This information contains forward-looking statements which are subject to change based on various important factors, including without limitation, competitive actions in the marketplace and adverse actions of governmental and other third-party payors. Actual results could differ materially from those suggested by these forward-looking statements. Further information on potential factors that could affect the Company's financial results is included in the Company's Form 10-K for the year ended December 31, 2001 and subsequent filings.

How Laboratory Testing Works

Laboratory Testing is the "Gateway to Quality Health Care":

- 1) Patient visits doctor;
- 2) Doctor orders laboratory tests with diagnosis information;
- 3) Doctor or patient service center (PSC) draws sample;
- 4) Laboratory performs tests;
- 5) Test results reported to doctor;
- 6) Doctor makes diagnosis and treatment begins

The Clinical Laboratory Testing Market
US market is approximately \$34-36 billion
