#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of results for the unaudited interim periods.

The results of operations for the nine month period ended March 31, 2012 are not necessarily indicative of the results to be expected for the fiscal year ending June 30, 2012 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle's Form 10-K for the fiscal year ended June 30, 2011.

The Company evaluated subsequent events for potential recognition and/or disclosure through May 14, 2012 the date the consolidated financial statements were issued.

On April 5, 2010, the Company completed its second-step conversion from the partially-public mutual holding company structure to the fully publicly-owned stock holding company structure. As part of that transaction it also completed a related offering of its common stock. As a result of the conversion and offering, the Company became the stock holding company for American Federal Savings Bank, and Eagle Financial MHC and Eagle Bancorp ceased to exist. The Company sold a total of 2,464,274 shares of common stock at a purchase price of \$10.00 per share in the offering for gross proceeds of \$24.6 million. Concurrent with the completion of the offering, shares of Eagle Bancorp common stock owned by the public were exchanged. Stockholders of Eagle Bancorp received 3.800 shares of the Company's common stock for each share of Eagle Bancorp common stock that they owned immediately prior to completion of the transaction. Accordingly, as of April 5, 2010, the Company had 8,000,000 shares of common stock authorized and 4,083,127 issued and outstanding.

In evaluating debt securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell or if it is more likely than not that it will be required to sell impaired debt securities. In so doing, management considers contractual constraints, liquidity, capital, asset/liability management and securities portfolio objectives. With respect to its impaired debt securities at March 31, 2012 and June 30, 2011, management determined that it does not intend to sell and that there is no expected requirement to sell any of its impaired debt securities.

As of March 31, 2012 and June 30, 2011, there were, respectively, 32 and 37 securities in an unrealized loss position and were considered to be temporarily impaired and therefore an impairment charge has not been recorded. All of such temporarily impaired investments are debt securities.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 2. INVESTMENT SECURITIES - continued

At March 31, 2012, 11 U.S. government and agency obligations had unrealized losses with aggregate depreciation of less than 0.59% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements. As such, the Company determined that none of such securities had other-than-temporary impairment.

At March 31, 2012, 9 municipal obligations had unrealized losses with aggregate depreciation of less than 6.86% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements and recent credit concerns in the overall municipal bond market. As such, the Company determined that none of such securities had other-than-temporary impairment.

At March 31, 2012, 1 corporate obligation had an unrealized loss with aggregate depreciation of less than 6.29% from the Company's cost basis. This unrealized loss is principally due to changes in interest rates and some concern the issuer may have exposure to Europe. No credit issues have been identified that cause management to believe the declines in market value are other than temporary. In analyzing the issuer's financial condition, management considers industry analysts' reports, financial performance and if available projected target prices of investment analysts within a one-year time frame. As management has the ability to hold debt securities until maturity, or for the foreseeable future if classified as available for sale, no declines are deemed to be other than temporary.

At March 31, 2012, 11 mortgage backed and CMO securities had unrealized losses with aggregate depreciation of less than 1.27% from the Company's cost basis of these securities. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market. One of the CMO securities are non-agency securities. At March 31, 2012 the fair value of this non-agency security was \$191,000 with an unrealized loss of \$39,000, or 16.96% of the Company's amortized cost basis. Management considers available evidence to assess whether it is more likely than not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of March 31, 2012 revealed no expected credit losses on these securities.

#### NOTE 3. LOANS RECEIVABLE

Loans receivable consist of the following:

The Company utilizes a 5 point internal loan rating system, largely basis on regulatory classifications, for 1-4 family real estate, commercial real estate, construction, home equity and commercial loans as follows:

Loans rated Pass: these are loans that are considered to be protected by the current net worth and paying capacity of the obligor, or by the value of the asset or the underlying collateral.

#### Edgar Filing: Eagle Bancorp Montana, Inc. - Form 10-Q

Loans rated Special Mention: these loans have potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset at some future date.

Loans rated Substandard: these loans are inadequately protected by the current net worth and paying capacity of the obligor of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Loans rated Doubtful: these loans have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans rated Loss: these loans are considered uncollectible and of such little value that their continuance as assets without establishment of a specific reserve is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather, that it is not practical or desirable to defer writing off a basically worthless asset even though practical recovery may be effected in the future.

On an annual basis, or more often if needed, the Company formally reviews the ratings of all commercial real estate, construction, and commercial business loans that have a principal balance of \$500,000 or more. Quarterly, the Company reviews the rating of any consumer loan, broadly defined, that is delinquent 90 days or more. Likewise, quarterly, the Company reviews the rating of any commercial loan, broadly defined, that is delinquent 60 days or more. Annually, the Company engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process.

#### NOTE 4. TROUBLE DEBT RESTRUCTURINGS

The Company adopted the amendments in Accounting Standards Update No. 2011-02 during the quarter ended September 30, 2011. As required, the Company reassessed all restructurings that occurred on or after the beginning of the current fiscal year (July 1, 2011) for identification as troubled debt restructurings. The Company identified as troubled debt restructurings certain receivables for which the allowance for credit losses had previously been measured under a general allowance for credit losses methodology (ASC 450-20). Upon identifying the reassessed receivables as troubled debt restructurings, the Company also identified them as impaired under the guidance in ASC 310-10-35. The amendments in Accounting Standards Update No. 2011-02 require prospective application of the impairment measurement guidance in Section 310-10-35 for those receivables newly identified as impaired. As of March 31, 2012, the recorded investment in receivables for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired under Section 310-10-35 was \$213,000 (310-40-65-1(b)), and the allowance for credit losses associated with those receivables, on the basis of a current evaluation of loss, was \$15,000 (310-40-65-1(b)).

#### **Modification Categories**

The Company offers a variety of modifications to borrowers. The modification categories offered can generally be described in the following categories:

Rate Modification – A modification in which the interest rate is changed.

Term Modification – A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification – A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification – A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

# Edgar Filing: Eagle Bancorp Montana, Inc. - Form 10-Q

Combination Modification – Any other type of modification, including the use of multiple categories above.

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

There were no loans modified as a troubled debt restructured loan within the previous 12 months and for which there was a payment default during the three and nine months ended March 31, 2012. A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral. As of March 31, 2012 and June 30, 2011, the Company had no commitments to lend additional funds to loan customers whose terms had been modified in trouble debt restructures.

| -23-                         |                                  |                               |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 6. EARNINGS PER SHARE

Basic earnings per share for the nine months ended March 31, 2012 was computed using 3,726,453 weighted average shares outstanding. Basic earnings per share for the nine months ended March 31, 2011 was computed using 3,899,808 weighted average shares outstanding. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,916,486 for the nine months ended March 31, 2012 and 3,899,808 for the nine months ended March 31, 2011.

#### NOTE 7. DIVIDENDS AND STOCK REPURCHASE PROGRAM

For the fiscal year July 1, 2011 through June 30, 2012, Eagle has paid dividends of \$0.07125 per share on August 26, 2011, November 25, 2011, and on March 1, 2012. A dividend of \$0.07125 per share was declared on April 19, 2012, payable May 25, 2012 to stockholders of record on February 10, 2012.

On April 26, 2011, the Company announced that its Board of Directors authorized a common stock repurchase program for 204,156 shares of common stock, effective April 27, 2011. The program was intended to be implemented through purchases made from time to time in the open market or through private transactions. The program terminated on December 27, 2011 with its final purchase of shares within the program.

On April 21, 2011, the Company entered into a pre-arranged Rule 10b5-1 written trading plan ("the Trading Plan") with a broker to facilitate the repurchase of its shares of common stock, in conformity with the provisions of Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. A broker selected by the Company had the authority under the terms and limitations specified in the Trading Plan to repurchase shares on the Company's behalf in accordance with the terms of the Trading Plan. The Trading Plan, facilitated the Company's share repurchase program, went into effect on April 27, 2011 and was completed on December 27, 2011. The Trading Plan enabled the Company to continue to repurchase shares without suspension for self-imposed trading blackout periods. The shares repurchased under the Trading Plan were in accordance with and subject to the limitations of the stock repurchase program.

After the expiration of the current Trading Plan, the Company may from time to time enter into subsequent trading plans under Rule 10b5-1 to facilitate the repurchase of its common stock pursuant to its share repurchase program. Information regarding share repurchases will be available in the Company's periodic reports on Form 10-Q and 10-K filed with the Securities and Exchange Commission as required by the applicable rules of the Exchange Act.

#### NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative instruments is interest rate risk. The Company entered into an interest rate swap agreement on August 27, 2010 with a third party to manage interest rate risk associated with a fixed-rate loan. The interest rate swap agreement effectively converted the loan's fixed rate into a variable rate. The derivatives and hedging accounting guidance (FASB ASC 815-10) requires that the Company recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with this guidance, the Company designates the interest rate swap on this fixed-rate loan as a fair value hedge.

The Company is exposed to credit-related losses in the event of nonperformance by the counterparties to this agreement. The Company controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect any counterparties to fail their obligations. The Company deals only with primary dealers.

If certain hedging criteria specified in derivatives and hedging accounting guidance are met, including testing for hedge effectiveness, hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships.

The hedge documentation specifies the terms of the hedged item and the interest rate swap. The documentation also indicates that the derivative is hedging a fixed-rate item, that the hedge exposure is to the changes in the fair value of the hedged item, and that the strategy is to eliminate fair value variability by converting fixed-rate interest payments to variable-rate interest payments.

-24-

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES - continued

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the hedged items in the same line item—noninterest income—as the offsetting loss or gain on the related interest rate swap.

The hedged fixed rate loan has an original maturity of 20 years and is not callable. This loan is hedged with a "pay fixed rate, receive variable rate" swap with a similar notional amount, maturity, and fixed rate coupons. The swap is not callable. At March 31, 2012, the loan had an outstanding principal balance of \$11,619,000, and the interest rate swap had a notional value of \$11,619,000.

### NOTE 9: FAIR VALUE DISCLOSURES

FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and, (iv) willing to transact.

-25-

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 9: FAIR VALUE DISCLOSURES - continued

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date, or convert to cash in the short term.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Available for Sale Securities – Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds,

credit information and the bond's terms and conditions, among other things.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

Loans Held for Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

Repossessed Assets – Fair values are valued at the time the loan is foreclosed upon and the asset is transferred from loans. The value is based upon primary third party appraisals, less costs to sell. The appraisals are generally discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Such discounts are typically significant and result in Level 3 classification of the inputs for determining fair value. Repossessed assets are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on same or similar factors above.

-26-

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 9: FAIR VALUE DISCLOSURES - continued

Loan Subject to Fair Value Hedge – The Company has one loan that is carried at fair value subject to a fair value hedge. Fair value is determined utilizing valuation models that consider the scheduled cash flows through anticipated maturity and is considered a Level 3 input.

Derivative financial instruments – Fair values for interest rate swap agreements are based upon the amounts required to settle the contracts. These instruments are valued using Level 3 inputs utilizing valuation models that consider: (a) time value, (b) volatility factors and (c) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Although the Company utilizes counterparties' valuations to assess the reasonableness of its prices and valuation techniques, there is not sufficient corroborating market evidence to support classifying these assets and liabilities as Level 2.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2012 and June 30, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollars in thousands):

|                                  |         | March   | 31, 2012 |            |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 9: FAIR VALUE DISCLOSURES - continued

The following table presents, for the nine months ended March 31, 2012, the changes in Level 3 assets and liabilities that are measured at fair value on a recurring basis.

|                                  |              | Total Realized/<br>Unrealized<br>Gains<br>(Losses) | Purchases,       |                |
|----------------------------------|--------------|--|------------------|----------------|
|                                  | Balance      | Included   | Sales,           | Balance        |
|                                  | as of        | in Noninterest                                     | Issuances, and   | as of          |
|                                  | July 1, 2011 | Income   | Settlements, net | March 31, 2012 |
|                                  |              | (In tho  | usands)          |                |
| Financial Assets (Liability):    |              |  |                  |                |
| Loan subject to fair value hedge | \$ 11,405    | 844  | (238)            | \$ 12,011      |
| Derivative financial instruments | 650          | (1,124   | -                | (474 )         |

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes financial assets and financial liabilities measured at fair value on a nonrecurring basis as of March 31, 2012 and June 30, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollars in thousands):

|                    | March 31, 2012 |         |          |            |  |
|--------------------|----------------|---------|----------|------------|--|
|                    | Level 1        | Level 2 | Level 3  | Total Fair |  |
|                    | Inputs         | Inputs  | Inputs   | Value      |  |
| Impaired loans     | \$ -           | \$ -    | \$ 624   | \$ 624     |  |
| Repossessed assets | -              | -       | 1,872    | 1,872      |  |
|                    |                |         |          |            |  |
|                    | June 30, 2011  |         |          |            |  |
|                    | Level 1        | Level 2 | Level 3  | Total Fair |  |
|                    | Inputs         | Inputs  | Inputs   | Value      |  |
| Impaired loans     | \$ -           | \$ -    | \$ 1,004 | \$ 1,004   |  |
| Repossessed assets |                |         |          | 1,181      |  |

During the quarter ended March 31, 2012, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$927,000 were reduced by specific valuation allowance allocations totaling \$303,000 to a total reported fair value of \$624,000 based on collateral valuations utilizing Level 3 valuation inputs.

Those financial instruments subject to FASB ASC Topic 825 are required to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which

it is practicable to estimate fair value. Below is a table that summarizes the fair market values of all financial instruments of the Company at March 31, 2012 and June 30, 2011, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.
