Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund (the Fund) for the semi-annual reporting period ended September 30, 2007. The Fund is a closed-end fund that trades under the New York Stock exchange symbol AWF. Effective January 26, 2007, the Fund changed its name from Alliance World Dollar Government Fund II, Inc. to AllianceBernstein Global High Income Fund, Inc. to reflect the new investment policies and guidelines, which are discussed below, and to brand the Fund with the same AllianceBernstein name used for most other funds in the AllianceBernstein family of funds. On April 13, 2007, the Fund acquired all of the assets and assumed the liabilities of Alliance World Dollar Government Fund, Inc. in exchange for shares of the Fund.

Investment Objective and Policies

This closed-end fund seeks high current income and secondarily, capital appreciation. At a Special Meeting of the Fund's stockholders held on December 12, 2006, stockholders approved a proposal to eliminate the fundamental investment restriction requiring that the Fund invest at least 65% of its total assets in sovereign debt obligations issued or guaranteed by foreign governments. The Fund is now permitted to invest, without limit, in securities denominated in non-U.S. currencies as well as those denominated in the U.S. dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of U.S. and non-

U.S. corporate issuers. For more information regarding the Fund's risks, please see A Word About Risk on page 4 and Note E Risks Involved in Investing in the Fund of the Notes to Financial Statements on page 33.

Investment Results

The table on page 5 shows the Fund's performance compared to its benchmark, the J.P. Morgan Emerging Markets Bond Index Global (JPM EMBI Global).

The Fund outperformed its benchmark for both the six- and 12-month periods ended September 30, 2007. Contributing positively to performance for both periods was the Fund's exposure to unhedged local currency emerging-market debt, which significantly outperformed the benchmark. The Fund's exposure to local debt, particularly in Brazil and Turkey, significantly added to the Fund's premium. The Fund's underweight in Venezuela, which underperformed, also contributed positively, as did the Fund's use of leverage.

Detracting from performance for both the six- and 12-month periods ended September 30, 2007, was the Fund's overweight in Argentina, which underperformed, and the Fund's underweight in Ecuador. The Fund's defensive security selection in Argentina offset some of the negative impact of the country weighting.

Market Review and Investment Strategy

Volatility returned to the capital markets as the credit crisis in the U.S.

subprime mortgage market spilled over, in the form of a liquidity crunch, into other sectors and asset classes. As investors flocked to the safety of the highest-quality securities, government bond yields fell worldwide and yield spreads widened across fixed-income markets.

Overall growth in emerging-market countries remained quite strong, aided by solid commodity prices. Inflows into the asset class slowed and external accounts turned somewhat less favorable. Dollar reserve accumulation slowed in key countries like Russia, Brazil and Argentina. Consequently, emerging-market debt posted a relatively weak six-month return of 1.12% as represented by the JPM EMBI Global despite a rally in September 2007, after the U.S. Federal Reserve (the Fed) cut interest rates by 50 basis points to 4.75%. Emerging-market debt, however, proved resilient, outperforming both investment-grade and high-yield corporates during the reporting period. Emerging-market spreads widened 44 basis points to end the 12-month period at 214 basis points over Treasuries.

For the six-month period, divergence appeared as the performance range across emerging-market debt became more correlated with the strength of individual country fundamentals. Non-Latin countries at 2.04% outpaced the Latin region at 0.33%. Outperforming countries within the Index for the six-month period included Ecuador at 9.32%, Turkey at 3.81% and Brazil at 3.15%. Ecuador bounced back, benefiting from the rising price of oil, a major source of federal revenues, and waning concerns

over debt restructuring. Underperforming countries for the period included Argentina at -17.02% and Venezuela at -9.74%. Argentina was negatively impacted during the period by skepticism over the accuracy of government economic data, and by the viability of fiscal and monetary policies and the willingness of the presumed next president to change those policies.

Emerging-market debt in local currency terms (unhedged in U.S. dollars) was significantly stronger than U.S. dollar-denominated debt. Local currency emerging-market debt overall returned 8.87% for the six-month reporting period due to strong local currencies and falling interest rates. Brazil and Turkey, two of the Fund's largest local currency holdings, significantly outperformed, posting strong returns of 20.03% and 29.91%, respectively. The Brazilian real excelled versus the U.S. dollar and enhanced the gains from the Fund's longstanding Brazil overweight. Dollar-denominated Brazilian sovereigns benefited from ongoing strength in economic fundamentals, as well as growing investor recognition that Brazil would continue to retire external debt.

Lastly, the appreciation of the Turkish lira during the 12-month period under review magnified the positive impact of political and economic news on Turkish debt prices. The lira was one of the world's strongest currencies versus the U.S. dollar, which served to boost returns of Turkish bonds in dollar terms. On the political front, investors expressed confidence that

2 ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND

newly elected President Abdullah Gul would maintain Turkey's debt-friendly fiscal and monetary policies. Positive economic developments included an

official rate cut in September 2007 that prompted expectations of further cuts, and successful efforts to bring down inflation.

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance shown on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein Global High Income Fund Shareholder Information

The Fund's NYSE trading symbol is AWF. Weekly comparative and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times*, each Saturday in *Barron's* and other newspapers in a table called "Closed-End Funds." For additional shareholder information regarding this Fund, please see page 40.

Benchmark Disclosure

The unmanaged J.P. Morgan Emerging Markets Bond Index Global (JPM EMBI Global) does not reflect fees and expenses associated with the active management of a mutual fund portfolio. The JPM EMBI Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, Brady bonds, loans and Eurobonds. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

The Fund invests primarily in foreign securities which may result in significant fluctuations due to changes in foreign exchange rates and the possibility of substantial volatility due to political and economic uncertainty in foreign countries. The Fund may invest in securities of emerging market nations, which may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed foreign countries. Fluctuations in the exchange rates between the U.S. dollar and foreign currencies may negatively affect the value of the Fund's investments or reduce the returns of the Fund. Price fluctuation in the Fund's portfolio securities may be caused by changes in the general level of interest rates or changes in bond credit quality ratings. Please note, as interest rates rise, existing bond prices fall and can cause the value of an investment in the Fund to decline. Changes in interest rates have a greater effect on bonds with longer maturities than on those with shorter maturities. At the discretion of the Fund's Adviser, the Fund may invest substantially all of its net assets in bonds that are rated below investment grade (i.e., junk bonds) and up to 50% in securities that are not readily marketable. These high-yield bonds involve a greater risk of default and price volatility than other bonds. Investing in non investment grade securities presents special risks, including credit risk. Investments in the Fund are not guaranteed because of fluctuation in the net asset value of the underlying fixed-income related investments. Similar to direct bond ownership, bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the Fund. The Fund utilizes leverage, which increases volatility since leverage magnifies both positive and negative performance. The Fund maintains asset coverage of at least 300%. While the Fund invests principally in bonds and other fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments.

NOTES TO FINANCIAL STATEMENTS

September 30, 2007 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund), formerly Alliance World Dollar Government Fund II, Inc. was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles, which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on The NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market, (OTC) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. Government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the Adviser) may establish

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 27

Notes to Financial Statements

procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because, most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of investments and foreign currency denominated assets and liabilities.

3. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

4. Investment Income and Investment Transactions

Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

5. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. generally accepted accounting principles. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the Investment Advisory Agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Prior to October 1, 2005, the Fund paid the Adviser an advisory fee at an annual rate of 1.00% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

Pursuant to the Administration Agreement in effect until October 1, 2005, the Fund paid the Adviser an administrative fee of .15% of the Fund's average weekly net assets. Effective that date pursuant to an Amended Administration Agreement, the Fund reimburses the Adviser for its costs, including legal and accounting costs, in serving as Administrator of the Fund; provided, however, that the reimbursement may not exceed the prior fee of .15% of average weekly net assets. For the six months ended September 30, 2007, the Fund paid the Adviser \$62,127 for its administrative services, representing .01% of the Fund's average weekly net assets.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. ("ABIS"), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended September 30, 2007, there was no reimbursement paid to ABIS.

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 29

Notes to Financial Statements

NOTE C**Investment Transactions**

Purchases and sales of investment securities (excluding short-term investments) for the six months ended September 30, 2007, were as follows:

	Purchases	Sales
Investment securities (excluding		
U.S. government securities)	\$ 324,759,267	\$ 341,862,530
U.S. government securities	735,762	0

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding swap contracts and foreign currency transactions) are as follows:

Gross unrealized appreciation	\$ 81,978,696
Gross unrealized depreciation	(15,315,795)
Net unrealized appreciation	\$ 66,662,901

1. Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sale commitments denominated in foreign currencies and for investment purposes. A forward currency exchange contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Fund.

The Fund's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Fund having a value at least equal to the aggregate amount of the Fund's commitments under forward currency exchange contracts entered into with respect to position hedges.

Risks may arise from the potential inability of the counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currencies relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Fund has in that particular currency contract.

2. Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign government securities and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

For the six months ended September 30, 2007, the Fund had no transactions in written options.

3. Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates and credit risk or for investment purposes. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain/loss on swaps, in addition to realized gain/loss recorded upon the termination of swap contracts on the statement of operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of investments.

The Fund may enter into credit default swaps. The Fund may purchase credit protection on the referenced obligation of the credit default swap (Buy Contract) or provide credit protection on the referenced obligation of the credit default swap (Sale Contract). A sale/(buy) in a credit default swap provides upon the occurrence of a credit event, as defined in the swap agreement, for the Fund to buy/(sell) from/(to) the counterparty at the notional amount (the Notional Amount) and receive/(deliver) the principal amount of the referenced obligation. If a credit event occurs, the maximum payout amount for a Sale Contract is limited to the Notional Amount of the swap contract (Maximum Payout Amount). During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the Notional Amount. These interim payments are recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer and no credit event occurs, it will lose its investment. In addition, if the Fund is a seller and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received, may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

At September 30, 2007, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$82,610,000, with net unrealized appreciation of \$3,193,214 and terms ranging from 5 months to 3 years, as reflected in the portfolio of investments.

In certain circumstances, the Fund may hold Sale Contracts on the same referenced obligation and with the same counterparty from which it has purchased credit protection, which may reduce its obligation to make payments on Sale Contracts, if a credit event occurs. At September 30, 2007, the Fund had no Buy Contracts outstanding with the same referenced obligations and same counterparties as Sales Contracts outstanding.

32 ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND

Notes to Financial Statements

4. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

For the six months ended September 30, 2007, the average amount of reverse repurchase agreements outstanding was \$165,182,622 and the daily weighted average interest rate was 4.85%.

NOTE D

Capital Stock

During the six months ended September 30, 2007 and the year ended March 31, 2007, the Fund issued no shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

Leverage Risk The Fund may use certain investment techniques that have increased risks. For example, the Fund may use leverage, through borrowings, to

enhance its returns. For this purpose, the Fund may use reverse repurchase agreements and dollar rolls, which are considered borrowings, as part of its investment strategy. Borrowings allow the Fund to increase the amount of money available to invest in debt securities. As long as the income from the securities financed is greater than the interest cost of the borrowings, the Fund's investors benefit from higher returns than if the Fund were not leveraged.

The use of leverage, which is usually considered speculative, involves certain risks to stockholders. These include a higher volatility of the NAV of the common stock caused by favorable or adverse changes in interest rates. In addition, fluctuations in the interest rates on a fund's borrowings will affect the return to stockholders, with increases in interest rates decreasing the fund's return.

To the extent that the current interest rate on a fund's borrowings approaches the net return on the leveraged portion of the fund's investment portfolio, the benefit of leverage to stockholders will be reduced. If the current interest rate on the borrowings were to exceed the net return on that portion of the fund's portfolio, the fund's leverage would result in a lower rate of return to stockholders and in a lower NAV than if a fund were not leveraged.

NOTE F

Acquisition of Alliance World Dollar Government Fund, Inc. by AllianceBernstein Global High Income Fund (the Fund)

On April 13, 2007, the Fund acquired all of the net assets and assumed all of the liabilities of Alliance World Dollar Government Fund, Inc. (AWG) in a tax free event, pursuant to an Agreement and Plan of Acquisition and Liquidation approved by the stockholders of AWG at a Special Meeting of Stockholders held on January 19, 2007. As a result of the acquisition, stockholders of AWG received shares of the Fund equivalent to the aggregate net asset value of the shares they held in AWG. Stockholders participating in AWG's dividend reinvestment plan received full and fractional shares of the Fund. Other stockholders received cash in lieu of fractional shares. On April 13, 2007, the acquisition was accomplished by a tax-free exchange of 8,687,393 shares of the Fund for 8,897,498 shares of Alliance World Dollar Government Fund, Inc. The aggregate net assets of the Fund and Alliance World Dollar Government Fund, Inc. immediately before the acquisition were \$1,001,015,961 and \$128,584,856 (including \$11,483,514 of net unrealized depreciation of investments and foreign currency denominated assets and liabilities), respectively. Immediately after the acquisition, the combined net assets of the Fund amounted to \$1,129,600,816.

NOTE G**Distributions to Shareholders**

The tax character of distributions to be paid for the year ending March 31, 2008 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended March 31, 2007 and March 31, 2006 were as follows:

	2007	2006
Distributions paid from:		
Ordinary income	\$ 66,464,867	\$ 60,647,076
Total taxable distributions	66,464,867	60,647,076
Total distributions paid	\$ 66,464,867	\$ 60,647,076

As of March 31, 2007, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 10,348,257
Undistributed long-term capital gains	14,268,618 ^(a)
Unrealized appreciation/(depreciation)	86,274,080 ^(b)
Total accumulated earnings/(deficit)	\$ 110,890,955

^(a) During the fiscal year, the Fund utilized capital loss carryforwards of \$17,972,214.

^(b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium and the difference between book and tax treatment of swap income.

NOTE H**Legal Proceedings**

As has been previously reported, the staff of the U.S. Securities and Exchange Commission (SEC) and the Office of the New York Attorney General (NYAG) have been investigating practices in the mutual fund industry identified as market timing and late trading of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that the Adviser provide information to them. The Adviser has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below.

Numerous lawsuits have been filed against the Adviser and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. The lawsuits are now

pending in the United States District Court for the District of Maryland pursuant to a ruling by the Judicial Panel on Multidistrict Litigation transferring and centralizing all of the mutual funds involving market and late trading in the District of Maryland (the Mutual Fund MDL).

The Adviser believes that these matters are not likely to have a material adverse effect on the Fund or the Adviser's ability to perform advisory services relating to the Fund.

NOTE I

Recent Accounting Pronouncements

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing a fund's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded in the current period. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006 and is to be applied to all open tax years as of the effective date. On December 22, 2006, the Securities and Exchange Commission notified the industry that the implementation of FIN 48 by registered investment companies could be delayed until the last business day of the first required financial statement reporting period for fiscal years beginning after December 15, 2006. On September 28, 2007, the Portfolio implemented FIN 48 which supplements FASB 109, Accounting for Income Taxes , and determined that there was no effect on the financial statements.

On September 20, 2006, the FASB released Statement of Financial Accounting Standards No. 157 Fair Value Measurements (FAS 157). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair-value measurements. The application of FAS 157 is required for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 157 and its impact on the financial statements has not yet been determined.

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 37

Financial Highlights

(a) *As of April 1, 2003, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. These interim payments are reflected within net realized and unrealized gain (loss) on swap contracts, however prior to April 1, 2003, these interim payments were reflected within interest income/expense on the statement of operations. The effect of this change for the year ended March 31, 2004, was to decrease net investment income per share by \$0.06 and increase net realized and unrealized gain (loss) on investment transactions per share by \$0.06, and decrease the ratios of net investment income and expenses to average net assets by 0.50% and 0.20%, respectively.*

(b) *Based on average shares outstanding.*

(c) *Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.*

(d) *Annualized.*

Board of Directors

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 219-4218. The Fund also distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper, Inc., Morningstar, Inc. and Bloomberg. The Fund's NYSE trading symbol is AWF. Weekly comparative net asset value and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times* and each Saturday in *Barron's* and other newspapers in a table called "Closed-End Funds."

Information Regarding New or Amended Investment Policies

The Fund's Board of Directors recently approved a broader investment policy that permits the Fund to invest in other investment companies to the full extent permitted by the Investment Company Act of 1940 (the "1940 Act") and the rules thereunder. The Board of Directors also

approved the Fund's investments of uninvested cash balances in an affiliated money market fund as permitted by Rule 12d1-1 under the 1940 Act.

Dividend Reinvestment Plan

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect to receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.
