Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

If your notes are not called prior to maturity, your investment may result in a loss; there is no guaranteed return of principal.

Payments on the notes are subject to the credit risk of BofA Finance and the credit risk of BAC, and actual or perceived changes in the creditworthiness of BofA Finance or BAC are expected to affect the value of the notes. If BofA Finance and BAC become insolvent or are unable to pay their respective obligations, you may lose your entire investment.

The initial estimated value of the notes on the pricing date will be less than their public offering price.

If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.

If called, your return on the notes is limited to the Call Premium.
