#### Notes to the Portfolio of Investments

**Security valuation.** Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. In order to value the securities, the fund uses the following valuation techniques: Equity securities held by the fund are valued at the last sale price or official closing price on the exchange where the security was acquired or most likely will be sold. In the event there were no sales during

Edgar Filing: JOHN HANCOCK PREMIUM DIVIDEND FUND - Form N-Q

the day or closing prices are not available, the securities are valued using the last available bid price. Swaps are valued using evaluated prices obtained from an independent pricing vendor. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing vendor. Securities that trade only in the over-the-counter (OTC) market are valued using bid prices. Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of January 31, 2014, by major security category or type:

	<b>Total Market Value at 01/31/14</b>	<b>Level 1 Quoted Price</b>	<b>Level 2 Significant Observable Inputs</b>	<b>Level 3 Significant Unobservable Inputs</b>
<b>Preferred Securities</b>				
Consumer Staples	\$19,593,843	—	\$19,593,843	—
Financials	403,215,334	\$403,215,334	—	—
Industrials	3,056,400	3,056,400	—	—
Telecommunication Services	46,648,785	46,648,785	—	—
Utilities	261,999,037	201,056,041	60,942,996	—
<b>Common Stocks</b>				
Energy	43,761,760	43,761,760	—	—
Telecommunication Services	28,233,800	28,233,800	—	—
Utilities	254,565,326	254,565,326	—	—
<b>Total Investments in Securities</b>	<b>\$1,061,074,285</b>	<b>\$980,537,446</b>	<b>\$80,536,839</b>	—
<b>Other Financial Instruments:</b>				
Interest Rate Swaps	(\$1,910,080)	—	(\$1,910,080)	—

**Derivative Instruments.** The fund may invest in derivatives in order to meet its investment objectives. Derivatives include a variety of different instruments that may be traded in the over-the-counter market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or

otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

**Interest rate swaps.** Interest rate swaps represent an agreement between the fund and a counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps).

5

---

## Premium Dividend Fund

### As of 1-31-14 (Unaudited)

Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

During the period ended January 31, 2014, the fund used interest rate swaps in anticipation of rising interest rates. The following table summarizes the interest rate swap contracts held as of January 31, 2014.

Counterparty	USD Notional Amount	Payments Made by Fund	Payments Received by Fund	Maturity Date	Market Value
Morgan Stanley Capital Services	\$82,000,000	Fixed 1.4625%	3-Month LIBOR (a)	Aug 2016	(\$2,239,170)
Morgan Stanley Capital Services	82,000,000	Fixed 0.8750%	3-Month LIBOR (a)	Jul 2017	329,000
<b>Total</b>	<b>\$164,000,000</b>				<b>(\$1,910,000)</b>

(a) At 1-31-14, the 3-month LIBOR rate was 0.2366%

ITEM 2. CONTROLS AND PROCEDURES.

Edgar Filing: JOHN HANCOCK PREMIUM DIVIDEND FUND - Form N-Q

(a) Based upon their evaluation of the registrant's disclosure controls and procedures as conducted within 90 days of the filing date of this Form N-Q, the registrant's principal executive officer and principal accounting officer have concluded that those disclosure controls and procedures provide reasonable assurance that the material information required to be disclosed by the registrant on this report is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There were no changes in the registrant's internal control over financial reporting that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Separate certifications for the registrant's principal executive officer and principal accounting officer, as required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached.
