-

Section 2 Financial Information**Item 2.02 Results of Operations and Financial Condition.**

On December 8, 2004, Greif, Inc. (the Company) issued a press release (the Release) announcing its financial results for the fourth quarter and fiscal 2004 periods ended October 31, 2004. The full text of the Release is attached as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

The Release included the following non-GAAP financial measures (the non-GAAP Measures): (i) net income before restructuring charges, timberland gains and cumulative effect of change in accounting principle, (ii) net income before restructuring charges and timberland gains, (iii) diluted earnings per Class A and Class B share before restructuring charges, timberland gains and cumulative effect of change in accounting principle, (iv) diluted earnings per Class A and Class B share before restructuring charges and timberland gains, (v) operating profit before restructuring charges and timberland gains, and (vi) operating profit before restructuring charges. Net income before restructuring charges, timberland gains and cumulative effect of change in accounting principle is equal to GAAP net income plus restructuring charges less timberland gains and less cumulative effect of change in accounting principle, net of tax. Net income before restructuring charges and timberland gains is equal to GAAP net income plus restructuring charges less timberland gains, net of tax. Diluted earnings per Class A and Class B share before restructuring charges, timberland gains and cumulative effect of change in accounting principle is equal to GAAP diluted earnings per Class A and Class B share, respectively, plus the effects of restructuring charges less the effects of timberland gains and less the effects of cumulative effect of change in accounting principle, net of tax. Diluted earnings per Class A and Class B share before restructuring charges and timberland gains is equal to GAAP diluted earnings per Class A and Class B share, respectively, plus the effects of restructuring charges less the effects of timberland gains, net of tax. Operating profit before restructuring charges and timberland gains is equal to GAAP operating profit plus restructuring charges less timberland gains. Operating profit before restructuring charges is equal to GAAP operating profit plus restructuring charges.

The Company discloses the non-GAAP Measures because management believes that these non-GAAP Measures are a better indication of the Company's operational performance than GAAP net income, diluted earnings per Class A and Class B share and operating profit since they exclude restructuring charges and cumulative effect of change in accounting principle, which are not representative of ongoing operations, and timberland gains, which are volatile from period to period. The non-GAAP Measures provide a more stable platform on which to compare the historical performance of the Company.
