series E Preferred Stock, at a redemption price of 100% of the liquidation amount plus accrued but unpaid dividends, after receiving approval from our federal banking regulator and the US Treasury.

12. Accumulated Other Comprehensive Loss

The following table presents the changes in each component of accumulated other comprehensive loss, net of tax, for the three and six months ended June 30, 2016 and 2015 (in thousands):

	Three months ended June 30, 2016			Three months ended June 30, 2015		
	Net Unrealized Gains and (Losses) on Investment Securities AFS ⁽¹⁾		Total ⁽¹⁾	Net Unrealized Gains and (Losses) on Investment Securities AFS ⁽¹⁾		Total ⁽¹⁾

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****13. Regulatory Capital**

The Company is subject to various capital requirements administered by the federal banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital to risk-weighted assets, Tier 1 capital to average assets, and common equity Tier I capital (as defined in the regulations) to risk-weighted assets (RWA) (as defined). Additionally under Basel III rules, the decision was made to opt-out of including accumulated other comprehensive income in regulatory capital. As of June 30, 2016, the Bank was categorized as Well Capitalized under the regulatory framework for prompt corrective action promulgated by the Federal Reserve. The Company believes that no conditions or events have occurred that would change this conclusion as of such date. To be categorized as Well Capitalized, the Bank must maintain minimum Total Capital, Common Equity Tier 1 Capital, Tier 1 Capital, and Tier 1 leverage ratios as set forth in the table. Additionally, while not a regulatory capital ratio, the Company's tangible common equity ratio was 7.72% at June 30, 2016 (in thousands, except ratios).

At June 30, 2016

	Company		Bank		Minimum Required For Capital Adequacy Purposes Ratio	To be Well Capitalized Under Prompt Corrective Action Regulations* Ratio
	Amount (In Thousands, Except Ratios)	Ratio	Amount	Ratio

Tier 1 Capital (To Average Assets)	125,648	11.41	96,092	8.97	4.00	5.00

*

Applies to the Bank only.

On July 2, 2013, the Board of Governors of the Federal Reserve System approved final rules that substantially amend the regulatory risk-based capital rules applicable to the Company and the Bank. The final rules implement the Basel III regulatory capital reforms, as well as certain changes required by the Dodd-Frank Act, which will require institutions to, among other things, have more capital and a higher quality of capital by increasing the minimum regulatory capital ratios, and requiring capital buffers. The new rules became effective for the Company and the Bank on January 1, 2015, and have an implementation period that stretches to January 1, 2019. For a more detailed discussion see the Capital Resources section of the MD&A.

14. Segment Results

The financial performance of the Company is also monitored by an internal funds transfer pricing profitability measurement system which produces line of business results and key performance measures. The Company's major business units include retail banking, commercial banking, trust, and investment/parent. The reported results reflect the underlying economics of the business segments. Expenses for centrally provided services are allocated based upon the cost and estimated usage of those services. The businesses are match-funded and interest rate risk is centrally managed and accounted for within the investment/parent business segment. The key performance measure the Company focuses on for each business segment is net income contribution.

Retail banking includes the deposit-gathering branch franchise and lending to both individuals and small businesses. Lending activities include residential mortgage loans, direct consumer loans, and small business commercial loans.

Commercial banking to businesses includes commercial loans, and CRE loans. The trust segment contains our wealth management businesses which include the Trust Company and West Chester Capital Advisors (WCCA), our registered investment advisory firm and financial services. Wealth management includes personal trust products and services such as personal portfolio investment management, estate planning and administration, custodial services and pre-need trusts. Also, institutional trust products and services such as 401(k) plans, defined benefit and defined contribution employee benefit plans, and individual retirement accounts are included in this segment. Financial services include the sale of mutual funds, annuities, and insurance products. The wealth management businesses also includes the union collective investment funds, namely the ERECT and BUILD funds which are designed to use union pension dollars in construction projects that utilize union labor. The investment/parent includes the net results of investment securities and borrowing activities, general corporate expenses not allocated to the business segments, interest

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****14. Segment Results (continued)**

expense on guaranteed junior subordinated deferrable interest debentures, and centralized interest rate risk management. Inter-segment revenues were not material.

The contribution of the major business segments to the Consolidated Statements of Operations for the three and six months ended June 30, 2016 and 2015 were as follows (in thousands):

	Three months ended June 30, 2016		Six months ended June 30, 2016		June 30, 2016
	Total revenue	Net income (loss)	Total revenue	Net income (loss)	Total assets
Retail banking	\$ 6,593	\$ 895	\$ 12,890	\$ 1,478	\$ 369,270
Commercial banking	4,731	1,367	9,366	532	624,507
Trust	2,202	400	4,379	545	5,427
Investment/Parent	(1,298)	(1,300)	(2,412)	(2,460)	143,288
Total	\$ 12,228	\$ 1,362	\$ 24,223	\$ 95	\$ 1,142,492

	Three months ended June 30, 2015		Six months ended June 30, 2015		December 31, 2015
	Total revenue	Net income (loss)	Total revenue	Net income (loss)	Total assets
Retail banking	\$ 6,539	\$ 743	\$ 13,063	\$ 1,402	\$ 415,008
Commercial banking	4,635	1,334	9,373	2,625	589,840
Trust	2,230	396	4,397	776	5,263
Investment/Parent	(912)	(1,052)	(1,695)	(2,013)	138,386
Total	\$ 12,492	\$ 1,421	\$ 25,138	\$ 2,790	\$ 1,148,497

15. Commitments and Contingent Liabilities

The Company had various outstanding commitments to extend credit approximating \$166.7 million and \$170.5 million along with standby letters of credit of \$9.0 million and \$7.5 million as of June 30, 2016 and December 31, 2015, respectively. The Company's exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Bank uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

Additionally, the Company is also subject to a number of asserted and unasserted potential claims encountered in the normal course of business. In the opinion of the Company, neither the resolution of these claims nor the funding of these credit commitments will have a material adverse effect on the Company's consolidated financial position, results of operation or cash flows.

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****16. Pension Benefits**

The Company has a noncontributory defined benefit pension plan covering certain employees who work at least 1,000 hours per year. The participants shall have a vested interest in their accrued benefit after five full years of service. The benefits of the plan are based upon the employee's years of service and average annual earnings for the highest five consecutive calendar years during the final ten year period of employment. Plan assets are primarily debt securities (including US Treasury and Agency securities, corporate notes and bonds), listed common stocks (including shares of AmeriServ Financial, Inc. common stock which is limited to 10% of the plan's assets), mutual funds, and short-term cash equivalent instruments. The net periodic pension cost for the three and six months ended June 30, 2016 and 2015 were as follows (in thousands):

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Components of net periodic benefit cost				
Service cost	\$ 368	\$ 400	\$ 736	\$ 800
Interest cost	344	325	688	650
Expected return on plan assets	(563)	(525)	(1,126)	(1,050)
Recognized net actuarial loss	314	300	628	600
Net periodic pension cost	\$ 463	\$ 500	\$ 926	\$ 1,000

The Company implemented a soft freeze of its defined benefit pension plan to provide that non-union employees hired on or after January 1, 2013 and union employees hired on or after January 1, 2014 are not eligible to participate in the pension plan. Instead, such employees are eligible to participate in a qualified 401(k) plan. This change was made to help reduce pension costs in future periods.

17. Disclosures about Fair Value Measurements

The following disclosures establish a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined within this hierarchy are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair-valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

Assets and Liability Measured on a Recurring Basis

Securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the US Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

The following tables present the assets reported on the Consolidated Balance Sheets at their fair value as of June 30, 2016 and December 31, 2015, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

24

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****17. Disclosures about Fair Value Measurements (continued)**

Assets and liability measured at fair value on a recurring basis are summarized below (in thousands):

	Fair Value Measurements at June 30, 2016 Using			
	Total	(Level 1)	(Level 2)	(Level 3)
US Agency securities	\$ 1,902	\$	\$ 1,902	\$
US Agency mortgage-backed securities	91,723		91,723	
Corporate bonds	26,700		26,700	

	Fair Value Measurements at December 31, 2015 Using			
	Total	(Level 1)	(Level 2)	(Level 3)
US Agency securities	\$ 2,881	\$	\$ 2,881	\$
US Agency mortgage-backed securities	98,334		98,334	
Corporate bonds	18,252		18,252	

Assets Measured on a Non-recurring Basis

Loans considered impaired are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. As detailed in the allowance for loan loss footnote, impaired loans are reported at fair value of the underlying collateral if the repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on observable market data which at times are discounted. At June 30, 2016, impaired loans with a carrying value of \$1,327,000 were reduced by a specific valuation allowance totaling \$737,000 resulting in a net fair value of \$590,000. At December 31, 2015, impaired loans with a carrying value of \$4.5 million were reduced by a specific valuation allowance totaling \$1.4 million resulting in a net fair value of \$3.1 million.

Other real estate owned is measured at fair value based on appraisals, less cost to sell at the date of foreclosure. Valuations are periodically performed by management. Income and expenses from operations and changes in valuation allowance are included in the net expenses from OREO.

Assets measured at fair value on a non-recurring basis are summarized below (in thousands, except range data):

	Fair Value Measurements at June 30, 2016 Using			
	Total	(Level 1)	(Level 2)	(Level 3)
Impaired loans	\$ 590	\$	\$	\$ 590
Other real estate owned	68			68

	Fair Value Measurements at December 31, 2015			
	Using			
	Total	(Level 1)	(Level 2)	(Level 3)
Impaired loans	\$ 3,115	\$	\$	\$ 3,115
Other real estate owned	75			75

Quantitative Information About Level 3 Fair Value Measurements				
June 30, 2016	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Wgtd Ave)
Impaired loans	\$590	Appraisal of collateral ^{(1),(3)}	Appraisal adjustments ⁽²⁾	15% to 20% (18%)
Other real estate owned	68	Appraisal of collateral ^{(1),(3)}	Appraisal adjustments ⁽²⁾ Liquidation expenses	0% to 26% (8%) 9% to 55% (16%)

25

TABLE OF CONTENTS**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****17. Disclosures about Fair Value Measurements (continued)**

December 31, 2015	Quantitative Information About Level 3 Fair Value Measurements			
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Wgtd Ave)
Impaired loans	\$3,115	Appraisal of collateral ^{(1),(3)}	Appraisal adjustments ⁽²⁾	15% to 20% (17%)
Other real estate owned	75	Appraisal of collateral ^{(1),(3)}	Appraisal adjustments ⁽²⁾ Liquidation expenses	23% to 49% (35%) 10% to 59% (25%)

(1) Fair Value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions.

(3) Includes qualitative adjustments by management and estimated liquidation expenses.

DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

For the Company, as for most financial institutions, approximately 90% of its assets and liabilities are considered financial instruments. Many of the Company's financial instruments, however, lack an available trading market characterized by a willing buyer and willing seller engaging in an exchange transaction. Therefore, significant estimates and present value calculations were used by the Company for the purpose of this disclosure.

Fair values have been determined by the Company using independent third party valuations that use the best available data (Level 2) and an estimation methodology (Level 3) the Company believes is suitable for each category of financial instruments. Management believes that cash, cash equivalents, and loans and deposits with floating interest rates have estimated fair values which approximate the recorded book balances. The estimation methodologies used, the estimated fair values based on US GAAP measurements, and recorded book balances at June 30, 2016 and December 31, 2015, were as follows (in thousands):

	June 30, 2016			
	Carrying Value	Fair Value (Level 1)	(Level 2)	(Level 3)

FINANCIAL LIABILITIES:					
Deposits with no stated maturities	\$633,751	\$633,751	\$633,751	\$	\$
Deposits with stated maturities	269,543	271,909			271,909
Short-term borrowings	48,748	48,748	48,748		
All other borrowings	68,310	71,816			71,816
Accrued interest payable	1,651	1,651	1,651		

The fair value of cash and cash equivalents, regulatory stock, accrued interest income receivable, short-term borrowings, and accrued interest payable are equal to the current carrying value.

The fair value of investment securities is equal to the available quoted market price for similar securities. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the US Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. The Level 3 securities are valued by discounted cash flows using the US Treasury rate for the remaining term of the securities.

Loans held for sale are priced individually at market rates on the day that the loan is locked for commitment with an investor. All loans in the held for sale account conform to Fannie Mae underwriting guidelines, with the specific intent of the loan being purchased by an investor at the predetermined rate structure. Loans in the held for sale account have specific delivery dates that must be executed to protect the pricing commitment (typically a 30, 45, or 60 day lock period).

The net loan portfolio has been valued using a present value discounted cash flow. The discount rate used in these calculations is based upon the treasury yield curve adjusted for non-interest operating costs, credit loss, current market prices and assumed prepayment risk.

The fair value of bank owned life insurance is based upon the cash surrender value of the underlying policies and matches the book value.

Deposits with stated maturities have been valued using a present value discounted cash flow with a discount rate approximating current market for similar assets and liabilities. Deposits with no stated maturities have an estimated fair value equal to both the amount payable on demand and the recorded book balance.

The fair value of all other borrowings is based on the discounted value of contractual cash flows. The discount rates are estimated using rates currently offered for similar instruments with similar remaining maturities.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

17. Disclosures about Fair Value Measurements (continued)

Commitments to extend credit and standby letters of credit are financial instruments generally not subject to sale, and fair values are not readily available. The carrying value, represented by the net deferred fee arising from the unrecognized commitment, and the fair value, determined by discounting the remaining contractual fee over the term of the commitment using fees currently charged to enter into similar agreements with similar credit risk, is not considered material for disclosure. The contractual amounts of unfunded commitments are presented in Note 15.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values. The Company's remaining assets and liabilities which are not considered financial instruments have not been valued differently than has been customary under historical cost accounting.

18. Accounting Changes

On January 1, 2016, the Company adopted ASU 2015-03, *Interest Imputation of Interest (Subtopic 835-30)*, which changed the presentation of debt issuance costs. Whereas in prior periods debt issuance cost related to a recognized debt liability was presented on the balance sheet as an asset of the Company, the amendment requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The new method of accounting for debt issuance cost was adopted in accordance with the Update and comparative financial statements of prior years have been adjusted to apply the new method retrospectively. The guaranteed junior subordinated deferrable interest debentures and subordinated debt financial statement line items for the periods ended June 30, 2016 and December 31, 2015 were affected by this change in accounting principle.

TABLE OF CONTENTS

Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (M.D. & A.)

.....2016 SECOND QUARTER SUMMARY OVERVIEW.....AmeriServ Financial, Inc. reported second quarter 2016 net income available to common shareholders of \$1,362,000, or \$0.07 per diluted common share. This earnings performance was consistent with the second quarter of 2015 where net income available to common shareholders totaled \$1,369,000, or \$0.07 per diluted common share. For the six month period ended June 30, 2016, the Company reported net income available to common shareholders of \$80,000, which rounds to \$0.00 per diluted share. This represented a decrease in earnings per share from the first half of 2015 where net income available to common shareholders totaled \$2,685,000, or \$0.14 per diluted common share, due primarily to an increased provision for loan losses that was recorded in the first quarter of 2016.

The second quarter of 2016 was a period marked by a number of unexpected events. In the world of global finance, there was the vote in the United Kingdom to exit the European Union. In the world of geopolitics, there was the spread of terrorism on an almost daily basis. Meanwhile, we in the United States can feel the quickening of tensions as the 2016 Presidential election draws near. It is necessary for us at AmeriServ to monitor these events of significance, but we find it is also a good time to increase our concentration on the events here at AmeriServ.

The first quarter of 2016 was highlighted by the decision of our Board and Management team to take swift and complete action on two issues of concern. This meant the Trust Company had to bear most of the full expense involved in the inquiry into a Trust Company processing error. Concurrently, we took action to absorb a significant charge off of the company s only direct energy loan. These decisions resulted in a net loss for the first quarter of 2016. These two events were unrelated and very much self-contained. Therefore, the best course of action for the good of the franchise was to put them behind us. This enabled Management to focus totally on achieving better results during the remaining quarters of 2016.

As previously noted, AmeriServ produced net income of \$1,362,000 or \$0.07 earnings per common share in the second quarter. This result was just \$59,000 below the second quarter of 2015. More importantly, it was indicative that the recovery in net income had occurred, as we had believed it would. Perhaps even beyond that important accomplishment, the second quarter net income was also sufficient to overcome the first quarter loss and to return the franchise to profitability for the first six months of 2016. While we remain diligent and alert, we now believe that the additional expenses from the first quarter of 2016 are in fact behind us and therefore Management can focus fully on growth with earnings again.

Given the media concerns about the global and national economies, we note that the AmeriServ loan portfolio closed the second quarter at a ninth consecutive quarterly record high. Meanwhile, deposits increased by over \$37 million pushing ever closer to the \$1 billion level. At the same time, non-performing assets declined to the lowest quarter end level since 2006.

During the second quarter of 2016, the Trust Company achieved fees that were the third highest in the last ten quarters and trust expenses were the lowest since the first quarter of 2015. The new management team at the Trust Company is in place and focused on meeting its goals on after tax profit margin and total revenue growth.

It is our belief that the second quarter rapid return to profitability is a very strong indicator of the strength of AmeriServ. The Company was able to face operating challenges and solve them quickly so that fundamental progress

may continue. It is especially interesting to note that while these challenges were being faced, the Company issued \$7.65 million of subordinated debt which has a 6.50% fixed interest rate in late December 2015. The proceeds from the subordinated debt issuance, along with other cash on hand, was used to redeem all \$21 million of our outstanding SBLF preferred stock on January 27, 2016. Following that repayment transaction AmeriServ still exceeded the published Federal Reserve capital requirements that do not become effective until 2019.

Certainly, it is our goal to be transparent with our shareholders, for it is their capital contributions that enable us to exist. Certainly, the loan production and the deposit totals tell a positive story. The Trust Company with its multiple lines of business is almost unique among companies the size of AmeriServ.

TABLE OF CONTENTS

Perhaps one of the most outstanding qualities of AmeriServ is its increasing strength as a safe and sound company and its determination to be a better performer in everything it does.

THREE MONTHS ENDED JUNE 30, 2016 VS. THREE MONTHS ENDED JUNE 30, 2015

....**PERFORMANCE OVERVIEW**....The following table summarizes some of the Company's key performance indicators (in thousands, except per share and ratios).

	Three months ended June 30, 2016	Three months ended June 30, 2015
Net income	\$ 1,362	\$ 1,421
Net income available to common shareholders	1,362	1,369
Diluted earnings per share	0.07	0.07
Return on average assets (annualized)	0.48 %	0.52 %
Return on average equity (annualized)	5.60 %	4.88 %

The Company returned to more typical profitability levels in the second quarter of 2016 by reporting net income available to common shareholders of \$1,362,000 or \$0.07 per diluted common share. This earnings performance was consistent with the second quarter of 2015 where net income available to common shareholders totaled \$1,369,000, or \$0.07 per diluted common share. The negative impact of net interest margin compression more than offset continued solid loan and deposit growth and resulted in net interest income decreasing by \$314,000. Nearly offsetting this decline to net interest income was the positive impact to the Company's earnings performance of a higher level of non-interest income by \$50,000 and a lower level of non-interest expense by \$200,000.

....**NET INTEREST INCOME AND MARGIN**....The Company's net interest income represents the amount by which interest income on average earning assets exceeds interest paid on average interest bearing liabilities. Net interest income is a primary source of the Company's earnings, and it is affected by interest rate fluctuations as well as changes in the amount and mix of average earning assets and average interest bearing liabilities. The following table compares the Company's net interest income performance for the second quarter of 2016 to the second quarter of 2015 (in thousands, except percentages):

	Three months ended June 30, 2016	Three months ended June 30, 2015	\$ Change	% Change
Interest income	\$ 10,389	\$ 10,409	\$ (20)	(0.2)%
Interest expense	1,903	1,609	294	18.3
Net interest income	\$ 8,486	\$ 8,800	\$ (314)	(3.6)
Net interest margin	3.23 %	3.45 %	(0.22)	N/M

N/M not meaningful

The Company's net interest income in the second quarter of 2016 decreased by \$314,000, or 3.6%, when compared to the second quarter of 2015. The Company's net interest margin of 3.23% for the second quarter of 2016 was 22 basis points lower than the net interest margin of 3.45% for the second quarter 2015. The reduction in net interest income is

a direct result of net interest margin compression along with the interest expense associated with the Company's late fourth quarter 2015 issuance of subordinated debt. The prolonged low interest rate environment that exists in the economy, along with intense market competition for loans are the primary causes of this net interest margin compression and more than offset the Company continuing to grow earning assets and control its cost of funds through disciplined deposit pricing. Specifically, the earning asset growth occurred in the loan portfolio as total loans averaged \$889 million in the second quarter of 2016 which is \$31.5 million, or 3.7%, higher than the \$857 million average for the second quarter of 2015. This loan growth reflects the successful results of the Company's business development efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans particularly through its loan production offices. Despite this meaningful loan growth experienced between years, loan interest income decreased by \$71,000, or 0.7%. Interest income on investments in 2016 also returned to a more normal level after the Company benefited from a special dividend from the FHLB of Pittsburgh in 2015. Overall, total interest income decreased by \$20,000, or 0.2%, between years.

TABLE OF CONTENTS

When compared to the second quarter of 2015, total interest expense for the second quarter of 2016 increased by \$294,000, or 18.3%, due to a higher level of both borrowings and deposit interest expense. The Company experienced a \$135,000 increase in the interest cost for borrowings in the second quarter of 2016 with \$129,000 of this increase attributable to the Company's recent subordinated debt issuance. Specifically, the Company issued \$7.65 million of subordinated debt which has a 6.50% fixed interest rate in late December 2015. The proceeds from the subordinated debt issuance, along with other cash on hand, was used to redeem all \$21 million of our outstanding SBLF preferred stock on January 27, 2016. The remainder of the increase in borrowings interest expense was due to a greater utilization of FHLB term advances to extend borrowings for interest rate risk management purposes. The Company experienced significant growth in deposits between years which is a reflection of the loyalty and stability of our core deposit base that provides a strong foundation from which this growth builds. Management's ability to acquire new core deposit funding from outside of our traditional market areas as well as our ongoing efforts to cross sell new loan customers into deposit products were the primary reasons for this growth. Specifically, total deposits averaged a record level of \$955 million for the second quarter of 2016 which is \$64.5 million, or 7.2%, higher than the \$891 million average for the second quarter of 2015. The Company is pleased that a meaningful portion of this deposit growth occurred in non-interest bearing demand deposit accounts. Deposit interest expense in 2016 increased by \$159,000, or 13.6%, due to the higher balance of deposits along with certain money market accounts repricing upward after the December 2015 Federal Reserve fed funds interest rate increase.

The table that follows provides an analysis of net interest income on a tax-equivalent basis for the three month periods ended June 30, 2016 and June 30, 2015 setting forth (i) average assets, liabilities, and stockholders' equity, (ii) interest income earned on interest earning assets and interest expense paid on interest bearing liabilities, (iii) average yields earned on interest earning assets and average rates paid on interest bearing liabilities, (iv) the Company's interest rate spread (the difference between the average yield earned on interest earning assets and the average rate paid on interest bearing liabilities), and (v) the Company's net interest margin (net interest income as a percentage of average total interest earning assets). For purposes of these tables, loan balances do include non-accrual loans, and interest income on loans includes loan fees or amortization of such fees which have been deferred, as well as interest recorded on certain non-accrual loans as cash is received. Additionally, a tax rate of 34% is used to compute tax-equivalent yields.

TABLE OF CONTENTSThree months ended June 30 (In thousands, except percentages)

	2016		2015			
	Average Balance	Interest Income/ Expense	Yield/Rate	Average Balance	Interest Income/ Expense	Yield/Rate

Tax-equivalent adjustment	(7)	(6)
Net Interest Income	\$8,486	\$8,800

.....**PROVISION FOR LOAN LOSSES**.....The Company recorded a \$250,000 provision for loan losses in the second quarter of 2016 compared to a \$200,000 provision for loan losses in the second quarter of 2015. The provision recorded in the second quarter of 2016 was more typical of the level to support the continuing growth of the loan portfolio and cover net loan charge-offs. The Company experienced net loan charge-offs of \$24,000 or 0.01% of total loans in the second quarter of 2016 compared to net loan charge-offs of \$172,000 or 0.08% of total loans in the second quarter of 2015. At June 30, 2016, non-performing assets totaled

TABLE OF CONTENTS

\$2.2 million, or only 0.25% of total loans. In summary, the allowance for loan losses provided a strong 437% coverage of non-performing loans, and 1.09% of total loans, at June 30, 2016, compared to 158% coverage of non-performing loans, and 1.13% of total loans, at December 31, 2015.

.....NON-INTEREST INCOME.....Non-interest income for the second quarter of 2016 totaled \$3.7 million and increased \$50,000, or 1.4%, from the second quarter 2015 performance. Factors contributing to this higher level of non-interest income for the quarter included:

- * a \$107,000 increase in revenue from other income as a result of funds received from our debit card vendor from a branding agreement;
- * a \$40,000, or 17.8%, decrease in net gains realized on residential mortgage loan sales and a \$11,000 decrease in mortgage related fees due to reduced refinance activity and a decrease in new mortgage loan originations in 2016;
 - * a \$32,000 increase in gains realized on the sale of investment securities in the second quarter of 2016; and
 - * a \$25,000 decrease in service charges on deposit accounts due to a lower receipt of checking overdraft fees.

.....NON-INTEREST EXPENSE.....Non-interest expense for the second quarter of 2016 totaled \$10.0 million and decreased by \$200,000, or 2.0%, from the prior year's second quarter. Factors contributing to the lower non-interest expense in the quarter included:

- * a decrease in professional fees of \$83,000 or 6.5% due to reduced legal fees, director fees and other professional related costs;
- * a \$76,000, or 1.3%, decrease in salaries and employee benefits due to the previously disclosed branch consolidation in the State College market and reduction of staff in the executive office;
- * a \$71,000 decrease in equipment expenses along with a \$28,000 reduction in occupancy expenses which is reflective of the Company's ongoing efforts to reduce non-interest expenses; and
 - * a \$54,000 increase in other expenses due to higher software related expenses and ATM processing costs.

SIX MONTHS ENDED JUNE 30, 2016 VS. SIX MONTHS ENDED JUNE 30, 2015

.....PERFORMANCE OVERVIEW.....The following table summarizes some of the Company's key performance indicators (in thousands, except per share and ratios).

	Six months ended June 30, 2016	Six months ended June 30, 2015		
Net income	\$ 95	\$ 2,790		
Net income available to common shareholders	80	2,685		
Diluted earnings per share	0.00	0.14		
Return on average assets (annualized)	0.02	0.51	%	%
Return on average equity (annualized)	2.66	4.84	%	%

The Company reported a first half 2016 net income available to common shareholders of \$80,000, which rounds to \$0.00 per diluted common share, due primarily to a \$2.9 million increased provision for loan losses that was recorded in the first quarter of 2016. This represented a decrease in earnings per share from the first half of 2015 where net income available to common shareholders totaled \$2,685,000, or \$0.14 per diluted common share. The negative impact of net interest margin compression more than offset continued solid loan and deposit growth and resulted in net interest income decreasing by \$690,000. Additionally, the Company's earnings performance was also negatively impacted due to a lower level of non-interest income by \$225,000 and a higher level of non-interest expense by \$101,000.

.....**NET INTEREST INCOME AND MARGIN**.....The Company's net interest income represents the amount by which interest income on average earning assets exceeds interest paid on average interest bearing liabilities. Net interest income is a primary source of the Company's earnings, and it is affected by interest

TABLE OF CONTENTS

rate fluctuations as well as changes in the amount and mix of average earning assets and average interest bearing liabilities. The following table compares the Company's net interest income performance for the first six months of 2016 to the first six months of 2015 (in thousands, except percentages):

	Six months ended	Six months ended	\$	%
	June 30, 2016	June 30, 2015	Change	Change
Interest income	\$ 20,811	\$ 20,932	\$ (121)	(0.6)%
Interest expense	3,767	3,198	569	17.8
Net interest income	\$ 17,044	\$ 17,734	\$ (690)	(3.9)
Net interest margin	3.27 %	3.51 %	(0.24)	N/M

N/M not meaningful

The Company's net interest income in the first half of 2016 decreased by \$690,000, or 3.9%, when compared to the first half of 2015. The Company's net interest margin of 3.27% for the first half of 2016 was 24 basis points lower than the net interest margin of 3.51% for the first half 2015. The reduction in net interest income is a direct result of net interest margin compression that is prevalent in the banking industry as well as additional interest expense associated with the Company's late fourth quarter 2015 issuance of subordinated debt. The prolonged low interest rate environment that exists in the economy, along with intense market competition for loans more than offset the Company continuing to grow earning assets and control its cost of funds through disciplined deposit pricing. Specifically, the earning asset growth occurred in the loan portfolio as total loans averaged \$885 million in the first six months of 2016 which is \$35.5 million, or 4.2%, higher than the \$849 million average for the first six months of 2015. This loan growth reflects the successful results of the Company's business development efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans particularly through its loan production offices. Despite this meaningful loan growth experienced between years, loan interest income decreased modestly by \$62,000, or 0.3%. Interest income on investments in 2016 is also down for the six month period as the Company benefited from a special dividend from the FHLB of Pittsburgh in 2015. Overall, total interest income decreased by \$121,000, or 0.6%, in the first half of 2016.

Total interest expense for the first half of 2016 increased by \$569,000, or 17.8%, due to higher levels of both borrowings and deposit interest expense. The Company experienced a \$330,000 increase in the interest cost for borrowings in the first half of 2016 with \$258,000 of this increase attributable to the Company's recent subordinated debt issuance. Specifically, the Company issued \$7.65 million of subordinated debt which has a 6.50% fixed interest rate in late December 2015. The proceeds from the subordinated debt issuance, along with other cash on hand, was used to redeem all \$21 million of our outstanding SBLF preferred stock on January 27, 2016. The remainder of the increase in borrowings interest expense was due to a greater utilization of FHLB term advances to extend borrowings for interest rate risk management purposes. The Company also experienced significant growth in deposits between years which is a reflection of the loyalty and stability of our core deposit base that provides a strong foundation from which this growth builds. Management's ability to acquire new core deposit funding from outside of our traditional market areas as well as our ongoing efforts to cross sell new loan customers into deposit products were the primary reasons for this growth. Specifically, total deposits averaged a record level of \$933 million for the first six months of 2016 which is \$38.9 million, or 4.4%, higher than the \$894 million average for the first six months of 2015. The Company is pleased that a meaningful portion of this deposit growth occurred in non-interest bearing demand deposit accounts. Deposit interest expense through six months of 2016 increased by \$239,000, or 10.2%, due to the higher balance of deposits along with certain money market accounts repricing upward after the December 2015 Federal Reserve fed funds interest rate increase.

The table that follows provides an analysis of net interest income on a tax-equivalent basis for the six month periods ended June 30, 2016 and June 30, 2015 setting forth (i) average assets, liabilities, and stockholders' equity, (ii) interest income earned on interest earning assets and interest expense paid on interest bearing liabilities, (iii) average yields earned on interest earning assets and average rates paid on interest bearing liabilities, (iv) the Company's interest rate spread (the difference between the average yield earned on interest earning assets and the average rate paid on interest bearing liabilities), and (v) the Company's net interest margin (net interest income as a percentage of average total interest earning assets). For purposes of

TABLE OF CONTENTS

these tables, loan balances do include non-accrual loans, and interest income on loans includes loan fees or amortization of such fees which have been deferred, as well as interest recorded on certain non-accrual loans as cash is received. Additionally, a tax rate of 34% is used to compute tax-equivalent yields.

TABLE OF CONTENTS

.....PROVISION FOR LOAN LOSSES..... For the six month period in 2016, the Company recorded a \$3,350,000 provision for loan losses compared to a \$450,000 provision for loan losses in the first six months of 2015. The substantially higher than typical provision and net loan charge-offs recorded in the first quarter of 2016 were necessary to resolve the Company's only meaningful direct loan exposure to the energy industry. These loans are related to a single borrower in the fracking industry who had filed for bankruptcy protection in the fourth quarter of 2015. With the bankruptcy changing from Chapter 11 (reorganization) to Chapter 7 (liquidation) late in the first quarter of 2016, the Company concluded that its previously established reserves on these non-accrual loans were not sufficient to cover the discounted collateral values that will result from the liquidation process. For the six month periods, there were net loan charge-offs of \$3.5 million, or 0.80%, of total loans in first half of 2016 compared to net loan charge-offs of \$356,000 or 0.08% of total loans in 2015. Overall, the Company continued to maintain outstanding asset quality in the first half of 2016. At June 30, 2016, non-performing assets totaled \$2.2 million, or only 0.25% of total loans. In summary, the allowance for loan losses provided a strong 437% coverage of non-performing loans, and 1.09% of total loans, at June 30, 2016, compared to 158% coverage of non-performing loans, and 1.13% of total loans, at December 31, 2015.

.....NON-INTEREST INCOME.....Non-interest income for the first six months of 2016 totaled \$7.2 million and decreased \$225,000, or 3.0%, from the first six months 2015 performance. Factors contributing to this lower level of non-interest income for the quarter included:

- * a \$198,000 decrease in revenue from bank owned life insurance after the Company received a death benefit in 2015 and no benefit claim occurred in 2016;
- * a \$124,000, or 29.8%, decrease in net gains realized on residential mortgage loan sales and a \$63,000 decrease in mortgage related fees due to reduced refinance activity and a decrease in new mortgage loan originations in 2016;
- * a \$92,000 increase in revenue from other income as a result of funds received from our debit card vendor from a branding agreement; and
- * an \$89,000 increase in gains realized on the sale of investment securities in the first six months of 2016.

.....NON-INTEREST EXPENSE.....Non-interest expense for the first half of 2016 totaled \$20.8 million and increased by \$101,000, or 0.5%, from the prior year's first six months. Factors contributing to the higher non-interest expense in the quarter included:

- * a \$171,000 increase in professional fees that was almost entirely attributable to non-recurring costs for legal and accounting services that were necessary to resolve a trust operations trading error. Costs related to this trust issue were also the primary reason that other expenses also increased by \$119,000 between years; and
- * a \$132,000 decrease in occupancy expenses along with a \$101,000 reduction in equipment expenses which is reflective of the Company's ongoing focus to reduce non-interest expenses.

.....INCOME TAX EXPENSE.....The Company recorded an income tax expense of \$28,000, or an effective tax rate of 22.8%, in the first six months of 2016 which is lower when compared to the income tax expense of \$1,249,000, or an effective tax rate of 30.9%, for the first six months of 2015. The lower income tax expense and effective tax rate is due to the first quarter 2016 loss recognized by the Company.

.....SEGMENT RESULTS.....Retail banking's net income contribution was \$895,000 in the second quarter and \$1.5 million for the first six months of 2016 which was up by \$152,000 and \$76,000 from the net income contribution for the same 2015 periods. These increases in earnings in 2016 were due this segment's net interest income benefitting from the significantly higher deposit balances and reduced non-interest expenses particularly occupancy and equipment related costs. These favorable items more than offset a lower level of BOLI income, residential mortgage related fee income and residential mortgage loan sale gains.

The commercial banking segment reported net income of \$1.4 million in the second quarter and \$532,000 for the first six months of 2016 which was \$33,000 higher when compared to the second quarter of 2015, but

TABLE OF CONTENTS

\$2.1 million lower than the first six months of 2015 result. The lower level of income for the six month time period was due to the higher loan loss provision that was required to resolve the troubled energy sector loan. Also, net interest income decreased as the negative impact of net interest margin compression more than offset the strong growth in commercial and commercial real estate loans over the past year. Additionally, total non-interest income decreased due to the lower level of BOLI income while total non-interest expense was higher due to increased employee cost.

The trust segment reported net income of \$400,000 in the second quarter and \$545,000 for the first six months of 2016 which was \$4,000 higher than the 2015 result for the same quarter period, but \$231,000 lower than the first six months of 2015 period. The lower level of net income for the six month period is primarily due to the Trust Company operations trading error that occurred during a technology upgrade and resulted in \$366,000 of additional expenses in the first quarter of 2016. Slightly offsetting this was trust and investment advisory fees increasing modestly since last year due to successful business development efforts. Also, fee pressure from reduced asset market values that was caused by a declining equity market early in 2016 rebounded in the second quarter as the equity market increased resulting in asset market values improving.

The investment/parent segment reported net loss of \$1.3 million in the second quarter and a net loss of \$2.5 million for the first six months of 2016, which resulted in a greater loss by \$248,000 and \$447,000, respectively than the 2015 result for the same periods. The increased loss between years is reflective of an increase in total interest expense due to the additional cost associated with the subordinated debt issuance that occurred in late 2015 and is included in the investment/parent segment's results for the first time. Finally, this segment has felt the most earnings pressure from the continued low interest rate environment.

.....**BALANCE SHEET**.....The Company's total consolidated assets were \$1.142 billion at June 30, 2016, which declined by \$6.0 million, or 0.5%, from the December 31, 2015 asset level. The reduction in assets was primarily due to the repayment of the \$21 million SBLF preferred stock. The redemption was funded from the issuance of \$7.65 million of subordinated debt and \$13.4 million of cash and securities on hand at the Parent Company.

Total deposits increased by \$37.6 million, or 4.2% in the first six months of 2016. Total FHLB borrowings have decreased by \$24.1 million since year-end 2015. The FHLB term advances with maturities between three and five years grew by \$2 million and now total \$50 million as the Company has utilized these advances to help manage interest rate risk and favorably position our balance sheet in a rising rate environment. The Company's total shareholders' equity decreased by \$19.7 million over the first six months of 2016 due to the Company's redemption of the preferred stock on January 27, 2016. The Company continues to be considered well capitalized for regulatory purposes with a total capital ratio of 13.04%, and a common equity tier 1 capital ratio of 9.90% at June 30, 2016. (See the discussion of the new Basel III capital requirements under the Capital Resources section.) The Company's book value per common share was \$5.25, its tangible book value per common share was \$4.62, and its tangible common equity to tangible assets ratio was 7.72% at June 30, 2016.

TABLE OF CONTENTS

.....**LOAN QUALITY**.....The following table sets forth information concerning the Company's loan delinquency, non-performing assets, and classified assets (in thousands, except percentages):

	June 30, 2016	December 31, 2015	June 30, 2015
Total accruing loan delinquency (past due 30 to 89 days)	\$2,861	\$4,396	\$4,383
Total non-accrual loans	2,162	6,066	2,111
Total non-performing assets including TDR*	2,230	6,297	2,565
Accruing loan delinquency, as a percentage of total loans, net of unearned income	0.32 %	0.50 %	0.51 %
Non-accrual loans, as a percentage of total loans, net of unearned income	0.24	0.69	0.24
Non-performing assets, as a percentage of total loans, net of unearned income, and other real estate owned	0.25	0.71	0.30
Non-performing assets as a percentage of total assets	0.20	0.55	0.23
As a percent of average loans, net of unearned income:			
Annualized net charge-offs	0.80	0.11	0.08
Annualized provision for loan losses	0.76	0.15	0.11
Total classified loans (loans rated substandard or doubtful)	\$5,052	\$8,566	\$8,683

Non-performing assets are comprised of (i) loans that are on a non-accrual basis, (ii) loans that are contractually past *due 90 days or more as to interest and principal payments, (iii) performing loans classified as a troubled debt restructuring and (iv) other real estate owned.

The Company continued to maintain strong asset quality in the first six months of 2016 as evidenced by low levels of non-accrual loans, non-performing assets, classified loans, and loan delinquency levels that continue to be below 1% of total loans. We continue to closely monitor the loan portfolio given the slow recovery in the economy and the number of relatively large-sized commercial and commercial real estate loans within the portfolio. As of June 30, 2016, the 25 largest credits represented 32.5% of total loans outstanding.

.....**ALLOWANCE FOR LOAN LOSSES**.....The following table sets forth the allowance for loan losses and certain ratios for the periods ended (in thousands, except percentages):

	June 30, 2016	December 31, 2015	June 30, 2015
Allowance for loan losses	\$9,746	\$9,921	\$9,717
Allowance for loan losses as a percentage of each of the following			
total loans, net of unearned income	1.09 %	1.13 %	1.13 %
total accruing delinquent loans (past due 30 to 89 days)	340.65	225.68	221.70
total non-accrual loans	450.79	163.55	460.30
total non-performing assets	437.04	157.55	378.83

The Company recorded a \$3.4 million provision for loan losses in the first six months of 2016 compared to a \$450,000 provision for loan losses in the first six months of 2015 or an increase of \$2.9 million between periods. The

substantially higher than typical provision in the first six months of 2016 was necessary to resolve the Company's only meaningful direct loan exposure to the energy industry.

.....**LIQUIDITY**.....The Company's liquidity position has been strong during the last several years. Our core retail deposit base has grown over the past five years and has been more than adequate to fund the Company's operations. Cash flow from maturities, prepayments and amortization of securities was also used to help fund loan growth over the past few years. We strive to operate our loan to deposit ratio in a range of 80% to 100%. For the first six months of 2016, the Company's loan to deposit ratio has averaged 94.9%. We are

TABLE OF CONTENTS

optimistic that we can increase the loan to deposit ratio in the future given current commercial loan pipelines, continued growth of our loan production offices and our focus on small business lending.

Liquidity can be analyzed by utilizing the Consolidated Statement of Cash Flows. Cash and cash equivalents decreased by \$21.5 million from December 31, 2015 to June 30, 2016, due to \$18.0 million of cash used in investing activities and \$7.9 million of cash used by financing activities. This more than offset the \$4.4 million of cash provided by operating activities. Within investing activities, cash provided from investment security maturities was \$12.7 million. Cash advanced for new loan fundings and purchases (excluding residential mortgages sold in the secondary market) totaled \$113.2 million and was \$14.9 million higher than the \$98.3 million of cash received from loan principal payments and participations sold. Within financing activities, deposits increased by \$37.6 million of cash. Total borrowings decreased as advances of short-term borrowings and purchases of FHLB term advances declined by \$24.1 million. The company also used \$21.0 million to redeem the preferred stock issued to the US Treasury under the SBLF program. At June 30, 2016, the Company had immediately available \$386 million of overnight borrowing capacity at the FHLB and \$39 million of unsecured federal funds lines with correspondent banks.

The holding company had \$9.6 million of cash, short-term investments, and investment securities at June 30, 2016.

Additionally, dividend payments from our subsidiaries can also provide ongoing cash to the holding company. At June 30, 2016, our subsidiary Bank had \$2.5 million of cash available for immediate dividends to the holding company under applicable regulatory formulas. Management follows a policy that limits dividend payments from the Trust Company to 75% of annual net income. Based upon this internal limit, the Trust Company had \$33,000 of cash available for immediate dividends to the holding company. Overall, we believe that the holding company has strong liquidity to meet its trust preferred and subordinated debt service requirements, and its current common stock dividends, all of which should approximate \$2.4 million over the next twelve months.

.....CAPITAL RESOURCES.....The Bank meaningfully exceeds all regulatory capital ratios for each of the periods presented and is considered well capitalized. The Company's common equity tier 1 ratio was 9.90%, the tier 1 capital ratio was 11.11%, and the total capital ratio was 13.04% at June 30, 2016. The Company's tier 1 leverage was 9.29% at June 30, 2016. We anticipate that we will maintain our strong capital ratios throughout the remainder of 2016. We expect that capital generated from earnings will be utilized to pay the common stock cash dividend and will also support anticipated balance sheet growth. On July 25, 2016, the Company announced that its Board of Directors declared a \$0.015 per share quarterly common stock cash dividend. This new quarterly dividend amount represents a 50% increase from the previous \$0.01 per share quarterly dividend. The cash dividend is payable August 22, 2016 to shareholders of record on August 8, 2016. This increased cash dividend represents a 1.9% annualized yield using the July 21, 2016 closing common stock price of \$3.13 and represents an approximate payout ratio of 21% based upon the Company's second quarter 2016 earnings per share of \$0.07. With the successful redemption of the SBLF preferred stock in the first quarter of 2016 and the Company's rapid return to more typical profitability levels in the second quarter of 2016, our Board of Directors is confident that this is the appropriate time to begin to return more capital to our shareholders.

On January 1, 2015, U.S. federal banking agencies implemented the new Basel III capital standards, which establish the minimum capital levels to be considered well-capitalized and revise the prompt corrective action requirements under banking regulations. The revisions from the previous standards include a revised definition of capital, the introduction of a minimum Common Equity Tier 1 capital ratio and changed risk weightings for certain assets. The implementation of the new rules will be phased in over a four year period ending January 1, 2019 with minimum capital requirements becoming increasingly more strict each year of the transition. The new minimum capital requirements for each ratio, both, initially on January 1, 2015 and at the end of the transition on January 1, 2019, are as follows: A common equity tier 1 capital ratio of 4.5% initially and 7.0% at January 1, 2019; a tier 1 capital ratio of 6.0% and 8.50%; a total capital ratio of 8.0% and 10.50%; and a tier 1 leverage ratio of 5.00% and 5.00%. Under the

new rules, in order to avoid limitations on capital distributions (including dividend payments and certain discretionary bonus payments to executive officers), a banking organization must hold a capital conservation buffer above its minimum risk-based capital requirements, which increases over the transition period, from 0.625% of total risk weighted

TABLE OF CONTENTS

assets in 2016 to 2.5% in 2019. The Company continues to be committed to maintaining strong capital levels that exceed regulatory requirements while also supporting balance sheet growth and providing a return to our shareholders.

.....INTEREST RATE SENSITIVITY.....The following table presents an analysis of the sensitivity inherent in the Company's net interest income and market value of portfolio equity. The interest rate scenarios in the table compare the Company's base forecast, which was prepared using a flat interest rate scenario, to scenarios that reflect immediate interest rate changes of 100 and 200 basis points. Note that we suspended the 200 basis point downward rate shock since it has little value due to the absolute low level of interest rates. Each rate scenario contains unique prepayment and repricing assumptions that are applied to the Company's existing balance sheet that was developed under the flat interest rate scenario.

Interest Rate Scenario	Variability of Net Interest Income	Change in Market Value of Portfolio Equity
200bp increase	4.2 %	36.6 %
100bp increase	2.6	22.2
100bp decrease	(3.1)	1.0

The Company believes that its overall interest rate risk position is well controlled. The variability of net interest income is positive in the upward rate shocks due to the Company's short duration investment securities portfolio, the scheduled repricing of loans tied to LIBOR or prime, and the extension of a portion of borrowed funds. Also, the Company expects that it will not have to reprice its core deposit accounts up as quickly when interest rates rise. The variability of net interest income is negative in the 100 basis point downward rate scenario as the Company has more exposure to assets repricing downward to a greater extent than liabilities due to the absolute low level of interest rates with the fed funds rate currently at approximately 0.25%. The market value of portfolio equity increases in the upward rate shocks due to the improved value of the Company's core deposit base. Modest positive variability of market value of portfolio equity occurs in the downward rate shock due to a limited reduction of value for core deposits in this low interest rate environment.

.....OFF BALANCE SHEET ARRANGEMENTS.....The Company incurs off-balance sheet risks in the normal course of business in order to meet the financing needs of its customers. These risks derive from commitments to extend credit and standby letters of credit. Such commitments and standby letters of credit involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated financial statements. The Company had various outstanding commitments to extend credit approximating \$166.7 million and standby letters of credit of \$9.0 million as of June 30, 2016. The Company's exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Company uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

.....CRITICAL ACCOUNTING POLICIES AND ESTIMATES.....The accounting and reporting policies of the Company are in accordance with Generally Accepted Accounting Principles and conform to general practices within the banking industry. Accounting and reporting policies for the allowance for loan losses, goodwill, income taxes, and investment securities are deemed critical because they involve the use of estimates and require significant management judgments. Application of assumptions different than those used by the Company could result in material changes in the Company's financial position or results of operation.

ACCOUNT Allowance for Loan Losses
BALANCE SHEET REFERENCE Allowance for loan losses

INCOME STATEMENT REFERENCE Provision for loan losses
DESCRIPTION

The allowance for loan losses is calculated with the objective of maintaining reserve levels believed by management to be sufficient to absorb estimated probable credit losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the credit portfolio and other relevant factors. However, this quarterly evaluation is inherently subjective as it requires material estimates, including, among others, likelihood of customer default, loss given default, exposure at default, the amounts and timing of

40

TABLE OF CONTENTS

expected future cash flows on impaired loans, value of collateral, estimated losses on consumer loans and residential mortgages, and general amounts for historical loss experience. This process also considers economic conditions, uncertainties in estimating losses and inherent risks in the various credit portfolios. All of these factors may be susceptible to significant change. Also, the allocation of the allowance for credit losses to specific loan pools is based on historical loss trends and management's judgment concerning those trends.

Commercial and commercial real estate loans are the largest category of credits and the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan loss. Approximately \$7.6 million, or 78%, of the total allowance for loan losses at June 30, 2016 has been allocated to these two loan categories. This allocation also considers other relevant factors such as actual versus estimated losses, economic trends, delinquencies, levels of non-performing and TDR loans, concentrations of credit, trends in loan volume, experience and depth of management, examination and audit results, effects of any changes in lending policies and trends in policy, financial information and documentation exceptions. To the extent actual outcomes differ from management estimates, additional provision for loan losses may be required that would adversely impact earnings in future periods.

ACCOUNT Goodwill
BALANCE SHEET REFERENCE Goodwill
INCOME STATEMENT REFERENCE Goodwill impairment
DESCRIPTION

The Company considers our accounting policies related to goodwill to be critical because the assumptions or judgment used in determining the fair value of assets and liabilities acquired in past acquisitions are subjective and complex. As a result, changes in these assumptions or judgment could have a significant impact on our financial condition or results of operations.

The fair value of acquired assets and liabilities, including the resulting goodwill, was based either on quoted market prices or provided by other third party sources, when available. When third party information was not available, estimates were made in good faith by management primarily through the use of internal cash flow modeling techniques. The assumptions that were used in the cash flow modeling were subjective and are susceptible to significant changes. The Company routinely utilizes the services of an independent third party that is regarded within the banking industry as an expert in valuing core deposits to monitor the ongoing value and changes in the Company's core deposit base. These core deposit valuation updates are based upon specific data provided from statistical analysis of the Company's own deposit behavior to estimate the duration of these non-maturity deposits combined with market interest rates and other economic factors.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. The Company's goodwill relates to value inherent in the banking and wealth management businesses, and the value is dependent upon the Company's ability to provide quality, cost-effective services in the face of free competition from other market participants on a regional basis. This ability relies upon continuing investments in processing systems, the development of value-added service features and the ease of use of the Company's services. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted and the loyalty of the Company's deposit and customer base over a longer time frame. The quality and value of a Company's assets is also an important factor to consider when performing goodwill impairment testing. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective value added services over sustained periods can lead to impairment of goodwill.

Goodwill which has an indefinite useful life is tested for impairment at least annually and written down and charged to results of operations only in periods in which the recorded value is more than the estimated fair value.

ACCOUNT Income Taxes
BALANCE SHEET REFERENCE Net deferred tax asset
INCOME STATEMENT REFERENCE Provision for income tax expense
DESCRIPTION

41

TABLE OF CONTENTS

The provision for income taxes is the sum of income taxes both currently payable and deferred. The changes in deferred tax assets and liabilities are determined based upon the changes in differences between the basis of assets and liabilities for financial reporting purposes and the basis of assets and liabilities as measured by the enacted tax rates that management estimates will be in effect when the differences reverse. This income tax review is completed on a quarterly basis.

In relation to recording the provision for income taxes, management must estimate the future tax rates applicable to the reversal of tax differences, make certain assumptions regarding whether tax differences are permanent or temporary and the related timing of the expected reversal. Also, estimates are made as to whether taxable operating income in future periods will be sufficient to fully recognize any gross deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. Alternatively, we may make estimates about the potential usage of deferred tax assets that decrease our valuation allowances. As of June 30, 2016, we believe that all of the deferred tax assets recorded on our balance sheet will ultimately be recovered and that no valuation allowances were needed.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

	ACCOUNT	Investment Securities
	BALANCE SHEET REFERENCE	Investment securities
	INCOME STATEMENT REFERENCE	Net realized gains (losses) on investment securities
	DESCRIPTION	

Available-for-sale and held-to-maturity securities are reviewed quarterly for possible other-than-temporary impairment. The review includes an analysis of the facts and circumstances of each individual investment such as the severity of loss, the length of time the fair value has been below cost, the expectation for that security's performance, the creditworthiness of the issuer and the Company's intent and ability to hold the security to recovery. A decline in value that is considered to be other-than-temporary is recorded as a loss within non-interest income in the Consolidated Statements of Operations. At June 30, 2016, the unrealized losses in the available-for-sale security portfolio were comprised of securities issued by government agencies or government sponsored agencies and certain high quality corporate securities. The Company believes the unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, management does not intend to sell these securities and does not believe it will be required to sell these securities before they recover in value.

.....FORWARD LOOKING STATEMENT.....

THE STRATEGIC FOCUS:

The challenge for the future is to improve earnings performance to peer levels through a disciplined focus on community banking and improving the profitability of our Trust Company. In accordance with our strategic plan, the Company will maintain its focus as a community bank delivering banking and trust services to the best of our ability and focus on further growing revenues by leveraging our strong capital base and infrastructure. This Company will not succumb to the lure of quick fixes and fancy financial gimmicks. It is our plan to continue to build the Company into a potent banking force in this region and in this industry. Our focus encompasses the following:

Customer Service It is the existing and prospective customer that the Company must satisfy. This means good products and fair prices. But it also means quick response time and professional

42

TABLE OF CONTENTS

competence. It means speedy problem resolution and a minimizing of bureaucratic frustrations. The Company is training and motivating its staff to meet these standards while providing customers with more banking options that involve leading technologies such as computers, smartphones, and tablets to conduct business.

Revenue Growth It is necessary for the Company to focus on growing revenues. This means loan growth, deposit growth and fee growth. It also means close coordination between all customer service areas so as many revenue producing products as possible can be presented to existing and prospective customers. The Company's Strategic Plan contains action plans in each of these areas particularly on increasing loans through several loan production offices. There will be a particular focus on small business commercial lending. An examination of the peer bank database provides ample proof that a well-executed community banking business model can generate a reliable and rewarding revenue stream.

Expense Rationalization The Company remains focused on trying to reduce and rationalize expenses. This has not been a program of broad based cuts, but has been targeted so the Company stays strong but spends less. It is critical to be certain that future expenditures are directed to areas that are playing a positive role in the drive to improve revenues. The Company's also recently completed two additional initiatives that will further reduce non-interest expenses and improve the Company's future profitability. Specifically, at the end of the first quarter of 2016, the Company had closed its Southern Atherton branch office in the State College market and consolidated the retail customer accounts from this branch into its nearby and newer branch office located on North Atherton Street. The Company remains committed to the State College market and this change will allow for a more efficient operation that will allow us to better compete in this demographically attractive but highly competitive banking market. Additionally, the Company also recently realigned its executive leadership team by eliminating one senior position in its executive office. We anticipate that the combined annual cost savings from these two profitability improvement initiatives will approximate \$750,000.

This Form 10-Q contains various forward-looking statements and includes assumptions concerning the Company's beliefs, plans, objectives, goals, expectations, anticipations, estimates, intentions, operations, future results, and prospects, including statements that include the words may, could, should, would, believe, expect, anticipate, intend, project, plan or similar expressions. These forward-looking statements are based upon current expectations, are subject to risk and uncertainties and are applicable only as of the dates of such statements. Forward-looking statements involve risks, uncertainties and assumptions. Although we do not make forward-looking statements unless we believe we have a reasonable basis for doing so, we cannot guarantee their accuracy. You should not put undue reliance on any forward-looking statements. These statements speak only as of the date of this Form 10-Q, even if subsequently made available on our website or otherwise, and we undertake no obligation to update or revise these statements to reflect events or circumstances occurring after the date of this Form 10-Q. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company provides the following cautionary statement identifying important factors (some of which are beyond the Company's control) which could cause the actual results or events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) the effects of trade, monetary and fiscal policies and laws, including interest rate policies of the Federal Reserve; (iii) significant changes in interest rates and prepayment speeds; (iv) inflation, stock and bond market, and monetary fluctuations; (v) credit risks of commercial, real estate, consumer, and other lending activities; (vi) changes in federal and state banking and financial services laws and regulations; (vii) the presence in the Company's market area of competitors with greater financial resources than the Company; (viii) the timely development of competitive new products and services by the Company and the acceptance of those products and services by customers and regulators (when required); (ix) the willingness of customers to substitute competitors' products and services for those of the Company and vice versa; (x) changes in consumer spending and savings habits; (xi) unanticipated regulatory or judicial proceedings; and (xii) other external developments which could materially impact the Company's operational and financial performance.

TABLE OF CONTENTS

The foregoing list of important factors is not exclusive, and neither such list nor any forward-looking statement takes into account the impact that any future acquisition may have on the Company and on any such forward-looking statement.

Item 3.....QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK.....The Company manages market risk, which for the Company is primarily interest rate risk, through its asset liability management process and committee, see further discussion in Interest Rate Sensitivity section of the M.D. & A.

Item 4.....CONTROLS AND PROCEDURES.....(a) Evaluation of Disclosure Controls and Procedures. The Company's management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and the operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2016, pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer along with the Chief Financial Officer concluded that the Company's disclosure controls and procedures as of June 30, 2016, are effective.

(b) Changes in Internal Controls. There have been no changes in AmeriServ Financial Inc.'s internal controls over financial reporting that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

TABLE OF CONTENTS

Part II Other Information

Item 1. Legal Proceedings

There are no material proceedings to which the Company or any of our subsidiaries are a party or by which, to the Company's knowledge, we, or any of our subsidiaries, are threatened. All legal proceedings presently pending or threatened against the Company or our subsidiaries involve routine litigation incidental to our business or that of the subsidiary involved and are not material in respect to the amount in controversy.
