#### PEOPLES FINANCIAL CORPORATION AND SUBSIDIARIES

#### NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

For the Six Months Ended June 30, 2015 and 2014

#### 1. Basis of Presentation:

Peoples Financial Corporation (the Company ) is a one-bank holding company headquartered in Biloxi, Mississippi. It has two operating subsidiaries, PFC Service Corp., an inactive company, and The Peoples Bank, Biloxi, Mississippi (the Bank ). The Bank provides a full range of banking, financial and trust services to state, county and local government entities and individuals and small and commercial businesses operating in those portions of Mississippi, Louisiana and Alabama which are within a fifty mile radius of the Waveland, Wiggins and Gautier branches, the Bank s three most outlying locations (the trade area ).

The accompanying unaudited consolidated financial statements and notes thereto contain all adjustments, consisting only of normal recurring adjustments, necessary to present fairly, in accordance with accounting principles generally accepted in the United States of America (GAAP), the financial position of the Company and its subsidiaries as of June 30, 2015 and the results of their operations and their cash flows for the periods presented. The interim financial information should be read in conjunction with the annual consolidated financial statements and the notes thereto included in the Company s 2014 Annual Report and Form 10-K.

The results of operations for the quarter or six months ended June 30, 2015, are not necessarily indicative of the results to be expected for the full year.

Use of Estimates - The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates. Material estimates common to the banking industry that are particularly susceptible to significant change in the near term include, but are not limited to, the determination of the allowance for loan losses, the valuation of other real estate acquired in connection with foreclosure or in satisfaction of loans and valuation allowances associated with the realization of deferred tax assets, which are based on future taxable income.

Summary of Significant Accounting Policies - The accounting and reporting policies of the Company conform to GAAP and general practices within the banking industry. There have been no material changes or developments in the application of principles or in our evaluation of the accounting estimates and the underlying assumptions or methodologies that we believe to be Critical Accounting Policies as disclosed in our Form 10-K for the year ended December 31, 2014.

New Accounting Pronouncements - In January 2015, the Financial Accounting Standards Board (the FASB) issued Accounting Standards Update (ASU) No. 2015-01, *Income Statement-Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary items.* ASU No. 2015-01 eliminated the concept of extraordinary items from U.S. GAAP. ASU 2015-01 will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of the ASU is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

In June 2015, FASB issued ASU 2015-10, *Technical Corrections and Improvements*. ASU 2015-10 includes amendments to clarify the Codification, correct unintended application of guidance or make minor improvements to the Codification and will be effective for fiscal years, and interim periods within those fiscal years, beginning after

December 31, 2015. The adoption of ASU 2015-10 is not expected to have a material effect on the Company s financial position, results of operations or cash flows.

### 2. Earnings Per Share:

Per share data is based on the weighted average shares of common stock outstanding of 5,123,186 for the quarter and six months ended June 30, 2015 and 2014.

#### 3. Statements of Cash Flows:

The Company has defined cash and cash equivalents as cash and due from banks. The Company paid \$426,168 and \$525,244 for the six months ended June 30, 2015 and 2014, respectively, for interest on deposits and borrowings. Income tax payments of \$320,000 were made during the six months ended June 30, 2014. Loans transferred to other real estate amounted to \$6,337,091 and \$194,328 during the six months ended June 30, 2015 and 2014, respectively.

#### 4. Investments:

•										
TOTAL	\$	20,407	\$	69	\$ 128,598	\$	2,215	\$ 149,005	\$	2,284

At June 30, 2015, 4 of the 14 securities issued by the U.S. Treasury, 12 of the 18 securities issued by U.S. Government agencies, 7 of the 10 mortgage-backed securities and 24 of the 140 securities issued by states and political subdivisions contained unrealized losses.

Management evaluates securities for other-than-temporary impairment on a monthly basis. In performing this evaluation, the length of time and the extent to which the fair value has been less than cost, the fact that the Company s securities are primarily issued by U.S. Treasury and U.S. Government Agencies and the cause of the decline in value are considered. In addition, the Company does not intend to sell and it is not more likely than not that it will be required to sell these securities before maturity. While some available for sale securities have been sold for liquidity purposes or for gains, the Company has traditionally held its securities, including those classified as available for sale, until maturity. As a result of the evaluation of these securities, the Company has determined that the unrealized losses summarized in the tables above are not deemed to be other-than-temporary.

Securities with a fair value of \$194,613,371 and \$200,474,637 at June 30, 2015 and December 31, 2014, respectively, were pledged to secure public deposits, federal funds purchased and other balances required by law.

## 5. Loans:

The Company monitors the credit quality of its loan portfolio through the use of a loan grading system. A score of 1 is assigned to the loan on factors including repayment ability, trends in net worth and/or financial condition of the borrower and guarantors, employment stability, management ability, loan to value fluctuations, the type and structure of the loan, conformity of the loan to bank policy and payment performance. Based on the total score, a loan grade of A, B, C, S, D, E or F is applied. A grade of A will generally be applied to loans for customers that are well known to the Company and that have excellent sources of repayment. A grade of B will generally be applied to loans for customers that have excellent sources of repayment which have no identifiable risk of collection. A grade of C will generally be applied to loans for customers that have adequate sources of repayment which have little identifiable risk of collection. A grade of S will generally be applied to loans for customers who meet the criteria for a grade of C but also warrant additional monitoring by placement on the watch list. A grade of D will generally be applied to loans for customers that are inadequately protected by current sound net worth, paying capacity of the borrower, or pledged collateral. Loans with a grade of D have unsatisfactory characteristics such as cash flow deficiencies, bankruptcy filing by the borrower or dependence on the sale of collateral for the primary source of repayment, causing more than acceptable levels of risk. Loans 60 to 89 days past due receive a grade of D. A grade of E will generally be applied to loans for customers with weaknesses inherent in the D classification and in which collection or liquidation in full is questionable. In addition, on a monthly basis the Company determines which loans are 90 days or more past due and assigns a grade of E to them. A grade of F is applied to loans which are considered uncollectible and of such little value that their continuance in an active bank is not warranted. Loans with this grade are charged off, even though partial or full recovery may be possible in the future.

An analysis of the loan portfolio by loan grade, segregated by class of loans, as of June 30, 2015 and December 31, 2014, is as follows (in thousands):

	Loans With A Grade Of:

## 7. Deposits:

Prior to June 30, 2015, the Company had reported its funds management sweep accounts which amounted to approximately \$123,207,000 and \$124,206,000 at June 30, 2015 and December 31, 2014, respectively, as federal funds purchased and securities sold under agreements to repurchase ( federal funds purchased ). Management has

determined that these balances should be reported as interest-bearing demand deposits. The amount previously reported as federal funds purchased at December 31, 2014 has been reclassified in these financial statements to conform to current year presentation.

Time deposits of \$100,000 or more at June 30, 2015 and December 31, 2014 included brokered deposits of \$5,000,000, which mature in 2017.

Time deposits of \$250,000 or more totaled \$26,238,000 and \$25,321,000 at June 30, 2015 and December 31, 2014, respectively.

#### 8. Borrowings:

The Company s line of credit with the Federal Home Loan Bank (FHLB) has been collateralized by a blanket floating lien on a substantial portion of its real estate loans. The Company was notified on July 1, 2015, that this line has been changed to a custody status, which requires that specific loans serve as collateral and that certain documents relating to such loans will be held in custody by the FHLB.

#### 9. Fair Value Measurements and Disclosures:

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Available for sale securities are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record other assets at fair value on a non-recurring basis, such as impaired loans and ORE. These non-recurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets. Additionally, the Company is required to disclose, but not record, the fair value of other financial instruments.

## **Fair Value Hierarchy**

The Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 - Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 - Valuation is based upon quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 - Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques.

Following is a description of valuation methodologies used to determine the fair value of financial assets and liabilities.

#### **Cash and Due from Banks**

The carrying amount shown as cash and due from banks approximates fair value.

## **Available for Sale Securities**

The fair value of available for sale securities is based on quoted market prices. The Company savailable for sale securities are reported at their estimated fair value, which is determined utilizing several sources. The primary source is Interactive Data Corporation, which utilizes pricing models that vary based on asset class and include available trade, bid and other market information and whose methodology includes broker quotes, proprietary models and vast descriptive databases. The other source for determining fair value is matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other benchmark securities. All of the Company s available for sale securities are Level 2 assets.

# **Held to Maturity Securities**

The fair value of held to maturity securities is based on quoted market prices.

#### **Other Investments**

The carrying amount shown as other investments approximates fair value.

#### **Federal Home Loan Bank Stock**

The carrying amount shown as Federal Home Loan Bank Stock approximates fair value.

#### Loans

The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings for the remaining maturities. The cash flows considered in computing the fair value of such loans are segmented into categories relating to the nature of the contract and collateral based on contractual principal maturities. Appropriate adjustments are made to reflect probable credit losses. Cash flows have not been adjusted for such factors as prepayment risk or the effect of the maturity of balloon notes. The fair value of floating rate loans is estimated to be its carrying value. At each reporting period, the Company determines which loans are impaired. Accordingly, the Company s impaired loans are reported at their estimated fair value on a non-recurring basis. An allowance for each impaired loan, which are generally collateral-dependent, is calculated based on the fair value of its collateral. The fair value of the collateral is based on appraisals performed by third-party valuation specialists. Factors including the assumptions and techniques utilized by the appraiser are considered by Management. If the recorded investment in the impaired loan exceeds the measure of fair value of the collateral, a valuation allowance is recorded as a component of the allowance for loan losses. Impaired loans are non-recurring Level 3 assets.

#### **Other Real Estate**

In the course of lending operations, Management may determine that it is necessary to foreclose on the related collateral. Other real estate acquired through foreclosure is carried at fair value, less estimated costs to sell. The fair value of the collateral is based on appraisals performed by third-party valuation specialists. Factors including the assumptions and techniques utilized by the appraiser are considered by Management. If the current appraisal is more than one year old and/or the loan balance is more than \$200,000, a new appraisal is obtained. Otherwise, the Bank s in-house property evaluator and Management will determine the fair value of the collateral, based on comparable sales, market conditions, Management s plans for disposition and other estimates of fair value obtained from principally independent sources, adjusted for estimated selling costs. Other real estate is a non-recurring Level 3 asset.

#### **Cash Surrender Value of Life Insurance**

The carrying amount of cash surrender value of bank-owned life insurance approximates fair value.

## **Deposits**

The fair value of non-interest bearing demand and interest bearing savings and demand deposits is the amount reported in the financial statements. The fair value of time deposits is estimated by discounting the cash flows using current rates of time deposits with similar remaining maturities. The cash flows considered in computing the fair value of such deposits are based on contractual maturities, since approximately 98% of time deposits provide for automatic renewal at current interest rates.

#### **Borrowings from Federal Home Loan Bank**

The fair value of Federal Home Loan Bank (FHLB) fixed rate borrowings is estimated using discounted cash flows based on current incremental borrowing rates for similar types of borrowing arrangements. The fair value of FHLB variable rate borrowings is estimated to be its carrying value.

The balances of available for sale securities, which are the only assets measured at fair value on a recurring basis, by level within the fair value hierarchy and by investment type, as of June 30, 2015 and December 31, 2014 are as follows (in thousands):

		Fair Value Measurements Us

10. Reclassifications:

Certain reclassifications, which had no effect on prior year net income, have been made to prior period statements to conform to current year presentation.

### Item 2: Management s Discussion and Analysis of Financial Condition and Results of Operations

#### **GENERAL**

The Company is a one-bank holding company headquartered in Biloxi, Mississippi. It has two operating subsidiaries, PFC Service Corp., an inactive company, and The Peoples Bank, Biloxi, Mississippi (the Bank). The Bank provides a full range of banking, financial and trust services to state, county and local government entities and individuals and small and commercial businesses operating in those portions of Mississippi, Louisiana and Alabama which are within a fifty mile radius of the Waveland, Wiggins and Gautier branches, the Bank s three most outlying locations (the trade area).

The following presents Management s discussion and analysis of the consolidated financial condition and results of operations of Peoples Financial Corporation and Subsidiaries. These comments should be considered in combination with the Consolidated Financial Statements and Notes to Consolidated Financial Statements included in this report on Form 10-Q and the Consolidated Financial Statements, Notes to Consolidated Financial Statements and Management s Discussion and Analysis included in the Company s Form 10-K for the year ended December 31, 2014.

### **Forward-Looking Information**

Congress passed the Private Securities Litigation Act of 1995 in an effort to encourage corporations to provide information about a company s anticipated future financial performance. This act provides a safe harbor for such disclosure which protects the companies from unwarranted litigation if actual results are different from management expectations. This report contains forward-looking statements and reflects industry conditions, company performance and financial results. These forward-looking statements are subject to a number of factors and uncertainties which could cause the Company s actual results and experience to differ from the anticipated results and expectations expressed in such forward-looking statements. Such factors and uncertainties include, but are not limited to: changes in interest rates and market prices, changes in local economic and business conditions, increased competition for deposits and loans, a deviation in actual experience from the underlying assumptions used to determine and establish the allowance for loan losses, changes in the availability of funds resulting from reduced liquidity, changes in government regulations and acts of terrorism, weather or other events beyond the Company s control.

### **New Accounting Pronouncements**

The Financial Accounting Standards Board (FASB) has issued two new accounting standards updates for the first half of 2015 which are disclosed in the Notes to Unaudited Consolidated Financial Statements. The Company does not expect that these updates will have a material effect on its financial position or results of operations.

#### **Critical Accounting Policies**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company evaluates these estimates and assumptions on an on-going basis using historical experience and other factors, including the current economic environment. We adjust such estimates and assumptions when facts and circumstances dictate. Certain critical accounting policies affect the more significant estimates and assumptions used in the preparation of the consolidated financial statements.

#### Allowance for loan losses

The Company s most critical accounting policy relates to its allowance for loan losses (ALL), which reflects the estimated losses resulting from the inability of its borrowers to make loan payments. The ALL is established and maintained at an amount sufficient to cover the estimated loss associated with the loan portfolio of the Company as of the date of the financial statements. Credit losses arise not only from credit risk, but also from other risks inherent in the lending process including, but not limited to, collateral risk, operation risk, concentration risk and

economic risk. As such, all related risks of lending are considered when assessing the adequacy of the ALL. On a quarterly basis, Management estimates the probable level of losses to determine whether the allowance is adequate to absorb reasonably foreseeable, anticipated losses in the existing portfolio based on our past loan loss experience, known and inherent risk in the portfolio, adverse situations that may affect the borrowers—ability to repay and the estimated value of any underlying collateral and current economic conditions. Management believes that the ALL is adequate and appropriate for all periods presented in these financial statements. If there was a deterioration of any of the factors considered by Management in evaluating the ALL, the estimate of loss would be updated, and additional provisions for loan losses may be required. The analysis divides the portfolio into two segments: a pool analysis of loans based upon a five year average loss history which is updated on a quarterly basis and which may be adjusted by qualitative factors by loan type and a specific reserve analysis for those loans considered impaired under GAAP. All credit relationships with an outstanding balance of \$100,000 or greater that are included in Management—s loan watch list are individually reviewed for impairment. All losses are charged to the ALL when the loss actually occurs or when a determination is made that a loss is likely to occur; recoveries are credited to the ALL at the time of receipt.

#### **Other Real Estate**

Other real estate (ORE) includes real estate acquired through foreclosure. Each other real estate property is carried at fair value, less estimated costs to sell. Fair value is principally based on appraisals performed by third-party valuation specialists. If Management determines that the fair value of a property has decreased subsequent to foreclosure, the Company records a write down which is included in non-interest expense.

### **Employee Benefit Plans**

Employee benefit plan liabilities and pension costs are determined utilizing actuarially determined present value calculations. The valuation of the benefit obligation and net periodic expense is considered critical, as it requires Management and its actuaries to make estimates regarding the amount and timing of expected cash outflows including assumptions about mortality, expected service periods and the rate of compensation increases.

#### **Income Taxes**

GAAP requires the asset and liability approach for financial accounting and reporting for deferred income taxes. We use the asset and liability method of accounting for deferred income taxes and provide deferred income taxes for all significant income tax temporary differences. As part of the process of preparing our consolidated financial statements, the Company is required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as the provision for loan losses, for tax and financial reporting purposes. These differences result in deferred tax assets and liabilities that are included in our consolidated statement of condition. We must also assess the likelihood that our deferred tax assets will be recovered from future taxable income, and to the extent we believe that recovery is not likely, we must establish a valuation allowance. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. To the extent the Company establishes a valuation allowance or adjusts this allowance in a period, we must include an expense within the tax provisions in the consolidated statement of income.

#### **OVERVIEW**

The Company is a community bank serving the financial and trust needs of its customers in our trade area, which is defined as those portions of Mississippi, Louisiana and Alabama which are within a fifty mile radius of the Waveland, Wiggins and Gautier branches, the bank subsidiary s three most outlying locations. Maintaining a strong core deposit base and providing commercial and real estate lending in our trade area are the traditional focuses of the Company.

Growth has largely been achieved through de novo branching activity, and it is expected that these strategies will continue to be emphasized in the future.

The Company incurred a net loss of \$1,605,000 for the second quarter of 2015 compared with net income of \$335,000 for the second quarter of 2014 and a net loss of \$2,756,000 for the first two quarters of 2015 compared with net income of \$914,000 for the first two quarters of 2014. Results in 2015 for both time periods were primarily impacted by a decrease in net interest income and an increase in the provision for the allowance for loan losses as compared with 2014.

Managing the net interest margin in the Company s highly competitive market and in context of larger economic conditions has been very challenging and will continue to be so, for the foreseeable future. Net interest income was impacted primarily by the decrease in interest income on loans of \$552,000 and \$1,051,000 for the second quarter and first two quarters ended June 30, 2015, respectively as compared with 2014. This decrease was the result of a new loan totaling \$20,000,000 on which the contractual rate is below the weighted average rate of other loans, which decreased the yield on average loans.

Monitoring asset quality, estimating potential losses in our loan portfolio and addressing non-performing loans continue to be emphasized during these difficult economic times, as the local economy continues to negatively impact collateral values and borrowers—ability to repay their loans. The provision for the allowance for loan losses was \$1,536,000 and \$2,522,000 for the second quarter and first two quarters of 2015, respectively, compared with \$537,000 and \$1,074,000, respectively, for the second quarter and first two quarters of 2014. The Company is working diligently to address and reduce its non-performing assets. The Company s nonaccrual loans totaled \$28,989,000 and \$33,298,000 at June 30, 2015 and December 31, 2014, respectively. Most of these loans are collateral-dependent, and the Company has rigorously evaluated the value of its collateral to determine potential losses.

Non-interest income decreased \$475,000 and \$751,000 for the second quarter and first two quarters of 2015 as compared with 2014 results. Service charges on deposit accounts decreased \$469,000 and \$831,000 for the second quarter and first two quarters of 2015 as compared with 2014 primarily as a result of decreased ATM fee income.

Non-interest expense decreased \$573,000 and \$463,000 for the second quarter and first two quarters of 2015 as compared with 2014 results. This decrease for the second quarter of 2015 was the result of decreases in salaries and employee benefits of \$266,000, equipment rentals, depreciation and maintenance of \$155,000 and ATM expenses of \$278,000 while ORE expense increased \$120,000 and other expenses increased \$105,000 as compared with 2014. This decrease for the first two quarters of 2015 was the result of decreases in salaries and employee benefits of \$440,000, equipment rentals, depreciation and maintenance of \$154,000, FDIC and state banking assessments of \$79,000, and ATM expenses of \$590,000 while ORE expense increased \$373,000 and other expense increased \$363,000 as compared with 2014.

Total assets at June 30, 2015 increased \$11,339,000 as compared with December 31, 2014. Cash and due from banks increased \$9,836,000 in management of the Company s liquidity position.

#### RESULTS OF OPERATIONS

#### **Net Interest Income**

Net interest income, the amount by which interest income on loans, investments and other interest-earning assets exceeds interest expense on deposits and other borrowed funds, is the single largest component of the Company s income. Management s objective is to provide the largest possible amount of income while balancing interest rate, credit, liquidity and capital risk. Changes in the volume and mix of interest-earning assets and interest-bearing liabilities combined with changes in market rates of interest directly affect net interest income.

Quarter Ended June 30, 2015 as Compared with Quarter Ended June 30, 2014

# Edgar Filing: PEOPLES FINANCIAL CORP /MS/ - Form 10-Q

The Company s average interest earning assets decreased approximately \$32,019,000, or 5%, from approximately \$658,308,000 for the second quarter of 2014 to approximately \$626,289,000 for the second quarter of 2015. The Company s average balance sheet decreased primarily as decreased public funds enabled us to reduce our investment in securities.

The average yield on earning assets decreased by 42 basis points, from 3.61% for the second quarter of 2014 to 3.19% for the second quarter of 2015. The yield on average loans decreased from 4.57% in 2014 to 3.95% in 2015 as discussed in the Overview. The yield on average taxable available for sale securities decreased from 2.01% for the second quarter of 2014 to 1.70% for the second quarter of 2015 as recent purchases have shorter durations, and therefore lower yields, in anticipation of rising rates.

Average interest bearing liabilities decreased approximately \$40,662,000, or 8%, from approximately \$514,478,000 for the second quarter of 2014 to approximately \$473,816,000 for the second quarter of 2015. Average time deposits decreased approximately \$16,415,000 primarily as customers have moved their accounts to transaction deposits. Average borrowings from the Federal Home Loan Bank decreased \$22,888,000 due to the liquidity needs of the bank subsidiary.

The average rate paid on interest bearing liabilities for the second quarter of 2015 was .18% as compared with .27% for the second quarter of 2014.

The Company s net interest margin on a tax-equivalent basis, which is net interest income as a percentage of average earning assets, was 3.05% for the second quarter of 2015 down 35 basis points from 3.40% for the second quarter of 2014.

# Six Months Ended June 30, 2015 as Compared with Six Months Ended June 30, 2014

The Company s average interest earning assets decreased approximately \$41,513,000, or 6%, from approximately \$663,977,000 for the first two quarters of 2014 to approximately \$622,464,000 for the first two quarters of 2015. The Company s average balance sheet decreased primarily as decreased public funds enabled us to reduce our investment in securities.

The average yield on earning assets decreased by 35 basis points, from 3.61% for the first two quarters of 2014 to 3.26% for the first two quarters of 2015. The yield on average loans decreased from 4.57% for the first two quarters of 2014 to 4.04% for the first two quarters of 2015 as discussed in the Overview. The yield on average taxable available for sale securities decreased from 2.01% for the first two quarters of 2014 to 1.72% for the first two quarters of 2015 as recent purchases have shorter durations, and therefore lower yields, in anticipation of rising rates.

Average interest bearing liabilities decreased approximately \$46,818,000, or 9%, from approximately \$522,872,000 for the first two quarters of 2014 to approximately \$476,054,000 for the first two quarters of 2015. Average time deposits decreased approximately \$20,636,000 primarily as customers have moved their accounts to transaction deposits. Average borrowings from the Federal Home Loan Bank decreased approximately \$20,809,000 due to the liquidity needs of the bank subsidiary.

The average rate paid on interest bearing liabilities for the first two quarters of 2015 was .18% compared with .24% for the first two quarters of 2014.

The Company s net interest margin on a tax-equivalent basis, which is net interest income as a percentage of average earning assets, was 3.12% for the first two quarters of 2015, down 30 basis points from 3.42% for the first two quarters of 2014.

The tables on the following pages analyze the changes in tax-equivalent net interest income for the quarters and six months ended June 30, 2015 and 2014.

### **Provision for Loan Losses**

In the normal course of business, the Company assumes risk in extending credit to its customers. This credit risk is managed through compliance with the loan policy, which is approved by the Board of Directors. The policy establishes guidelines relating to underwriting standards, including but not limited to financial analysis, collateral valuation, lending limits, pricing considerations and loan grading. The Company s Loan Review and Special Assets Departments play key roles in monitoring the loan portfolio and managing problem loans. New loans and, on a periodic basis, existing loans are reviewed to evaluate compliance with the loan policy. Loan customers in concentrated industries such as gaming and hotel/motel, as well as the exposure for out of area; residential and land development; construction and commercial real estate loans, and their direct and indirect impact on its operations are evaluated on a monthly basis. Loan delinquencies and deposit overdrafts are closely monitored in order to identify developing problems as early as possible. Lenders experienced in workout scenarios consult with loan officers and customers to address non-performing loans. A watch list of credits which pose a potential loss to the Company is prepared based on the loan grading system. This list forms the foundation of the Company s allowance for loan loss computation.

Management relies on its guidelines and existing methodology to monitor the performance of its loan portfolio and identify and estimate potential losses based on the best available information. The potential effect of the continuing decline in real estate values and actual losses incurred by the Company were key factors in our analysis. Much of the Company s loan portfolio is collateral-dependent, requiring careful consideration of changes in the value of the collateral.

The Company s analysis includes evaluating the current values of collateral securing all nonaccrual loans. Even though nonaccrual loans were \$28,989,000 and \$33,298,000 at June 30, 2015 and December 31, 2014, respectively, specific reserves of only \$3,169,000 and \$2,507,000, respectively, have been allocated to these loans as collateral values appear sufficient to cover loan losses or the loan balances have been charged down to their realizable value.

The Company s on-going, systematic evaluation resulted in the Company recording a provision for loan losses of \$1,536,000 and \$537,000 for the second quarter of 2015 and 2014, respectively, and \$2,522,000 and \$1,074,000 for the first two quarters of 2015 and 2014, respectively. As a result of receiving new information during the first half of 2015, the Company updated the evaluation of the collateral value and recorded a loan loss provision on an out-of-area residential development. The allowance for loan losses as a percentage of loans was 2.64% and 2.54% at June 30, 2015 and December 31, 2014, respectively. The Company believes that its allowance for loan losses is appropriate as of June 30, 2015.

The allowance for loan losses is an estimate, and as such, events may occur in the future which may affect its accuracy. The Company anticipates that it is possible that additional information will be gathered in future quarters which may require an adjustment to the allowance for loan losses. Management will continue to closely monitor its portfolio and take such action as it deems appropriate to accurately report its financial condition and results of operations.

#### Non-interest income

## Quarter Ended June 30, 2015 as Compared with Quarter Ended June 30, 2014

Non-interest income decreased \$475,000 for the second quarter of 2015 as compared with the second quarter of 2014 primarily as the result of the decrease in service charges on deposit accounts of \$469,000. More specifically, ATM fee income decreased \$399,000 as the Company s off-site ATMs at two casinos transferred to other vendors.

# Six Months Ended June 30, 2015 as Compared with Six Months Ended June 30, 2014

Non-interest income decreased \$751,000 in 2015 as compared with 2014. Trust department income and fees increased while service charges on deposit accounts, income from other investments and other income decreased in 2015 as compared with 2014.

Trust department income and fees increased \$83,000 in 2015 as compared with 2014 as a result of the increase on market value, on which fees are based, of personal trust accounts.

Service charges decreased by \$831,000 in 2015 as compared with 2014. ATM fee income decreased \$726,000 as the Company s off-site ATMs at two casinos transferred to other vendors.

The Company realized a loss from operations of its investment in a low income housing partnership in 2015 as compared with income from operations in 2014 as a result of decreased occupancy.

Other income increased \$101,000 in 2015 as compared with 2014 due to the recognition of a deferred gain of \$100,000 from the sale of a loan.

#### Non-interest expense

Ouarter Ended June 30, 2015 as Compared with Ouarter Ended June 30, 2014

## Edgar Filing: PEOPLES FINANCIAL CORP /MS/ - Form 10-Q

Total non-interest expense decreased \$573,000 in 2015 as compared with 2014. Salaries and employee benefits decreased \$266,000; equipment rentals, depreciation and maintenance decreased \$155,000; FDIC and state banking assessments decreased \$50,000; ATM expense decreased \$278,000, other real estate expense increased \$120,000 and other expenses increased \$105,000 in 2015 as compared with 2014.

Salaries and employee benefits decreased in 2015 as the Company updated the estimates of costs associated with its deferred compensation plans in 2014.

Equipment rentals, depreciation and maintenance decreased in 2015 as 2014 results included additional servicing costs associated with bank-wide hardware and software conversion costs.

FDIC and state banking assessments decreased in 2015 as FDIC assessments fluctuated based on the average assets of the bank subsidiary and state assessments fluctuated based on the budget needs of the Mississippi Department of Banking and Consumer Finance.

ATM expenses decreased in 2015 as a result of decreased ATM activity in the current year as a result of off-site ATMs at two casinos transferring to other vendors.

ORE expense increased in 2015 as compared with 2014 due to increased writedowns of other real estate based on updated values.

Other expenses increased in 2015 primarily as a result of increased legal fees associated with non-performing loans of \$54,000 as compared with 2014.

## Six Months Ended June 30, 2015 as Compared with Six Months Ended June 30, 2014

Total non-interest expense decreased \$463,000 for the first two quarters of 2015 as compared with the first two quarters of 2014. Salaries and employee benefits decreased \$440,000; equipment rentals, depreciation and maintenance decreased \$154,000; ATM expense decreased \$590,000, other real estate expense increased \$373,000 and other expenses increased \$363,000 in 2015 as compared with 2014.

Salaries and employee benefits decreased in 2015 as the Company updated the estimates of costs associated with its deferred compensation plans in 2014.

Equipment rentals, depreciation and maintenance decreased in 2015 as 2014 results included additional servicing costs associated with bank-wide hardware and software conversion costs.

ATM expenses decreased in 2015 as a result of decreased ATM activity in the current year as a result of off-site ATMs at two casinos transferring to other vendors.

ORE expense increased in 2015 as compared with 2014 due to increased writedowns of other real estate based on updated values.

Other expenses increased in 2015 primarily as a result of increased legal fees associated with non-performing loans of \$259,000 as compared with 2014.

#### **Income Taxes**

At December 31, 2014, the Company established a full valuation allowance on its deferred tax assets. Until such time as the Company returns to sustained earnings, and it is determined that it is more likely than not that the deferred tax asset will be realized, no income tax benefit or expense will be recorded.

Income taxes were impacted by non-taxable income and federal tax credits during the three months and six months ended June 30, 2014, as follows (in thousands except rate):

	Quarter Ended June 30, 2014Six Months Ended June 30, 20

#### FINANCIAL CONDITION

Cash and due from banks increased \$9,836,000 at June 30, 2015, compared with December 31, 2014 in the management of the bank subsidiary s liquidity position.

Other real estate (ORE) increased \$4,116,000 at June 30, 2015 as compared with December 31, 2014. Loans totaling \$6,337,000 were transferred into ORE while \$1,755,000 was sold for a loss of \$55,000 and writedowns of ORE to fair value were \$411,000 during the first two quarters of 2015.

Total deposits increased \$20,625,000 at June 30, 2015, as compared with December 31, 2014. Typically, significant increases or decreases in total deposits and/or significant fluctuations among the different types of deposits from quarter to quarter are anticipated by Management as customers in the casino industry and county and municipal entities reallocate their resources periodically.

Borrowings from the Federal Home Loan Bank decreased \$7,133,000 at June 30, 2015 as compared with December 31, 2014 based on the liquidity needs of the bank subsidiary.

## SHAREHOLDERS EQUITY AND CAPITAL ADEQUACY

Strength, security and stability have been the hallmark of the Company since its founding in 1985 and of its bank subsidiary since its founding in 1896. A strong capital foundation is fundamental to the continuing prosperity of the Company and the security of its customers and shareholders.

New rules relating to risk-based capital requirements and the method for calculating components of capital and of computing risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act became effective for the Company on January 1, 2015. The rules establish a new common equity Tier 1 minimum capital requirement, increase the minimum capital ratios and assign a higher risk weight to certain assets based on the risk associated with these assets.

As of June 30, 2015, the most recent notification from the Federal Deposit Insurance Corporation categorized the bank subsidiary as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized as of March 31, 2015, the bank subsidiary must have a Total risk-based capital ratio of 10.00% or greater, a Common Equity Tier 1 Capital ratio of 6.50% or greater, a Tier 1 risk-based capital ratio of 8.00% or greater and a Leverage capital ratio of 5.00% or greater. There are no conditions or events since that notification that Management believes have changed the bank subsidiary s category.

The Company s actual capital amounts and ratios and required minimum capital amounts and ratios as of June 30, 2015 and December 31, 2014, are as follows (in thousands):

	Actua	al	For Capital Adequacy Purp		
	Amount	Ratio	Amount	Ratio	
June 30, 2015 :					
Total Capital (to Risk Weighted Assets)	\$ 97,764	20.42%	\$ 38,292	8.00%	
Common Equity Tier 1 Capital (to Risk					
Weighted Asset)	91,737	19.17%	21,539	4.50%	
Tier 1 Capital (to Risk Weighted Assets)	91,737	19.17%	28,719	6.00%	
Tier 1 Capital (to Average Assets)	91,737	13.01%	28,215	4.00%	

Edgar Filing: PEOPLES FINANCIAL CORP /MS/ - Form 10-Q

# December 31, 2014:

Total Capital (to Risk Weighted Assets)	\$ 100,243	21.95%	\$ 36,528	8.00%
Tier 1 Capital (to Risk Weighted Assets)	94,493	20.70%	18,264	4.00%
Tier 1 Capital (to Average Assets)	94,493	13.29%	28,437	4.00%

The actual capital amounts and ratios and required minimum capital amounts and ratios for the Bank as of June 30, 2015 and December 31, 2014, are as follows (in thousands):

	For Capital Adequacy					
	Actu	al	Purpos	Purposes		Capitalized
	Amount	Ratio	Amount	Ratio	Amount	Ratio
June 30, 2015 :						
Total Capital (to Risk Weighted Assets)	\$ 94,115	19.81%	\$ 38,005	8.00%	\$ 47,507	10.00%
Common Equity Tier 1 Capital (to Risk						
Weighted Assets)	88,132	18.55%	21,378	4.50%	30,879	6.50%
Tier 1 Capital (to Risk Weighted Assets)	88,132	18.55%	28,504	6.00%	38,005	8.00%
Tier 1 Capital (to Average Assets)	88,132	12.54%	28,103	4.00%	35,128	5.00%
December 31, 2014:						
Total Capital (to Risk Weighted Assets)	\$ 96,427	21.28%	\$ 36,247	8.00%	\$ 45,309	10.00%
Tier 1 Capital (to Risk Weighted Assets)	90,720	20.02%	18,124	4.00%	27,186	6.00%
Tier 1 Capital (to Average Assets)	90,720	13.15%	27,599	4.00%	34,499	5.00%

In addition to monitoring its risk-based capital ratios, the Company also determines the primary capital ratio on a quarterly basis. This ratio was 14.90% at June 30, 2015, which is well above the regulatory minimum of 6.00%. Management continues to emphasize the importance of maintaining the appropriate capital levels of the Company and has established the goal of maintaining its primary capital ratio at 8.00%, which is the minimum requirement for classification as being well-capitalized by the banking regulatory authorities.

## **LIQUIDITY**

Liquidity represents the Company s ability to adequately provide funds to satisfy demands from depositors, borrowers and other commitments by either converting assets to cash or accessing new or existing sources of funds. Management monitors these funds requirements in such a manner as to satisfy these demands and provide the maximum earnings on its earning assets. The Company manages and monitors its liquidity position through a number of methods, including through the computation of liquidity risk targets and the preparation of various analyses of its funding sources and utilization of those sources on a monthly basis. The Company also uses proforma liquidity projections which are updated on a monthly basis in the management of its liquidity needs and also conducts periodic contingency testing on its liquidity plan.

Deposits, payments of principal and interest on loans, proceeds from maturities of investment securities and earnings on investment securities are the principal sources of funds for the Company. Borrowings from the FHLB, federal funds sold and federal funds purchased are utilized by the Company to manage its daily liquidity position. The Company has also been approved to participate in the Federal Reserve Bank s Discount Window Primary Credit Program, which it intends to use only as a contingency.

#### **REGULATORY MATTERS**

During 2009, Management identified opportunities for improving risk management, addressing asset quality concerns, managing concentrations of credit risk and ensuring sufficient liquidity at the Bank as a result of its own investigation as well as examinations performed by certain bank regulatory agencies. In concert with the regulators, the Company and the Bank identified specific corrective steps and actions to enhance its risk management, asset quality and liquidity policies, controls and procedures. The Company and the Bank may not declare or pay any cash dividends without the prior written approval of their regulators.

#### **Item 4: Controls and Procedures**

As of June 30, 2015, an evaluation was performed under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer of the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e)). Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective to ensure that the information required to be disclosed by the Company in the reports it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

There were no changes in the Company s internal control over financial reporting that occurred during the period ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.

#### **PART II - OTHER INFORMATION**

## **Item 1: Legal Proceedings**

The Bank is involved in various legal matters and claims which are being defended and handled in the ordinary course of business. None of these matters is expected, in the opinion of Management, to have a material adverse effect upon the financial position or results of operations of the Company.

#### **Item 5: Other Information**

None.

## Item 6 - Exhibits and Reports on Form 8-K

### (a) Exhibits
