UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

× Quarterly Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2018

OR

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 001-35580

SERVICENOW, INC.

(Exact name of registrant as specified in its charter)

Delaware 20-2056195

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification Number)

ServiceNow, Inc.
2225 Lawson Lane
Santa Clara, California 95054

Edgar Filing: ServiceNow, Inc. - Form 10-Q

(408) 501-8550

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the

Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 30, 2018, there were approximately 177.9 million shares of the Registrant's Common Stock outstanding.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

(1) During the three months ended December 31, 2017, we adopted Accounting Standards Update 2016-18, "Statement of Cash Flows (Topic 230): Restricted Cash," which requires that amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. Accordingly, we have recast our prior period condensed consolidated statement of cash flows to conform to the current presentation. The impact of the adoption for the six months ended June 30, 2017 is not material.

See accompanying notes to condensed consolidated financial statements

SERVICENOW, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Unless the context requires otherwise, references in this report to “ServiceNow,” the “Company,” “we,” “us,” and “our” refer to ServiceNow, Inc. and its consolidated subsidiaries.

(1) Description of the Business

ServiceNow is a leading provider of enterprise cloud computing solutions that define, structure, manage and automate services for global enterprises. We help our customers improve service quality and reduce costs while scaling and automating their businesses. We typically deliver our software via the Internet as a service, through an easy-to-use, consumer product-like interface, which means it can be easily configured and rapidly deployed. In a minority of cases, we deploy our software on-premises at a customer data center to support a customer’s unique regulatory or security requirements.

(2) Summary of Significant Accounting Policies

Basis of Presentation

Effective January 1, 2018, we adopted the Accounting Standards Update (ASU) No. 2014-09, “Revenue from Contracts with Customers (Topic 606)” as discussed further below in this Note 2. All amounts and disclosures set forth in this Form 10-Q have been updated to comply with the new standards, including previously reported amounts, which are labeled “as adjusted” in these condensed consolidated financial statements and related notes. Certain prior period amounts reported in our condensed consolidated financial statements and notes thereto have been reclassified to conform to the current period presentation.

The accompanying unaudited condensed consolidated financial statements and condensed footnotes have been prepared in accordance with the applicable rules and regulations of the Securities and Exchange Commission (the SEC) regarding interim financial reporting. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (GAAP) for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring items) considered necessary under GAAP for fair statement of results for the interim periods presented have been included. The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the results to be expected for the year ending December 31, 2018 or for other interim periods or future years. The condensed consolidated balance sheet as of December 31, 2017 is derived from audited financial statements as adjusted to reflect the impact of the full retrospective adoption of Topic 606; however, it does not include all of the information and footnotes required by GAAP for complete financial statements. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the SEC on February 28, 2018.

Principles of Consolidation

The condensed consolidated financial statements have been prepared in conformity with GAAP, and include our accounts and the accounts of our wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated upon consolidation.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make certain estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, as well as reported amounts of revenues and expenses during the reporting period. Such management estimates and assumptions include, but are not limited to, the stand-alone selling price (SSP) for each distinct performance obligation included in customer contracts with multiple performance obligations, the period of benefit for deferred commissions, the fair value of assets acquired and liabilities assumed for business combinations, stock-based compensation expenses, the assessment of the useful life and recoverability of our property and equipment, goodwill and identifiable intangible assets, and legal contingencies. Actual results could differ from those estimates.

Table of Contents

New Accounting Pronouncements Adopted in 2018

Stock-based Compensation

In June 2018, the Financial Accounting Standards Board (FASB) issued ASU No. 2018-07, “Compensation—Stock Compensation (Topic 718): Improvements to Non-employee Share-Based Payment Accounting,” which is intended to reduce cost and complexity and to improve financial reporting for nonemployee share-based payments. Currently, the accounting requirements for nonemployee and employee share-based payment transactions are significantly different. This standard expands the scope of Topic 718 to include share-based payments issued to nonemployees for goods or services, aligning the accounting for share-based payments to nonemployees and employees. This standard is effective for our fiscal year beginning January 1, 2019 and early adoption is permitted. We early adopted this new standard effective January 1, 2018, and the adoption of this standard did not have a material impact on our condensed consolidated financial statements. As this standard was adopted on a prospective basis as of January 1, 2018, the adoption of this standard did not impact our previously reported financial statements for periods ended on or prior to December 31, 2017. The adoption of this standard did not impact our previously reported financial statements for the three months ended March 31, 2018 and 2017.

Income Taxes

In February 2018, the FASB issued ASU No. 2018-02, “Income Statement—Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income,” which provides entities the option to reclassify tax effects stranded in accumulated other comprehensive income as a result of the 2017 Tax Cuts and Jobs Act (the Tax Act) to retained earnings. This standard is effective for our fiscal year beginning January 1, 2019 and early adoption is permitted. We early adopted this new standard effective January 1, 2018, with an immaterial amount of cumulative effect adjustment recorded to our accumulated deficit as of January 1, 2018. As this standard was adopted on a modified prospective basis as of January 1, 2018, the adoption of this standard did not impact our previously reported financial statements for periods ended on or prior to December 31, 2017.

In December 2017, the SEC staff issued Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act (SAB 118), which allows us to record provisional amounts for the 2017 Tax Cuts and Jobs Act (the Tax Act) during a measurement period not to extend beyond one year of the enactment date, with further clarifications made recently with the issuance of ASU 2018-05. Through June 30, 2018, we did not have any significant adjustments to our provisional amounts. In light of the enactment of the Tax Act, we are assessing whether to change our indefinite reinvestment assertion, in which we consider earnings from our foreign operations to be indefinitely reinvested outside of the United States. Under guidance issued by the SEC, we are required to complete our assessment by the end of the measurement period described above. We will continue our analysis of these provisional amounts, which remain subject to change during the measurement period. We anticipate further guidance on accounting interpretations from the FASB and application of the law from the Department of Treasury. We expect to reach a final determination within the measurement period described above.

In October 2016, the FASB issued ASU 2016-16, “Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory,” which includes a revision of the accounting for the income tax consequences of intra-entity transfers of assets other than inventory to reduce the complexity in accounting standards. We adopted this new standard as of January 1, 2018 with an immaterial amount of cumulative effect adjustment recorded to our accumulated deficit as of January 1, 2018. As this standard was adopted on a modified prospective basis as of January 1, 2018, the adoption of this standard did not impact our previously reported financial statements for periods ended on or prior to December 31, 2017.

Table of Contents

Financial Instruments

In January 2016, the FASB issued ASU 2016-01, “Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities,” which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments, with further clarifications made more recently. This new standard requires equity securities to be measured at fair value with changes in fair value recognized through net income, which results in greater variability in our net income. We adopted these new standards as of January 1, 2018 with a cumulative-effect adjustment, net of tax of \$7.2 million recorded to our accumulated deficit as of January 1, 2018. This adjustment relates to the unrealized gain on our marketable equity securities as of December 31, 2017, which was previously included in accumulated other comprehensive income (loss) on our condensed consolidated balance sheet. As part of the adoption, we elected to apply the measurement alternative for our non-marketable equity investments that do not have readily determinable fair values, measuring them at cost, less any impairment, plus or minus adjustments resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. The adoption of these standards did not result in an adjustment for our non-marketable equity investments as our measurement alternative election requires adjustments to be recorded only on a prospective basis. As these standards were adopted on a modified prospective basis as of January 1, 2018, the adoption of these standards did not impact our previously reported financial statements for periods ended on or prior to December 31, 2017.

Revenue from Contracts with Customers

In May 2014, the FASB issued Topic 606, which supersedes the prior revenue recognition standard (Topic 605). Under Topic 606, revenue is recognized when a customer obtains control of promised goods or services and is recognized in an amount that reflects the consideration which the entity expects to be entitled to in exchange for those goods or services. In addition, this standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. Topic 606 also includes Subtopic 340-40, Other Assets and Deferred Costs—Contracts with Customers, which requires the deferral of incremental costs of obtaining a contract with a customer.

The Topic 606 standard permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method) or retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application (modified retrospective method). We adopted the requirements of Topic 606 as of January 1, 2018, utilizing a full retrospective method. The most significant impact of the standard relates to the timing of revenue recognition related to our on-premises offerings, in which we grant customers the right to deploy our software on the customer’s own servers without significant penalty, the accounting for incremental costs to obtain a contract, and the classification of proceeds for Knowledge and other user forums as a reduction in sales and marketing expenses instead of as professional services and other revenues. The adoption of Topic 606 resulted in changes to our accounting policies for revenue recognition, unbilled receivables, deferred commissions, deferred revenue and customer deposits as detailed below.

Under Topic 606, for our on-premises offerings, the requirement to have vendor specific objective evidence (VSOE) for undelivered elements was eliminated. As a result, for all periods presented, we have recognized as subscription revenues a portion of the sales price upon delivery of the software, compared to the prior practice under Topic 605 of recognizing the entire sales price ratably over an estimated subscription period due to the lack of VSOE. To the extent the amounts recognized as subscription revenues have not been billed, the revenues are primarily recorded as “unbilled receivables.” In addition, refundable amounts associated with customer contracts are recorded as “customer deposits.”

In addition, under Topic 606, for all periods presented, we have deferred all incremental commission costs to obtain customer contracts, including indirect costs that are not tied to a specific contract, for both our on-premises offerings

and our cloud-based subscription offerings. On initial contracts and contracts for increased purchases with existing customers (expansion contracts), these costs are primarily amortized over a period of benefit that we have determined to be five years. On renewal contracts, these costs are amortized over the renewal term. Additionally, for our on-premises offerings, consistent with the recognition of subscription revenue for on-premises offerings as described above, a portion of the commission cost is expensed upfront when the on-premises offering is made available. Our prior practice under Topic 605 was to defer only direct and incremental commission costs to obtain a contract and amortize those costs over the contract term, which is generally 12 to 36 months, for both our on-premises offerings and our cloud-based subscription offerings.

The direct effect on income taxes resulting from the full retrospective adoption of the above-mentioned changes to revenues and commission expenses resulted in a cumulative income tax expense of \$23.3 million recorded in the prior periods through December 31, 2017. The indirect tax benefit of Topic 606 on income taxes associated with intercompany adjustments of \$23.1 million, or \$0.13 per basic and diluted share for the six months ended June 30, 2018, was recorded in the first quarter of adoption during the three months ended March 31, 2018.

Table of Contents

The table below provides specified line items from our condensed consolidated balance sheet (i) as previously reported and (ii) as adjusted to reflect the impact of the full retrospective adoption of Topic 606 (in thousands):

	Year Ended December 31, 2017	
	As Previously Reported	As Adjusted
Assets		
Accounts receivable, net	\$434,895	\$437,051
Current portion of deferred commissions	118,690	109,643
Prepaid expenses and other current assets	77,681	95,959
Deferred commissions, less current portion	85,530	224,252
Other assets	49,600	51,832
Liabilities		
Accrued expenses and other current liabilities	244,605	253,257
Current portion of deferred revenue	1,280,499	1,210,695
Deferred revenue, less current portion	39,884	36,120
Other long-term liabilities	43,239	65,884
Stockholder's equity		
Accumulated other comprehensive (loss) income	(889)	5,767
Accumulated deficit	(1,146,520)	(958,564)

The table below provides specified line items from our condensed consolidated statement of comprehensive loss (i) as previously reported and (ii) as adjusted to reflect the impact of the full retrospective adoption of Topic 606 (in thousands, except per share data):

	Three months ended June 30, 2017		Six months ended June 30, 2017	
	As Previously Reported	As Adjusted	As Previously Reported	As Adjusted
Revenues:				
Subscription	\$411,007	\$402,672	\$787,142	\$790,256

Table of Contents

The table below provides specified line items from our condensed consolidated statement of cash flows (i) as previously reported and (ii) as adjusted to reflect the impact of the full retrospective adoption of Topic 606 (in thousands):

	Six months ended June 30, 2017	
	As Previously Reported	As Adjusted
Cash flows from operating activities:		
Net loss	\$(97,135)	\$(77,318)
Adjustments to reconcile net loss to net cash provided by operating activities:		
Amortization of deferred commissions	50,587	43,086
Changes in operating assets and liabilities, net of effect of business combinations:		
Accounts receivable	51,039	55,186
Deferred commissions	(61,287)	(69,947)
Prepaid expenses and other assets	(11,945)	(3,606)
Deferred revenue	145,662	133,416
Accrued expenses and other liabilities	(6,578)	(10,216)
Net cash provided by operating activities	316,149	316,333
Foreign currency effect on cash, cash equivalents and restricted cash	18,224	18,040

Updated Significant Accounting Policies***Revenue Recognition***

We report our revenues in two categories: (i) subscriptions and (ii) professional services and other.

Revenues are recognized when control of these services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those services.

We determine revenue recognition through the following steps:

- 1 Identification of the contract, or contracts, with a customer
- 2 Identification of the performance obligations in the contract
- 3 Determination of the transaction price
- 4 Allocation of the transaction price to the performance obligations in the contract
- 5 Recognition of revenue when, or as, we satisfy a performance obligation

Subscription revenues

Subscription revenues are primarily comprised of subscription fees that give customers access to the ordered subscription service, related support and updates, if any, to the subscribed service during the subscription term. We recognize subscription revenues ratably over the contract term beginning on the commencement date of each contract, which is the date we make our services available to our customers. Our contracts with customers typically include a fixed amount of consideration, and are generally non-cancelable and without any refund-type provisions. We typically invoice our customers annually in advance for our subscription services upon execution of the initial contract or subsequent renewal, and our invoices are typically due within 30 days from the invoice date.

Subscription revenues also include revenues from our on-premises offerings in which we grant customers the right to deploy our subscription service on the customers' own servers without significant penalty. For these contracts, we account for the software element and the related support and updates separately as they are distinct performance obligations. Refer to the discussion below related to contracts with multiple performance obligations for further details. The transaction price is allocated to separate performance obligations on a relative SSP basis. Transaction price allocated to the software element is recognized upon delivery, which is when transfer of control of the software to the customer is complete. The transaction price allocated to the related support and updates are recognized ratably over the contract term.

Table of Contents

Professional services and other revenues

Our professional services arrangements are primarily on a time-and-materials basis, and revenues on these arrangements are recognized as the services are delivered. We typically invoice our customers monthly in arrears for these professional services based on actual hours and expenses incurred, and our invoices are typically due within 30 days from the invoice date. Professional services revenues associated with fixed fee arrangements are recognized on a proportional performance basis. In instances where certain milestones are required to be met before revenues are recognized, we defer professional services revenues and the associated costs until milestone criteria have been met. Other revenues consist of fees from customer training delivered on-site or through publicly available classes.

Contracts with multiple performance obligations

We enter into contracts that can include various combinations of products and services, which are generally capable of being distinct and accounted for as separate performance obligations. For these contracts, the transaction price is allocated to the separate performance obligations on a relative SSP basis. We determine SSP by considering the historical selling price of these performance obligations in similar transactions as well as other factors, including, but not limited to, competitive pricing of similar products, other software vendor pricing, industry publications and current pricing practices.

Unbilled Receivables

Unbilled receivables, which is a contract asset, represent subscription revenues that are recognized upon delivery of the software prior to being invoiced. Unbilled receivables are primarily presented under prepaid expenses and other current assets on our condensed consolidated balance sheets.

Deferred Commissions

Deferred commissions are the incremental selling costs that are associated with acquiring customer contracts and consist of sales commissions paid to our sales force and referral fees paid to independent third-parties. On initial and expansion contracts, commissions and referral fees are primarily deferred and amortized over a period of benefit that we have determined to be five years. On renewal contracts, commissions are deferred and amortized over the renewal term. Additionally, for our on-premises offerings, consistent with the recognition of subscription revenue for on-premises offerings, a portion of the commission cost is expensed upfront when the on-premises offering is made available. We determine the period of benefit by taking into consideration our customer contracts, our technology life cycle and other factors. We include amortization of deferred commissions in sales and marketing expense in our condensed consolidated statements of comprehensive income (loss). There was no impairment loss in relation to the costs capitalized for all periods presented.

Deferred revenue

Deferred revenue, which is a contract liability, consists primarily of payments received in advance of revenue recognition from our contracts with customers and is recognized as the revenue recognition criteria are met. Once our services are available to customers, we record amounts due in accounts receivable and in deferred revenue. To the extent we bill customers in advance of the billing period commencement date, the accounts receivable and corresponding deferred revenue amounts are netted to zero on our condensed consolidated balance sheets, unless such amounts have been paid as of the balance sheet date.

Customer deposits

Customer deposits primarily relate to payments received from customers which could be refundable pursuant to the terms of the contract and are presented under “accrued expenses and other current liabilities” on our condensed consolidated balance sheets.

Table of Contents

Strategic investments

Our strategic investments consist of debt and non-marketable equity investments in privately-held companies in which we do not have a controlling interest or significant influence. Debt investments in privately-held companies are classified as available-for-sale and are recorded at their estimated fair value with changes in fair value recorded through accumulated other comprehensive income (loss). We have elected to apply the measurement alternative for equity investments that do not have readily determinable fair values, measuring them at cost, less any impairment, plus or minus adjustments resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. An impairment loss is recorded when event or circumstance indicates a decline in value has occurred. We include these strategic investments in “Other assets” on the consolidated balance sheets.

New Accounting Pronouncements Pending Adoption

In January 2018, the FASB released guidance on the accounting for tax on the global intangible low-taxed income (GILTI) provisions of the Tax Act. The GILTI provisions impose a tax on foreign income in excess of a deemed return on tangible assets of subsidiary foreign corporations. We are currently evaluating the impact of the Tax Act and this guidance on our condensed consolidated financial statements and have not yet elected an accounting policy to either recognize deferred taxes for basis differences expected to reverse as GILTI or to record GILTI as period costs if and when incurred.

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments,” which requires a financial asset measured at amortized cost basis to be presented at the net amount expected to be collected. Credit losses relating to available-for-sale debt securities should be recorded through an allowance for credit losses. This new standard is effective for our interim and annual periods beginning January 1, 2020. We are currently evaluating the impact of the adoption of this standard on our condensed consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842),” which requires lessees to generally recognize on the balance sheet operating and financing lease liabilities and corresponding right-of-use assets, and to recognize on the income statement the expenses in a manner similar to current practice. This new standard, including related amendments subsequently issued by the FASB, is effective for our interim and annual periods beginning January 1, 2019, and early adoption is permitted. We are in the process of implementing changes to our existing systems and processes in conjunction with a review of existing vendor agreements and do not plan to early adopt this new standard. We currently anticipate that the adoption of this standard will have a material impact on our condensed consolidated balance sheets given that we had operating lease commitments in excess of \$700 million as of June 30, 2018. The present value of these lease commitments will be recognized as right-of-use assets and lease liabilities at the later to occur of (i) the adoption date of January 1, 2019 or (ii) the time we take possession of the leased asset. However, we do not anticipate that the adoption of this standard will have a material impact on our condensed consolidated statements of comprehensive income (loss) since the expense recognition under this new standard will be similar to current practice.

Table of Contents**(3) Investments***Marketable Securities*

The following is a summary of our available-for-sale investment securities, excluding marketable equity securities and those securities classified within cash and cash equivalents on the condensed consolidated balance sheets (in thousands):

	June 30, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-sale securities:				
Commercial paper	\$253,519	\$ —	\$(1)	\$253,518
Corporate notes and bonds	954,783	42	(4,146)	950,679
Certificates of deposit	32,742	2	—	32,744
U.S. government agency securities	113,166	—	(666)	112,500
Total available-for-sale securities	\$1,354,210	\$ 44	\$(4,813)	\$1,349,441

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-sale securities:				
Commercial paper	\$258,348	\$ 1	\$(5)	\$258,344
Corporate notes and bonds	1,006,302	26	(3,084)	1,003,244
Certificates of deposit	33,084	—	—	33,084
U.S. government agency securities	129,494	—	(638)	128,856
Total available-for-sale securities	\$1,427,228	\$ 27	\$(3,727)	\$1,423,528

As of June 30, 2018, the contractual maturities of our available-for-sale investment securities, excluding securities classified within cash and cash equivalents on the condensed consolidated balance sheets, did not exceed 36 months. The fair values of these securities, by remaining contractual maturity, are as follows (in thousands):

	June 30, 2018
Due within 1 year	\$1,044,812
Due in 1 year through 5 years	304,629
Total	\$1,349,441

Table of Contents

The following table shows the fair values and the gross unrealized losses of our available-for-sale investment securities, classified by the length of time that the securities have been in a continuous unrealized loss position, and aggregated by investment types, excluding those securities classified as cash and cash equivalents on the condensed consolidated balance sheets (in thousands):

	June 30, 2018					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Commercial paper	\$14,931	\$(1)	\$—	\$—	\$14,931	\$(1)
Corporate notes and bonds	850,411	(3,990)	74,722	(156)	925,133	(4,146)
U.S. government agency securities	79,733	(537)	32,767	(129)	112,500	(666)
Total	\$945,075	\$(4,528)	\$107,489	\$(285)	\$1,052,564	\$(4,813)

	December 31, 2017					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Commercial paper	\$14,809	\$(5)	\$—	\$—	\$14,809	\$(5)
Corporate notes and bonds	819,113	(2,703)	141,874	(381)	960,987	(3,084)
U.S. government agency securities	106,301	(593)	22,555	(45)	128,856	(638)
Total	\$940,223	\$(3,301)	\$164,429	\$(426)	\$1,104,652	\$(3,727)

As of June 30, 2018, we had a total of 366 available-for-sale securities, excluding those securities classified within cash and cash equivalents on the consolidated balance sheet in an unrealized loss position. There were no impairments considered “other-than-temporary” as it is more likely than not we will hold the securities until maturity or a recovery of the cost basis.

Marketable Equity Securities

As of December 31, 2017, we had marketable equity securities of \$20.7 million. During the six months ended June 30, 2018, we sold these securities for total proceeds of \$40.0 million, and we recognized net gains of \$0.8 million and \$19.3 million for the three and six months ended June 30, 2018, respectively. These gains resulted from our adoption of ASU 2016-01 as we began to record changes in stock price fluctuations of our marketable equity securities through net income, even prior to the sale of these securities. Upon our sale of these securities during the three months ended June 30, 2018, the previously unrealized gain became realized. During the six months ended June 30, 2017, prior to the adoption of ASU 2016-01, we recognized \$12.2 million of unrealized gains on our marketable equity securities offset by \$4.5 million of tax effect through accumulated other comprehensive loss on our condensed consolidated balance sheet. Refer to Note 2 for further details on ASU 2016-01.

Strategic Investments

As of June 30, 2018 and December 31, 2017, the total amount of equity investments in privately-held companies included in other assets on our condensed consolidated balance sheets was \$4.8 million. We have not recorded any adjustments resulting from observable price changes or impairment charges for any of our equity investments in privately-held companies.

The fair value of our debt investments in privately-held companies included within our strategic investments is \$1.0

million as of June 30, 2018 and December 31, 2017. These investments are recorded at fair value using significant unobservable inputs or data in an inactive market and the valuation requires our judgment due to the absence of quoted prices in active markets and inherent lack of liquidity and are categorized accordingly as Level 3 in the fair value hierarchy.

Table of Contents**(4) Fair Value Measurements**

The following table presents our fair value hierarchy for our assets measured at fair value on a recurring basis at June 30, 2018 (in thousands):

	Level 1	Level 2	Total
Cash equivalents:			
Money market funds	\$ 176,304	\$—	\$ 176,304
Commercial paper	—	173,604	173,604
Corporate notes and bonds	—	6,598	6,598
Short-term investments:			
Commercial paper	—	253,518	253,518
Corporate notes and bonds	—	678,619	678,619
Certificates of deposit	—	29,844	29,844
U.S. government agency securities	—	82,831	82,831
Long-term investments:			
Corporate notes and bonds	—	272,060	272,060
Certificates of deposit	—	2,900	2,900
U.S. government agency securities	—	29,669	29,669
Total	\$ 176,304	\$ 1,529,643	\$ 1,705,947

The following table presents our fair value hierarchy for our assets measured at fair value on a recurring basis at December 31, 2017 (in thousands):

	Level 1	Level 2	Total
Cash equivalents:			
Money market funds	\$ 282,507	\$—	\$ 282,507
Commercial paper	—	100,456	100,456
Corporate notes and bonds	—	50,437	50,437
Short-term investments:			
Commercial paper	—	258,344	258,344
Corporate notes and bonds	—	688,316	688,316
Certificates of deposit	—	17,950	17,950
U.S. government agency securities	—	67,476	67,476
Marketable equity securities	20,717	—	20,717
Long-term investments:			
Corporate notes and bonds	—	314,928	314,928
Certificates of deposit	—	15,134	15,134
U.S. government agency securities	—	61,380	61,380
Total	\$ 303,224	\$ 1,574,421	\$ 1,877,645

We determine the fair value of our security holdings based on pricing from our service providers and market prices from industry-standard independent data providers. Such market prices may be quoted prices in active markets for identical assets (Level 1 inputs) or pricing determined using inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs), such as yield curve, volatility factors, credit spreads, default rates, loss severity, current market and contractual prices for the underlying instruments or debt, broker and dealer quotes, as well as other relevant economic measures.

See Note 3 for the fair value measurement of our debt investments in privately-held companies, Note 8 for the fair value measurement of our derivative contracts and Note 11 for the fair value measurement of our convertible senior notes.

Table of Contents**(5) Business Combinations**

During the six months ended June 30, 2018, we completed acquisitions of two privately-held companies, Parlo, Inc. and VendorHawk, Inc., for an aggregate of approximately \$25.1 million in cash. In allocating the aggregate purchase price based on the estimated fair values, we recorded a total of \$18.1 million of goodwill, \$9.0 million of developed technology intangible assets (to be amortized over estimated useful lives of five years) and \$2.2 million of deferred tax liabilities.

During the six months ended June 30, 2017, we completed acquisitions of two privately-held companies, Qlue, Inc. and DxContinuum, Inc., for an aggregate of approximately \$21.6 million in cash. In allocating the aggregate purchase price based on the estimated fair values, we recorded a total of \$16.2 million of goodwill, \$9.0 million of developed technology intangible assets (to be amortized over estimated useful lives of five years) and \$3.6 million of deferred tax liabilities.

The excess of purchase consideration over the fair value of net tangible and identifiable assets acquired was recorded as goodwill. We believe the goodwill balance associated with these business combinations represents the synergies expected from expanded market opportunities when integrating the acquired developed technologies with our offerings. Goodwill arising from these business combinations is not deductible for income tax purposes.

The results of operations of these business combinations have been included in our condensed consolidated financial statements from their respective dates of purchase. These business combinations did not have a material impact on our condensed consolidated financial statements, and therefore historical and pro forma disclosures have not been presented. Aggregate acquisition-related costs of \$0.7 million and \$1.4 million for the six months ended June 30, 2018 and 2017, respectively, are included in general and administrative expenses in our condensed consolidated statements of comprehensive loss.

(6) Goodwill and Intangible Assets

Goodwill balances are presented below (in thousands):

	Carrying Amount
Balance as of December 31, 2017	\$ 128,728
Goodwill acquired	18,063
Foreign currency translation adjustments	(3,784)
Balance as of June 30, 2018	\$ 143,007

Intangible assets consist of the following (in thousands):

	June 30, 2018	December 31, 2017
Developed technology	\$ 110,473	\$ 102,349
Patents	35,130	31,030
Other	650	1,575
Total intangible assets	146,253	134,954
Less: accumulated amortization	(58,527)	(48,038)
Net carrying amount	\$ 87,726	\$ 86,916

Apart from the business combinations described in Note 5, we acquired \$4.1 million and \$6.2 million of intangible assets in patents during the six months ended June 30, 2018 and 2017, respectively. The weighted-average useful life for the patents acquired was approximately 10 years.

Amortization expense for intangible assets for the three months ended June 30, 2018 and 2017 was approximately \$6.1 million and \$4.8 million, respectively, and for the six months ended June 30, 2018 and 2017 was approximately \$11.8 million and \$9.5 million, respectively.

Table of Contents

The following table presents the estimated future amortization expense related to intangible assets held at June 30, 2018 (in thousands):

Years	
Ending	
December	
31,	
2018,	\$182,791
2019,	\$49,686
2020,	\$20,552
2021,	\$2,558
Thereafter	\$201
Total	\$3,638
future	\$87,726
amortization	
expense	

(7) Property and Equipment

Property and equipment, net, consists of the following (in thousands):

	June 30, 2018	December 31, 2017
Computer equipment	\$391,524	\$326,378
Computer software	53,894	46,413
Leasehold and other improvements	63,561	56,232
Furniture and fixtures	39,814	38,789
Building	6,744	7,084
Construction in progress	15,673	5,341
	571,210	480,237
Less: accumulated depreciation	(284,257)	(235,113)
Total property and equipment, net	\$286,953	\$245,124

Construction in progress consists primarily of building, leasehold and other improvements and in-process software development costs. Depreciation and amortization expense for the three months ended June 30, 2018 and 2017 was \$29.2 million and \$22.2 million, respectively, and for the six months ended June 30, 2018 and 2017 was approximately \$56.8 million and \$42.6 million, respectively.

(8) Derivative Contracts

We conduct business on a global basis in multiple foreign currencies, subjecting us to foreign currency risk. In order to manage certain exposures to currency fluctuations, we initiated a limited hedging program beginning in the three months ended March 31, 2018 by entering into foreign currency derivative contracts with maturities of 12 months or less to hedge a portion of our net outstanding monetary assets and liabilities.

These derivative contracts include spot and forward contracts entered into with various counterparties, and are not designated as hedging instruments under applicable accounting guidance. As such, all changes in the fair value of these derivative contracts are recorded in Interest income and other income (expense), net on the condensed

consolidated statements of comprehensive loss. These derivative contracts are intended to offset the foreign currency gains or losses associated with the underlying monetary assets and liabilities, and changes in the related derivative assets and liabilities balances are classified as operating activities.

These derivative contracts expose us to credit risk to the extent that the counterparties may be unable to meet the terms of the arrangement. We mitigate this credit risk by transacting with major financial institutions with high credit ratings and entering into master netting arrangements, which permit net settlement of transactions with the same counterparty. While the contract or notional amount is often used to express the volume of foreign currency derivative contracts, the amounts potentially subject to credit risk are generally limited to the amounts, if any, by which the counterparties' obligations under the agreements exceed the obligations of the Company to the counterparties. We are not required to pledge, and are not entitled to receive, cash collateral related to these derivative instruments. We do not enter into derivative contracts for trading or speculative purposes.

Table of Contents

As of June 30, 2018, we had derivative contracts with total notional values of \$851.0 million, which are not designated as hedge instruments. Our foreign currency contracts are classified within Level 2 because the valuation inputs are based on quoted prices and market observable data of similar instruments in active markets, such as currency spot and forward rates. The fair values of these outstanding derivative contracts as of June 30, 2018 were as follows (in thousands):

	Condensed Consolidated Balance Sheet Location	June 30, 2018
<i>Derivative Assets:</i>		
Foreign currency derivative contracts	Prepaid expenses and other current assets	\$ 14,676
<i>Derivative Liabilities</i>		
Foreign currency derivative contracts	Accrued expenses and other current liabilities	\$ 844

(9) Deferred Revenue and Performance Obligations

Revenues recognized during the six months ended June 30, 2018 from amounts included in deferred revenue as of December 31, 2017 are \$825.0 million. Revenues recognized during the six months ended June 30, 2018 from performance obligations satisfied or partially satisfied in previous periods were not material.

Transaction Price Allocated to the Remaining Performance Obligations

Transaction price allocated to remaining performance obligations represents contracted revenue that has not yet been recognized, which includes deferred revenue and non-cancelable amounts that will be invoiced and recognized as revenues in future periods. We applied the practical expedient in accordance with Topic 606 to exclude the amounts related to professional services contracts that are on a time-and-material basis, which typically have a remaining duration of one year or less. In addition, we elected to apply the practical expedient to not disclose the transaction price allocated to remaining performance obligations for all periods presented before January 1, 2018, the date of our initial adoption of Topic 606.

As of June 30, 2018, the total remaining non-cancelable performance obligations under our contracts with customers was approximately \$4.0 billion, and we expect to recognize revenues on approximately 50% of these remaining performance obligations over the following 12 months, with the balance to be recognized thereafter.

(10) Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following (in thousands):

	June 30, 2018	December 31, 2017 *As Adjusted
Taxes payable	\$ 30,927	\$ 25,617
Bonuses and commissions	70,104	84,972
Accrued compensation	51,827	45,428
Other employee related liabilities	47,762	44,284
Other	73,374	52,956
Total accrued expenses and other current liabilities	\$ 273,994	\$ 253,257

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

(11) Convertible Senior Notes

In May and June 2017, we issued an aggregate of \$782.5 million of 0% convertible senior notes (the 2022 Notes), which are due June 1, 2022 unless earlier converted or repurchased in accordance with their terms. In November 2013, we issued \$575.0 million of 0% convertible senior notes (the 2018 Notes, and together with the 2022 Notes, the Notes), which are due November 1, 2018 unless earlier converted or repurchased in accordance with their terms. The Notes do not bear interest, and we cannot redeem the Notes prior to maturity.

The Notes are unsecured obligations and do not contain any financial covenants or restrictions on the payments of dividends, the incurrence of indebtedness or the issuance or repurchase of securities by us or any of our subsidiaries.

Table of Contents

Upon conversion of the Notes, we may choose to pay or deliver, as the case may be, cash, shares of our common stock or a combination of cash and shares of our common stock upon settlement. We currently intend to settle the principal amount of the Notes with cash.

Convertible Date	Initial Conversion Price per Share	Initial Conversion Rate per \$1,000 Par Value	Initial Number of Shares
2022 Notes February 1, 2022	\$ 134.75	7.42 shares	5,806,936
2018 Notes July 1, 2018	\$ 73.88	13.54 shares	7,783,023

Holders of the Notes may convert their Notes at their option at any time prior to the close of business on the business day immediately preceding February 1, 2022 and July 1, 2018, for the 2022 Notes and 2018 Notes, respectively (each, a Convertible Date), only under the following circumstances:

during any calendar quarter (and only during such calendar quarter) if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day (in each case, the Conversion Condition); or

during the five-business day period after any five-consecutive trading day period, or the measurement period, in which the trading price per \$1,000 principal amount of the Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on each such trading day; or

upon the occurrence of specified corporate events.

On or after the applicable Convertible Date, a holder may convert all or any portion of its Notes at any time prior to the close of business on the second scheduled trading day immediately preceding the maturity date regardless of the foregoing conditions, and such conversions will settle upon the applicable maturity date. Upon settlement, we will pay or deliver, as the case may be, cash, shares of our common stock or a combination of cash and shares of our common stock, pursuant to our election.

The conversion price will be subject to adjustment in some events. Holders of the Notes who convert their Notes in connection with certain corporate events that constitute a “make-whole fundamental change” are, under certain circumstances, entitled to an increase in the conversion rate. Additionally, in the event of a corporate event that constitutes a “fundamental change,” holders of the Notes may require us to purchase with cash all or a portion of the Notes upon the occurrence of a fundamental change, at a purchase price equal to 100% of the principal amount of the respective Notes plus any accrued and unpaid special interest, if any.

In accounting for the issuance of the Notes, we separated the Notes into liability and equity components. The carrying cost of the liability component was calculated by measuring the fair value of a similar liability that does not have an associated convertible feature. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the par value of the Notes. The difference between the principal amount of the Notes and the proceeds allocated to the liability component, or the debt discount, is amortized to interest expense using the effective interest method over the term of the respective Notes. The equity component is not remeasured as long as it continues to meet the conditions for equity classification.

In accounting for the transaction costs related to the issuance of the Notes, we allocated the total amount incurred to the liability and equity components based on their relative fair values. Transaction costs attributable to the liability

component are being amortized to interest expense over the respective terms of the Notes, and transaction costs attributable to the equity component were netted with the equity component of the Notes in stockholders' equity. The Notes consisted of the following (in thousands):

17

Table of Contents

	June 30, 2018	December 31, 2017
Liability component:		
Principal:		
2022 Notes	\$782,500	\$782,500
2018 Notes	216,252	574,994
Less: debt issuance cost and debt discount, net of amortization		
2022 Notes	(136,832)	(152,482)
2018 Notes	(4,789)	(31,576)
Net carrying amount	\$857,131	\$1,173,436
	2022 Notes	2018 Notes
Equity component recorded at issuance:		
Note	\$162,039	\$155,319
Issuance cost	(2,148)	(3,257)
Net amount recorded in equity	\$159,891	\$152,062

The Conversion Condition for the 2022 Notes was met for the quarter ended June 30, 2018, and therefore, our 2022 Notes became convertible at the holders' option beginning on July 1, 2018 through September 30, 2018. Through the filing date, we have not received any conversion requests for our 2022 Notes. The Conversion Condition for the 2018 Notes was met for the quarters ended June 30, 2017, September 30, 2017, December 31, 2017 and March 31, 2018, respectively. Therefore, the 2018 Notes became convertible at the holders' option beginning on July 1, 2017 and continued to be convertible at the holders' option through June 30, 2018. Any conversion requests received subsequent to June 30, 2018, will be settled on the maturity date, which is November 1, 2018.

During the six months ended June 30, 2018, we paid cash to settle \$358.7 million principal amount of the 2018 Notes and recorded a loss on early note conversions of \$3.9 million. The loss on early note conversions for the three months ended June 30, 2018 was \$3.1 million. As a result of the settlements, we also recorded a \$6.0 million net reduction to additional paid-in capital, reflecting \$473.2 million fair value adjustments to the conversion option, settled offset by a \$467.2 million benefit from the 2018 Note Hedges (as defined below).

For statement of cash flow presentation, we bifurcated the \$358.7 million paid during the six months ended June 30, 2018 into two components: the portion of the repayment attributable to debt discount is classified as cash outflows from operating activities, and the portion of the repayment attributable to the principal is classified as cash outflows from financing activities.

Based on additional conversion requests we have received through June 30, 2018, we expect to settle in cash an aggregate of \$54.4 million in principal amount of the 2018 Notes during the third quarter of 2018. For conversions received on or after the July 1, 2018 Convertible Date for the 2018 Notes, the remaining principal amount of the 2018 Notes of \$161.8 million will be settled on the maturity date, which is November 1, 2018.

We consider the fair value of the Notes at June 30, 2018 to be a Level 2 measurement. The estimated fair values of the Notes at June 30, 2018 and December 31, 2017 based on the closing trading price per \$100 of the Notes were as follows (in thousands):

	June 30, 2018	December 31, 2017
2022 Notes	\$1,056,375	\$897,778
2018 Notes	\$502,470	\$1,015,554

Table of Contents

As of June 30, 2018, the remaining life of the 2022 Notes and 2018 Notes are 47 months and 4 months, respectively. The following table sets forth total interest expense recognized related to the Notes (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2018	2017	June 30, 2018	2017
Amortization of debt issuance cost				
2022 Notes	\$380	\$122	\$756	\$122
2018 Notes	409	473	907	940
Amortization of debt discount				
2022 Notes	7,493	2,388	14,894	2,388
2018 Notes	7,216	8,354	16,005	16,565
Total	\$15,498	\$11,337	\$32,562	\$20,015
Effective interest rate of the liability component				
2022 Notes	4.75%			
2018 Notes	6.50%			

Note Hedges

To minimize the impact of potential economic dilution upon conversion of the Notes, we entered into convertible note hedge transactions (the 2022 Note Hedge and 2018 Note Hedge, respectively, and collectively, the Note Hedges) with certain investment banks, with respect to our common stock concurrently with the issuance of the 2022 Notes and 2018 Notes.

	Purchase (in thousands)	Shares
2022 Note Hedge	\$128,017	5,806,936
2018 Note Hedge	\$135,815	7,783,023

The Note Hedges cover shares of our common stock at a strike price per share that corresponds to the initial conversion price of the respective Notes, subject to adjustment, and are exercisable upon conversion of the Notes. If exercised, we may elect to receive cash, shares of our common stock, or a combination of cash and shares. We have accounted for the aggregate amount of purchase price for the Note Hedges as a reduction to additional paid-in capital. The Note Hedges will expire upon the maturity of the Notes. The Note Hedges are intended to reduce the potential economic dilution upon conversion of the Notes in the event that the fair value per share of our common stock at the time of exercise is greater than the conversion price of the Notes. The Note Hedges are separate transactions and are not part of the terms of the Notes. Holders of the Notes will not have any rights with respect to the Note Hedges. The Note Hedges do not impact earnings per share, as they were entered into to offset any dilution from the Notes.

During the six months ended June 30, 2018, the Note Hedge counterparties paid \$467.2 million in cash to holders of the 2018 Notes from the exercise of a portion of the 2018 Note Hedges. As of June 30, 2018, 2,927,122 shares remain subject to the 2018 Note Hedge due to early conversions that have occurred through June 30, 2018.

Warrants

	Proceeds (in thousands)	Shares	Strike Price	First Expiration Date
2022 Warrants	\$54,071	5,806,936	\$203.40	September 1, 2022
2018 Warrants	\$84,525	7,783,023	\$107.46	February 1, 2019

Table of Contents

Separately, we entered into warrant transactions with certain investment banks, whereby we sold warrants to acquire, subject to adjustment, the number of shares of our common stock shown in the table above (the 2022 Warrants and 2018 Warrants, respectively, and collectively, the Warrants). If the average market value per share of our common stock for the reporting period, as measured under the Warrants, exceeds the strike price of the respective Warrants, such Warrants would have a dilutive effect on our earnings per share to the extent we report net income. According to the terms of each of the Warrants, the Warrants will be automatically exercised over a 60 trading day period beginning on the first expiration date of the respective Warrants as set forth above. The Warrants are separate transactions and are not remeasured through earnings each reporting period. The Warrants are not part of the Notes or Note Hedges, and have been accounted for as part of additional paid-in capital.

Based on the stock price as of June 30, 2018, we expect to issue additional shares in the first half of 2019 upon the exercise of the 2018 Warrants. As the warrants will be net share settled, the number of shares we will issue depends on the stock price over a 60 trading day period beginning on the first expiration date of the 2018 Warrants, which is February 1, 2019. Based on the stock price as of June 30, 2018, the number of shares to be issued upon exercise of the 2018 Warrants would be approximately 2.9 million.

(12) Accumulated Other Comprehensive (Loss) Income

The components of accumulated other comprehensive (loss) income, net of tax, consist of the following (in thousands):

	June 30, 2018	December 31, 2017 *As Adjusted
Foreign currency translation adjustment	\$ 803	\$ 2,246
Net unrealized (loss) gain on investments, net of tax ⁽¹⁾	(4,798)	3,521
Accumulated other comprehensive (loss) income	\$(3,995)	\$ 5,767

(1) The net unrealized loss on investments as of June 30, 2018 includes a cumulative-effect adjustment, net of tax of \$7.2 million resulting from our adoption of ASU 2016-01. See Note 2 for further details.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Reclassification adjustments out of accumulated other comprehensive (loss) income into net loss were immaterial for all periods presented.

(13) Stockholders' Equity***Common Stock***

Under our restated certificate of incorporation, we were authorized to issue 600,000,000 shares of common stock as of June 30, 2018. Holders of our common stock are not entitled to receive dividends unless declared by our board of directors. As of June 30, 2018, we had 177,945,946 shares of common stock outstanding and had reserved shares of common stock for future issuance as follows:

	June 30, 2018
Stock plans:	
Options outstanding	2,169,490
RSUs ⁽¹⁾	12,113,962
Shares of common stock available for future grants:	
2012 Equity Incentive Plan ⁽²⁾	31,722,900
2012 Employee Stock Purchase Plan ⁽²⁾	10,948,982
Total shares of common stock reserved for future issuance	56,955,334

Edgar Filing: ServiceNow, Inc. - Form 10-Q

(1) Represents the number of shares issuable upon settlement of outstanding RSUs and performance-based RSUs, assuming 100% of the target number of shares are issuable for the 2018 performance-based RSUs, as discussed under the section entitled "RSUs" in Note 14.

(2) Refer to Note 14 for a description of these plans.

During the six months ended June 30, 2018 and 2017, we issued a total of 3,670,082 shares and 3,822,126 shares, respectively, from stock option exercises, vesting of restricted stock units (RSUs), net of shares withheld to satisfy employee payroll taxes, and purchases from our 2012 Employee Stock Purchase Plan.

20

Table of Contents**(14) Equity Awards**

We currently have two equity incentive plans, our 2005 Stock Option Plan (the 2005 Plan) and our 2012 Equity Incentive Plan (the 2012 Plan). Our 2005 Plan was terminated in connection with our initial public offering in 2012 but continues to govern the terms of outstanding stock options that were granted prior to the termination of the 2005 Plan. We no longer grant equity awards pursuant to our 2005 Plan.

Our 2012 Plan provides for the grant of incentive stock options, nonqualified stock options, stock appreciation rights, RSUs, performance-based stock awards and other forms of equity compensation (collectively, equity awards). In addition, the 2012 Plan provides for the grant of performance cash awards. Incentive stock options may be granted only to employees. All other equity awards may be granted to employees, including officers, as well as directors and consultants. The share reserve may increase to the extent outstanding stock options under the 2005 Plan expire or terminate unexercised. The share reserve also automatically increases on January 1 of each year until January 1, 2022, by up to 5% of the total number of shares of common stock outstanding on December 31 of the preceding year as determined by our board of directors. On January 1, 2018, 8,713,793 shares of common stock were automatically added to the 2012 Plan pursuant to the provision described in the preceding sentence.

Our 2012 Employee Stock Purchase Plan (the 2012 ESPP) authorizes the issuance of shares of common stock pursuant to purchase rights granted to our employees. The price at which common stock is purchased under the 2012 ESPP is equal to 85% of the fair market value of our common stock on the first or last day of the offering period, whichever is lower. Offering periods are six months long and begin on February 1 and August 1 of each year. The number of shares of common stock reserved for issuance automatically increases on January 1 of each year until January 1, 2022, by up to 1% of the total number of shares of common stock outstanding on December 31 of the preceding year as determined by our board of directors. On January 1, 2018, 1,742,758 shares of common stock were automatically added to the 2012 ESPP pursuant to the provision described in the preceding sentence.

Stock Options

A summary of the stock option activity for the six months ended June 30, 2018 is as follows:

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2017	3,369,732	\$ 38.43		
Exercised	(621,330)	27.83		\$ 77,936
Canceled	(61,168)	68.12		
Outstanding at March 31, 2018	2,687,234	40.21		
Exercised	(486,160)	18.02		\$ 73,805
Canceled	(31,584)	74.84		
Outstanding at June 30, 2018	2,169,490	44.67	5.62	\$ 277,264
Vested and expected to vest as of June 30, 2018	2,156,223	\$ 44.49	5.61	\$ 275,954
Vested and exercisable as of June 30, 2018	1,547,973	\$ 29.47	4.50	\$ 221,355

Aggregate intrinsic value represents the difference between the estimated fair value of our common stock and the exercise price of outstanding in-the-money options. The total fair value of stock options vested during the six months ended June 30, 2018 was \$8.0 million.

As of June 30, 2018, total unrecognized compensation cost, adjusted for estimated forfeitures, related to unvested stock options was approximately \$16.2 million. The weighted-average remaining vesting period of unvested stock options at June 30, 2018 was 2.78 years.

RSUs

A summary of RSU activity for the six months ended June 30, 2018 is as follows:

	Number of Shares	Weighted Average Grant Date Fair Value (Per Share)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2017	11,403,341	\$81.50	
Granted	4,078,322	151.13	
Vested	(1,854,662)	73.94	\$281,822
Forfeited	(348,849)	87.01	
Outstanding at March 31, 2018	13,278,152	103.80	
Granted	377,766	173.35	
Vested	(1,288,135)	71.70	\$226,722
Forfeited	(253,821)	99.79	
Outstanding at June 30, 2018	12,113,962	109.43	\$2,089,295

RSUs granted to employees under the 2012 Plan generally vest over a four-year period. As of June 30, 2018, total unrecognized compensation cost, adjusted for estimated forfeitures, related to unvested RSUs was approximately \$976.5 million and the weighted-average remaining vesting period was 3.03 years.

Included in the RSU activity table above are RSUs with both service and performance-based vesting criteria that were granted to certain employees. The number of shares eligible to vest for the performance-based RSUs (PRSUs) will depend upon achievement of a corporate performance metric, with level of achievement determined by the Leadership Development and Compensation Committee of our Board of Directors in January of the year following the grant. The ultimate number of shares eligible to vest for PRSUs range from 0% to 180% of the target number of shares depending on achievement relative to the performance metric over the applicable period. The eligible shares subject to PRSUs granted during the six months ended June 30, 2018 will vest 33% in February 2019 and continue to vest quarterly for the remaining two subsequent years, contingent on each holder's continuous status as a service provider on the applicable vesting dates. The PRSUs shown in the table above reflect the number of shares that would be eligible to vest at 100% of target performance, in the case of PRSUs for which achievement has not yet been determined, and reflect adjustments for over- or under- achievement, in the case of PRSUs for which achievement has already been determined. We recognized \$37.3 million and \$18.0 million of stock-based compensation expense, net of actual and estimated forfeitures, associated with PRSUs on a graded vesting basis during the six months ended June 30, 2018 and 2017, respectively.

(15) Net Loss Per Share

Basic net income (loss) per share attributable to common stockholders is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period. Diluted net income (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period, adjusted for the effects of dilutive shares of common stock, which are comprised of outstanding stock options, RSUs, ESPP obligations, the Notes and the Warrants. The dilutive potential shares of common stock are computed using the treasury stock method or the as-if converted method, as applicable. The effects of outstanding stock options, RSUs, ESPP obligations, Notes and Warrants are excluded from the computation of diluted net income (loss) per share in periods in which the effect would be antidilutive.

Table of Contents

The following tables present the calculation of basic and diluted net loss per share attributable to common stockholders (in thousands, except share and per share data):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017 *As Adjusted	2018	2017 *As Adjusted
Numerator:				
Net loss	\$(52,746)	\$(55,804)	\$(42,124)	\$(77,318)
Denominator:				
Weighted-average shares outstanding - basic and diluted	177,343,176	170,419,083	176,418,984	169,585,356
Net loss per share - basic and diluted	\$(0.30)	\$(0.33)	\$(0.24)	\$(0.46)

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Potentially dilutive securities that are not included in the calculation of diluted net loss per share because doing so would be antidilutive are as follows:

	June 30,	
	2018	2017
Common stock options	2,169,490	4,992,394
Restricted stock units	12,113,962	13,270,087
ESPP obligations	243,685	286,176
2018 convertible senior notes	2,927,122	7,783,023
Warrants related to the issuance of 2018 convertible senior notes	7,783,023	7,783,023
2022 convertible senior notes	5,806,933	5,806,936
Warrants related to the issuance of 2022 convertible senior notes	5,806,933	5,806,936
Total potentially dilutive securities	36,851,148	45,728,575

(16) Income Taxes

We compute our provision for income taxes by applying the estimated annual effective tax rate to year-to-date loss from recurring operations and adjust the provision for discrete tax items recorded in the period.

Our effective tax rate was (29)% and 13% for the three and six months ended June 30, 2018, which was lower than the U.S. federal statutory tax rate of 21%. For the three months ended June 30, 2018, the lower tax rate was primarily attributable to our loss from operations. For the six months ended June 30, 2018, the lower tax rate was primarily attributable to the one-time indirect effect of Topic 606 on income taxes associated with intercompany adjustments offset by our loss from operations.

Our effective tax rate was 3% and 4% for the three and six months ended June 30, 2017, which was lower than the U.S. federal statutory tax rate of 34%. The lower tax rate was primarily attributable to our loss from operations, the foreign tax rate differential, a release of the valuation allowance in connection with an acquisition and excess tax benefits of stock-based compensation.

We are subject to taxation in the United States and foreign jurisdictions. As of June 30, 2018, our tax years 2004 to 2017 remain subject to examination in most jurisdictions.

Table of Contents

There are differing interpretations of tax laws and regulations, and as a result, disputes may arise with tax authorities involving issues of the timing and amount of deductions and allocations of income among various tax jurisdictions. We periodically evaluate our exposures associated with our tax filing positions. We believe that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations, and we do not anticipate a significant impact to our gross unrecognized tax benefits within the next 12 months related to these years. Although the timing of the resolution, settlement, and closure of any audit is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years that remain subject to examination, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

(17) Commitments and Contingencies***Operating Leases and Other Contractual Commitments***

For some of our offices and data centers, we have entered into non-cancelable operating lease agreements with various expiration dates. Future minimum payments under our non-cancelable operating leases and other contractual commitments outstanding as of June 30, 2018 are presented in the table below (in thousands):

	Operating Leases	Purchase Obligations ⁽¹⁾	Other	Total
Years Ending December 31,				
Remainder of 2018	\$22,608	\$21,407	\$419	\$44,434
2019	48,833	38,702	837	88,372
2020	47,756	28,927	871	77,554
2021	46,351	12,360	888	59,599
2022	49,784	5,877	888	56,549
Thereafter	572,052	4,461	370	576,883
Total	\$787,384	\$111,734	\$4,273	\$903,391

Consists of future minimum payments under non-cancelable purchase commitments primarily related to data center and IT operations and sales and marketing activities. Not included in the table above are certain purchase commitments related to our future annual Knowledge user conferences and other customer or sales conferences. If we were to cancel these contractual commitments as of June 30, 2018, we would have been obligated to pay cancellation penalties of approximately \$16.4 million in aggregate.

In addition to the amounts above, the repayment of our 2022 Notes with an aggregate principal amount of \$782.5 million is due on June 1, 2022, and the repayment of our remaining 2018 Notes with an aggregate principal amount of \$216.3 million is due on November 1, 2018. Refer to Note 11 for further information regarding our Notes.

In addition to the obligations in the table above, approximately \$13.7 million of unrecognized tax benefits have been recorded as liabilities as of June 30, 2018. It is uncertain as to if or when such amounts may be settled.

Legal Proceedings

From time to time, we are party to litigation and other legal proceedings in the ordinary course of business. While the results of any litigation or other legal proceedings are uncertain, management does not believe the ultimate resolution of any pending legal matters is likely to have a material adverse effect on our financial position, results of operations or cash flows, except for those matters for which we have recorded a loss contingency. We accrue for loss contingencies when it is both probable that we will incur the loss and when we can reasonably estimate the amount of the loss or range of loss.

Generally, our subscription agreements require us to defend our customers for third-party intellectual property infringement and other claims. Any adverse determination related to intellectual property claims or other litigation could prevent us from offering our services and adversely affect our financial condition and results of operations.

Table of Contents**(18) Information about Geographic Areas and Products**

Revenues by geographic area, based on the location of our users, were as follows for the periods presented (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017 *As Adjusted	2018	2017 *As Adjusted
North America ⁽¹⁾	\$413,259	\$306,159	\$800,732	\$600,014
EMEA ⁽²⁾	160,644	108,361	313,070	210,046
Asia Pacific and other	57,153	33,738	106,476	66,969
Total revenues	\$631,056	\$448,258	\$1,220,278	\$877,029

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Property and equipment, net by geographic area were as follows (in thousands):

	June 30, 2018	December 31, 2017
North America ⁽³⁾	\$185,522	\$164,040
EMEA ⁽²⁾	68,105	50,028
Asia Pacific and other	33,326	31,056
Total property and equipment, net	\$286,953	\$245,124

(1) Revenues attributed to the United States were approximately 94% of North America revenues for each of the three and six months ended June 30, 2018 and the six months ended June 30, 2017, and 95% of North America revenues for the three months ended June 30, 2017.

(2) Europe, the Middle East and Africa

(3) Property and equipment, net attributed to the United States were approximately 86% and 89% of property and equipment, net attributable to North America as of June 30, 2018 and December 31, 2017, respectively.

Subscription revenues consist of the following (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017 *As Adjusted	2018	2017 *As Adjusted
Service management products	\$494,714	\$356,370	\$957,276	\$700,162
ITOM products	90,568	46,302	171,331	90,094
Total subscription revenues	\$585,282	\$402,672	\$1,128,607	\$790,256

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Our service management products include our platform, IT service management, IT business management, customer service management, HR service delivery and security operations, and are generally priced on a per user basis. Our IT operations management (ITOM) products are generally priced on a per node basis.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition, results of operations and cash flows should be read in conjunction with the (1) unaudited condensed consolidated financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q, and (2) the audited consolidated financial statements and notes thereto and management’s discussion and analysis of financial condition and results of operations for the year ended December 31, 2017 included in the Annual Report on Form 10-K dated as of, and filed with the Securities and Exchange Commission (the SEC), on February 28, 2018 (File No. 001-35580). This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). These statements are often identified by the use of words such as “may,” “will,” “expect,” “believe,” “anticipate,” “intend,” “could,” “estimate,” or “continue,” and similar expressions or variations. Such forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified herein, and those discussed in the section titled “Risk Factors,” set forth in Part II, Item 1A of this Quarterly Report on Form 10-Q and in our other SEC filings. We disclaim any obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Our billings and free cash flow measures included in the sections entitled “—Key Business Metrics—Billings,” and “—Key Business Metrics—Free Cash Flow” are not presented in accordance with U.S. Generally Accepted Accounting Principles (GAAP). These non-GAAP financial measures are not intended to be considered in isolation or as a substitute for, or superior to, financial information prepared and presented in accordance with GAAP. These measures may be different from non-GAAP financial measures used by other companies, limiting their usefulness for comparison purposes. We encourage investors to carefully consider our results under GAAP, as well as our supplemental non-GAAP information and the reconciliation between these presentations, to more fully understand our business.

Overview

ServiceNow is a leading provider of enterprise cloud computing solutions that define, structure, manage and automate services for global enterprises. We help our customers improve service quality and reduce costs while scaling and automating their businesses.

We generally offer our services on an annual subscription fee basis, which includes access to the ordered subscription service and related support, including updates to the subscription service during the subscription term. We provide a scaled pricing model based on the duration of the subscription term, and we frequently extend discounts to our customers based on the volume of units purchased. We generate sales through our direct sales team and, to a lesser extent, indirectly through resale partners and third-party referrals. We also generate revenues from professional services and for training of customer and partner personnel. We generally bill our customers annually in advance for subscription services and monthly in arrears for our professional services as the work is performed.

A majority of our revenues come from large global enterprise customers. We continue to invest in the development of our services, infrastructure and sales and marketing to drive long-term growth. We increased our overall employee headcount to 7,150 as of June 30, 2018 from 5,571 as of June 30, 2017.

Key Business Metrics

Number of customers with ACV greater than \$1 million. We count the total number of customers with annualized contract value (ACV) greater than \$1 million as of the end of the period. We had 575 and 410 customers with ACV greater than \$1 million as of June 30, 2018 and 2017, respectively. For purposes of customer count, a customer is defined as an entity with a unique Dunn & Bradstreet Global Ultimate (GULT), Data Universal Numbering System (DUNS) number and an active subscription contract as of the measurement date. The DUNS number is a global standard for business identification and tracking. We make exceptions for holding companies, government entities and other organizations for which the GULT, in our judgment, does not accurately represent the ServiceNow customer. For example, while all U.S. government agencies roll up to “Government of the United States” under the GULT, we count each government agency that we contract with as a separate customer. Our customer count is subject to adjustments for acquisitions, spin-offs and other market activity. Previously disclosed number of customers with ACV greater than \$1 million as well as our average contract term calculations are restated to allow for comparability. ACV is calculated based on the foreign exchange rate in effect at the time the contract was signed. Foreign exchange rate fluctuations could cause some variability in the number of customers with ACV greater than \$1 million.

Table of Contents

G2K customer count. The Global 2000 (G2K) customer count is defined as the total number of G2K companies in our customer base as of the end of the period. The Forbes Global 2000 is an annual ranking of the top 2,000 public companies in the world by Forbes magazine. The ranking is based on a mix of four metrics: sales, profit, assets, and market value. The Forbes Global 2000 is updated annually in the second quarter of the calendar year. Current and prior period G2K customer counts are based on the most recent list comparability purposes. We also adjust the G2K count for acquisitions, spin-offs and other market activity. For example, we add a G2K customer when a G2K company that is not our customer acquires a company in our existing customer base that is not a G2K company. When we enter into a contract with a G2K parent company, or any of its related subsidiaries, or any combination of entities within a G2K company, we count only one G2K customer. We do not count further penetration into entities within a given G2K as a new customer in the G2K customer count. Our G2K customer count also excludes customers that have only purchased our Express product offering, which is our entry-level IT service management solution. Our G2K customer count does not include large private companies, government agencies and educational organizations, which represent a growing portion of our customer base. As a result, we expect our G2K customer count metric to become less relevant to our business over time. Our G2K customer count was 837 and 764 as of June 30, 2018 and 2017, respectively.

Average ACV per G2K customer. We calculate average ACV for our G2K customers by taking aggregate ACV from G2K customers as of the end of the period divided by the total number of G2K customers as of the end of the period. ACV is calculated based on the foreign exchange rate in effect at the time the contract was entered into, and as a result, foreign currency rate fluctuations could cause variability in the average ACV per G2K customer. Prior G2K customer counts used in calculating ACV per G2K customer are adjusted for the most recent Forbes Global 2000 list for comparability purposes. Our average ACV per G2K customer was approximately \$1.5 million and \$1.2 million as of June 30, 2018 and 2017, respectively.

Renewal rate. We calculate our renewal rate by subtracting our attrition rate from 100%. Our attrition rate for a period is equal to the ACV from customers lost during the period, divided by the sum of (i) the total ACV from all customers that renewed during the period, excluding changes in price or users, and (ii) the total ACV from all customers lost during the period. Accordingly, our renewal rate is calculated based on ACV and is not based on the number of customers that have renewed. Further, our renewal rate does not reflect increased or decreased purchases from our customers to the extent such customers are not lost customers. A lost customer is a customer that did not renew an expiring contract and that, in our judgment, will not be renewed. Typically, a customer that reduces its subscription upon renewal is not considered a lost customer. However, in instances where the subscription decrease represents the majority of the customer's ACV, we may deem the renewal as a lost customer. For our renewal rate calculation, we define a customer as an entity with a separate production instance of our service and an active subscription contract as of the measurement date, instead of an entity with a unique GULT or DUNS number. Our renewal rate was 98% for each of the three months ended June 30, 2018 and 2017 and six months ended June 30, 2018, and 97% for the six months ended June 30, 2017. As our renewal rate is impacted by the timing of renewals, which could occur in advance of, or subsequent to the original contract end date, period-to-period comparison of renewal rates may not be meaningful.

Total backlog. Total backlog consists of unbilled backlog, deferred revenue and customer deposits. Unbilled backlog is an operational measure representing future unearned revenue amounts believed to be firm that are to be invoiced under our existing agreements and are not included in the deferred revenue or customer deposits on our consolidated balance sheets. In our previous Annual Reports on Form 10-K, we referred to unbilled backlog as "backlog." We believe total backlog is a useful measure of customer adoption of our services.

As of June 30, 2018, our total backlog was \$4.2 billion, of which \$2.8 billion was unbilled backlog and \$1.4 billion was deferred revenue and customer deposits. Of this total backlog, we expect to recognize approximately 50% in

revenues over the 12 months following June 30, 2018, with the balance to be recognized thereafter.

As of December 31, 2017, our total backlog was \$3.8 billion, of which \$2.5 billion was unbilled backlog and \$1.3 billion was deferred revenue and customer deposits, which reflects the impact of the full retrospective adoption of Topic 606. For the disclosure of unbilled backlog prior to the adoption of Topic 606, see the section entitled “Business” in our Annual Report on Form 10-K for the year ended December 31, 2017 filed on February 28, 2018.

We expect total backlog to fluctuate due to a number of factors, including the timing, duration and size of customer contracts, the mix of cloud and on-premises offerings and foreign exchange rate fluctuations.

Table of Contents

Billings. We define billings, a non-GAAP financial measure, as revenues recognized plus the change in total unbilled receivables, deferred revenue and customer deposits as presented on the condensed consolidated statements of cash flows. Prior to adopting Topic 606 on January 1, 2018, we had defined billings in previous filings as revenues recognized plus the change in total deferred revenue as presented on the condensed consolidated statements of cash flows. Our current definition better aligns with Topic 606, which became effective for our interim and annual periods beginning January 1, 2018. Refer to Note 2 in the notes to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information regarding Topic 606.

A calculation of billings is provided below:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2018	2017 *As Adjusted	% Change	2018	2017 *As Adjusted	% Change
	(dollars in thousands)			(dollars in thousands)		
Billings:						
Total revenues	\$631,056	\$448,258	41 %	\$1,220,278	\$877,029	39 %
Change in total deferred revenue, unbilled receivables and customer deposits ⁽¹⁾	34,810	49,349	(29)%	134,974	140,049	(4)%
Total billings	\$665,866	\$497,607	34 %	\$1,355,252	\$1,017,078	33 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

(1) As presented on or derived from our condensed consolidated statements of cash flows.

Billings consists of amounts invoiced for subscription contracts with existing customers, renewal contracts, contracts for increased purchases with existing customers (expansion contracts), contracts with new customers, and contracts for professional services and training. Factors that may cause our billings results to vary from period to period include the following:

Billings duration. While we typically bill customers annually for our subscription services, customers sometimes request, and we accommodate, billings with durations less than or greater than the typical 12-month term.

Contract start date. From time to time, we enter into contracts with a contract start date in the future, and we exclude these amounts from billings as these amounts are not included in our consolidated balance sheets, unless such amounts have been paid as of the balance sheet date.

Foreign currency exchange rates. While a majority of our billings have historically been in U.S. Dollars, an increasing percentage of our billings in recent periods has been in foreign currencies, particularly the Euro and British Pound Sterling.

Timing of contract renewals. While customers typically renew their contracts at the end of the contract term, from time to time customers may do so either before or after the scheduled expiration date. For example, in cases where we are successful in selling additional products or services to an existing customer, a customer may decide to renew its existing contract early to ensure that all its contracts expire on the same date. In other cases, prolonged negotiations or other factors may result in a contract not being renewed until after it has expired.

While we believe billings is a useful leading indicator regarding the performance of our business, due to the factors described above, an increase or decrease in new or renewed subscriptions in a reporting period may not have an immediate impact on billings for that reporting period.

To facilitate greater year-over-year comparability in our billings results, we disclose the impact that foreign currency rate fluctuations and fluctuations in billings duration had on our billings. The impact of foreign currency rate fluctuations is calculated by translating the current period results for entities reporting in currencies other than U.S.

Dollars into U.S. Dollars at the average exchange rates in effect during the prior period presented, rather than the actual exchange rates in effect during the current period. The impact of fluctuations in billings duration is calculated by replacing the portion of multi-year billings in excess of 12 months during the current period with the portion of multi-year billings in excess of 12 months during the prior period presented. Notwithstanding the adjustments described above, the comparability of billings results from period to period remains subject to the impact of variations in the dollar value of contracts with future start dates and the timing of contract renewals, for which no adjustments have been presented.

Table of Contents

Foreign currency rate fluctuations had a favorable impact of \$16.4 million and \$46.0 million on billings for the three and six months ended June 30, 2018, respectively. Changes in billings duration had a favorable impact of \$0.6 million for the three months ended June 30, 2018 and an unfavorable impact of \$1.4 million for the six months ended June 30, 2018.

We have historically experienced seasonality in terms of when we enter into customer agreements for our services. We sign a significantly higher percentage of agreements with new customers, as well as renewal agreements with existing customers, in the fourth quarter of each year. The increase in customer agreements for the fourth quarter is primarily a result of the terms of our commission plans to incentivize our direct sales force to meet their annual quotas by December 31 and large enterprise account buying patterns typical in the software industry, which are driven primarily by the expiration of annual authorized budgeted expenditures. Furthermore, we usually sign a significant portion of these agreements during the last month, and often the last two weeks, of each quarter. This seasonality in the timing of entering into customer contracts is sometimes not immediately apparent in our billings, due to the fact that we typically exclude cloud-offering contracts with a future start date from our billings. Similarly, this seasonality is reflected to a much lesser extent, and sometimes is not immediately apparent in our revenues, due to the fact that we recognize subscription revenues from our cloud offerings over the term of the license agreement, which is generally 12 to 36 months. Although these seasonal factors are common in the technology industry, historical patterns should not be considered a reliable indicator of our future sales activity or performance.

Free cash flow. We define free cash flow, a non-GAAP financial measure, as GAAP net cash provided by operating activities reduced by purchases of property and equipment. Purchases of property and equipment are otherwise included in cash used in investing activities under GAAP. We believe information regarding free cash flow provides useful information to investors because it is an indicator of the strength and performance of our business operations. However, our calculation of free cash flow may not be comparable to similar measures used by other companies. In addition, free cash flow is impacted by the timing of collections and disbursements, including the timing of capital expenditures. We have historically seen higher collections in the quarter ended March 31 due to seasonality in timing of entering into customer contracts in the quarter ended December 31. A calculation of free cash flow is provided below:

	Six Months Ended June 30,		%
	2018	2017	Change
	(dollars in thousands)		
Free cash flow:			
Net cash provided by operating activities	\$375,976	\$316,333	19 %
Purchases of property and equipment	(88,362)	(69,103)	28 %
Free cash flow ⁽¹⁾	\$287,614	\$247,230	16 %

(1) Free cash flow for the six months ended June 30, 2018 includes the effect of \$87.6 million relating to the repayments of convertible senior notes attributable to debt discount.

Average contract term. We calculate the average contract term for new customers, expansion contracts, and renewals based on the terms of those contracts entered into during the period weighted by their ACV. The average new customer contract term was 35 months and 34 months for the three months ended June 30, 2018 and 2017, respectively, and 36 months and 34 months for the six months ended June 30, 2018 and 2017, respectively. The average expansion contract term was 26 months and 28 months for the three months ended June 30, 2018 and 2017, respectively, and 26 months and 27 months for the six months ended June 30, 2018 and 2017, respectively. The average renewal contract term was 29 months and 28 months for the three months ended June 30, 2018 and 2017, respectively, and 28 months and 27 months for the six months ended June 30, 2018 and 2017, respectively.

Components of Results of Operations

Revenues

Subscription revenues. Subscription revenues are primarily comprised of fees that give customers access to the ordered subscription service, and related support and updates, if any, to the subscription service during the subscription term. Pricing includes multiple instances, hosting and support services, data backup and disaster recovery services, as well as future updates, when and if available, offered during the subscription term. We typically invoice our customers for subscription fees in annual increments upon execution of the initial contract or subsequent renewal. Our contracts are generally non-cancelable during the subscription term, though a customer can terminate for breach if we materially fail to perform.

Table of Contents

Professional services and other revenues. Professional services revenues consist of fees associated with professional services. Our arrangements for professional services are primarily on a time-and-materials basis. We generally invoice our professional services monthly in arrears based on actual hours and expenses incurred. Other revenues primarily consist of fees from customer training delivered on-site or through publicly available classes. Typical payment terms require our customers to pay us within 30 days of invoice.

We generate sales directly through our sales team and, to a lesser extent, through our resale partners. Revenues from our direct sales organization represented 84% and 89% of our total revenues for the three months ended June 30, 2018 and 2017, respectively, and 85% and 90% for the six months ended June 30, 2018 and 2017, respectively. We make sales to our resale partners at a discount and record those revenues at the discounted price when all revenue recognition criteria have been met. From time to time, other third parties provide us referrals for which we pay a referral fee. We include revenues associated with these referrals as part of revenues from our direct sales organization. Referral fees paid to these third parties are generally 10% of the customer's net new ACV. We include these fees in sales and marketing expense.

Allocation of Overhead Costs

Overhead costs associated with office facilities, IT and certain depreciation related to infrastructure that is not dedicated for customer use or research and development use are allocated to cost of revenues and operating expenses based on headcount.

Cost of Revenues

Cost of subscription revenues. Cost of subscription revenues consists primarily of expenses related to hosting our services and providing support to our customers. These expenses are comprised of data center capacity costs, which include facility costs associated with our data centers as well as interconnectivity between data centers, depreciation related to our infrastructure hardware equipment dedicated for customer use, amortization of intangible assets and personnel-related costs directly associated with data center operations and customer support, including salaries, benefits, bonuses and stock-based compensation and allocated overhead.

Cost of professional services and other revenues. Cost of professional services and other revenues consists primarily of personnel-related costs directly associated with our professional services and training departments, including salaries, benefits, bonuses and stock-based compensation, the costs of contracted third-party partners, travel expenses and allocated overhead.

Professional services are performed directly by our services team, as well as by contracted third-party partners. Fees paid to third-party partners are primarily recognized as cost of revenues as the professional services are delivered. Cost of revenues associated with our professional services engagements contracted with third-party partners as a percentage of professional services and other revenues was 19% and 21% for the three months ended June 30, 2018 and 2017, respectively, and 19% and 22% for the six months ended June 30, 2018 and 2017, respectively.

Sales and Marketing

Sales and marketing expenses consist primarily of personnel-related expenses directly associated with our sales and marketing staff, including salaries, benefits, bonuses, commissions and stock-based compensation. Sales and marketing expenses also include third-party referral fees, expenses offset by proceeds related to our annual Knowledge user conference, other marketing program expenses, which include events other than Knowledge, and costs associated with purchasing advertising and marketing data, and allocated overhead.

Research and Development

Research and development expenses consist primarily of personnel-related expenses directly associated with our research and development staff, including salaries, benefits, bonuses and stock-based compensation and allocated overhead. Research and development expenses also include data center capacity costs, costs associated with outside services contracted for research and development purposes, amortization of intangible assets and depreciation of infrastructure hardware equipment that is used solely for research and development purposes.

General and Administrative

General and administrative expenses consist primarily of personnel-related expenses for our executive, finance, legal, human resources, facilities and administrative personnel, including salaries, benefits, bonuses and stock-based compensation, external legal, accounting and other professional services fees, other corporate expenses, amortization of intangible assets and allocated overhead.

Table of Contents

Provision for Income Taxes

Provision for income taxes consists of federal, state and foreign income taxes. Due to cumulative losses, we maintain a valuation allowance against our U.S. deferred tax assets as of June 30, 2018. We consider all available evidence, both positive and negative, including but not limited to earnings history, projected future outcomes, industry and market trends and the nature of each of the deferred tax assets in assessing the extent to which a valuation allowance should be applied against our U.S. deferred tax assets.

Table of Contents**Results of Operations**

To enhance comparability, the following table sets forth our results of operations for the periods presented. The period-to-period comparison of financial results is not necessarily indicative of future results.

Subscription revenues increased \$182.6 million during the three months ended June 30, 2018 compared to the same period in the prior year, driven by increased purchases by existing customers and an increase in our customer count. Included in subscription revenues is \$31.6 million and \$7.8 million of revenues recognized upfront from the delivery of software associated with our on-premises offering during the three months ended June 30, 2018 and 2017, respectively. We expect subscription revenues to grow in absolute dollars and as a percentage of total revenues for the year ending December 31, 2018 compared to the year ended December 31, 2017 as we continue to add new customers and existing customers increase their usage of our products. Our expectations for revenues, cost of revenues and operating expenses for the remainder of 2018 are based on foreign exchange rates as of June 30, 2018.

Subscription revenues consist of the following:

	Three Months Ended June 30,		% Change	
	2018	2017 *As Adjusted		
(dollars in thousands)				
Service management products	\$494,714	\$356,370	39	%
ITOM products	90,568	46,302	96	%
Total subscription revenues	\$585,282	\$402,672	45	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Our service management products include our platform, IT service management, IT business management, customer service management, HR service delivery and security operations, and are generally priced on a per user basis. Our ITOM products are generally priced on a per node basis.

Professional services and other revenues increased \$0.2 million during the three months ended June 30, 2018 compared to the same period in the prior year.

Our international operations have provided and will continue to provide a significant portion of our total revenues. Revenues outside North America represented 35% and 32% of total revenues for the three months ended June 30, 2018 and 2017, respectively. As a result, the general weakening of the U.S. Dollar relative to other major foreign currencies (primarily the Euro and British Pound Sterling) from the three months ended June 30, 2017 to the three

months ended June 30, 2018 had a favorable impact on our revenues. For entities reporting in currencies other than the U.S. Dollar, if we had translated our results for the three months ended June 30, 2018 at the exchange rates in effect for the three months ended June 30, 2017 rather than the actual exchange rates in effect during the period, our reported subscription revenues would have been \$14.3 million lower. The impact from the foreign currency movements from the three months ended June 30, 2017 to the three months ended June 30, 2018 is not material to professional services and other revenues.

Table of Contents**Cost of Revenues and Gross Profit Percentage**

	Three Months Ended June 30,		% Change	
	2018	2017 *As Adjusted		
(dollars in thousands)				
Cost of revenues:				
Subscription	\$ 101,699	\$ 75,793	34	%
Professional services and other	51,466	46,335	11	%
Total cost of revenues	\$ 153,165	\$ 122,128	25	%
Gross profit (loss) percentage:				
Subscription	83	% 81		%
Professional services and other	(12)% (2)%	
Total gross profit percentage	76	% 73		%
Gross profit	\$ 477,891	\$ 326,130		
Headcount (at period end)				
Subscription	1,065	837	27	%
Professional services and other	602	566	6	%
Total headcount	1,667	1,403	19	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Cost of subscription revenues increased \$25.9 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount, which resulted in an increase of \$8.7 million in personnel-related costs excluding stock-based compensation, an increase of \$3.6 million in stock-based compensation and an increase of \$2.6 million in overhead expenses. Depreciation expense increased \$5.1 million, primarily due to purchases of infrastructure hardware equipment for our data centers and expenses associated with software, IT services, technical support increased \$1.9 million. In addition, data center capacity costs increased \$1.7 million due to the addition of new data centers and the expansion of existing data centers.

Our subscription gross profit percentage was 83% and 81% for the three months ended June 30, 2018 and 2017, respectively. We expect our cost of subscription revenues to increase in absolute dollar terms for the year ending December 31, 2018 compared to the year ended December 31, 2017 as we provide subscription services to more customers and increase usage within our customer instances. We expect our subscription gross profit percentage to improve slightly for the year ending December 31, 2018 compared to the year ended December 31, 2017 as we continue to leverage the investments we have made in our existing data center infrastructure. To the extent future acquisitions are consummated, our cost of subscription revenues may increase due to additional non-cash charges associated with the amortization of intangible assets acquired.

Cost of professional services and other revenues increased \$5.1 million during the three months ended June 30, 2018 as compared to the same period in the prior year, primarily due to increased headcount resulting in an increase of \$4.0 million in personnel-related costs excluding stock-based compensation.

Our professional services and other gross loss percentage increased to 12% for the three months ended June 30, 2018, from 2% for the three months ended June 30, 2017, primarily due to stock-based compensation and other personnel-related costs increasing at a higher rate than professional services and other revenues as we invest in specialized resources to support our newer products.

The impact from the foreign currency movements from the three months ended June 30, 2017 to the three months ended June 30, 2018 is not material to cost of revenues.

Table of Contents**Sales and Marketing**

	Three Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
Sales and marketing	\$310,869	\$222,393	40 %
Percentage of revenues	49	% 49	%
Headcount (at period end)	2,763	2,185	26 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Sales and marketing expenses increased \$88.5 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount that resulted in an increase of \$37.4 million in personnel-related costs excluding stock-based compensation and commissions, an increase of \$14.8 million in stock-based compensation and an increase of \$7.2 million in overhead expenses. Commissions and third-party referral fees increased \$12.6 million, and amounted to 6% and 5% of subscription revenues for the three months ended June 30, 2018 and 2017, respectively. Expenses related to our annual Knowledge user conference, net of proceeds, increased \$6.8 million due to a 21% year-over-year increase in registrations. Other marketing program expenses, which include events other than Knowledge, and costs associated with purchasing advertising and market data, increased \$6.5 million during the three months ended June 30, 2018 compared to the same period in the prior year. Outside service costs increased \$3.2 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to an increase in contractors and professional fees to support our sales and marketing functions.

The general weakening of the U.S. Dollar relative to other major foreign currencies from the three months ended June 30, 2017 to the three months ended June 30, 2018 had an unfavorable impact on our sales and marketing expenses. For entities reporting in currencies other than the U.S. Dollar, if we had translated our results for the three months ended June 30, 2018 at the exchange rates in effect for the three months ended June 30, 2017 rather than the actual exchange rates in effect during the period, our reported sales and marketing expenses would have been \$3.5 million lower.

We have historically seen an increase in marketing expenses in the quarter ended June 30, and a corresponding decrease in marketing expenses in the quarter ended September 30 due to the net expenses incurred for our annual Knowledge user conference. We expect sales and marketing expenses to increase in absolute dollar terms for the year ending December 31, 2018 compared to the year ended December 31, 2017, but remain relatively flat as a percentage of total revenues as we continue to expand our direct sales force, increase our marketing activities, grow our international operations and build brand awareness.

Research and Development

	Three Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
Research and development	\$127,916	\$90,005	42 %
Percentage of revenues	20	% 20	%
Headcount (at period end)	1,675	1,216	38 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Research and development expenses increased \$37.9 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount, which resulted in an increase of \$19.1 million in personnel-related costs excluding stock-based compensation, an increase of \$11.0 million in stock-based compensation and an increase of \$5.0 million in overhead expenses.

The impact from the foreign currency movements from the three months ended June 30, 2017 to the three months ended June 30, 2018 is not material to research and development expenses.

We expect research and development expenses to increase in absolute dollar terms for the year ending December 31, 2018 compared to the year ended December 31, 2017, but remain relatively flat as a percentage of total revenues as we continue to improve the existing functionality of our services, develop new applications to fill market needs and enhance our core platform.

Table of Contents**General and Administrative**

	Three Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
General and administrative	\$71,095	\$51,526	38 %
Percentage of revenues	11	% 11	%
Headcount (at period end)	1,045	767	36 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

General and administrative expenses increased \$19.6 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount, which resulted in an increase of \$10.6 million in personnel-related costs excluding stock-based compensation and an increase of \$7.3 million in stock-based compensation. Outside service costs increased \$1.5 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to an increase in contractors and professional fees to support our administrative function.

The impact from the foreign currency movements from the three months ended June 30, 2017 to the three months ended June 30, 2018 is not material to general and administrative expenses.

We expect general and administrative expenses to increase in absolute dollar terms for the year ending December 31, 2018 compared to the year ended December 31, 2017 as we continue to hire people, but remain relatively flat as a percentage of total revenues.

Stock-based Compensation

	Three Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
Cost of revenues:			
Subscription	\$12,538	\$8,942	40 %
Professional services and other	8,342	7,617	10 %
Sales and marketing	57,069	42,287	35 %
Research and development	33,780	22,731	49 %
General and administrative	23,831	16,489	45 %
Total stock-based compensation	\$135,560	\$98,066	38 %
Percentage of revenues	21	% 22	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Stock-based compensation increased \$37.5 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount and increased weighted-average grant date fair value of stock awards.

Stock-based compensation is inherently difficult to forecast due to fluctuations in our stock price. Based upon our stock price as of June 30, 2018, we expect stock-based compensation to increase in absolute dollar terms for the year ending December 31, 2018 compared to the year ended December 31, 2017 as we continue to issue stock-based awards to our employees, but remain relatively flat as a percentage of total revenues.

Table of Contents**Interest Expense**

	Three Months Ended June 30,		% Change
	2018	2017	
	(dollars in thousands)		
Interest expense	\$ (15,498)	\$ (11,337)	37 %
Percentage of revenues	2 %	2 %	

Interest expense increased \$4.2 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to the increase in the aggregate amount of convertible debt and associated amortization expense of debt discount and issuance costs related to the 2022 Notes issued in May and June 2017.

Interest Income and Other Income (Expense), net

	Three Months Ended June 30,		% Change
	2018	2017 *As Adjusted	
	(dollars in thousands)		
Interest income	\$7,483	\$3,419	119 %
Foreign currency exchange gain (loss), net of derivative contracts	783	(11,849)	(107)%
Gain on marketable equity securities	802	—	NM
Loss on early note conversions	(3,093)	—	NM
Other	663	(55)	NM
Interest and other income (expense), net	\$6,638	\$(8,485)	(178)%
Percentage of revenues	1 %	2 %	

NM - Not meaningful.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Interest income and other income (expense), net increased \$15.1 million during the three months ended June 30, 2018 compared to the same period in the prior year, primarily due to an increase of \$12.6 million from fluctuations in foreign currency exchange rates. Our foreign currency exchange exposures were largely mitigated by the derivative contracts we have entered into during the three months ended June 30, 2018 compared to the same period in the prior year. The increase in interest income and other income (expense), net is also due to an increase of \$4.1 million of interest income due to higher cash and investment balances and higher yields on our invested balances for the three months ended June 30, 2018, partially offset by a \$3.1 million loss recorded on early note conversions.

In order to manage certain exposures to currency fluctuations, we initiated a limited hedging program beginning in the three months ended March 31, 2018 by entering into foreign currency derivative contracts with maturities of 12 months or less to hedge a portion of our net outstanding monetary assets and liabilities. These hedging contracts may reduce, but cannot entirely eliminate, the impact of adverse currency exchange rate movements.

Provision for (Benefit from) Income Taxes

	Three Months Ended June 30,		% Change
	2018	2017 *As Adjusted	
	(dollars in thousands)		
Loss before income taxes	\$(40,849)	\$(57,616)	(29)%
Provision for (benefit from) income taxes	11,897	(1,812)	NM
Effective tax rate	(29)%	3%	

Edgar Filing: ServiceNow, Inc. - Form 10-Q

NM - Not meaningful.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

38

Table of Contents

Our effective tax rate was (29)% for the three months ended June 30, 2018 compared to 3% for the three months ended June 30, 2017, primarily due to a change in the mix of income or losses in jurisdictions with different tax rates and our loss from operations.

We continue to maintain a full valuation allowance on our federal and state deferred tax assets, and the significant components of the tax expense recorded are current cash taxes in various jurisdictions. The cash tax expenses are impacted by each jurisdiction's individual tax rates, laws on timing of recognition of income and deductions, and availability of net operating losses and tax credits. Given the full valuation allowance and sensitivity of current cash taxes to local rules, we expect that our effective tax rate could fluctuate significantly on a quarterly basis and could be adversely affected to the extent earnings are lower than anticipated in countries that have lower statutory rates and higher than anticipated in countries that have higher statutory rates.

Net Loss

	Three Months Ended June 30,		% Change
	2018	2017 *As Adjusted	
	(dollars in thousands)		
Net loss	\$ (52,746)	\$ (55,804)	(5)%
Percentage of revenues	(8)%	(12)%	

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Net loss decreased \$3.1 million during the three months ended June 30, 2018 compared to the same period in the prior year. We expect to continue to incur a GAAP loss for the year ending December 31, 2018 due to increased costs and expenses, including non-cash charges associated with equity awards, amortization of purchased intangibles from business combinations and other expenses.

Comparison of the Six Months Ended June 30, 2018 and 2017**Revenues**

	Six Months Ended June 30,		% Change
	2018	2017 *As Adjusted	
	(dollars in thousands)

Total	100	% 100	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Subscription revenues increased \$338.4 million during the six months ended June 30, 2018 compared to the same period in the prior year, driven by increased purchases by existing customers and an increase in our customer count. Included in subscription revenues is \$56.1 million and \$38.8 million of revenues recognized upfront from the delivery of software associated with our on-premises offering during the six months ended June 30, 2018 and 2017,

respectively.

39

Table of Contents

Subscription revenues consist of the following:

	Six Months Ended June 30,			
	2018	2017 *As Adjusted	% Change	
	(dollars in thousands)			
Service management products	\$957,276	\$700,162	37	%
ITOM products	171,331	90,094	90	%
Total subscription revenues	\$1,128,607	\$790,256	43	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Our Service Management solutions include ServiceNow Platform, IT Service Management, IT Business Management, Customer Service, Human Resources and Security Operations, which have similar features and functions and are generally priced on a per user basis. Our IT Operations Management solutions, which improve visibility, availability and agility of enterprise services, are generally priced on a per node basis.

Professional services and other revenues increased \$4.9 million during the six months ended June 30, 2018 compared to the same period in the prior year, due to an increase in services provided to our growing customer base.

Our international operations have provided and will continue to provide a significant portion of our total revenues. Revenues outside North America represented 34% and 32% of total revenues for the six months ended June 30, 2018 and 2017, respectively. As a result, the general weakening of the U.S. Dollar relative to other major foreign currencies (primarily the Euro and British Pound Sterling) from the six months ended June 30, 2017 to the six months ended June 30, 2018 had a favorable impact on our revenues. For entities reporting in currencies other than the U.S. Dollar, if we had translated our results for the six months ended June 30, 2018 at the exchange rates for the six months ended June 30, 2017 rather than the actual exchange rates in effect during the period, our subscription revenues would have been \$37.5 million lower and our reported professional services and other revenues would have been \$3.4 million lower.

Table of Contents**Cost of Revenues and Gross Profit Percentage**

	Six Months Ended June 30,			
	2018	2017	% Change	
		*As Adjusted		
	(dollars in thousands)			
Cost of revenues:				
Subscription	\$ 197,097	\$ 146,168	35	%
Professional services and other	99,541	92,044	8	%
Total cost of revenues	\$ 296,638	\$ 238,212	25	%

Gross profit	\$ 923,640	\$ 638,817		
Headcount (at period end)				
Subscription	1,065	837	27	%
Professional services and other	602	566	6	%
Total headcount	1,667	1,403	19	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Cost of subscription revenues increased \$50.9 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount resulting in an increase of \$18.0 million in personnel-related costs excluding stock-based compensation, an increase of \$6.9 million in stock-based compensation and an increase of \$5.3 million in overhead expenses. Depreciation expense increased \$10.0 million primarily due to purchases of infrastructure hardware equipment for our data centers and expenses associated with software, IT services and technical support increased \$4.0 million. In addition, data center capacity costs increased \$2.7 million due to the addition of new data centers and the expansion of existing data centers, amortization of intangibles increased \$1.8 million as a result of acquisitions and outside services increased \$1.2 million due to an increase in contractors to support our subscription revenues.

Our subscription gross profit percentage was 83% and 82% for the six months ended June 30, 2018 and 2017, respectively, due to improved data center utilization and economies of scale.

Cost of professional services and other revenues increased \$7.5 million during the six months ended June 30, 2018 as compared to the same period in the prior year, primarily due to increased headcount resulting in an increase of \$6.8 million in personnel-related costs excluding stock-based compensation and an increase of \$1.4 million in stock-based compensation.

Our professional services and other gross loss percentage increased to 9% for the six months ended June 30, 2018, from 6% for the six months ended June 30, 2017, primarily due to stock-based compensation and other personnel-related costs increasing at a higher rate than professional services and other revenues as we invest in specialized resources to support our newer products.

The general weakening of the U.S. Dollar relative to other major foreign currencies from the six months ended June 30, 2017 to the six months ended June 30, 2018 had an unfavorable impact on our cost of revenues. For entities reporting in currencies other than the U.S. Dollar, if we had translated our results for the six months ended June 30, 2018 at the exchange rates for the six months ended June 30, 2017 rather than the actual exchange rates in effect during the period, our cost of subscription revenues would have been \$3.3 million lower and our cost of professional

services and other revenues would have been \$2.2 million lower.

Table of Contents**Sales and Marketing**

	Six Months Ended June 30,		
	2018	2017	% Change
		*As Adjusted	
	(dollars in thousands)		
Sales and marketing	\$594,570	\$426,132	40 %
Percentage of revenues	49	% 49	%
Headcount (at period end)	2,763	2,185	26 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Sales and marketing expenses increased \$168.4 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount that resulted in an increase of \$74.5 million in personnel-related costs excluding stock-based compensation and commissions, an increase of \$28.5 million in stock-based compensation and an increase of \$14.9 million in overhead expenses. Commissions and third-party referral fees increased \$20.4 million and amounted to 6% and 5% of subscription revenues for six months ended June 30, 2018 and 2017. Outside services increased \$8.0 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to an increase in contractors and professional fees to support our sales and marketing functions. Marketing program expenses, which include events other than Knowledge, and costs associated with purchasing advertising and market data, increased \$14.8 million during the six months ended June 30, 2018 compared to the same period in the prior year. Expenses related to our annual Knowledge user conference, net of proceeds increased \$6.8 million due to a 21% year-over-year increase in registrations.

The general weakening of the U.S. Dollar relative to other major foreign currencies from the six months ended June 30, 2017 to the six months ended June 30, 2018 had an unfavorable impact on our sales and marketing expenses. For entities reporting in currencies other than the U.S. Dollar, if we had translated our results for the six months ended June 30, 2018 at the exchange rates in effect for the six months ended June 30, 2017 rather than the actual exchange rates in effect during the period, our sales and marketing expenses would have been \$10.4 million lower.

Research and Development

	Six Months Ended June 30,		
	2018	2017	% Change
		*As Adjusted	
	(dollars in thousands)		
Research and development	\$245,184	\$174,494	41 %
Percentage of revenues	20	% 20	%
Headcount (at period end)	1,675	1,216	38 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Research and development expenses increased \$70.7 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount, which resulted in an increase of \$38.2 million in personnel-related costs excluding stock-based compensation, an increase of \$17.8 million in stock-based compensation and an increase \$10.1 million in overhead expenses. Research and development expenses also increased \$1.5 million due to depreciation of infrastructure hardware equipment that is used solely for research and development purposes.

The impact from the foreign currency movements from the six months ended June 30, 2017 to the six months ended June 30, 2018 is not material to research and development expenses.

Table of Contents**General and Administrative**

	Six Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
General and administrative	\$ 136,158	\$ 97,777	39 %
Percentage of revenues	11	% 11	%
Headcount (at period end)	1,045	767	36 %

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

General and administrative expenses increased \$38.4 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount, which resulted in an increase of \$20.3 million in personnel-related costs excluding stock-based compensation and an increase of \$14.3 million in stock-based compensation. Outside service costs increased \$3.7 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to an increase in contractors and professional fees to support our administrative function.

The impact from the foreign currency movements from the six months ended June 30, 2017 to the six months ended June 30, 2018 is not material to general and administrative expenses.

Stock-based Compensation

	Six Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
Cost of revenues:			
Subscription	\$ 23,829	\$ 16,880	41 %
Professional services and other	15,903	14,492	10 %
Sales and marketing	109,151	80,688	35 %
Research and development	62,378	44,532	40 %
General and administrative	45,640	31,343	46 %
Total stock-based compensation	\$ 256,901	\$ 187,935	37 %
Percentage of revenues	21	% 22	%

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Stock-based compensation increased \$69.0 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to increased headcount and increased weighted-average grant date fair value of stock awards.

Interest Expense

	Six Months Ended June 30,		
	2018	2017	% Change
	(dollars in thousands)		
Interest expense	\$(32,562)	\$(20,015)	63 %
Percentage of revenues	3	% 2	%

Interest expense increased \$12.5 million during the six months ended June 30, 2018 compared to the same period in the prior year, due to the increase in the aggregate amount of convertible debt and associated amortization expense of

debt discount and issuance costs related to the 2022 Notes issued in May and June 2017.

43

Percentage of revenues	4	% —	%

NM - Not meaningful.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Interest income and other income (expense), net increased \$37.4 million during the six months ended June 30, 2018 compared to the same period in the prior year, primarily due to \$19.3 million of realized gains relating to changes in the market value of our marketable equity securities resulting from the adoption of ASU 2016-01. Refer to Note 2 for further details. Interest income and other income (expense), net also increased \$12.6 million due to fluctuations in foreign currency exchange rates, net of the effect of our foreign currency derivative contracts, and interest income increased \$8.5 million due to higher cash and investment balances and higher yields on our invested balances for the six months ended June 30, 2018, partially offset by a \$3.9 million loss recorded on early note conversions.

Benefit from Income Taxes

	Six Months Ended June 30,		
	2018	2017 *As Adjusted	% Change
	(dollars in thousands)		
Loss before income taxes	\$(48,209)	\$(80,357)	(40)%
Benefit from income taxes	(6,085)	(3,039)	100 %
Effective tax rate	13	% 4	%

NM - Not meaningful.

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Our effective tax rate was 13% for the six months ended June 30, 2018 compared to 4% for the six months ended June 30, 2017, primarily due to the one-time indirect tax benefit of Topic 606 on income taxes associated with intercompany adjustments offset by our loss from operations.

Table of Contents**Net Loss**

	Six Months Ended June 30,		
	2018	2017	% Change
		*As Adjusted	
	(dollars in thousands)		
Net loss	\$ (42,124)	\$ (77,318)	(46)%
Percentage of revenues	(3)%	(9)%	

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Net loss decreased \$35.2 million for the six months ended June 30, 2018 compared to the same period in the prior year due to the adoption of Topic 606 which required us to record a one-time indirect tax benefit of \$23.1 million and a \$19.3 million in realized gain on marketable equity investments that we sold during the six months ended June 30, 2018.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash and cash equivalents, investments, and cash generated from operations. As of June 30, 2018, our principal sources of liquidity were \$1.7 billion in cash and cash equivalents and short-term investments, of which \$240.7 million represented cash held by foreign subsidiaries and \$231.5 million was denominated in currencies other than U.S. Dollar. In addition, we had \$304.6 million in long-term investments that provide additional capital resources. We do not anticipate that we will need funds generated from foreign operations to fund our domestic operations.

The price of our common stock was greater than or equal to 130% of the conversion price of the 2022 Notes for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the quarter ended June 30, 2018. Therefore, the 2022 Notes became convertible at the holders' option beginning on July 1, 2018 and continue to be convertible at the holders' option through September 30, 2018. Through the filing date, we have not received any conversion requests for our 2022 Notes.

The price of our common stock was greater than or equal to 130% of the conversion price of the 2018 Notes for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the quarter ended June 30, 2017, September 30, 2017, December 31, 2017, and March 31, 2018, respectively. Therefore, the 2018 Notes became convertible at the holders' option beginning on July 1, 2017 and continued to be convertible at the holders' option through June 30, 2018.

During the six months ended June 30, 2018, we paid cash to settle \$358.7 million principal amount of the 2018 Notes and recorded a loss on early note conversions of \$3.9 million. As a result of the settlements, we also recorded a \$6.0 million reduction to additional paid-in capital, reflecting fair value adjustments to the conversion option settled offset by the benefit of the 2018 Note Hedge. Based on additional conversion requests we have received through June 30, 2018, we expect to settle in cash an aggregate of \$54.4 million in principal amount of the 2018 Notes during the third quarter of 2018. For conversion requests received on or after the July 1, 2018 Convertible Date for the 2018 Notes, the remaining principal amount of the 2018 Notes of \$161.8 million will be settled in cash on the maturity date, which is November 1, 2018.

Based on the stock price as of June 30, 2018, we expect to issue additional shares in the first half of 2019 upon the exercise of the 2018 Warrants. The number of shares to be issued depends on the stock price over a 60 trading day period beginning on the first expiration date of the 2018 Warrants, which is February 1, 2019. Because exercises of the 2018 Warrants will be net share settled, there will not be an impact on our liquidity. Refer to Note 11 in the notes

to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information.

As disclosed in Item 5 to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, on May 3, 2018 we entered into agreements with respect to the extension of the lease and expansion of our existing headquarters located in Santa Clara, California. Under these agreements, we expect to incur aggregate incremental additional payments of \$453.7 million over the terms of the agreements through February 28, 2035. Refer to Note 17 in the notes to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information regarding future minimum payments under our non-cancelable operating leases.

Table of Contents

We anticipate our current cash and cash equivalents balance and cash generated from operations will be sufficient to meet our liquidity needs, including the repayment of our Notes, expansion of data centers, lease obligations, expenditures related to the growth of our headcount and the acquisition of fixed assets, intangibles, and investments in office facilities, to accommodate our growth for at least the next 12 months. Whether these resources are adequate to meet our liquidity needs beyond that period will depend on our growth, operating results, cash utilized for acquisitions and/or debt retirements if any are consummated, and the capital expenditures required to meet possible increased demand for our services. If we require additional capital resources to grow our business at any time in the future, we may seek to finance our operations from the current funds available or seek additional equity or debt financing.

	Six Months Ended June 30,	
	2018	2017
		*As Adjusted
	(dollars in thousands)	
Net cash provided by operating activities	\$375,976	\$316,333
Net cash used in investing activities	(10,934)	(155,483)
Net cash (used in) provided by financing activities	(364,873)	594,164
Net (decrease) increase in cash, cash equivalents and restricted cash, net of foreign currency effect on cash, cash equivalents and restricted cash	(7,336)	773,054

*As adjusted to reflect the impact of the full retrospective adoption of Topic 606. See Note 2 for further details.

Operating Activities

Cash provided by operating activities mainly consists of our net loss adjusted for certain non-cash items such as repayments of convertible senior notes attributable to debt discount, depreciation and amortization, amortization of premiums on investments, amortization of deferred commissions, amortization of issuance cost and debt discount, stock-based compensation and changes in operating assets and liabilities during the year.

Net cash provided by operating activities was \$376.0 million for the six months ended June 30, 2018 compared to \$316.3 million for the six months ended June 30, 2017. The increase in operating cash flow was primarily due to a decrease in net loss of \$35.2 million. The remaining change was due to an increase in non-cash adjustments to reconcile net loss to net cash provided by operations and the favorable impact on operating cash flow from changes in operating assets and liabilities.

Investing Activities

Net cash used in investing activities for the six months ended June 30, 2018 was \$10.9 million compared to \$155.5 million for the six months ended June 30, 2017. The decrease in cash used in investing activities was mainly due to a \$171.9 million decrease in net purchases of investments, partially offset by a \$19.3 million increase in capital expenditures related to purchases of infrastructure hardware equipment to support the expansion of our data centers as well as investments in leasehold improvements, furniture and equipment to support our headcount growth, a \$4.7 million increase in purchase of other intangibles and a \$3.4 million increase in business combinations.

Financing Activities

Net cash used in financing activities was \$364.9 million for the six months ended June 30, 2018 compared to net cash provided by financing activities of \$594.2 million for the six months ended June 30, 2017. During the six months ended June 30, 2017, we had \$698.2 million in net proceeds from issuance of the 2022 Notes and the related note hedge and warrant transactions, and used \$55.0 million in cash to repurchase shares of our common stock. During the six months ended June 30, 2018, we had additional financing cash outflows of \$271.2 million relating to the

repayments of the 2018 Notes attributable to principal and \$67.2 million increase in taxes paid related to net share settlement of equity awards, offset by a \$20.5 million increase in proceeds from employee equity plans.

Table of Contents

Contractual Obligations and Commitments

Except as set forth in Note 17, Commitments and Contingencies, of the notes to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q, there have been no material changes outside the ordinary course of business in the contractual obligations and commitments disclosed in our Annual Report on 10-K for the year ended December 31, 2017.

Off-Balance Sheet Arrangements

During all periods presented, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in those types of relationships.

Critical Accounting Policies and Significant Judgments and Estimates

Except for the accounting policies for revenue recognition and deferred commissions that were updated as a result of adopting Topic 606, there have been no changes to our critical accounting policies and estimates described in the Annual Report on Form 10-K for the year ended December 31, 2017, filed with the SEC on February 28, 2018, that have had a material impact on our condensed consolidated financial statements and related notes.

Revenue Recognition

We report our revenues in two categories: (i) subscriptions and (ii) professional services and other.

Revenues are recognized when control of these services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those services.

We determine revenue recognition through the following steps:

- 1 Identification of the contract, or contracts, with a customer
- 2 Identification of the performance obligations in the contract
- 3 Determination of the transaction price
- 4 Allocation of the transaction price to the performance obligations in the contract
- 5 Recognition of revenue when, or as, we satisfy a performance obligation

Subscription revenues

Subscription revenues are primarily comprised of subscription fees that give customers access to the ordered subscription service, related support and updates, if any, to the subscribed service during the subscription term. For our cloud services, we recognize subscription revenues ratably over the contract term beginning on the commencement date of each contract, the date we make our services available to our customers. Our contracts with customers typically include a fixed amount of consideration, and are generally non-cancelable and without any refund-type provisions. We typically invoice our customers annually in advance for our subscription services upon execution of the initial contract or subsequent renewal, and our invoices are typically due within 30 days from the invoice date.

Subscription revenues also include revenues from our on-premises offerings in which we grant customers the right to deploy our subscription service on the customers' own servers without significant penalty. For these contracts, we account for the software element and the related support and updates separately as they are distinct performance obligations (Refer to the discussion below related to contracts with multiple performance obligations for further details). The transaction price is allocated to separate performance obligations on a relative standalone selling price (SSP) basis. Transaction price allocated to the software element is recognized upon delivery, which is when transfer of control of the software to the customer is complete. The transaction price allocated to the related support and updates are recognized ratably over the contract term.

Professional services and other revenues

Our professional services arrangements are primarily on a time-and-materials basis, and revenues on these arrangements are recognized as the services are delivered. We typically invoice our customers monthly in arrears for these professional services based on actual hours and expenses incurred, and our invoices are typically due within 30 days from the invoice date. Professional

Table of Contents

services revenues associated with fixed fee arrangements are recognized on a proportional performance basis. In instances where certain milestones are required to be met before revenues are recognized, we defer professional services revenues and the associated costs until milestone criteria have been met. Other revenues consist of fees from customer training delivered on-site or through publicly available classes.

Contracts with multiple performance obligations

We enter into contracts that can include various combinations of products and services, which are generally capable of being distinct and accounted for as separate performance obligations. For these contracts, the transaction price is allocated to the separate performance obligations on a relative SSP basis. Determining whether products and services are considered distinct performance obligations that should be accounted for separately versus together may require significant judgment. Significant judgment is also involved in determining SSP by considering the historical selling price of these performance obligations in similar transactions as well as other factors, including, but not limited to, competitive pricing of similar products, other software vendor pricing, industry publications and current pricing practices.

Deferred Commissions

Deferred commissions are the incremental selling costs that are associated with acquiring customer contracts and consist of sales commissions paid to our sales force and referral fees paid to independent third-parties. On initial and expansion contracts, commissions and referral fees are primarily deferred and amortized over a period of benefit that we have determined to be five years. On renewal contracts, commissions are deferred and amortized over the renewal term. Additionally, for our on-premises offerings, consistent with the recognition of subscription revenue for on-premises offerings, a portion of the commission cost is expensed upfront when the on-premises offering is made available. The determination of the period of benefit requires significant judgment by taking into consideration our customer contracts, our technology life cycle and other factors. We include amortization of deferred commissions in sales and marketing expense in our condensed consolidated statements of comprehensive income (loss).

New Accounting Pronouncements Pending Adoption

The impact of recently issued accounting standards is set forth in Note 2, Summary of Significant Accounting Policies, of the notes to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Except as set forth below, there have been no material changes in our market risk as compared to the disclosures in Part II, Item 7A in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the SEC on February 28, 2018.

Foreign Currency Exchange Risk

In order to manage certain exposures to currency fluctuations, we initiated a limited hedging program beginning in the three months ended March 31, 2018 by entering into foreign currency derivative contracts to hedge a portion of our net outstanding monetary assets and liabilities.

These derivative contracts include spot and forward contracts entered into with various counterparties and are not designated as hedging instruments under applicable accounting standard. As such, all changes in the fair value of the derivative contracts are reported in Interest income and other income (expense), net in our consolidated statements of

operations. These derivative contracts are intended to offset the foreign currency gains or losses associated with the underlying monetary assets and liabilities, and cash flows from such derivative contracts are classified as operating activities.

These derivative contracts expose us to credit risk to the extent that the counterparties may be unable to meet the terms of the arrangement. We mitigate this credit risk by transacting with major financial institutions with high credit ratings and entering into master netting arrangements, which permit net settlement of transactions with the same counterparty. While the contract or notional amount is often used to express the volume of foreign currency derivative contracts, the amounts potentially subject to credit risk are generally limited to the amounts, if any, by which the counterparties' obligations under the agreements exceed our obligations to the counterparties. We are not required to pledge, and are not entitled to receive, cash collateral related to these derivative instruments. We do not enter into derivative contracts for trading or speculative purposes. Refer to Note 8 in the notes to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Regulations under the Exchange Act require public companies, including our company, to maintain “disclosure controls and procedures,” which are defined in Rule 13a-15(e) and Rule 15d-15(e) to mean a company’s controls and other procedures that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required or necessary disclosures. In designing and evaluating our disclosure controls and procedures, management recognizes that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer have concluded, based on the evaluation of the effectiveness of the disclosure controls and procedures by our management as of the end of the quarter covered by this Quarterly Report on Form 10-Q, that our disclosure controls and procedures were effective at the reasonable assurance level for this purpose.

Changes in Internal Control Over Financial Reporting

Regulations under the Exchange Act require public companies, including our company, to evaluate any change in our “internal control over financial reporting” as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) of the Exchange Act. In connection with their evaluation of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer did not identify any change in our internal control over financial reporting during the quarter covered by this Quarterly Report on Form 10-Q that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are party to litigation and other legal proceedings in the ordinary course of business. While the results of any litigation or other legal proceedings are uncertain, we are not presently a party to any legal proceedings that, if determined adversely to us, would individually or taken together have a material adverse effect on our business, financial position, results of operations or cash flows.

ITEM 1A. RISK FACTORS

Investing in our securities involves a high degree of risk. You should consider carefully the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including our condensed consolidated financial statements and related notes, before making an investment decision. We have identified the following risks and uncertainties that may have a material adverse effect on our business, financial condition, results of operations and future prospects. Our business could be harmed by any of these risks. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment.

Risks Related to Our Business and Industry

We expect our revenue growth rate to continue to decline, and we may incur losses in accordance with U.S. Generally Accepted Accounting Principles (GAAP) during future periods.

We have experienced significant revenue growth in prior periods; however, our revenue growth rate is declining, and we expect that it will continue to decline into the foreseeable future. We also expect our costs to increase in future periods as we continue to invest in our capacity to support anticipated growth. These investments may not result in increased revenues or growth in our business. Even if our revenues continue to increase, we may incur losses in accordance with GAAP during future periods due to increased costs such as non-cash charges associated with equity awards, business combinations and other expenses. Additionally, we may encounter unforeseen operating expenses, difficulties, complications, delays and other unforeseen or unpredictable factors that may result in increased costs. Furthermore, it is difficult to predict the size and growth rate of our market, customer demand for our products, customer adoption and renewal rates, and the entry of competitive products or the success of existing competitive products. As a result of these and other factors, we may not maintain profitability in the future, our gross margins may be negatively impacted, and our ability to generate cash flow from operations may be negatively impacted. If we fail to increase our revenues sufficiently to keep pace with our growing investments and other expenses, our business, operating results and growth prospects will be adversely affected.

If we or our third-party service providers suffer a cyber-security event, we may lose customers and incur significant liabilities, any of which would harm our business and operating results.

Our operations involve the storage, transmission and processing of our customers' confidential, proprietary and sensitive data, including personally identifiable information, protected health information and credit card and other financial information. While we have security measures in place designed to protect customer information and prevent data loss, these measures may be breached as a result of third-party actions, including intentional misconduct by computer hackers, employee error, malfeasance or otherwise, and result in someone obtaining unauthorized access to our customers' data or our data, including our intellectual property and other confidential business information. Additionally, because we do not control our third-party service providers, or the processing of data by our third-party service providers, we cannot ensure the integrity or security of measures they take to protect customer information and prevent data loss. Moreover, computer malware, viruses and hacking, phishing and denial of service attacks by third

parties have become more prevalent in our industry, and have occurred on our and our third-party service providers' systems in the past and may occur on these systems in the future. Because techniques used to sabotage or obtain unauthorized access to systems change frequently and generally are not recognized until successfully launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. We devote significant financial and personnel resources to implement and maintain security measures; however, as cyber-security threats develop, evolve, and grow more complex over time, it may be necessary to make significant further investments to protect data and infrastructure. A security breach suffered by us or our third-party service providers, an attack against our service availability or unauthorized access or loss of data could result in a disruption to our service, litigation, the triggering of indemnification and other contractual obligations, regulatory investigations, government fines and penalties, reputational damage, loss of sales and customers, mitigation and remediation expenses and other significant costs and liabilities. We do not have insurance sufficient to compensate us for the potentially significant losses that may result from security breaches.

Table of Contents

If we do not accurately predict, prepare for, and respond promptly to rapidly evolving technological and market developments, our competitive position and business prospects may be harmed.

The markets in which we compete continue to evolve rapidly, and the pace of innovation will continue to accelerate, as cloud, mobile, workflow, consumer product-like user experiences, social, collaboration, machine learning, artificial intelligence, internet connected devices, robotic automation, security, cryptography, development tools and other digital technologies increasingly become the basis for customer purchases. At the same time, our customers and prospective customers are facing their own competitive imperatives to adopt digital technologies, resulting in the ongoing disruption of almost every sector of the global economy. Acquisitions, integrations and consolidation by and among companies in our industry may further accelerate changes in the markets in which we participate. Accordingly, to compete effectively in our rapidly changing markets, we must: identify and innovate in the right emerging technologies among the many in which we could make investments knowing that we cannot make substantial investments in all of them; accurately predict our customers' changing business needs; successfully deliver new platform technologies and products that meet these business needs; efficiently integrate with other technologies within our customers' digital environments; profitably market and sell new products in markets where our sales and marketing teams have less experience; and effectively deliver, either directly or through our ecosystem of partners, the business process planning, IT systems architecture planning, and product implementation services that our customers require to be successful. If we fail to meet any of these requirements, our competitive position and business prospects may be harmed.

Delays in the release of, or actual or perceived defects in, new or updated products may slow the adoption of our most recent technologies, reduce our ability to efficiently provide our services, decrease customer satisfaction, increase our vulnerability to cyber attacks, and adversely impact sales of additional products to our customers.

We must successfully continue to release new products and updates to existing products. The success of any release depends on a number of factors, including our ability to manage the risks associated with quality or other defects or deficiencies, delays in the timing of releases, and other complications that may arise during the early stages of introduction. If releases are delayed or if customers perceive that our releases contain bugs or other defects, customer adoption of our new products or updates may be adversely impacted, customer satisfaction may decrease, our ability to efficiently provide our services may be reduced, and our growth prospects may be harmed.

Various factors, including our customers' business, integration, migration and security requirements, or errors by us or our partners, may cause implementations of our products to be delayed, inefficient or otherwise unsuccessful.

Our business depends upon the successful implementation of our products by our customers. Increasingly, we, as well as our customers, rely on our network of partners to deliver implementation services, and there may not be enough qualified implementation partners available to meet customer demand. Further, various factors, including our customers' business, integration, migration and security requirements, or errors by us or our partners, may cause implementations to be delayed, inefficient or otherwise unsuccessful. For example, changes in the functional requirements of our customers, delays in timeline, or deviation from recommended best practices may occur during the course of an implementation project. As a result of these and other risks, we or our customers may incur significant implementation costs in connection with the purchase and implementation of our products. Some customer implementations may take longer than planned or fail to meet our customers' expectations, which may delay our ability to sell additional products or result in customers canceling or failing to renew their subscriptions before our products have been fully implemented. Unsuccessful, lengthy, or costly customer implementation and integration projects could result in claims from customers, harm to our reputation, and opportunities for competitors to displace our products, each of which could have an adverse effect on our business and operating results.

Table of Contents***Disruptions or defects in our services could damage our customers' businesses, subject us to substantial liability and harm our reputation and financial results.***

From time to time, we experience defects in our services, and new defects may be detected in the future. For example, we provide regular updates to our services, which frequently contain undetected defects when first introduced or released. Defects may also be introduced by our use of third-party software, including open source software. Disruptions may result from errors we make in delivering, configuring or hosting our services, or designing, installing, expanding or maintaining our cloud infrastructure. Disruptions in service can also result from incidents that are outside of our control, including denial of service attacks. We currently serve our customers primarily using equipment managed by us and co-located in third-party data center facilities operated by several different providers located around the world. These centers are vulnerable to damage or interruption from earthquakes, floods, fires, power loss and similar events. They may also be subject to break-ins, sabotage, intentional acts of vandalism and similar misconduct, equipment failure and adverse events caused by operator error. Despite precautions taken at these facilities, problems at these facilities could result in lengthy interruptions in our services and the loss of customer data. In addition, our customers may use our services in ways that cause disruptions in service for other customers. Our customers use our services to manage important aspects of their own businesses, and our reputation and business will be adversely affected if our customers and potential customers believe our services are unreliable. Disruptions or defects in our services may reduce our revenues, cause us to issue credits or pay penalties, subject us to claims and litigation, cause our customers to delay payment or terminate or fail to renew their subscriptions, and adversely affect our ability to attract new customers. The occurrence of payment delays, or service credit, warranty, termination for material breach or other claims against us, could result in an increase in our bad debt expense, an increase in collection cycles for accounts receivable, an increase to our service level credit accruals or other increased expenses or risks of litigation. We do not have insurance sufficient to compensate us for the potentially significant losses that may result from claims arising from disruptions in our services.

Our operating results may vary significantly from period to period, and if we fail to meet the financial performance expectations of investors or securities analysts, the price of our common stock could decline substantially.

Our operating results may vary significantly from period to period as a result of various factors, some of which are beyond our control. For any quarterly or annual period, there is a risk that our financial performance will not meet the financial guidance we have previously given for that period, or that we may otherwise fail to meet the financial performance expectations of the securities analysts who issue reports on our company and our common stock price, or of investors in our common stock. There is also a risk that we may issue forward-looking financial guidance for a quarterly or annual period that fails to meet the expectations of such securities analysts or investors. If any of the foregoing occurs, for any reason either within or outside of our control, the price of our common stock could decline substantially and investors in our common stock could incur substantial losses. Some of the important factors that may cause our revenues, operating results and cash flows to vary widely, or cause our forward-looking financial guidance to fall below the expectations of such securities analysts or investors, include:

- our ability to attract new customers, retain and increase sales to existing customers, and satisfy our customers' requirements;
- changes in our mix of products and services, including changes in our mix of cloud and on-premises offerings;
- changes in foreign currency exchange rates and our ability to effectively hedge our foreign currency exposure;
- the rate of expansion and productivity of our sales force;
- the number of new employees added;
- the cost, timing and management effort for our development of new products and services;
- general economic conditions that may adversely affect either our customers' ability or willingness to purchase additional subscriptions, delay a prospective customer's purchasing decision, reduce the value of new subscription contracts or adversely affect renewal rates;

the amount and timing of operating costs and capital expenditures related to the operation and expansion of our business;

seasonality in terms of when we enter into customer agreements for our services;

the length of the sales cycle for our services;

changes to our management team;

changes in our pricing policies, whether initiated by us or as a result of competition;

significant security breaches, technical difficulties or interruptions of our services;

new solutions, products or changes in pricing policies introduced by our competitors;

changes in effective tax rates;

changes in the average contract term of our customer agreements, changes in timing of renewals and changes in billings duration;

changes in our renewal rates and expansion within our existing customers;

the timing of customer payments and payment defaults by customers;

extraordinary expenses such as litigation costs or damages, including settlement payments;

Table of Contents

- the costs associated with acquiring new businesses and technologies and the follow-on costs of integration, including the tax effects of acquisitions;
- the impact of new accounting pronouncements, including the new revenue recognition standards that were effective for us beginning January 1, 2018 and the new leasing standard that will become effective on January 1, 2019;
- changes in laws or regulations impacting the delivery of our services;
- our ability to comply with privacy laws and regulations, including the General Data Protection Regulation (GDPR) and the California Consumer Privacy Act (CCPA);
- the amount and timing of equity awards and the related financial statement expenses; and
- our ability to accurately estimate the total addressable market for our products and services.

Changes in our effective tax rate could impact our financial results.

We are subject to income taxes in the United States and various foreign jurisdictions. We believe that our provision for income taxes is reasonable, but the ultimate tax outcome may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods in which such outcome is determined. Our effective tax rate could be adversely affected by changes in the mix of earnings and losses in countries with differing statutory tax rates, certain non-deductible expenses, the valuation of deferred tax assets and liabilities and the effects of acquisitions. Increases in our effective tax rate would reduce our profitability or in some cases increase our losses.

Additionally, our future effective tax rate could be impacted by changes in accounting principles or changes in U.S. federal, state or international tax laws or tax rulings. The U.S. recently enacted significant tax reform, and certain provisions of the new law may adversely affect us. Many countries and organizations such as the Organization for Economic Cooperation and Development are actively considering changes to existing tax laws or have proposed or enacted new laws that could increase our tax obligations in countries where we do business or cause us to change the way we operate our business. Any changes in federal, state or international tax laws or tax rulings may increase our worldwide effective tax rate and harm our financial position and results of operations.

In addition, we may be subject to income tax audits by tax jurisdictions throughout the world, many of which have not established clear guidance on the tax treatment of cloud computing companies. Although we believe our income tax liabilities are reasonably estimated and accounted for in accordance with applicable laws and principles, an adverse resolution of one or more uncertain tax positions in any period could have a material impact on the results of operations for that period.

Uncertainties in the interpretation and application of the 2017 Tax Cuts and Jobs Act could materially affect our tax obligations and effective tax rate.

The 2017 Tax Cuts and Jobs Act (the Tax Act) was enacted on December 22, 2017, and significantly changes how the U.S. imposes income tax on multinational corporations. The U.S. Department of Treasury has broad authority to issue regulations and interpretative guidance that may significantly impact how we will apply the law and affect our results of operations in the period issued.

The Tax Act requires complex computations not previously provided in U.S. tax law. As such, the application of accounting guidance for such items is currently uncertain. Further, compliance with the Tax Act and the accounting for such provisions require accumulation of information not previously required or regularly produced. As a result, we have provided a provisional estimate on the effect of the Tax Act in our financial statements for the year ended December 31, 2017. Our final analysis, which will be recorded in the period completed, may be different from our current provisional amounts and could materially affect our tax obligations and effective tax rate. Such analysis may be affected by additional regulatory guidance issued by the applicable tax authorities, clarifications in accounting

treatment, additional analysis on the application of the law, and refined estimates in calculating the impact of the Tax Act. Refer to Note 2 in the notes to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information on our provisional estimates on the effect of the Tax Act. Through June 30, 2018, we did not have any significant adjustments to our provisional amounts. The accounting for the tax effects of the Tax Act will be completed later in 2018.

Table of Contents

Our financial results may be adversely affected by changes in accounting principles applicable to us.

We prepare our financial statements in accordance with GAAP, which are subject to interpretation or changes by the Financial Accounting Standards Board (FASB), the SEC and other bodies formed to promulgate and interpret appropriate accounting principles. New accounting pronouncements and changes in accounting principles have occurred in the past and are expected to occur in the future, which may have a significant effect on our financial results. For example, in May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, “Revenue from Contracts with Customers (Topic 606),” which became effective for our interim and annual periods beginning January 1, 2018. Topic 606 superseded nearly all prior revenue recognition standards under GAAP. Under the Topic 606 standard, revenue is recognized when a customer obtains control of promised goods or services and is recognized in an amount that reflects the consideration which the entity expects to receive in exchange for those goods or services. Topic 606 has had a material impact on the timing of revenue and expense recognition for our contracts related to on-premises offerings and on our deferred commissions asset and the related amortization expense. Refer to Note 2 in the notes to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for additional information on Topic 606 and its impact on us. Adoption of this standard and any difficulties in implementation of changes in accounting principles, including the ability to modify our accounting systems and internal controls, could cause us to fail to meet our financial reporting obligations, which could result in regulatory discipline and harm investors’ confidence in us.

Foreign currency exchange rate fluctuations could harm our financial results.

We conduct significant transactions, including revenue transactions and intercompany transactions, in currencies other than the U.S. Dollar or the functional operating currency of the transactional entities. In addition, our international subsidiaries maintain significant net assets that are denominated in currencies other than the functional operating currencies of these entities. Accordingly, changes in the value of currencies relative to the U.S. Dollar may impact our consolidated revenues and operating results due to transactional and translational remeasurement that is reflected in our earnings. It is particularly difficult to forecast any impact from exchange rate movements, so there is risk that unanticipated currency fluctuations could adversely affect our financial results or cause our results to differ from investor expectations or our own guidance in any future periods. In addition, the June 23, 2016 referendum by British voters to exit the European Union adversely impacted global markets, including currencies, and resulted in a decline in the value of the British pound, as compared to the U.S. Dollar and other currencies. Volatility in exchange rates and global financial markets may continue due to a number of factors, including the continued negotiation of the United Kingdom’s exit from the European Union and the recent political and economic uncertainty globally.

We recently began using derivative instruments, such as foreign currency forwards, swaps and option contracts, to hedge certain exposures to fluctuations in foreign currency exchange rates. These hedging contracts may reduce, but cannot entirely eliminate, the impact of adverse currency exchange rate movements. Further, unanticipated changes in currency exchange rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a number of reasons, including our limited experience with these hedging contracts, we may not seek or be able to establish a perfect or effective correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss.

Table of Contents

The markets in which we participate are intensely competitive, and if we do not compete effectively our business and operating results will be adversely affected.

The markets for our enterprise cloud solutions are rapidly evolving and highly competitive, with relatively low barriers to entry. As the market for service management matures, we expect competition to intensify. We compete primarily with large, well-established, enterprise application software vendors, in-house solutions, large integrated systems vendors, established and emerging cloud vendors and vendors of products and services for development operations. Many prospective customers have invested substantial personnel and financial resources to implement and integrate their current enterprise software into their businesses and therefore may be reluctant or unwilling to migrate away from their current solution to our enterprise cloud solutions. Many of our competitors and potential competitors are larger, have greater name recognition, longer operating histories, more established customer relationships, larger marketing budgets and greater resources than we do. Further, other potential competitors not currently offering competitive products may expand their services to compete with our services. Acquisitions, integrations and consolidation by and among other companies in our industry may allow potential competitors to offer integrated or bundled products, enhanced functionality, or other advantages, which may impact our competitive position. We have expanded the breadth of our services to include offerings in the markets for IT operations management, customer service management, security operations management, HR service delivery and use of our platform by developers of custom applications. As a result, we expect increasing competition from platform vendors and from application development vendors focused on these other markets. Our competitors may be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, standards and customer requirements. In addition, some of our competitors offer their products or services at a lower price, which has resulted in pricing pressures. Larger competitors with more diverse product and service offerings may reduce the price of products or subscriptions that compete with ours or may bundle them with other products and subscriptions. We expect that smaller competitors and new entrants may accelerate pricing pressures, including in the IT service management market, which is our more mature offering and from which we derive the substantial majority of our revenues. For all of these reasons, we may not be able to compete successfully and competition could result in reduced sales, reduced margins, losses or the failure of our solutions to achieve or maintain market acceptance, any of which could harm our business.

Lawsuits against us by third-parties that allege we infringe their intellectual property rights could harm our business and operating results.

There is considerable patent and other intellectual property development activity in our industry. Many companies in our industry, including our competitors and other third parties, as well as non-practicing entities, own large numbers of patents, copyrights, trademarks and trade secrets, which they may use to assert claims of patent infringement, misappropriation or other violations of intellectual property rights against us.

Moreover, the patent portfolios of most of our competitors are larger than ours. This disparity may increase the risk that our competitors may sue us for patent infringement and may limit our ability to counterclaim for patent infringement or settle through patent cross-licenses. From time to time, our competitors or other third parties, including patent holding companies seeking to monetize patents they have purchased or otherwise obtained, may claim that we are infringing upon their intellectual property rights. For example, we recorded charges for aggregate legal settlements of \$270.0 million in our consolidated statement of comprehensive loss during the year ended December 31, 2016. The charge covers the fulfillment by us of all financial obligations under settlement agreements with BMC and HPE, with no remaining financial obligations under either settlement.

In any intellectual property litigation, regardless of the scope or merits of the claims at issue, we may incur substantial attorney's fees and other litigation expenses and, if the claims are successfully asserted against us and we are found to be infringing upon the intellectual property rights of others, we could be required to: pay substantial damages and

make substantial ongoing royalty payments; cease offering our products and services; modify our products and services; comply with other unfavorable terms, including settlement terms; and indemnify our customers and business partners and obtain costly licenses on their behalf and refund fees or other payments previously paid to us. Further, upon expiration of the term of any third-party agreements that allow us to use their intellectual property, we may be unable to renew such agreements on favorable terms, if at all, in which case we may face intellectual property litigation. The mere existence of any lawsuit, or any interim or final outcomes, and the course of its conduct and the public statements related to it (or absence of such statements) by the courts, press, analysts and litigants, could be unsettling to our customers and prospective customers and could cause an adverse impact to our customer satisfaction and related renewal rates and cause us to lose potential sales, and could also be unsettling to investors or prospective investors in our common stock and could cause a substantial decline in the price of our common stock. Accordingly, any claim or litigation against us could be costly, time-consuming and divert the attention of our management and key personnel from our business operations and harm our financial condition and operating results.

Table of Contents

Our intellectual property protections may not provide us with a competitive advantage, and defending our intellectual property may result in substantial expenses that harm our operating results.

Our success depends to a significant degree on our ability to protect our proprietary technology and our brand under a combination of patent and other intellectual property laws of the United States and other jurisdictions. Though we seek patent protection for our technology, we may not be successful in obtaining patent protection, and any patents acquired in the future may not provide us with competitive advantages, or may be successfully challenged by third parties. Furthermore, legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Any of our intellectual property rights may be challenged by others or invalidated through administrative process or litigation. Effective patent, trademark, copyright and trade secret protection may not be available to us in every country in which our services are available. The laws of some foreign countries may not be as protective of intellectual property rights as those in the United States, and mechanisms for enforcement of intellectual property rights may be inadequate. We may be required to spend significant resources to monitor and protect our intellectual property rights. We have initiated, and in the future may initiate, claims or litigation against third parties for infringement of our proprietary rights or to establish the validity of our proprietary rights. Any litigation, whether or not it is resolved in our favor, could result in significant expense to us, divert the efforts of our technical and management personnel and may result in counter-claims with respect to infringement of intellectual property rights by us. If we are unable to prevent third parties from infringing upon or misappropriating our intellectual property, or are required to incur substantial expenses in defending our intellectual property rights, our business and operating results may be adversely affected.

If we are unsuccessful in increasing our penetration of international markets or managing the risks associated with foreign markets, our business and operating results will be adversely affected.

Sales outside of North America represented approximately 35% and 32% of our total revenues for the three months ended June 30, 2018 and 2017, respectively, and 34% and 32% of our total revenues for the six months ended June 30, 2018 and 2017, respectively. Our business and future prospects depend on increasing our international sales as a percentage of our total revenues, and the failure to grow internationally will harm our business. Additionally, operating in international markets requires significant investment and management attention and will subject us to regulatory and economic risks that are different from those in the United States. We have made, and will continue to make, substantial investments in data centers and cloud computing infrastructure, sales, marketing, personnel and facilities as we enter and expand in new geographic markets. When we make these investments, it is typically unclear whether, and when, sales in the new market will justify our investments, and we may significantly underestimate the level of investment and time required to be successful, or whether we will be successful. Our rate of acquisition of new Global 2000 customers, a factor effecting our growth, has generally been lower in Africa, Asia, Eastern Europe, South America and other markets in which we are less established, as compared to North America, Australia and areas within Western Europe. An increasing proportion of the Global 2000 companies and large enterprise customers that are not yet our customers are located in emerging markets where we are less established. We have experienced, and may continue to experience, difficulties in some of our investments in geographic expansion, including in hiring qualified sales management personnel and managing foreign operations.

Risks inherent with international sales include without limitation:

- compliance with multiple, conflicting and changing governmental laws and regulations, including employment, tax, competition, privacy and data protection laws and regulations, including the GDPR;
- compliance by us and our business partners with international bribery and anti-corruption laws, including the UK Bribery Act and the Foreign Corrupt Practices Act;
- the risk that illegal or unethical activities of our business partners will be attributed to or result in liability to us;
- longer and potentially more complex sales cycles;

- longer accounts receivable payment cycles and other collection difficulties;
- tax treatment of revenues from international sources and changes to tax codes, including being subject to foreign tax laws and being liable for paying withholding, income or other taxes in foreign jurisdictions;
- different pricing and distribution environments;
- foreign currency fluctuations, which may cause transactional and translational remeasurement losses;
- potential changes in international trade policies and agreements, including the adoption and expansion of trade restrictions or regulatory frameworks or business practices favoring local competitors;
- local business practices and cultural norms that may favor local competitors; and
- localization of our services, including translation into foreign languages and associated expenses.

If we are unable to manage these risks, if our required investments in these international markets are greater than anticipated, or if we are unsuccessful in increasing sales in emerging markets, our revenue growth rate, business and operating results will be adversely affected.

Table of Contents

If we lose key employees or are unable to attract and retain the employees we need, our business and operating results will be adversely affected.

Our success depends largely upon the continued services of our management team, including our Chief Executive Officer, and many key individual contributors. From time to time, there may be changes in our management team resulting from the hiring or departure of executives. For example, in 2017, Frank Sloatman stepped down as our President and Chief Executive Officer, and John J. Donahoe was appointed as his successor. Such changes may result in a loss of institutional knowledge and cause disruptions to our business.

In the technology industry, there is substantial and continuous competition for engineers with high levels of experience in designing, developing and managing software and Internet-related solutions, as well as competition for sales executives and operations personnel. We may not be successful in attracting and retaining qualified personnel. We have from time to time experienced, and we may continue to experience, difficulty in hiring and retaining highly skilled employees with appropriate qualifications, and may not be able to fill positions in desired geographic areas or at all. In particular, competition for experienced software and cloud computing infrastructure engineers in the San Francisco Bay area, San Diego, Seattle, London and Amsterdam, our primary operating locations, is intense. Our employees, including our executive officers, are employed by us on an “at-will” basis, which means they may terminate their employment with us at any time. If we fail to attract new personnel or fail to retain and motivate our current personnel, our business and future growth prospects could be adversely affected.

Privacy laws and concerns, evolving regulation of cloud computing, cross-border data transfer restrictions, other foreign and domestic regulations and standards related to personal data and the Internet may adversely affect our business.

National and local governments or agencies have in the past adopted, and may in the future adopt, laws and regulations affecting data privacy, the use of the Internet as a commercial medium, and data sovereignty requirements concerning the location of data centers that store and process data. Changing laws, regulations and standards applying to the collection, transfer, processing, storage or use of personal data could affect our customers’ ability to use and share data, potentially restricting our ability to store, process and share data with our customers in connection with providing our services, and in some cases, could impact our ability to offer our services in certain locations or our customers’ ability to deploy our services globally. For example, the European Union (EU) and United States agreed to a framework to facilitate the transfer of data from the EU to the United States, called Privacy Shield, but this new framework has been challenged by private parties and may face additional challenges by national regulators or private parties. Additionally, in 2016 the EU adopted the GDPR, which took effect on May 25, 2018 and established new requirements applicable to the handling of personal data. Further, laws such as the EU’s proposed e-Privacy Regulation are increasingly aimed at the use of personal information for marketing purposes, and the tracking of individuals’ online activities. In addition, in June 2018 the California Consumer Privacy Act (CCPA) was signed into law, which takes effect in January 2020 and broadly defines personal information and provides California consumers increased privacy rights and protections.

The costs of compliance with, and other burdens imposed by, the GDPR, the e-Privacy Regulation, the CCPA and other privacy laws, regulations and standards may cause us to incur substantial operational costs or require us to modify our data handling practices, may limit the use and adoption of our services and reduce overall demand for our services. In addition, non-compliance could result in proceedings against us by governmental entities or others, significant fines, and may otherwise adversely impact our business, financial condition and operating results.

In addition to government activity, privacy advocacy groups and other technology and industry groups have established or may establish various new, additional or different self-regulatory standards that may place additional

burdens on us. Our customers may expect us to meet voluntary certifications or adhere to other standards established by third parties. If we are unable to maintain these certifications or meet these standards, it could reduce demand for our applications and adversely affect our business.

Because we generally recognize revenues from our subscription service over the subscription term, a decrease in new or renewed subscriptions during a reporting period may not be immediately reflected in our operating results for that period.

We generally recognize revenues from customers ratably over the terms of their subscriptions. As a result, most of the revenues we report in each period are derived from the recognition of deferred revenues relating to subscriptions entered into during previous periods. Consequently, a decrease in new or renewed subscriptions in any single reporting period will have a limited impact on our revenues for that period. In addition, our ability to adjust our cost structure in the event of a decrease in new or renewed subscriptions may be limited.

Table of Contents

Further, a decline in new or renewed subscriptions in a given period will negatively affect our revenues in future periods. Accordingly, the effect of significant downturns in sales and market acceptance of our services, and changes in our rate of renewals, may not be fully reflected in our results of operations until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenues through additional sales in any period, as revenues from new customers are generally recognized over the applicable subscription term. Additionally, due to the complexity of certain of our customer contracts, the actual revenue recognition treatment required under Topic 606 will depend on contract-specific terms and may result in greater variability in revenues from period to period.

In addition, a decrease in new or renewed subscriptions in a reporting period may not have an immediate impact on billings for that period due to factors that may offset the decrease, such as an increase in billings duration, the dollar value of contracts with future start dates, or the dollar value of collections in the current period related to contracts with future start dates.

As we acquire or invest in companies and technologies, we may not realize the expected business or financial benefits and the acquisitions and investments may divert our management's attention and result in additional dilution to our stockholders.

We have acquired or invested in companies and technologies in the past as part of our business strategy and may continue to evaluate potential strategic transactions, including acquisitions of, or investments in, businesses, technologies, services, products and other assets in the future. We also may enter into relationships with other businesses to expand our service offerings, functionality or our ability to provide services in international locations, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing or investments in other companies. Acquisitions and investments involve numerous risks, including:

- assimilating or integrating the businesses, technologies, products, personnel or operations of the acquired companies;
- failing to achieve the expected benefits of the acquisition or investment;
- potential loss of key employees of the acquired company;
- inability to maintain relationships with customers and partners of the acquired business;
- unanticipated expenses related to acquired technology and its integration into our existing technology;
- potential adverse tax consequences;
- inability to generate sufficient revenue to offset acquisition or investment costs;
- disruption to our business and diversion of management attention and other resources;
- potential financial and credit risks associated with acquired customers;
- dependence on acquired technologies or licenses for which alternatives may not be available to us without significant cost or complexity;
- in the case of foreign acquisitions, the challenges associated with integrating operations across different cultures and languages and any currency and regulatory risks associated with specific countries; and
- potential unknown liabilities associated with the acquired businesses.

In addition, we may have to pay cash, incur debt, or issue equity or equity-linked securities to pay for any future acquisitions, each of which could adversely affect our financial condition or the market price of our common stock. Furthermore, if we finance acquisitions by issuing equity or convertible or other debt securities or loans, our existing stockholders may be diluted, or we could face constraints related to the terms of and repayment obligation related to the incurrence of indebtedness that could affect the market price of our common stock. The occurrence of any of these risks could harm our business, operating results and financial condition.

Table of Contents

A portion of our revenues are generated by sales to government entities and heavily regulated organizations, which are subject to a number of challenges and risks.

A portion of our sales are to governmental agencies. Additionally, many of our current and prospective customers, such as those in the financial services and health care industries, are highly regulated and may be required to comply with more stringent regulations in connection with subscribing to and implementing our services. Selling to these entities can be highly competitive, expensive and time consuming, often requiring significant upfront time and expense without any assurance that we will successfully complete a sale. Furthermore, engaging in sales activities to foreign governments introduces additional compliance risks specific to the Foreign Corrupt Practices Act, the UK Bribery Act and other similar statutory requirements prohibiting bribery and corruption in the jurisdictions in which we operate. Government and highly regulated entities often require contract terms that differ from our standard arrangements and impose compliance requirements that are complicated, require preferential pricing or “most favored nation” terms and conditions, or are otherwise time consuming and expensive to satisfy. If we undertake to meet special standards or requirements and do not meet them, we could be subject to increased liability from our customers or regulators. Even if we do meet them, the additional costs associated with providing our services to government and highly regulated customers could harm our margins. Moreover, changes in the underlying regulatory conditions that affect these types of customers could harm our ability to efficiently provide our services to them and to grow or maintain our customer base.

Our use of open source software could harm our ability to sell our services and subject us to possible litigation.

Our products incorporate software licensed to us by third-party authors under open source licenses, and we expect to continue to incorporate open source software into other services in the future. We attempt to monitor our use of open source software in an effort to avoid subjecting our services to adverse licensing conditions. However, there can be no assurance that our efforts have been or will be successful. There is little or no legal precedent governing the interpretation of the terms of open source licenses, and therefore the potential impact of these terms on our business is uncertain and enforcement of these terms may result in unanticipated obligations regarding our services and technologies. For example, depending on which open source license governs open source software included within our services or technologies, we may be subjected to conditions requiring us to offer our services to users at no cost; make available the source code for modifications and derivative works based upon, incorporating or using the open source software; and license such modifications or derivative works under the terms of the particular open source license. Moreover, if an author or other third party that distributes such open source software were to allege that we had not complied with the conditions of one or more of these licenses, we could be required to incur significant legal costs defending ourselves against such allegations, be subject to significant damages or be enjoined from the distribution of our services.

If we are unable to maintain effective internal control over financial reporting, the accuracy and timeliness of our financial reporting may be adversely affected.

The Sarbanes-Oxley Act requires us, among other things, to assess and report on the effectiveness of our internal control over financial reporting annually and disclosure controls and procedures quarterly. In addition, our independent registered public accounting firm is required to audit the effectiveness of our internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act annually. Our independent registered public accounting firm may issue a report that is adverse in the event it is not satisfied with the level at which our controls are documented, designed or operating. Moreover, our testing, or the subsequent testing by our independent registered public accounting firm, may reveal material weaknesses. If material weaknesses are identified or we are not able to comply with the requirements of Section 404 in a timely manner, our reported financial results could be materially misstated or could subsequently require restatement, we could receive an adverse opinion regarding our internal control over financial reporting from our independent registered public accounting firm, we could be subject to

investigations or sanctions by regulatory authorities and we could incur substantial expenses. New accounting principles, such as the new revenue recognition standards that became effective for us beginning January 1, 2018, require significant changes to our existing processes and controls. We may not be able to effectively implement system and process changes required for new standards on a timely basis. Any delays or failure to update our systems and processes could also lead to a material weakness.

Table of Contents***Global economic conditions may harm our industry, business and results of operations.***

We operate globally and as a result our business and revenues are impacted by global macroeconomic conditions. Global financial developments seemingly unrelated to us or the software industry may harm us. From time to time, the United States and other key international economies have been impacted by geopolitical instability, high levels of bad debt globally, falling demand for a variety of goods and services, high levels of persistent unemployment and wage and income stagnation in some geographic markets, restricted credit, poor liquidity, reduced corporate profitability, volatility in credit, equity and foreign exchange markets, bankruptcies, international trade agreements, trade restrictions and overall uncertainty with respect to the economy. These conditions can arise suddenly and affect the rate of information technology spending and could adversely affect our customers' ability or willingness to purchase our services, delay prospective customers' purchasing decisions, reduce the value or duration of their subscriptions, or affect renewal rates, all of which could harm our operating results. In addition, the effects, if any, of global financial conditions on our business can be difficult to distinguish from the effects on our business from product, pricing, and other developments in the markets specific to our products and our relative competitive strength. If we make incorrect judgments about our business for this reason our business and results of operations could be adversely affected.

Natural disasters and other events beyond our control could harm our business.

Natural disasters or other catastrophic events may cause damage or disruption to our operations, international commerce and the global economy, and thus could have a negative effect on us. Our business operations are subject to interruption by natural disasters, flooding, fire, power shortages, pandemics, terrorism, political unrest, telecommunications failure, vandalism, cyber-attacks, geopolitical instability, war, the effects of climate change (such as drought, wildfires, increased storm severity and sea level rise) and other events beyond our control. Although we maintain crisis management and disaster response plans, such events could make it difficult or impossible for us to deliver our services to our customers, could decrease demand for our services, and could cause us to incur substantial expense. Our insurance may not be sufficient to cover losses or additional expense that we may sustain in connection with any natural disaster. The majority of our research and development activities, corporate offices, information technology systems, and other critical business operations are located near major seismic faults in California and Washington. Customer data could be lost, significant recovery time could be required to resume operations and our financial condition and operating results could be adversely affected in the event of a major natural disaster or catastrophic event.

Risks Related to Our 0% Convertible Senior Notes Due 2022 (2022 Notes) and Our 0% Convertible Senior Notes Due 2018 (2018 Notes)

We may not have the ability to raise the funds necessary to settle conversions of the convertible senior notes in cash or to repurchase the convertible senior notes upon a fundamental change, and our future debt may contain limitations on our ability to pay cash upon conversion or repurchase of the convertible senior notes.

Holders of the 2022 Notes and 2018 Notes have the right to require us to repurchase all or a portion of their 2022 Notes and 2018 Notes upon the occurrence of a fundamental change (as defined in the indenture for each of the 2022 Notes and 2018 Notes, as applicable) at a repurchase price equal to 100% of the principal amount of the 2022 Notes and 2018 Notes to be repurchased, plus accrued and unpaid special interest, if any. In addition, if a make-whole fundamental change (as defined in the indenture for each of the 2022 Notes and 2018 Notes, as applicable) occurs prior to the maturity date of the 2022 Notes or 2018 Notes, we will in some cases be required to increase the conversion rate for a holder that elects to convert its 2022 Notes or 2018 Notes in connection with such make-whole fundamental change. Upon conversion of the 2022 Notes or 2018 Notes, unless we elect to deliver solely shares of our common stock to settle such conversion (other than paying cash in lieu of delivering any fractional share), we will be

required to make cash payments in respect of the 2022 Notes or 2018 Notes being converted. However, we may not have enough available cash or be able to obtain financing at the time we are required to make repurchases of the 2022 Notes or 2018 Notes surrendered therefor or pay cash with respect to the 2022 Notes or 2018 Notes being converted.

We and our subsidiaries may incur substantial additional debt in the future, subject to the restrictions contained in our future debt instruments, some of which may be secured debt. We are not restricted under the terms of the indentures governing each of the 2022 Notes and 2018 Notes from incurring additional debt, securing existing or future debt, recapitalizing our debt or taking a number of other actions that could have the effect of diminishing our ability to make payments on the 2022 Notes and 2018 Notes when due. Furthermore, the indentures for each of the 2022 Notes and 2018 Notes prohibit us from engaging in certain mergers or acquisitions unless, among other things, the surviving entity assumes our obligations under the 2022 Notes and 2018 Notes and their respective indentures. These and other provisions in each of the indentures could deter or prevent a third party from acquiring us even when the acquisition may be favorable to holders of the 2022 Notes and 2018 Notes.

Table of Contents

In addition, our ability to repurchase or to pay cash upon conversion of the 2022 Notes or 2018 Notes may be limited by law, regulatory authority or agreements governing our future indebtedness. Our failure to repurchase 2022 Notes or 2018 Notes at a time when the repurchase is required by each indenture or to pay cash upon conversion of the 2022 Notes or 2018 Notes as required by each indenture would constitute a default. A default under each indenture or the fundamental change itself could also lead to a default under agreements governing our future indebtedness. Moreover, the occurrence of a fundamental change under each indenture could constitute an event of default under any such agreements. If the payment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the 2022 Notes or 2018 Notes, or to pay cash upon conversion of the 2022 Notes or 2018 Notes.

The conditional conversion feature of the 2022 Notes and 2018 Notes may adversely affect our financial condition and operating results.

Prior to the business day immediately preceding February 1, 2022 and July 1, 2018, for the 2022 Notes and 2018 Notes, respectively, the holders of the 2022 Notes and 2018 Notes may elect to convert their notes during any calendar quarter (and only during such calendar quarter) if the last reported sale price of our common stock for at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to \$175.18, in the case of the 2022 Notes, or \$96.04, in the case of the 2018 Notes (in each case, the Conversion Condition). The Conversion Condition was met for the 2018 Notes during the three months ended June 30, 2017, September 30, 2017, December 31, 2017, and March 31, 2018, respectively. Accordingly, the 2018 Notes were convertible at the holders' option during each of the three months ended September 30, 2017, December 31, 2017, March 31, 2018, and June 30, 2018. During the six months ended June 30, 2018, we paid cash to settle \$358.7 million principal amount of the 2018 Notes. Based on additional conversion requests we received through June 30, 2018, we expect to settle in cash an aggregate of \$54.4 million in principal amount of the 2018 Notes during the third quarter of 2018. Conversion requests for the 2018 Notes received subsequent to June 30, 2018 for the remaining principal amount of \$161.8 million will be settled on the maturity date, which is November 1, 2018.

The Conversion Condition was met for the 2022 Notes during the three months ended June 30, 2018. Accordingly, the 2022 Notes will be convertible at the holders' option through the three months ending September 30, 2018. If one or more holders elect to convert their 2022 Notes in future periods, unless we elect to satisfy our conversion obligation by delivering solely shares of our common stock (other than paying cash in lieu of delivering any fractional share), we may settle all or a portion of our conversion obligation in cash, which could adversely affect our liquidity and result in a material adverse effect on our financial position, results of operations and cash flows. In addition, to the extent we receive conversion requests, we may also record a loss on early conversions of the 2022 Notes converted by noteholders based on the difference between the fair market value allocated to the liability component on the settlement date and the net carrying amount of the liability component and unamortized debt issuance on the settlement date.

The convertible note hedge and warrant transactions may affect the value of the 2022 Notes and 2018 Notes and our common stock.

In connection with the sale of the 2022 Notes and 2018 Notes, we entered into convertible note hedge (the 2022 Note Hedge and 2018 Note Hedge, respectively) transactions with certain financial institutions (option counterparties). We also entered into warrant transactions with the option counterparties pursuant to which we sold warrants for the purchase of our common stock (the 2022 Warrants and 2018 Warrants, respectively). The 2022 Note Hedge and 2018 Note Hedge transactions are expected generally to reduce the potential dilution upon any conversion of the 2022 Notes or 2018 Notes and/or offset any cash payments we are required to make in excess of the principal amount of converted 2022 Notes or 2018 Notes, as the case may be. The warrant transactions could separately have a dilutive

effect to the extent that the market price per share of our common stock exceeds the exercise price of the 2022 Warrants or 2018 Warrants, which is \$203.40 and \$107.46, respectively. Based on the stock price as of June 30, 2018, we expect to issue additional shares in the first half of 2019 upon the exercise of the 2018 Warrants. As the warrants will be net share settled, the number of shares we will issue depends on the stock price over a 60 trading day period beginning on the first expiration date of the 2018 Warrants, which is February 1, 2019. Based on the stock price as of June 30, 2018, the number of shares to be issued upon exercise of the 2018 Warrants would be approximately 2.9 million.

Table of Contents

The option counterparties and/or their respective affiliates may modify their hedge positions by entering into or unwinding various derivatives with respect to our common stock and/or purchasing or selling our common stock in secondary market transactions prior to the maturity of the 2022 Notes or 2018 Notes (and are likely to do so during any observation period related to a conversion of 2022 Notes or 2018 Notes, or following any repurchase of 2022 Notes or 2018 Notes by us on any fundamental change repurchase date (as defined in the indentures for the 2022 Notes and 2018 Notes) or otherwise). This activity could also cause or avoid an increase or a decrease in the market price of our common stock or the 2022 Notes or 2018 Notes, which could affect note holders' ability to convert the 2022 Notes or 2018 Notes and, to the extent the activity occurs during any observation period related to a conversion of the 2022 Notes or 2018 Notes, it could affect the amount and value of the consideration that note holders will receive upon conversion of the 2022 Notes or 2018 Notes.

The potential effect, if any, of these transactions and activities on the market price of our common stock or the 2022 Notes or 2018 Notes will depend in part on market conditions and cannot be ascertained at this time. Any of these activities could adversely affect the value of our common stock and the value of the 2022 Notes and 2018 Notes (and as a result, the value of the consideration, the amount of cash and/or the number of shares, if any, that note holders would receive upon the conversion of any 2022 Notes or 2018 Notes) and, under certain circumstances, the ability of the note holders to convert the 2022 Notes or 2018 Notes.

We do not make any representation or prediction as to the direction or magnitude of any potential effect that the transactions described above may have on the price of the 2022 Notes or 2018 Notes or our common stock. In addition, we do not make any representation that the option counterparties will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

We are subject to counterparty risk with respect to the 2022 Note Hedge and 2018 Note Hedge transactions.

The option counterparties are financial institutions, and we will be subject to the risk that any or all of them may default under the 2022 Note Hedge or 2018 Note Hedge transactions. Our exposure to the credit risk of the option counterparties will not be secured by any collateral. Recent global economic conditions have resulted in the actual or perceived failure or financial difficulties of many financial institutions. If an option counterparty becomes subject to insolvency proceedings, we will become an unsecured creditor in those proceedings, with a claim equal to our exposure at that time under our transactions with that option counterparty. Our exposure will depend on many factors but, generally, an increase in our exposure will be correlated to an increase in the market price and in the volatility of our common stock. In addition, upon a default by an option counterparty, we may suffer adverse tax consequences and more dilution than we currently anticipate with respect to our common stock. We can provide no assurances as to the financial stability or viability of the option counterparties.

Risks Related to Ownership of Our Common Stock

The market price of our common stock has historically been and is likely to continue to be volatile and could subject us to litigation.

The trading price of our common stock has been, and is likely to continue to be, volatile and could be subject to wide fluctuations in response to various factors, some of which are beyond our control. In addition, the trading prices of the securities of technology companies in general have been highly volatile, and the volatility in market price and trading volume of securities is often unrelated or disproportionate to the financial performance of the companies issuing the securities. Factors affecting the market price of our common stock, some of which are beyond our control, include:

- changes in the estimates of our operating results or changes in recommendations by securities analysts that elect to follow our common stock;

announcements of new products, services or technologies, new applications or enhancements to services, strategic alliances, acquisitions, or other significant events by us or by our competitors;

fluctuations in the valuation of companies perceived by investors to be comparable to us, such as high-growth or cloud companies;

changes to our management team;

trading activity by directors, executive officers and significant stockholders, or the perception in the market that the holders of a large number of shares intend to sell their shares;

the size of our market float;

Table of Contents

- the volume of trading in our common stock, including sales upon exercise of outstanding options or vesting of equity awards or sales and purchases of any common stock issued upon conversion of the 2022 Notes or 2018 Notes or in connection with the 2022 Note Hedge and 2022 Warrant transactions relating to the 2022 Notes, or 2018 Note Hedge and 2018 Warrant transactions relating to the 2018 Notes;
- the economy as a whole, market conditions in our industry, and the industries of our customers; and
- overall performance of the equity markets.

Following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Securities litigation could result in substantial costs and divert our management's attention and resources from our business. This could have a material adverse effect on our business, operating results, and financial condition.

We do not intend to pay dividends on our common stock, so any returns will be limited to changes in the value of our common stock.

We have never declared or paid any cash dividends on our common stock. We currently anticipate that we will retain future earnings for the development, operation and expansion of our business and do not anticipate declaring or paying any cash dividends for the foreseeable future. In addition, our ability to pay cash dividends on our common stock may be prohibited or limited by the terms of any future debt financing arrangement. Any return to stockholders will therefore be limited to the increase, if any, of our stock price.

Provisions in our charter documents, Delaware law, our 2022 Notes and our 2018 Notes might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the market price of our common stock.

Our restated certificate of incorporation and restated bylaws contain provisions that could depress the market price of our common stock by acting to discourage, delay or prevent a change in control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions among other things:

- establish a classified board of directors so that not all members of our board are elected at one time;
- permit the board of directors to establish the number of directors;
- provide that directors may only be removed "for cause" and only with the approval of 66 2/3% of our stockholders;
- require super-majority voting to amend some provisions in our restated certificate of incorporation and restated bylaws;
- authorize the issuance of "blank check" preferred stock that our board could use to implement a stockholder rights plan;
- eliminate the ability of our stockholders to call special meetings of stockholders;
- prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- provide that the board of directors is expressly authorized to make, alter or repeal our restated bylaws; and
- establish advance notice requirements for nominations for election to our board or for proposing matters that can be acted upon by stockholders at annual stockholder meetings (though our restated bylaws have implemented stockholder proxy access).

In addition, Section 203 of the Delaware General Corporation Law may discourage, delay or prevent a change in control of our company. Section 203 imposes certain restrictions on merger, business combinations and other transactions between us and holders of 15% or more of our common stock.

Further, the fundamental change provisions of our 2022 Notes or 2018 Notes may delay or prevent a change in control of our company, because those provisions allow note holders to require us to repurchase such notes upon the

occurrence of a fundamental change.
