FOR IMMEDIATE RELEASE

MEXICAN CARRIER CHOOSES SIEMENS-ALVARION FOR WIRELESS  
BROADBAND NETWORK TARGETING BUSINESS USERS  
-----

Tel Aviv, Israel, December 6, 2004 - Alvarion Ltd., (NASDAQ: ALVR), the world's leading provider of wireless broadband solutions today announced that an alternative carrier is deploying a new network in the 10.5Ghz band using the field-proven Alvarion WALKair(TM) 1000 solution. Siemens Mexico will install the network in a multi-phase effort and provide ongoing local support. With the first and second stages of the project underway, Alvarion has received equipment orders totaling approximately \$1.7 million to date.

By deploying the WALKair 1000 in the 10.5GHz frequency bands, the carrier is able to launch a range of new services targeting corporate and SME customers and take advantage of the system's cost-effective backhauling capabilities.

"Once again, the Siemens-Alvarion partnership is proving to be a winning combination," said xxx, xxx of Siemens Mexico. "Together, with proven products and the world's most extensive wireless broadband deployment experience, we deliver smooth network installation and rapid deployment of high-quality, cost-effective services."

## Edgar Filing: ALVARION LTD - Form 6-K

The WALKair 1000 is a high-capacity, multi-service platform for point-to-multi-point solutions. In a single platform, the WALKair combines all communication and information technologies, including IP, Ethernet, Frame Relay, Leased Line, multi-POTS and ISDN.

"This deployment with this well-positioned carrier is indicative of the significant success we continue to have with operators throughout Latin America as they increasingly realize that wireless broadband is the best and most cost-effective method to deliver broadband services to end users," added Zvi Slonimsky, CEO of Alvarion. "In addition, this is yet another example of the strength of our seven-year strategic partnership with Siemens and we see as a vital contribution to our leadership of the BWA marketplace."

### About Siemens ICN and Siemens Mexico

Siemens Information and Communication Networks (ICN) is a leading global provider of communication solutions for enterprises and carriers. Its portfolio ranges from real-time IP-based applications, IP convergence solutions and broadband access systems to optical transport networks. ICN also provides consulting and services. With its innovative LifeWorks concept, ICN is developing a uniform platform that transcends the boundaries of corporate, fixed and mobile network, enabling providers to offer new services and enterprises to boost productivity. ICN posted sales of 7.1 billion euros in fiscal 2003 (year-end September 30) and employed 33,000 people.

In Mexico, Siemens began its activities more than 100 years ago. With headquarters in Mexico City, Siemens Mexico employs some 9,500 employees in 14 branches and a number of manufacturing centers. ### About Alvarion

With more than 2 million units deployed in 130 countries, Alvarion is the worldwide leader in wireless broadband providing systems to carriers, ISPs and private network operators. Leading the WiMAX revolution, Alvarion has the most extensive deployments and proven product portfolio in the industry covering the full range of frequency bands. Alvarion's products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, Hotspot coverage extension, community interconnection, and public safety communications. Alvarion works with several top OEM providers and over 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for over 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience deploying OFDM-based systems, the company's prominent work in the WiMAX Forum™ is focused on increasing widespread adoption of standards-based products in the wireless broadband market.
