**FOR IMMEDIATE RELEASE: January 29, 2004**

**No. 1/04**

**IAMGOLD MEETS 2003 PRODUCTION TARGETS**

## Edgar Filing: IAMGOLD CORP - Form 6-K

**Toronto, Ontario, January 29, 2004 - IAMGOLD Corporation ( IAMGOLD or the Company ) (TSX:IMG, AMEX:IAG)** announces 2003 gold production of 421,000 ounces at a weighted cash cost of \$225 per ounce (as defined by the Gold Institute ( GI )). Joe Conway, President & CEO of IAMGOLD stated: 2003 production and costs were generally in-line with revised guidance of 420,000 ounces of gold at a GI cash cost of approximately \$220 per ounce provided in the company's third quarter report. Production delays and shortfalls due to unusually heavy rainfall in West Africa during the third and fourth quarters of 2003 impacted the operating performance of the mines, particularly the Yatela mine in Mali. However, IAMGOLD's annual production for 2003 declined only 2% from guidance of 430,000 ounces of gold provided in the company's 2003 second quarter report. Production inefficiencies and shortfalls due to the heavy rainfall in West Africa and increasing fuel costs as the year advanced resulted in higher cash operating costs at the mines. IAMGOLD's weighted average GI cash costs increased 5% from \$215 per ounce compared to guidance provided in the company's 2003 second quarter report. Production for 2004 is expected to total 440,000 ounces of gold at weighted average GI cash costs of approximately \$220 per ounce.

### **IAMGOLD Attributable Production and Costs**

The table below presents IAMGOLD's attributable share of production and GI cash costs for each of the four quarters of 2003 at the four operating gold mines in West Africa in which it has interests along with total production and the weighted average GI cost of production for 2003.
