Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

If your notes are not called prior to maturity, your investment may result in a loss; there is no guaranteed return of principal.

Payments on the notes are subject to the credit risk of BAC, and actual or perceived changes in the creditworthiness of BAC are expected to affect the value of the notes. If BAC becomes insolvent or is unable to pay its obligations, you may lose your entire investment.

The initial estimated value of the notes on the pricing date will be less than their public offering price.

If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.

If called, your return on the notes is limited to the Call Premium.

You will have no rights of a holder of the securities represented by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.

Edgar Filing: BANK OF AMERICA CORP /DE/ - Form FWP

The securities included in the Market Measure are concentrated in a single sector; the Market Measure is heavily concentrated in a small number of index components.

Additional conflicts of interest may exist because of MLPF&S and its affiliates' roles in the Market Measure. Final terms will be set on the pricing date within the given range for the specified Market Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
