NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

September 30, 2008

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of Zions Bancorporation (the Parent) and its majority-owned subsidiaries (collectively the Company, Zions, we, our, us) have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Certain prior period amounts have been reclassified to conform to the current period presentation. These reclassifications did not affect net income or shareholders' equity.

Operating results for the three- and nine-month periods ended September 30, 2008 are not necessarily indicative of the results that may be expected in future periods. The consolidated balance sheet at December 31, 2007 is from the audited financial statements at that date, but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

The Company provides a full range of banking and related services through banking subsidiaries in ten Western and Southwestern states as follows: Zions First National Bank (Zions Bank), in Utah and Idaho; California Bank & Trust (CB&T); Amegy Corporation (Amegy) and its subsidiary, Amegy Bank, in Texas; National Bank of Arizona (NBA); Nevada State Bank (NSB); Vectra Bank Colorado (Vectra), in Colorado and New Mexico; The Commerce Bank of Washington (TCBW); and The Commerce Bank of Oregon (TCBO). The Parent also owns and operates certain nonbank subsidiaries that engage in the development and sale of financial technologies and related services.

2. CERTAIN RECENT ACCOUNTING PRONOUNCEMENTS

In March 2008, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*. SFAS 161, among other things, requires greater transparency in disclosing information about derivatives including the objectives for their use, the volume of derivative activity, tabular disclosure of financial statement amounts, and any credit-risk-related features. The Statement is effective for annual and interim financial statements beginning after November 15, 2008. Earlier application is encouraged but not required. Management is evaluating the impact this Statement may have on the Company's financial statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations*, and SFAS No. 160, *Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. These new standards will significantly change the financial accounting and reporting of business combination transactions and noncontrolling (or minority) interests in consolidated financial statements. Both Statements are effective for annual and interim financial statements beginning on or after December 15, 2008. Generally, adoption is prospective and early adoption is prohibited. Management is evaluating the impact these Statements may have on the Company's financial statements.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Effective January 1, 2008, we adopted the provisions of FASB Staff Position (FSP) FIN 39-1, *Offsetting of Amounts Related to Certain Contracts*. FSP FIN 39-1 permits entities to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against recognized fair value amounts of derivatives executed with the same counterparty under a master netting arrangement. At September 30, 2008, cash collateral was used to reduce recorded amounts of derivative assets by approximately \$69 million. The reduction of derivative liabilities was insignificant.

Additional accounting pronouncements recently adopted are discussed where applicable in the Notes to Consolidated Financial Statements.

3. ACQUISITION

Effective September 5, 2008, the Company acquired from the FDIC the insured deposits and certain assets of the failed Silver State Bank, headquartered in Henderson, Nevada. The acquisition was made through the Company's Nevada State Bank and National Bank of Arizona subsidiaries and included approximately \$737 million of deposits and \$66 million of assets.

4. INVESTMENT SECURITIES

As a result of an ongoing valuation review of our investment securities portfolio, we recognized a pretax charge of approximately \$28.0 million during the third quarter of 2008 for certain investment securities deemed to have other-than-temporary impairment (OTTI). Details of this OTTI are as follows:

\$19.2 million for three bank and insurance trust preferred collateralized debt obligations (CDOs)

\$1.3 million for two bank and insurance income notes (OTTI also taken previously)

\$4.1 million for three trust preferred CDOs related to real estate investment trusts (REITs) (OTTI also taken previously)

\$3.4 million for two structured asset-backed (ABS) CDOs

For the first nine months of 2008, total OTTI was \$107.6 million. As discussed in Note 5, valuation losses on securities purchased from Lockhart Funding, LLC (Lockhart) during the first quarter of 2008 were \$5.2 million. The total of these amounts comprises the Impairment losses on investment securities and valuation losses on securities purchased from Lockhart Funding in the statement of income for the first nine months of 2008.

During the second quarter of 2008, we reassessed the classification of certain asset-backed and trust preferred CDOs. On April 28, 2008, we reclassified approximately \$1.2 billion at fair value of these available-for-sale (AFS) securities to held-to-maturity (HTM). The related unrealized pretax loss of approximately \$273 million included in accumulated other comprehensive income (OCI) remained in OCI and is being amortized as a yield adjustment through earnings over the remaining terms of the securities. No gain or loss was recognized at the time of reclassification. We consider the HTM classification to be more appropriate because we have the ability and the intent to hold these securities to maturity.

At September 30, 2008, unrealized pretax losses recognized in OCI were \$248.5 million for HTM securities and \$145.8 million for AFS securities.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

5. OFF-BALANCE SHEET ARRANGEMENT

Zions Bank provides a liquidity facility for a fee to Lockhart, which is an off-balance sheet qualifying special-purpose entity (QSPE) securities conduit. Lockhart was structured to purchase floating rate U.S. Government and AAA-rated securities with funds from the issuance of asset-backed commercial paper. Zions Bank also provides interest rate hedging support and administrative and investment advisory services for a fee.

Pursuant to the Liquidity Agreement, Zions Bank is required to purchase nondefaulted securities from Lockhart to provide funds for Lockhart to repay maturing commercial paper upon Lockhart's inability to access a sufficient amount of funding in the commercial paper market, or upon a commercial paper market disruption as specified in governing documents for Lockhart. Pursuant to the governing documents, including the Liquidity Agreement, if any security in Lockhart is downgraded below AA-, or the downgrade of one or more securities results in more than ten securities having ratings of AA+ to AA-, Zions Bank must either 1) place its letter of credit on the security, 2) obtain credit enhancement from a third party, or 3) purchase the security from Lockhart at book value. Zions Bank may incur losses if it is required to purchase securities from Lockhart when the fair value of the securities at the time of purchase is less than book value.

During the first and second quarters of 2008, Zions Bank purchased an aggregate of \$1,067 million of securities and related accrued interest at book value from Lockhart. Of these purchases, \$792 million were required by the Liquidity Agreement when the securities, and MBIA Inc. which insured certain of the securities, were downgraded below AA-. The remaining \$275 million were due to the inability of Lockhart to issue a sufficient amount of commercial paper.

The securities purchased included \$987 million which comprised the entire remaining small business loan securitizations created by Zions Bank and held by Lockhart. No gain or loss was recognized on these purchases. Upon dissolution of the securitization trusts (including a total of \$170 million of related securities owned by the Parent), Zions Bank recorded \$1,180 million of loans on its balance sheet including \$23 million of premium. See further discussion of this premium in Note 9.

The commitment of Zions Bank to Lockhart cannot exceed the book value of Lockhart's securities portfolio, which was approximately \$828 million at September 30, 2008. Lockhart is limited in size by program agreements, agreements with rating agencies, and the size of the liquidity facility. The book value of Lockhart's remaining securities portfolio exceeded the fair value of the securities by approximately \$110 million at September 30, 2008. During the first quarter of 2008, Zions Bank recorded valuation losses of approximately \$5.2 million when it purchased certain securities from Lockhart.

As permitted by the governing documents, the Company has also purchased asset-backed commercial paper from Lockhart and held approximately \$557 million on its balance sheet at September 30, 2008. The average amount of Lockhart commercial paper included in money market investments for the three months ended September 30, 2008 was approximately \$597 million. These purchases were made to provide liquidity to Lockhart due to ongoing contraction and disruptions in the asset-backed commercial paper markets. If at any given time the Company were to own more than 90% of Lockhart's outstanding commercial paper (beneficial interest), Lockhart would cease to be a QSPE and the Company would be required to consolidate Lockhart in its financial statements.

On September 15, 2008, the FASB issued a proposed amendment, *Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140*, that among other things, would remove the concept of a QSPE and remove the exception from applying FIN 46R to QSPEs. The proposed amendment would be effective for calendar-year companies beginning in 2010. Management is monitoring these developments as they relate to the operations and existence of Lockhart.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

6. DEBT

During the third quarter and first nine months of 2008, the Company issued a net amount of \$28.5 million and \$261.3 million, respectively, of one- and two-year senior medium-term notes at coupon rates ranging from 4.50% to 5.65%. Interest is payable semiannually. These unsecured notes were sold via Zions' online auction process and direct sales. They were issued under the Company's existing shelf registration with the Securities and Exchange Commission (SEC).

The Company repaid senior medium-term notes of \$137 million and \$155 million during the third quarter and first nine months of 2008, respectively.

7. INCOME TAXES

The lower effective tax rate during the third quarter of 2008 is mainly due to lower taxable income in 2008, which increased the proportion of nontaxable income relative to total income. Income tax expense for the first nine months of 2008 included a net benefit of approximately \$5.3 million primarily from a settlement with governmental authorities during the second quarter that allowed the Company to reduce its liability and related interest for uncertain tax positions under the provisions of FIN 48.

Balance, September 30, 2007	\$ (71,586)	\$ 434	\$ (15,762)	\$ (86,914)

On July 2, 2008, the Company completed a \$47 million offering of 9.50% Series C Fixed-Rate Non-Cumulative Perpetual Preferred Stock. The Company issued 46,949 shares in the form of 1,877,971 depository shares with each depository share representing a 1/40th ownership interest in a share of the preferred stock. Terms and conditions, except for the dividend amount, are generally similar to the existing issuance of Series A floating rate preferred stock described in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. The offering was sold via Zions' online auction process and direct sales primarily by the Company's broker/dealer subsidiary.

During September 8-11, 2008, the Company issued \$250 million of new common stock consisting of 7,194,079 shares at an average price of \$34.75 per share. Net of issuance costs and fees, this issuance added \$244.9 million to common shareholders' equity.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

On October 27, 2008, the U.S. Department of the Treasury gave preliminary approval to the Company's application to receive a capital investment of \$1.4 billion. The application was made under the Treasury's Capital Purchase Program announced on October 14, 2008. The capital investment is expected to be received prior to year-end and will be in the form of nonvoting senior preferred shares pari passu with the Company's existing preferred shares. The Company will also issue to the Treasury warrants exercisable for 10 years to purchase \$210 million of the Company's common shares. The number of common shares issuable under the warrants will be determined from the average share price during a specified 20-day trading period. The preferred shares will qualify for regulatory Tier 1 capital and may be redeemed after three years. They will have a dividend rate of 5% for the first five years, increasing to 9% thereafter. Among other things, the Company will be subject to restrictions and conditions including those related to common dividends, share repurchases, executive compensation, and corporate governance.

9. FAIR VALUE

Effective January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements*, and SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. Both Standards address the application of fair value accounting and reporting.

Fair Value Measurements

SFAS 157 defines fair value, establishes a consistent framework for measuring fair value, and enhances disclosures about fair value measurements. In February 2008, the FASB amended SFAS 157 with the issuance of FSP FAS 157-1, which excludes with certain exceptions SFAS No. 13, *Accounting for Leases*, from the scope of SFAS 157, and FSP FAS 157-2, which delayed the adoption of SFAS 157 for one year for the measurement of nonfinancial assets and nonfinancial liabilities. There was no material effect from the adoption of SFAS 157 on the Company's consolidated financial statements.

SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. To measure fair value, SFAS 157 has established a hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities; includes certain U.S. Treasury and other U.S. Government and agency securities actively traded in over-the-counter markets; certain securities sold, not yet purchased; and certain derivatives.

Level 2 Observable inputs other than Level 1 including quoted prices for similar assets or liabilities, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data; also includes derivative contracts whose value is determined using a pricing model with observable market inputs or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. Government and agency securities; certain CDO securities; corporate debt securities; certain private equity investments; certain securities sold, not yet purchased; and certain derivatives.

Level 3 Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes observable inputs for nonbinding single dealer quotes not corroborated by observable market data. This category generally includes certain CDO securities, certain private equity investments, and retained interests from securitizations.

Table of Contents**ZIONS BANCORPORATION AND SUBSIDIARIES**

The Company uses fair value to measure certain assets and liabilities on a recurring basis when fair value is the primary measure for accounting. This is done primarily for available-for-sale and trading investment securities; certain private equity investments; certain retained interests from securitizations; securities sold, not yet purchased; and derivatives. Fair value is used on a nonrecurring basis to measure certain assets when applying lower of cost or market accounting or when adjusting carrying values, such as for loans held for sale, impaired loans, certain private equity investments, and other real estate owned. Fair value is also used when evaluating impairment on certain assets, including held-to-maturity and available-for-sale securities, goodwill, and core deposit and other intangibles, and for annual disclosures required by SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*.

Available-for-sale and trading investment securities are fair valued under Level 1 using quoted market prices when available for identical securities. When quoted prices are not available, fair values are determined under Level 2 using quoted prices for similar securities or independent pricing services that incorporate observable market data when possible. Available-for-sale securities include certain CDOs that consist of trust preferred securities related to banks and insurance companies and to REITs. Where possible, the fair value of these CDOs is priced under Level 2 using a whole market price quote method that incorporates matrix pricing and uses the prices of securities of similar type and rating to value comparable securities held by the Company. This method is described more fully in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. If sufficient information is not available for matrix pricing, fair value is determined under Level 3 using nonbinding single dealer quotes or the model pricing discussed subsequently.

At September 30, 2008 due to the market conditions subsequently described, the Company determined that certain CDOs with an amortized cost of \$1,878 million at September 30, 2008 previously fair valued under a Level 2 matrix approach would be more appropriately fair valued under a Level 3 cash flow modeling approach. Additional securities of \$190 million at amortized cost previously fair valued with Level 3 single dealer quotes were also moved to a Level 3 cash flow modeling approach. The total of these amounts, or \$2,068 million, included approximately \$1,353 million accounted for as HTM securities.

Because of recent market disruptions, particularly during the third quarter of 2008, both the SEC on September 30, 2008 (Release No. 2008-234) and the FASB on October 10, 2008 (FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*) issued additional guidance on fair value accounting when markets become distressed and inactive. In general, this guidance clarifies under such market conditions when and how an entity might appropriately determine fair value using unobservable inputs under Level 3 rather than using observable inputs under Level 2, particularly when significant adjustments become necessary under Level 2 and extensive judgment must be employed to evaluate inputs and results in estimating fair value.

The Company values its CDO portfolio using several methodologies that primarily include internal and third party models and to a lesser extent dealer quotes and pricing services. A licensed model is used internally to fair value bank and insurance trust preferred CDOs. This model uses estimated values of expected losses on underlying collateral and applies market-based discount rates on resultant cash flows to estimate fair value. Third party models are used to fair value certain REIT and ABS CDOs. These models utilize relevant data assumptions, which are evaluated by the Company for reasonableness. These assumptions include but are not limited to probability of default, collateral recovery rates, discount rates, over-collateralization levels, and rating transition probability matrices from rating agencies. The model prices obtained from third party services were evaluated for reasonableness including quarter to quarter changes in assumptions and comparison to other available data which included third party and internal model results and valuations. The Company's decision to use Level 3 model pricing for certain CDOs was made due to continued trading contraction of these securities and the lack of observable market inputs to value such securities.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Private equity investments valued under Level 2 on a recurring basis are investments in partnerships that invest in financial institutions. Fair values are determined from net asset values provided by the partnerships. Private equity investments valued under Level 3 on a nonrecurring basis are recorded initially at acquisition cost, which is considered the best indication of fair value unless there have been significant subsequent positive or negative developments that justify an adjustment in the fair value estimate. Subsequent adjustments to recorded amounts are based as necessary on current and projected financial performance, recent financing activities, economic and market conditions, market comparables, market liquidity, sales restrictions, and other factors.

Retained interests from securitizations are fair valued under Level 3 based on the modeling techniques previously described. The assumptions used in the models are evaluated quarterly.

Derivatives are fair valued primarily under Level 2 using third party services. Observable market inputs include yield curves, option volatilities, counterparty credit risk, and other related data. Certain foreign exchange derivatives have been fair valued under Level 1 because they are traded in active markets. Amounts disclosed in the following table are net of the cash collateral offsets pursuant to the guidance of FSP FIN 39-1, as discussed in Note 2.

Securities sold, not yet purchased are fair valued under Level 1 when quoted prices are available for the securities involved. Those under Level 2 are fair valued similar to trading account investment securities.

Assets and liabilities measured at fair value on a recurring basis, including those elected under SFAS 159, are summarized as follows at September 30, 2008 (*in thousands*):

	Level 1	Level 2	Level 3	Total
ASSETS				
Investment securities:				
Available-for-sale	\$ 40,610	\$ 1,985,267	\$ 766,359	\$ 2,792,236

	Level 1	Level 2	Level 3	Total	Three months ended September 30, 2008	Nine months ended September 30, 2008
ASSETS						
Loans held for sale		\$ 16,355		\$ 16,355	\$ (355)	\$ (349)
Impaired loans		200,805		200,805	(2,759)	(34,887)
Other noninterest-bearing investments:						
Private equity			\$ 63,430	63,430	7,957	550
	\$	\$ 217,160	\$ 63,430	\$ 280,590	\$ 4,843	\$ (34,686)

Loans held for sale relate to loans purchased under the Small Business Administration 7(a) program. They are fair valued under Level 2 based on quotes of comparable instruments.

Impaired loans that are collateral-dependent are fair valued under Level 2 based on the fair value of the collateral, which is determined when appropriate from appraisals and other observable market data.

Fair Value Option

SFAS 159 allows for the option to report certain financial assets and liabilities at fair value initially and at subsequent measurement dates with changes in fair value included in earnings. The option may be applied instrument by instrument, but is on an irrevocable basis. As of January 1, 2008, the Company elected the fair value option for one available-for-sale REIT trust preferred CDO security and three retained interests on selected small business loan securitizations. The cumulative effect of adopting SFAS 159 decreased retained earnings at January 1, 2008 by approximately \$11.5 million.

The REIT trust preferred CDO was selected as part of a directional hedging program to hedge the credit exposure the Company has to homebuilders in its REIT CDO portfolio. This allows the Company to avoid complex hedge accounting provisions associated with the implemented hedging program. Management selected this security because it had the most exposure to the homebuilder market compared to the other REIT CDOs in the Company's portfolio, both in dollar amount and as a percentage, and was therefore considered the most suitable for hedging.

The retained interests were selected to more appropriately reflect their fair value and to account for increases and decreases in their fair value through earnings. Net decreases in fair value of approximately \$2.1 million during the first and second quarters of 2008 were recognized in fair value and nonhedge derivative income (loss) in the statement of income. However as discussed in Note 5, during the first and second quarters of 2008, Zions Bank purchased securities from Lockhart that comprised the entire remaining small business loan securitizations created by Zions Bank and held by Lockhart. These retained interests related to the securities purchased and, as part of the purchase transaction, were included with the \$23 million premium amount recorded with the loan balances at Zions Bank.

10. GUARANTEES AND COMMITMENTS

The following are guarantees issued by the Company (*in thousands*):

	September 30, 2008	December 31, 2007
Standby letters of credit:		
Financial	\$ 1,349,044	\$ 1,317,304
Performance	272,092	351,150
	\$ 1,621,136	\$ 1,668,454

The Company's Annual Report on Form 10-K for the year ended December 31, 2007 contains further information on these letters of credit including their terms and collateral requirements. At September 30, 2008, the carrying value recorded by the Company as a liability for these guarantees was \$5.6 million.

As of September 30, 2008, the Parent has guaranteed approximately \$300.4 million of debt primarily issued by affiliated trusts issuing trust preferred securities.

During the first quarter of 2008, the Company's subsidiary banks recorded an aggregate pretax cash gain of approximately \$12.4 million from the partial redemption of their equity interests in Visa Inc. The redemption approximated 39% of the subsidiary banks' equity interests and was included in equity securities gains (losses), net in the statement of income for the nine months ended September 30, 2008. Also during the first quarter of 2008, the Company reversed approximately \$5.6 million of the \$8.1 million accrual established during the fourth quarter of 2007 for indemnification liabilities related to certain Visa (SM) litigation. The effect of this reversal is included in other noninterest expense in the statement of income for the nine months ended September 30, 2008. In accordance with generally accepted accounting principles and recent guidance from the SEC, the Company's subsidiary banks have not recognized any value for their remaining investment in Visa.

See Note 5 for a discussion of Zions Bank's commitment to Lockhart.

11. RETIREMENT PLANS

The following discloses the net periodic benefit cost (credit) and its components for the Company's pension and postretirement plans (*in thousands*):

	Pension benefits		Supplemental retirement benefits		Postretirement benefits		Pension benefits		Supplemental retirement benefits		Postretirement benefits

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

As disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, the Company has frozen its participation and benefit accruals for the pension plan and its contributions for individual benefit payments in the postretirement benefit plan. The settlement gain resulted from the Company's curtailment of coverage effective June 1, 2008 for certain participants in the postretirement benefit plan and was accounted for in accordance with applicable accounting standards.

12. OPERATING SEGMENT INFORMATION

We manage our operations and prepare management reports and other information with a primary focus on geographical area. As of September 30, 2008, we operate eight community/regional banks in distinct geographical areas. Performance assessment and resource allocation are based upon this geographical structure. Zions Bank operates 114 branches in Utah and 25 branches in Idaho. CB&T operates 90 branches in California. Amegy operates 87 branches in Texas. NBA operates 78 branches in Arizona. NSB operates 71 branches in Nevada. Vectra operates 40 branches in Colorado and one branch in New Mexico. TCBW operates one branch in the state of Washington. TCBO operates one branch in Oregon. Additionally, Zions Bank, CB&T, Amegy, NBA, Vectra, and TCBW each operate a foreign branch in the Grand Cayman Islands. NSB has an application pending to open a foreign branch. In addition, as of September 30, 2008, NBA operated 4 branches and NSB operated 13 branches from the failed Silver State Bank, which the Company acquired as discussed in Note 3. Subsequent to September 30, 2008, NBA and NSB closed certain of these branches and are still determining which of the remaining branches will continue to be operated.

On September 15, 2008, the Company announced it had entered into a definitive agreement to exit 49 grocery store branches (28 in Nevada and 21 in Utah). The leases on these branches are being assumed by another bank; however, all loans and deposits will be transferred to nearby Company branch locations. In connection with this transaction, the Company recorded \$2.2 million in impairment losses on the associated leasehold improvements. The amount is separately reflected as impairment losses on long-lived assets in the statement of income.

The operating segment identified as "Other" includes the Parent, Zions Management Services Company ("ZMSC"), certain nonbank financial service and financial technology subsidiaries, other smaller nonbank operating units, TCBO, and eliminations of transactions between segments. ZMSC provides internal technology and operational services to affiliated operating businesses of the Company. ZMSC charges most of its costs to the affiliates on an approximate break-even basis.

The accounting policies of the individual operating segments are the same as those of the Company. Transactions between operating segments are primarily conducted at fair value, resulting in profits that are eliminated for reporting consolidated results of operations. Operating segments pay for centrally provided services based upon estimated or actual usage of those services.
