- a These securities are prerefunded; the date shown represents the prerefunded date. Bonds which are prerefunded are collateralized by U.S. Government securities which are held in escrow and are used to pay principal and interest on the municipal issue and to retire the bonds in full at the earliest refunding date.
- b Security exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2008, this security amounted to \$2,101,800 or .5% of net assets applicable to Common Shareholders.
- c Security issued with a zero coupon. Income is recognized through the accretion of discount.
- d Inverse floater security--the interest rate is subject to change periodically.
- e Variable rate demand note rate shown is the interest rate in effect at December 31, 2008. Maturity date represents the next demand date, or the ultimate maturity date if earlier.

At December 31, 2008, the aggregate cost of investment securities for income tax purposes was \$787,870,245. Net unrealized depreciation on investments was \$109,103,842 of which \$20,206,438 related to appreciated investment securities and \$129,310,280 related to depreciated investment securities.

Securities valuation policies and other investment related disclosures are hereby incorporated by reference to the annual and semi-annual reports previously filed with the Securities and Exchange Commission on Form N-CSR.

Various inputs are used in determining the value of the fund's investments relating to Financial Accounting Standard No. 157 (FAS 157), Fair Value Measurements.

These inputs are summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical securities.
- **Level 2** other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of December 31, 2008 in valuing the fund's investments carried at fair value:
