Management of Aviv has prepared the estimates for the three months and year ended December 31, 2014 presented above in good faith based upon the most recent information available to management of Aviv from its internal reporting procedures as of the date of this document. The preliminary estimated ranges set forth herein are preliminary, unaudited, subject to further completion and reflect current good faith estimates, do not take into account or give pro forma effect to the merger with and into Omega Healthcare Investors, Inc. (Omega), are subject to additional financial closing procedures and may be revised as a result of Aviv management 's further review of Aviv 's results and any adjustments that may result from the completion of the audit of the 2014 consolidated financial statements. Aviv and its auditors have not completed Aviv 's normal quarterly review or annual audit procedures as of and for the three months and year ended December 31, 2014, and there can be no assurance that Aviv 's final results for this quarterly and annual period will not differ from these estimates. Any such changes could be material. During the course of the preparation of Aviv 's consolidated financial statements and related notes as of and for the three months and year ended December 31, 2014 and their audit, Aviv may identify items that would require it to make material adjustments to the preliminary financial information presented above.

Aviv 's consolidated financial statements and related notes as of and for the quarter and year ended December 31, 2014 included in its Annual Report on Form 10-K are expected to be filed with the Securities and Exchange Commission (SEC) on or about February 27, 2015. Aviv 's actual results may differ materially from the fourth quarter estimates above. Accordingly, you should not place undue reliance on these preliminary estimates. These estimates should not be viewed as a substitute for full audited or interim financial statements prepared in accordance with GAAP. In addition, these preliminary estimates as of and for the three months and year ended December 31, 2014 are not necessarily indicative of the results to be achieved for any future period. Factors that could cause these preliminary estimates to differ include, but are not limited to, discovery of new information that alters expectations about fourth quarter and year end results or impacts valuation methodologies underlying these results.

FFO, Normalized FFO and Adjusted FFO are non-GAAP measures. The following table presents a reconciliation of Aviv 's preliminary estimated non-GAAP measures to Aviv 's net income available to stockholders.

Aviv uses financial measures that are derived on the basis of methodologies other than in accordance with GAAP. The Aviv non-GAAP financial measures presented in this Current Report on Form 8-K include Funds from Operations (FFO), Normalized FFO and Adjusted FFO (AFFO). Aviv derives these measures as follows:

NAREIT defines FFO as net income (computed in accordance with GAAP), excluding gains and losses from sales of property (net) and impairments of depreciated real estate, plus real estate depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures. Applying the NAREIT definition to Aviv's financial statements results in FFO representing net income before depreciation and amortization, impairment of assets, and gain (loss) on sale of assets (net).

Normalized FFO represents FFO before loss on extinguishment of debt, reserves for uncollectible loan receivables, transaction costs, severance costs, and change in fair value of derivatives.

AFFO represents Normalized FFO before amortization of deferred financing costs, non-cash stock-based compensation, straight-line rental income (net) and rental income from intangible amortization (net).

Aviv's management uses FFO, Normalized FFO and AFFO as important supplemental measures of Aviv's operating performance and liquidity. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate assets diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue and as an indicator of a company's ability to incur and service debt. Because FFO, Normalized FFO, and AFFO exclude depreciation and amortization unique to real estate, impairment, gains and losses from property dispositions and extraordinary items, they provide Aviv's management with performance measures that, when compared year over year or with other REITs, reflect the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities and interest costs, in each case providing perspectives not immediately apparent from net income. In addition, Aviv believes that FFO, Normalized FFO and AFFO are frequently used by securities analysts, investors and other interested parties in the evaluation of REITs.

Aviv offers these measures to assist the users of Aviv's financial statements in assessing Aviv's financial performance and liquidity under GAAP, but these measures are non-GAAP measures and should not be considered measures of liquidity, alternatives to net income or indicators of any other performance measure determined in accordance with GAAP, nor are they indicative of funds available to fund Aviv's cash needs, including Aviv's ability to make payments on its indebtedness. In addition, Aviv's calculations of these measures are not necessarily comparable to similar measures as calculated by other companies, including Omega, that do not use the same definition or implementation guidelines or interpret the standards differently from Aviv. Investors should not rely on these measures as a substitute for any GAAP measure, including net income, cash flows provided by operating activities or revenues.
