This pricing term sheet should be read in conjunction with the prospectus dated April 20, 2018, as supplemented by the preliminary prospectus supplement dated April 20, 2018 (the Prospectus Supplement), relating to this offering. The following information amends and supplements the Prospectus Supplement:

The Notes may initially be sold to a small number of investors. Accordingly, a liquid trading market may not develop or be sustained, in which case you may not be able to resell your Notes at their fair market value or at all. In addition, one or more of the initial investors may purchase a significant percentage of the aggregate principal amount of the Notes in this offering. If such investor sells a material portion of the Notes at any one time, it could materially and adversely affect the trading price of the Notes. Furthermore, investors that hold a significant percentage of the Notes may be able to exercise certain rights and powers and may have significant influence on matters voted on by holders of the Notes. For example, holders of at least 25% in aggregate principal amount of the outstanding Notes may declare all the Notes to be immediately due and payable if certain types of events of default have occurred and are continuing.

In respect of the 2023 Notes, five institutional investors are each expected to purchase more than 5.0% of the 2023 Notes, including one investor who is expected to purchase 22.0%, at the initial public offering price and on the same terms as the other 2023 Notes are being offered. These five investors are expected in aggregate to initially hold approximately 67.6% of the 2023 Notes. Similarly, in respect of the 2028 Notes, six institutional investors are each expected to purchase more than 5.0% of the 2028 Notes, including one investor who is expected to purchase 38.0%, at the initial public offering price and on the same terms as the other 2028 Notes are being offered. These six investors are expected in aggregate to initially hold approximately 66.6% of the 2028 Notes.

Affiliates of Bank of China Limited are in aggregate expected to purchase approximately 20.4% of the 2023 Notes and approximately 7.6% of the 2028 Notes for asset management and/or proprietary purposes and not with a view to distribution.

* A securities rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn at any time. Each rating should be evaluated independently of any other rating.

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (EEA).
